## **1. INTRODUCTION**

This report presents the findings of the Spring 2015 Labour Force Survey (LFS). This is the first Spring LFS to be administered since 2006<sup>1</sup>. From 2005, the LFS has been conducted on a yearly basis in October (except in 2004 and 2006 when it was conducted in April). Prior to that, the LFS was conducted twice a year in Spring (April) and Fall (October). Financial constraints were the basis for the reduction in the frequency of the Survey.

The LFS has been used to provide information on the characteristics of persons in the labour force. The concepts used in the survey are in accordance with the International Labour Organization (ILO) guidelines and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this report present the methodology (Section 2), the main findings with emphasis on the profile of the labour force, and those that are out of the labour force (Section 3) and other findings on expenses and housing characteristics (Section 4). Due to the break in the Spring LFS time series, data are not compared to any other LFS results.

This edition of the LFS Report introduces a new sub-population classification 'Permanent Resident with rights to work (PR WRW)' in addition to the traditional sub-classification 'Caymanian' and 'Non-Caymanian.' Persons included in the PR WRW are those persons who are Non-Caymanians with permanent residence with government contract work, and Non-Caymanians with permanent residence with rights to work. PR WRW also includes spouses who are married to Caymanians. 'Non-Caymanian' in all tables in this Report therefore refers to all Non-Caymanians other than PR WRW.

## **2. METHODOLOGY**

Planning and execution of the Spring 2015 Labour Force survey (LFS) was done by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

The ESO's Household Register, which is comprised of a listing of all household dwelling units countrywide, provided the sampling frame for the survey. An update to the register was conducted between February and March 2015, based on information obtained from the October 2014 LFS, which revealed the register to contain 25,409 households dwelling units. A sample of 1,391 household addresses was randomly selected for the Spring survey. (The total

---

<sup>1</sup> The Survey of Living Conditions administered in March to May 2007 also included a labour force survey component.

number of households during the survey period was eventually adjusted to 22,249 based on the post-survey results which showed that approximately 11 percent of these household addresses were confirmed to have no occupant households at the time of the survey).

### Sample design

The Cayman Islands was divided into six strata along the same geographical lines as the Districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands.

Probability proportionate to population size, as revealed in the 2010 Population and Housing Census was used when allocating the number of selected households across strata. Households were randomly selected from all of the 6 districts; within each district, the households were selected with equal probability, and the final sample represented approximately 6.3 percent of households within respective districts. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

$P_h$  = probability of selection for the sample households in the h-th stratum (district)

$M_h$  = total number of households in the sample frame for the h-th stratum

$m_h$  = the number of sample households selected in the h-th stratum

### Fieldwork

Staff from the ESO conducted six evenings of training in preparation for the fieldwork phase of the LFS. A total of 31 persons, majority of whom have prior household survey experience (census and/or LFS) received training on how to conduct the LFS using tablets; however, only 25 persons were selected to conduct interviews in Grand Cayman. In the Sister Islands (Cayman Brac and Little Cayman), four persons were trained for one day on how to conduct the LFS using paper questionnaires. All four persons were selected to conduct interviews. The trained interviewers comprised staff members of the ESO and temporary survey staff.

The reference week for the survey was the week ending April 25, 2015. The data collection took place over a five-week period starting April 26, 2015 and ending on June 2, 2015.

In the October 2014 LFS, the ESO introduced the use of tablets for electronic data collection on Grand Cayman. This was the first time LFS interviewers were conducted without using paper questionnaires. The Sister Islands however continued to administer the paper questionnaire due to the lack of an on-site trained IT supervisor. Attached in the Appendix (page 102) is a copy of the questionnaire that was uploaded to the tablet.

## Weights

The population level estimates were derived by first estimating the total mid-year population for 2015 using census and administrative data. The 2015 natural increase (births minus deaths) and immigration data (work permits and change of status) were added to the 2014 population estimate. Census data were used to estimate the change in the sub-population by age (working age and below working age). The 2015 births and deaths data from the Health Services Authority for the period January 1 – June 30 2015 were used to calculate the mid-year population. The 2014 Caymanian/Non-Caymanian ratio of births and deaths was applied to total births and deaths due to the absence of disaggregated data for the six-month period. The basic sampling weight, or expansion factor, was then calculated based on the estimated population and the sample population adjusted for non-responses at the household level.

**Table 1: Response Rate by District, Spring 2015**

District	Sample Size <sup>1</sup>	In Scope Households <sup>2</sup>	Fully and Partially Completed	Response Rate
<b>Total</b>	<b>1,391</b>	<b>1,097</b>	<b>1,060</b>	<b>96.6</b>
George Town	760	605	586	96.9
West Bay	277	204	198	97.1
Bodden Town	223	191	184	96.3
North Side	32	27	27	100.0
East End	31	24	19	79.2
Sister Islands	68	46	46	100.0

1 Of the original 1,391 sample household addresses only 1,097 were deemed to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

## Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPRJ) software on tablet, which was first implemented in October 2014. Coding of industries and occupation were also conducted internally using the Industrial Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. A data file was then created with information from all households who completed the LFS interview (fully and partially). Indicators were generated from this file using SPSS.

**Standard errors for main estimates**

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

The estimates presented in this report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*) the more reliable is the estimate. Because of this, comparisons of the larger estimates may be used with confidence but small estimates must be treated with caution. Consequently, estimates of 25 or lower (but not zero) have been suppressed as indicated by "..." or regrouped as they are considered to be unreliable or not useful.

*Standard Errors, Confidence Intervals and Coefficients of Variation (C.V.)* of the estimates for key variables for the Spring 2015 LFS are shown in the Tables 2 and 3.

**Table 2: Standard Errors of Key Labour Force Indicators by Status**

Selected Characteristics	Estimate	Standard Errors	Interval		C.V
			Lower	Upper	
<b>Labour Force</b>	<b>40,149</b>	<b>1,578</b>	<b>37,041</b>	<b>43,257</b>	<b>0.04</b>

### 3. MAIN LABOUR FORCE FINDINGS

In Spring 2015, the population of the Cayman Islands was estimated at 59,054. There were 33,675 Caymanians, 4,542 Permanent Residents with Rights to Work (WRW) and 20,837 Non-Caymanians. The labour force was comprised of 40,149 persons, with 37,900 of them employed and 2,248 unemployed. The labour force participation rate was 82.9 percent while the unemployment rate was 5.6 percent. The unemployment rate and labour force participation rate varied by sex and status (Tables 4 and 5). Figure 1 illustrates the composition of the population and the labour force.

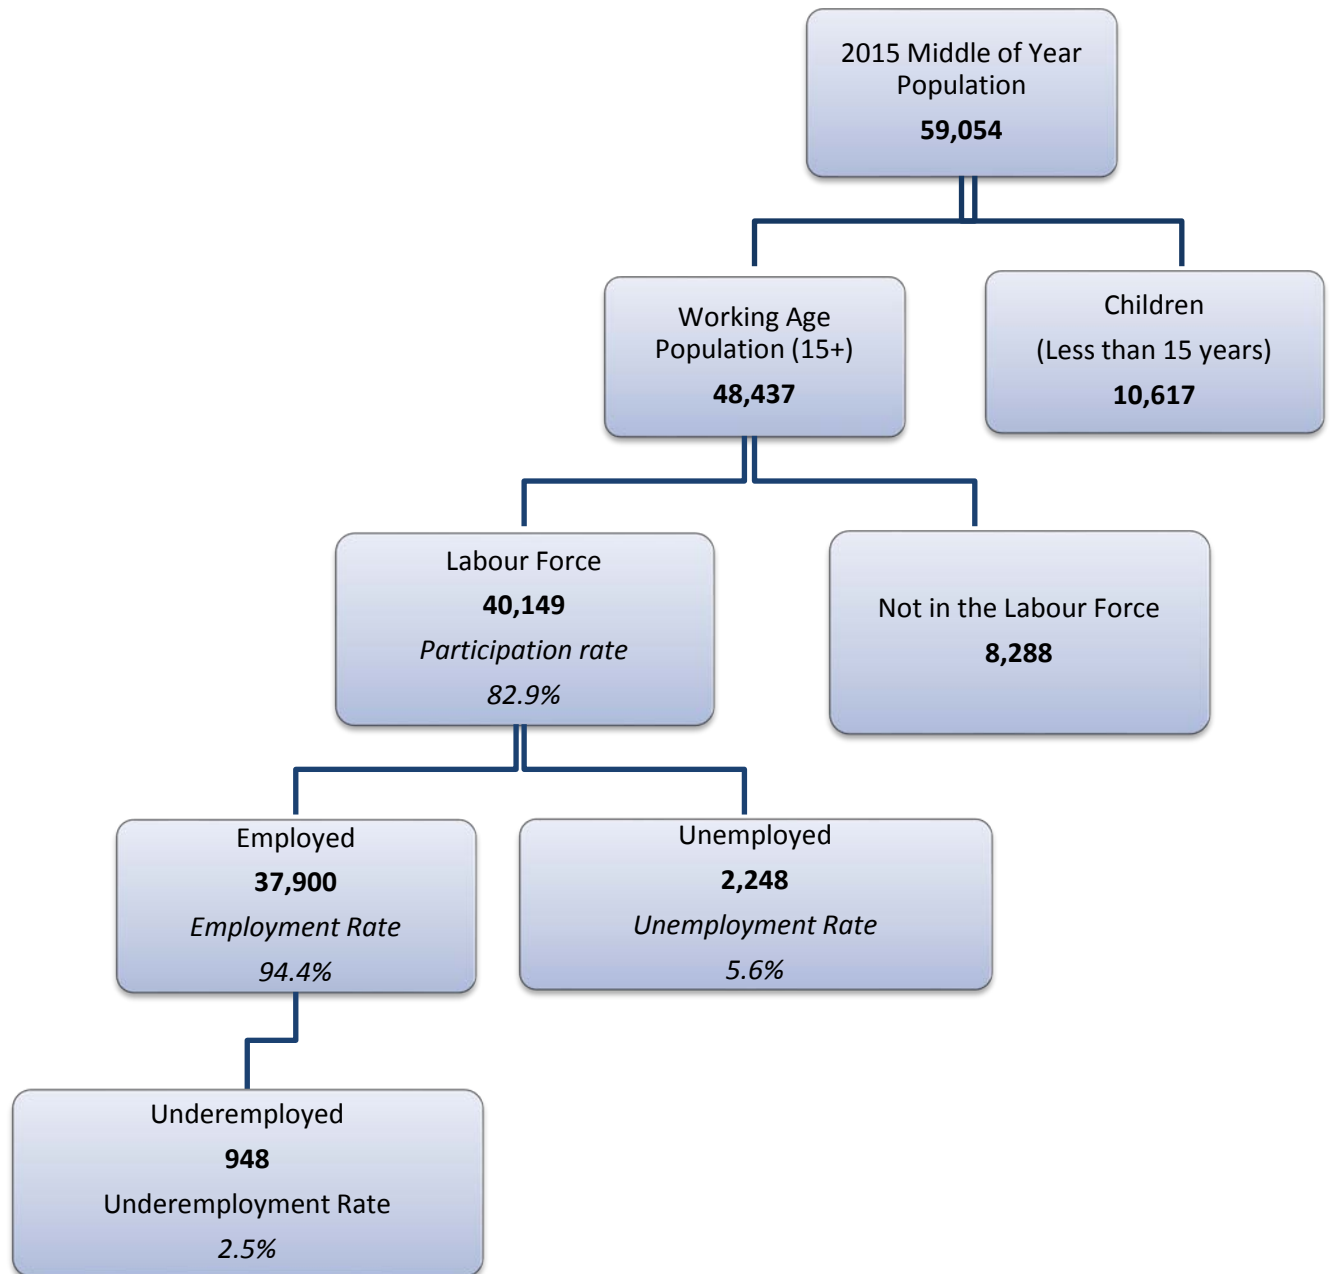

**Table 4: Main Labour Force Indicators by Status, Spring 2015**

Indicators	Total	Caymanian	PR WRW	Non-Caymanian
Population	59,054	33,675	4,542	20,837

Figure 1: Main Labour Force Composition, Spring 2015

### 3.1 POPULATION ESTIMATES

In Spring 2015, the estimated population stood at 59,054. The majority of Cayman's population lives in Grand Cayman, particularly in George Town which accounted for 52.4 percent. Bodden Town had 20.5 percent of the population while West Bay had 19.0 percent. The Sister Islands' (Cayman Brac and Little Cayman) combined population accounted for 3.1 percent (Table 6).

The average household size was 2.7 persons per household and varied by district. Bodden Town had the highest with 3.1 persons, followed by North Side with 3.0 persons. The Sister Islands had the lowest household size with 2.3 persons.

**Table 6: Middle-of-Year Population Estimates by District, Spring 2015**

District	Total Population		Average Household Size	Total Households	
	#	%		#	%
<b>Total</b>	<b>59,054</b>	<b>100</b>	<b>2.7</b>	<b>22,249</b>	<b>100</b>
George Town	30,968	52.4	2.6	12,038	54.0
West Bay	11,247	19.0	2.5	4,465	19.9
Bodden Town	12,092	20.5	3.1	3,935	17.7
North Side	1,639	2.8	3.0	555	2.5
East End	1,258	2.1	2.9	438	2.2
Sister Islands	1,850	3.1	2.3	818	3.7

#### *Sex and Age*

The estimated population according to sex distribution in Spring 2015 comprised 51.4 percent females and 48.6 percent males (Table 7).

Children younger than 15 years old accounted for 18.0 percent of the population while the elderly (65 years or older) represented 7.7 percent (Appendix Table 1.4). These two groups together are referred to as the 'dependent population' and accounted for 25.7 percent.

The working age population which is the age group comprising persons who are 15 years and older accounted for 82.0 percent of the population. Persons in this age group are usually working or looking for work and are said to be in their 'productive years'. It is this group that children and elderly depend on. Therefore, the distribution of the population by age indicates a

dependency ratio of one to three, i.e., for every dependent person there are three persons in the working age population.

**Table 7: Middle-of-Year Population Estimate by Selected Characteristics and Age Group, Spring 2015**

Selected Characteristics	Population		Sex				Status					
			Male		Female		Caymanian		PR WRW		Non-Caymanian	
	#	%	#	%	#	%	#	%	#	%	#	%
<b>Total</b>	<b>59,054</b>	<b>100</b>	<b>28,682</b>	<b>48.6</b>	<b>30,372</b>	<b>51.4</b>	<b>33,675</b>	<b>57.0</b>	<b>4,542</b>	<b>7.7</b>	<b>20,837</b>	<b>35.3</b>
<b>Age Group</b>												
0 - 14	10,617	100	5,225	49.2	5,391	50.8	7,982	75.2	-	-	2,635	24.8

45 - 54	10,185	100	5,202	51.1	4,982	48.9	5,232	51.4	1,276	12.5	3,677	36.1
55 - 64	5,815	100	2,757	47.4	3,059	52.6	3,733	64.2	517	8.9	1,565	26.9
65+	4,573	100	2,087	45.7	2,485	54.3	3,951	86.4	214	4.7	408	8.9

### *Status*

The proportion of Caymanians (57.0%) in the population is higher than both Non-Caymanians (35.3%) and Permanent Residents WRW (7.7%) (Table 7). Among Caymanians, 76.3 percent were in the working age population compared to 100 and 87.3 percent among Permanent Residents WRW and Non-Caymanians respectively (Appendix Table 1.5). This is expected since the local economy has a high proportion of expatriates that supply labour in various sectors of the economy.

### 3.2 LABOUR FORCE

The labour force is comprised of persons in the working-age population who worked, as well as those who at the time of the survey, did not have a job, but were available and looking for work during the reference period. In Spring 2015, there were 40,149 persons who were in the labour force (Table 8).

**Table 8: Labour Force by Selected Characteristics, Spring 2015**

Selected Characteristics	Labour Force	
	#	% Distribution
<b>Total</b>	<b>40,149</b>	<b>100</b>
<b>Sex</b>		
Male	19,995	49.8
Female	20,154	50.2
<b>Status</b>

PR WRW	4,227	10.9
Non-Caymanian	16,937	41.8
<b>Age Group*</b>		
15 - 24	2,921	7.3
25 - 34	9,312	23.2
35 - 44	11,993	29.9
45 - 54	9,567	23.8
55 - 64	4,734	11.8
65+	1,623	4.0

*\* Due to rounding, sub – totals may differ from the sum*

#### *Sex and age*

In Spring 2015, females accounted for 50.2 percent and males accounted for 49.8 percent of the labour force.

The age group 35 to 44 years accounted for 29.9 percent of the labour force in Spring 2015, followed by the 45-54 years (23.8%).

### *Status*

The labour force distribution by status in Spring 2015 indicated that 47.3 percent were Caymanians, 41.8 percent Non-Caymanians and 10.9 percent Permanent Residents WRW (Table 8).

### *Labour Force Participation Rate*

The overall labour force participation rate (LFPR)<sup>2</sup> was 82.9 percent (Table 9). Permanent Residents WRW overall had the highest labour force participation rate (93.1%) when compared to their Non-Caymanian (93.0%) and Caymanian counterparts (73.9%).

Labour force participation increased directly with educational attainment, as lower levels of education had lower participation rates in general. The rate ranged from 50.6 percent among those with primary and below qualifications to 94.4 percent among those with post-secondary education. The participation rate of females is lower than their male counterparts across all stated educational attainment categories.

---

<sup>2</sup> The number of persons in the labour force expressed as a percentage of the working age population.

### 3.3 EMPLOYED

The employed consists of those persons in the labour force who worked for pay, profit or family gain for at least one hour during the reference week, which was the week ending April 25, 2015. Persons who, for some reason or the other, did not work during the reference week, but had a job were also categorized as members of the employed labour force. Such persons were temporarily absent from work. In Spring 2015, the number of employed persons in the labour force was 37,900 (Table 10).

**Table 10: Employed Persons by Selected Characteristics, Spring 2015**

Selected Characteristics	Employed Persons	
	#	% Distribution
<b>Total</b>	<b>37,900</b>	<b>100</b>
<b>Sex*</b>

College / University	12,467	32.9
Not Stated	172	0.5

*\* Due to rounding, sub – totals may differ from the sum*

### *Sex and Age*

The number of males employed in the labour force was 18,998. This number is slightly higher than employed females, which numbered 18,903 (Table 10). Those in the 35 to 44 age group accounted for the biggest share of the employed (30.1%). Persons aged 15 to 24 years and the elderly (65+ years) represented 6.7 and 4.1 percent of the employed, respectively.

### *Status*

Employed Caymanians in Spring 2015 totalled 17,410 and accounted for 45.9 percent of the employed labour force. Employed Non-Caymanians and Permanent Residents WRW totalled 16,614 and 3,876. These two groups accounted for 54.1 percent of the employed labour force (Table 10).

### *Hours of Work*

The number of hours worked by the respondent was captured using two approaches. The first approach is the *Usual Hours* worked and the second, *Actual Hours* worked. Usual Hours worked is defined as the typical number of hours worked during a normal workweek by the respondent at his/her job(s). Actual hours worked is defined as the exact number of hours worked during the reference period of April 19 – 25, 2015 by the respondent at his/her job(s). Usual and Actual Hours worked includes all hours spent on work activities and overtime hours, but excludes vacation leave, sick leave, public holidays and other forms of paid or unpaid leave.

The employed usually worked an average of 43.1 hours per week. Males on average, worked 1.7 hours longer per week than females while Permanent Residents WRW and Non-Caymanians worked 1.8 and 1.4 hours respectively longer than Caymanians (Appendix Tables 3.18 and 3.19). However, the employed actually worked an average of 42.5 hours based on the reference week. Males on average worked 1.9 hours longer per week than females while Non-Caymanians and Permanent Residents WRW worked 2.2 and 0.5 hours longer than Caymanians (Appendix Tables 3.20 and 3.21).

### *Employment Status*

The employed worked mainly as paid employees (90.7%), while 9.0 percent had their own business as self-employed with or without employees. Among employed males, 12.7 percent were self-employed, while among females 5.1 percent were self-employed. Caymanians

(15.7%) were more likely than Permanent Residents WRW (8.0%) and Non-Caymanians (2.0%) to have their own business (Tables 11 and 12).

**Table 11: Employed Persons by Employment Status and Sex, Spring 2015**

### Occupation

The top six occupations in Spring 2015 which comprised 86.3 percent of total employment were service and sales workers (21.7%); professionals (15.1%); elementary occupations (14.9%); technicians and associate professionals (13.3%); craft and related trades workers (11.8%); and managers (9.5%) (Figure 2). Analysis by sex and status indicates varying patterns. The largest share of employed males by occupation worked as craft and related trades workers (22.2%); service and sales workers (16.3%); professionals (14.3%); and elementary occupations (12.5%). The employed share pattern for females showed that females were employed as service and sales workers (27.1%); elementary occupations (17.4%); technicians and associate professionals (16.1%); and professionals (15.9%), (Appendix Table 3.12).

The largest share of employed Caymanians worked as technicians and associate professionals (17.7%); service and sales workers (17.3%); clerical support workers (13.4%); and managers (13.1%). Non-Caymanians were mainly employed as service and sales workers (26.9%); elementary occupations (21.7%); professionals (16.2%); and craft and related trade workers (12.0%). Permanent Residents WRW were mainly employed as professionals (21.8%); service and sales workers (19.0%); craft and related trade workers (16.1%); and, technicians and associate professionals (12.4%), (Appendix Table 3.13).

**Figure 2: Employment by Occupation (%), Spring 2015**

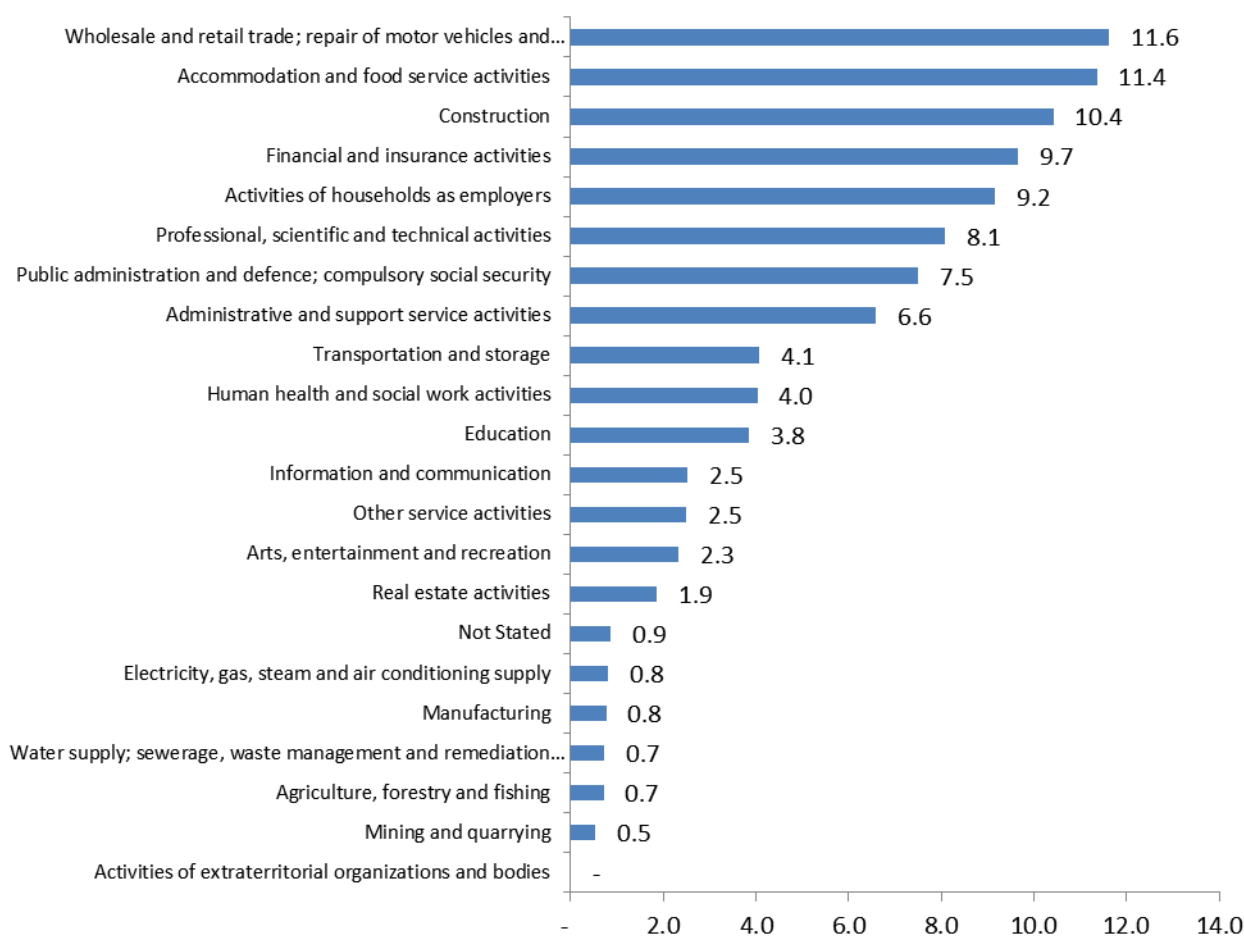

### *Industry*

The top seven industries accounted for 67.9 percent of the employed labour force, these were: wholesale and retail trade (11.6%); accommodation and food service activities (11.4%); construction (10.4%); financial services (9.7%); activities of households as employers (9.2%); professional, scientific, and technical activities (8.1%); and public administration and defence (7.5%) (Figure 3). Males were mainly engaged in construction (20.2%); wholesale and retail trade (12.2%); and accommodation and food services (11.9%) while females were mainly engaged in activities of households as employers (16.7%); financial services (12.0%); wholesale

and retail trade (11.0%); and accommodation and food services (10.8%), (Appendix Tables 3.14).

**Figure 3: Employment by Industry (%), Spring 2015**

The largest industry share of Caymanians were in financial services (14.5%); wholesale and retail trade (13.0%); and public administration activities (12.9%). Non-Caymanians were employed in the following industries: activities of households as employers (17.9%); accommodation and food service activities (15.5%); construction (10.9%); and administrative and support service activities (10.2%). Permanent Residents WRW were employed in the following industries: construction (15.3%); wholesale and retail trade (15.2%); financial and insurance activities (10.0%); and, professional, scientific and technical activities (8.9%); (Appendix Table 3.15).

### *Income*

Approximately 48.7 percent of employed persons earned CI \$2,400 or more per month (Tables 13 and 14). The proportion was slightly higher among employed males (50.5%) compared to employed females (46.9%) earning this same income range. Caymanians (58.2%) were more likely than Permanent Resident WRW (51.7%) and Non-Caymanians (38.1%) to have earned CI \$2,400.00 or more per month. In the highest income range, i.e. CI \$8,400.00 or more per month, there were more males (69.6%) than females (30.4%) and more Caymanians (43.0%) than Non-Caymanians (34.7%) and Permanent Resident WRW (22.3%).

**Table 13: Employed Persons by Monthly Income and Sex, Spring 2015**

### *Size of Business*

Employed persons were asked, 'How many persons are employed at ..... place of work?' This close ended question had five applicable responses, ranging from 1 - 5 to 50 or more. The results, which indicate the size of businesses where they work, revealed that most of the employed persons (10,713 or 28.3%) worked in businesses with 1 - 5 employees and 9,565 persons or 25.2 percent worked in businesses with 50 or more employees (Tables 15a and 15b).

Further analysis by industry shows that all employed persons who work in the activities of households as employers industry work with 1 - 5 employees (100%). Additionally, those who worked in construction (31.9%) and administrative and support services (35.2%) were also more likely to have worked in businesses with 1 - 5 employees.

In contrast, persons who worked in professional, scientific and technical activities (48.1%); accommodation (47.3%); human health and social work activities (45.9%); financial and

insurance activities (41.5%); and public administration (36.7%) industries were more likely to have worked in big companies with 50 or more persons.

### 3.3.1 UNDEREMPLOYMENT

‘Underemployment’ is defined as ‘Involuntary part-time’ work, where workers who could (and would like to) be working for a full work-week can find only part-time work. The underemployed accounted for 2.5 percent of the employed in Spring 2015 (Table 16). Underemployment was 2.7 percent for males and 2.3 percent for females. Caymanians had a higher rate of underemployment (3.4%) than Permanent Residents WRW (2.8%) and Non-Caymanians (1.5%). Persons age 65 and above have the highest underemployment rate (7.0%) and those who have only completed middle year education (8.0%) (Table 16).

### 3.4 UNEMPLOYED

Based on the ILO guidelines, a person of working age is deemed to be unemployed if he/she is without a job, but is currently available for work and has been seeking employment within the reference period. In Spring 2015 there were 2,248 unemployed persons, and the unemployment rate was 5.6 percent (Table 17 and 18). The unemployed were mainly persons who were 35 years and older (62.4%), females (55.7%), or Caymanians (70.1%).

**Table 17: Unemployed Persons by Selected Characteristics, Spring 2015**

\* Due to rounding, sub – totals may differ from the sum

$$** \text{ Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

*Sex, age and status*

The unemployment rate for persons between 15 and 24 years (13.4%) remained the highest compared to other subgroups of the unemployed. Females experienced a higher unemployment (6.2%) than Males (5.0%). The unemployment rate among Caymanians and Permanent Residence WRW was 8.3 percent, which is higher than Non-Caymanians (1.9%) (Table 18).

*Educational attainment and other information*

Approximately one in every three (30.0%) unemployed persons had post-secondary or higher level education. Among unemployed Caymanians, 24.5 percent of them had post-secondary education or higher compared to 70.4 and 17.8 percent of unemployed Non-Caymanians and Permanent Residents WRW respectively, (Appendix Table 5.7).

The majority (79.3%) of the unemployed stated that they had worked before, and 48.8 percent have been without work for more than twelve (12) months, (Appendix Tables 5.14 and 5.16). Unemployed persons mainly worked previously as service and sales workers (23.4%); clerical support workers (21.1%); and craft and related trades workers (18.5%), (Appendix Table 5.18).

When asked about their main means of job search, which was a multiple response question, the unemployed persons' most popular responses were to ask friends (71.6%); contact an employer (60.6%); and send résumés (57.5%). Unemployed persons also registered with the National Workforce Development Agency (NWDA) (42.1%) and to a lesser extent checked websites (30.5%). Caymanians (48.8%) were more likely than the Permanent Residents WRW (39.1%) and Non-Caymanians (12.9%) to have registered with the NWDA (Appendix Table 5.12 and 5.13).

The top five preferred occupations that the unemployed were looking for were service and sales (31.1%); clerical support (17.4%); craft and related works (15.7%); technicians and associate professionals (9.9%); and elementary occupations (7.5%) (Appendix Table 5.9).

The top five preferred industries where the unemployed looked for work were construction (17.2%); wholesale and retail trade (17.1%); accommodation and food services (14.3%); financial and insurance activities (9.2%); and professional, scientific and technical activities (8.6%) (Appendix Table 5.10).

Among the unemployed, 64.9 percent relied mainly on parents or spouse/partners for financial support. A further 16.0 percent relied on their other relatives and friends, and 10.6 percent on savings and investment (Appendix Tables 5.22).

### 3.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work and did not seek work during the reference week were classified as being not in the labour force. A total of 8,288 persons were not in the labour force, the majority of whom were 65 years and older (35.6%) and between 15 – 24 years (31.2%), (Appendix 6.1). The main reason given by the elderly (65 years and older) for being out of the labour force was retired (83.6%) while persons between 15 – 24 years old was studies/in training (97.4%) (Table 20). An insignificant number of persons (less than 1%) were out of the labour force for reasons “did not want to work”; “no work available”; and “tired of looking”.

Persons not in the labour force consisted mainly of females (58.2%), elderly 65 years and older (35.6%) and the youth 15 – 24 years (31.2%) (Appendix Tables 6.2 and 6.3). The majority of persons not in the labour force had high school or lower level education (73.4%) (Appendix Tables 6.6).

**Figure 4: Percent Persons Not in the Labour Force by Main Reason for Not Looking for Work, Spring 2015**

Most males not in the labour force were in school/training (41.3%) or retired/elderly (40.8%). Females not in the labour force were also mostly in retired/elderly (38.3%), school/training (30.4%), or engaged in home/family duties (21.7%) (Table 20). The main means of financial support for persons not in the labour force were parents (30.8%), spouse/partner (18.9%) and pensions (17.6%) (Appendix Table 6.18 and 6.19).

## 4. OTHER FINDINGS

### 4.1 HOUSING CHARACTERISTICS

The majority of households (48.7%) rented their homes, while 46.9 percent owned their homes (Table 21).

**Table 21: Percent of Households by Selected Characteristics, Spring 2015**

<b>Total Households</b>	<b>22,249</b>
Owned Households	46.9
Rented Households	48.7
Households with Household Employees	20.8

Households with Cell Phones	97.5
Households with Internet Connectivity	67.6
Households with Computer	71.0
Households with Cable	67.1
Households with Air Condition	91.2
Households with Housing Insurance	42.7

Majority of the households had internet connectivity (67.6%), computer<sup>3</sup> (71.0%), cable/satellite television (67.1%), and air-condition (91.2%). About two in every three households (63.1%) had no land-line telephone, but almost all (97.5%) had at least one cell phone. Approximately, one in every four households (20.8%) had a household employee and less than half of the households (42.7%) reported having housing insurance.

In Spring 2015, the mean monthly rent reported for accommodation furnished or unfurnished was CI\$897.75 and the mean rental value for owner occupied dwelling was CI\$1,976.52 (Appendix Table 8.7).

<sup>3</sup> Computer includes desktops, laptops, tablets and e-readers.

## APPENDIX TABLES
