1. INTRODUCTION

This report presents the findings of the Fall 2015 Labour Force Survey (LFS). The Fall LFS is the second phase of the recently reinstituted biannual LFS. From 2005, the LFS was conducted on a yearly basis in October (except in 2004 and 2006 when it was conducted in April). Prior to that, the LFS was conducted twice a year in Spring (April) and Fall (October). Financial constraints were the basis for the reduction in the frequency of the Survey. The LFS recommenced its biannual schedule in April 2015.

The LFS provides information on the characteristics of persons in the labour force. The concepts used in the survey are in accordance with the International Labour Organization (ILO) guidelines and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this report present the methodology (Section 2), the main findings with emphasis on the profile of the labour force, and those that are out of the labour force (Section 3) and other findings on expenses and housing characteristics (Section 4).

2. METHODOLOGY

Planning and execution of the Fall 2015 Labour Force survey (LFS) was done by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

The ESO's Household Register, which is comprised of a listing of all household dwelling units countrywide, provided the sampling frame for the survey. An update to the register was conducted between August and September 2015 based on information obtained from the April 2015 LFS and partial field updates, which revised the register to 26,780 household dwelling units. A sample of 1,415 household addresses was randomly selected for the Fall survey. (The total number of households during the survey period was eventually adjusted to 23,682 based on post-survey results, which showed that approximately 11.6 percent of these household addresses were confirmed to have no occupant households at the time of the survey).

Sample design

The Cayman Islands was divided into six strata along the same geographical lines as the Districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands.

Probability proportionate to population size, as revealed in the 2010 Population and Housing Census was used when allocating the number of selected households across strata. Households were randomly selected from all of the 6 districts; within each district, the households were selected with equal probability, and the final sample represented approximately 6.3 percent of households within respective districts. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

P_h = probability of selection for the sample households in the h-th stratum (district)

M_h = total number of households in the sample frame for the h-th stratum

m_h = the number of sample households selected in the h-th stratum

Fieldwork

In the October 2014 LFS, the ESO introduced the use of tablets for electronic data collection on Grand Cayman. This was the first time LFS interviews were conducted without using paper questionnaires. The Sister Islands however continue to administer the paper questionnaire due to the lack of an on-site trained IT supervisor. Attached in the Appendix (page 102) is a copy of the questionnaire that was uploaded to the tablet.

The reference week for the LFS was the week September 27 – October 3, 2015. The data collection took place over a four-week period starting October 4, 2015 and ended on November 3, 2015.

Staff from the ESO conducted three evenings of training in preparation for the fieldwork phase of the survey. A total of 24 persons, all of whom have prior household survey experience (census and/or LFS), received training on how to conduct the LFS using tablets. All 24 persons were selected to conduct interviews in Grand Cayman. In the Sister Islands (Cayman Brac and Little Cayman), four persons were trained for one day on how to conduct the LFS using paper questionnaires. All four persons were selected to conduct interviews. The trained interviewers comprised staff members of the ESO and temporary survey staff.

Weights

The population level estimates were derived by first estimating the total population for 2015 using census and administrative data. The 2015 natural increase (births minus deaths) and immigration data (work permits and change of status) were added to the 2014 population estimate. Census data were used to estimate the change in the sub-population by age (working

age and below working age). The 2015 births and deaths data from the Health Services Authority for the period January 1 – December 31 2015 were used to calculate the population. The basic sampling weight, or expansion factor, was then calculated based on the estimated population and the sample population adjusted for non-responses at the household level.

Table 1: Response Rate by District, Fall 2015

District	Sample Size ¹	In Scope Households ²	Fully and Partially Completed	Response Rate
Total	1,415	1,249	1,082	86.6
George Town	762	669	574	85.8
West Bay	285	255	214	83.9
Bodden Town	228	207	185	89.4
North Side	30	28	27	96.4
East End	33	31	28	90.3
Sister Islands	77	59	54	91.5

1 Of the original 1,415 sample household addresses only 1,249 were deemed to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPj) software on tablet, which was first implemented in October 2014. Coding of industries and occupation were also conducted internally using the Industrial Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. A data file was then created with information from all households who completed the LFS interview (fully and partially). Finally, indicators were generated from this file using SPSS.

Standard errors for main estimates

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

The estimates presented in this report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*) the more reliable is the estimate. Because of this, comparisons of the larger estimates may be used with confidence but small estimates must be treated with caution. Consequently, estimates of 25 or lower (but not zero) have been suppressed as indicated by '...' or regrouped as they are considered to be unreliable or not useful.

Standard Errors, Confidence Intervals and Coefficients of Variation (C.V.) of the estimates for key variables for the Fall 2015 LFS are shown in the Tables 2 and 3.

Table 2: Standard Errors of Key Labour Force Indicators by Status

3. MAIN LABOUR FORCE FINDINGS

In Fall 2015, the population of the Cayman Islands was estimated at 60,413. There were 34,237 Caymanians, 5,188 Permanent Residents and 20,988 Non-Caymanians. The labour force was comprised of 40,870 persons, with 39,138 of them employed and 1,732 unemployed. The labour force participation rate was 82.8 percent while the unemployment rate was 4.2 percent. The unemployment rate and labour force participation rate varied by sex and status (Tables 4 and 5). Figure 1 illustrates the composition of the population and the labour force.

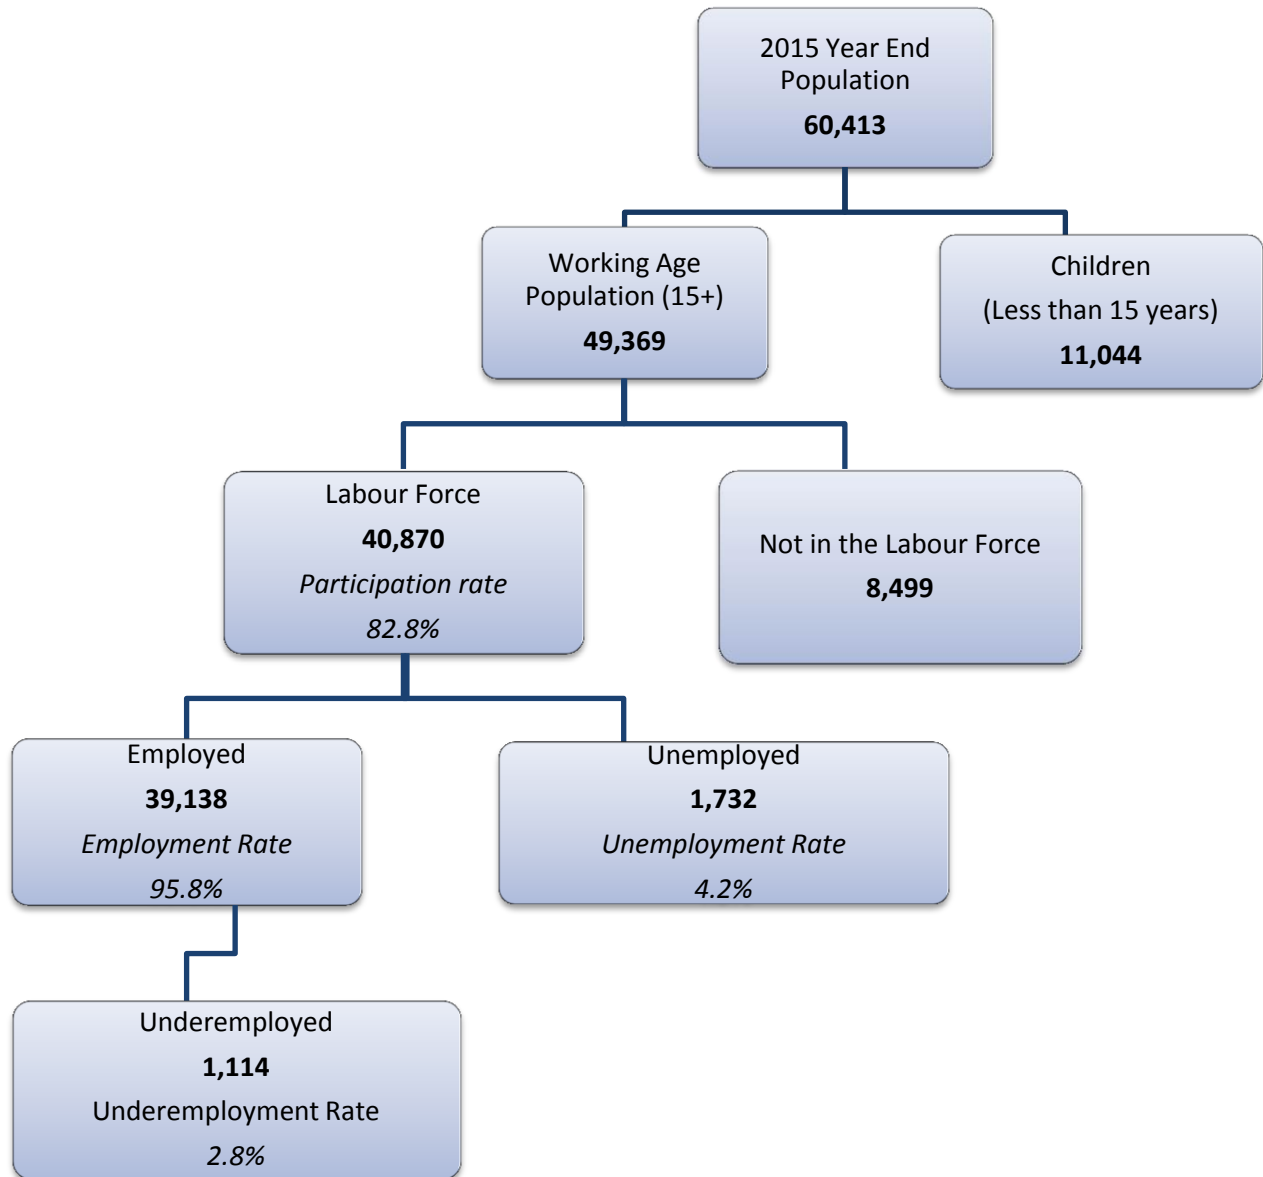

Table 4: Main Labour Force Indicators by Status, Fall 2015

Indicators	Total	Male	Female

Figure 1: Main Labour Force Composition, Fall 2015

3.1 POPULATION ESTIMATES

In Fall 2015, the estimated population stood at 60,413. The majority of Cayman's population lives in Grand Cayman, particularly in George Town which accounted for 51.8 percent. Bodden Town had 19.9 percent of the population while West Bay had 19.7 percent. The Sister Islands' (Cayman Brac and Little Cayman) combined population accounted for 3.6 percent (Table 6).

The average household size was 2.6 persons per household and varied by district. Bodden Town had the highest with 2.9 persons, followed by East End with 2.7 persons. The remaining Districts recorded similar household sizes of 2.5 persons.

Table 6: Year End Population Estimates by District, Fall 2015

District	Total Population		Average Household Size	Total Households	
	#	%		#	%
Total	60,413	100	2.6	23,682	100
George Town	31,303	51.8	2.5	12,725	54.0
West Bay	11,911	19.7	2.5	4,785	19.9
Bodden Town	12,001	19.9	2.9	4,133	17.7
North Side	1,480	2.5	2.5	604	2.5
East End	1,522	2.5	2.7	557	2.2
Sister Islands	2,196	3.6	2.5	878	3.7

Sex and Age

The estimated population according to sex distribution in Fall 2015 comprised 50.1 percent males and 49.9 percent females (Table 7).

Children younger than 15 years old accounted for 18.3 percent of the population while the elderly (65 years or older) represented 6.7 percent (Appendix Table 1.4). These two groups together are referred to as the 'dependent population' and accounted for 25.0 percent.

The working age population which is the age group comprising persons who are 15 years and older accounted for 81.7 percent of the population. Persons in this age group are usually working or looking for work and are said to be in their 'productive years'. It is this group that children and elderly depend on. Therefore, the distribution of the population by age indicates a

dependency ratio of one to four, i.e., for every dependent person there are four persons in the working age population.

Table 7: Year End Population Estimate by Selected Characteristics, 2014 and 2015

Selected Characteristics	2015 Population		2014 Population		2015 - 2014 Change	
	#	%	#	%	#	%
Total	60,413	100	58,238	100	2,175	3.7
Sex						
Male	30,264	50.1	28,322	48.6	1,942	6.9
Female	30,149	49.9	29,916	51.4	233	0.8
Status						
Caymanian	34,237	56.7	33,447	57.4	790	2.4
Permanent Res.	5,188	8.6	5,923	10.2	(735)	(12.4)
Non-Caymanian	20,988	34.7	18,868	32.4	2,120	11.2
Age Group						
0 - 14	11,044	18.3	10,342	17.8	702	6.8
15 - 24	5,564	9.2	5,386	9.3	178	3.3
25 - 34	10,005	16.6	10,298	17.7	(293)	(2.8)
35 - 44	13,145	21.8	11,147	19.1	1,998	17.9
45 - 54	11,134	18.4	10,786	18.5	348	3.2
55 - 64	5,481	9.1	6,486	11.1	(1,005)	(15.5)
65+	4,040	6.7	3,793	6.5	247	6.5

Status

The proportion of Caymanians (56.7%) in the population is higher than both Non-Caymanians (34.7%) and Permanent Residents (8.6%) (Table 7). Among Caymanians, 75.7 percent were in the working age population compared to 100 and 87.3 percent among Permanent Residents WRW and Non-Caymanians respectively (Appendix Table 1.5). This is expected since the local economy has a high proportion of expatriates that supply labour in various sectors of the economy.

3.2 LABOUR FORCE

The labour force is comprised of persons in the working-age population who worked, as well as those who at the time of the survey, did not have a job, but were available and looking for work during the reference period. In Fall 2015, there were 40,870 persons who were in the labour force (Table 8).

Table 8: Labour Force by Selected Characteristics, Fall 2015

Selected Characteristics	Labour Force	
	#	% Distribution
Total	40,870	100
Sex		
Male	20,772	50.8
Female	20,098	49.2
Status*		
Caymanian	19,575	47.9

25 - 34	9,500	23.2
35 - 44	12,265	30.0
45 - 54	10,431	25.5
55 - 64	4,301	10.5
65+	1,291	3.2

** Due to rounding, sub – totals may differ from the sum*

Sex and age

In Fall 2015, males accounted for 50.8 percent and females accounted for 49.2 percent of the labour force.

The age group 35 to 44 years accounted for 30.0 percent of the labour force in Fall 2015, followed by the 45-54 years (25.5%).

Status

The labour force distribution by status in Fall 2015 indicated that 47.9 percent were Caymanians, 41.7 percent Non-Caymanians and 10.5 percent Permanent Residents with Rights to Work (WRW) (Table 8).

Labour Force Participation Rate

The overall labour force participation rate (LFPR)¹ was 82.8 percent (Table 9). Non-Caymanians overall had the highest labour force participation rate (92.0%) when compared to Permanent Residents WRW (86.1%) and Caymanian (75.6%).

In the category of educational attainment, the labour force participation rate ranged from 47.5 percent among those with primary school education to 91.4 percent among those with post-secondary. The participation rate of females was lower than males in all of the educational attainment categories.

¹ The number of persons in the labour force expressed as a percentage of the working age population.

Table 9: Labour Force Participation Rate by Selected Characteristics, Fall 2015

Selected Characteristic	Total	Male	Female
Total	82.8	84.6	81.0
Status

3.3 EMPLOYED

The employed consists of those persons in the labour force who worked for pay, profit or family gain for at least one hour during the reference week, which was the week September 27 - October 3, 2015. Persons who, for some reason or the other, did not work during the reference week, but had a job were also categorized as members of the employed labour force. Such persons were temporarily absent from work. In Fall 2015, the number of employed persons in the labour force was 39,138 (Table 10).

Table 10: Employed Persons by Selected Characteristics, Fall 2015

Selected Characteristics	Employed Persons	
	#	% Distribution
Total	39,138	100
Sex		
Male	20,086	51.3

College / University	11,625	29.7
Not Stated	249	0.6

** Due to rounding, sub – totals may differ from the sum*

Sex and Age

The number of males employed in the labour force was 20,086. This number is higher than employed females, which numbered 19,052 (Table 10). Those in the 35 to 44 age group accounted for the biggest share of the employed (30.2%). Persons aged 15 to 24 years and the elderly (65+ years) represented 6.8 and 3.2 percent of the employed, respectively.

Status

Employed Caymanians in Fall 2015 totalled 18,366 and accounted for 46.9 percent of the employed labour force. Employed Non-Caymanians and Permanent Residents WRW totalled 16,783 and 3,990, respectively. These two groups accounted for 53.1 percent of the employed labour force (Table 10).

Hours of Work

The number of hours worked by the respondent was captured using two approaches. The first approach is the *Usual Hours* worked and the second, *Actual Hours* worked. Usual Hours worked is defined as the typical number of hours worked during a normal workweek by the respondent at his/her job(s). Actual hours worked is defined as the exact number of hours worked during the reference period of September 27 – October 3, 2015 by the respondent at his/her job(s). Usual and Actual Hours worked includes all hours spent on work activities and overtime hours, but excludes vacation leave, sick leave, public holidays and other forms of paid or unpaid leave.

The employed usually worked an average of 43.0 hours per week. Males on average, worked 1.8 hours longer per week than females while Non-Caymanians and Permanent Residents WRW worked 2.9 and 2.6 hours respectively longer than Caymanians (Appendix Tables 3.31 and 3.32). However, the employed actually worked an average of 41.7 hours during the reference week. Males on average worked 1.4 hours longer per week than females while Non-Caymanians and Permanent Residents WRW worked 2.3 and 0.6 hours longer than Caymanians (Appendix Tables 3.33 and 3.34).

Employment Status

The employed worked mainly as paid employees (92.4%), while 7.4 percent had their own business as self-employed with or without employees. Among employed males, 10.8 percent were self-employed, while among females 3.9 percent were self-employed. Caymanians

(13.2%) were more likely than Permanent Residents WRW (8.6%) and Non-Caymanians (0.8%) to have their own business (Tables 11 and 12).

Table 11: Employed Persons by Employment Status and Sex, Fall 2015

Employment Status	Total		Male		Female		Sex Distribution

Occupation

The top six occupations in Fall 2015, which comprised 85.8 percent of total employment, were service and sales workers (21.6%); professionals (16.3%); technicians and associate professionals (14.0%); elementary occupations (12.3%); craft and related trades workers (11.7%); and managers (9.9%) (Figure 2). Analysis by sex and status indicates varying patterns. The largest share of employed males by occupation worked as craft and related trades workers (22.2%); service and sales workers (16.0%); professionals (14.2%); and technicians and associate professionals (12.8%). The employed share pattern for females showed that females were employed as service and sales workers (27.5%); professionals (18.5%); elementary occupations (16.2%); and, technicians and associate professionals (15.3%), (Appendix Table 3.25).

The largest share of employed Caymanians worked as service and sales workers (17.7%); technicians and associate professionals (16.3%); professionals (15.9%); and managers (14.3%). Non-Caymanians were mainly employed as service and sales workers (26.9%); elementary

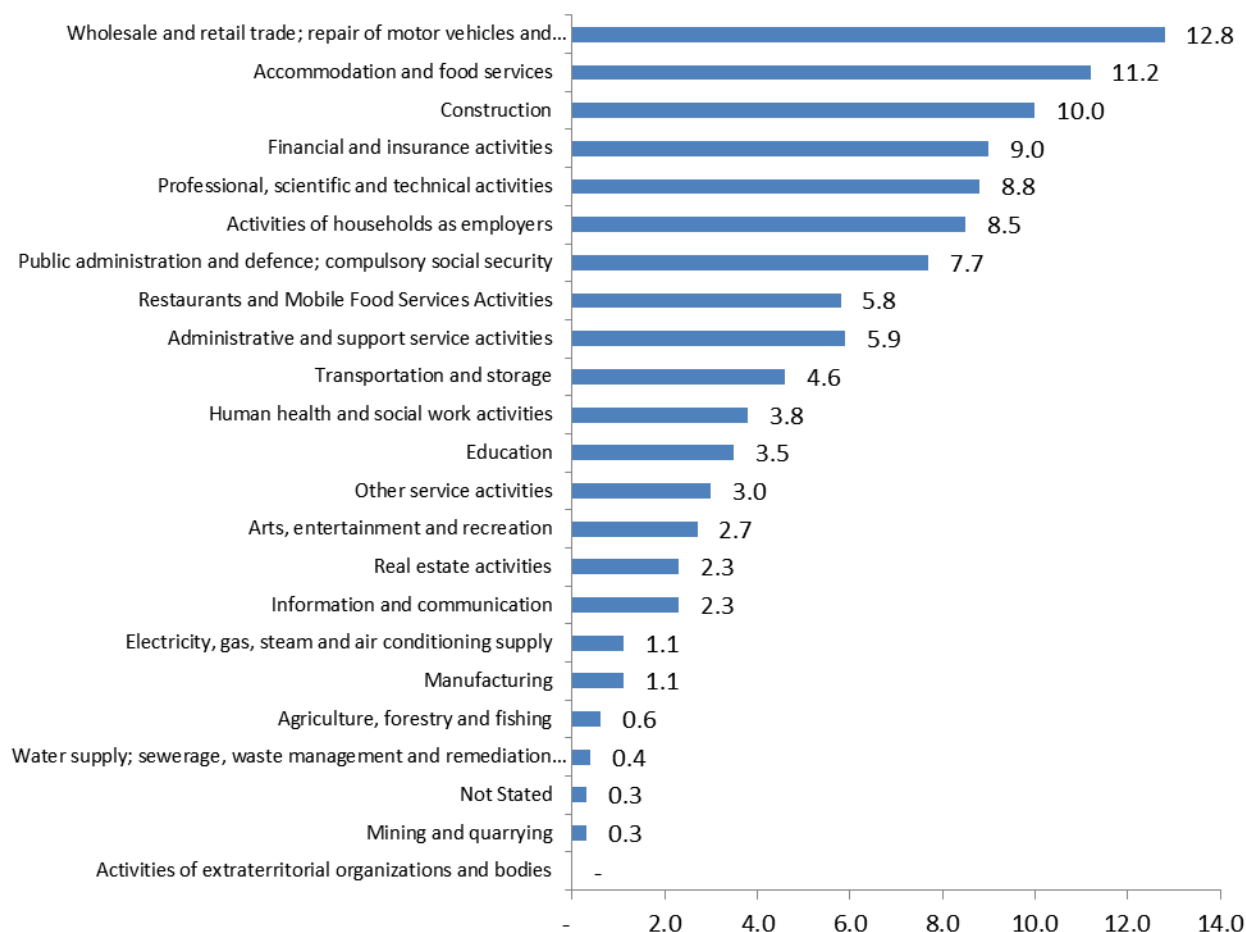

occupations (20.1%); professionals (17.1%); and craft and related trade workers (12.2%). Permanent Residents WRW were mainly employed as service and sales workers (17.1%); craft and related trade workers (16.4%); technicians and associate professionals (16.3%); and, professionals (15.1%), (Appendix Table 3.26).

Figure 2: Employment by Occupation (%), Fall 2015

Industry

The top seven industries accounted for 68.0 percent of the employed labour force, these were: wholesale and retail trade (12.8%); accommodation and food services activities (11.2%); construction (10.0%); financial services (9.0%); professional, scientific, and technical activities (8.8%); activities of households as employers (8.5%); and public administration and defence (7.7%) (Figure 3). Males were mainly engaged in construction (18.2%); wholesale and retail trade (15.0%); and accommodation and food services (9.9%) while females were mainly engaged in activities of households as employers (16.6%); accommodation and food services (12.5%); financial services (11.8%); and, wholesale and retail trade (10.5%), (Appendix Tables 3.27).

Figure 3: Employment by Industry (%), Fall 2015

The largest industry share for Caymanians were in wholesale and retail trade (14.7%); financial services (12.7%); and, public administration activities (12.1%). Non-Caymanians were mostly employed in the following industries: activities of households as employers (17.6%); accommodation and food service activities (16.0%); construction (9.5%); and administrative and support service activities (9.3%). Permanent Residents WRW were mainly employed in the following industries: wholesale and retail trade (20.0%); construction (12.2%); financial and insurance activities (11.5%); and, accommodation and food service activities (11.1%); (Appendix Table 3.28).

Income

From the number of respondents who answered the income question, approximately 51.3 percent of employed persons earned CI \$2,400 or more per month (Tables 13 and 14). The proportion was higher among employed males (53.9%) compared to employed females (48.3%) earning the same income range. Caymanians (61.6%) were more likely than Permanent Resident WRW (45.2%) and Non-Caymanians (41.2%) to have earned CI \$2,400.00 or more per month. In the highest income range, i.e. CI \$8,400.00 or more per month, there were more males (67.2%) than females (32.8%) and more Caymanians (44.7%) than Permanent Resident WRW (17.4%) and Non-Caymanians (37.8%).

Size of Business

Employed persons were asked, 'How many persons are employed at place of work?' This close ended question had five applicable responses, ranging from 1 - 5 to 50 or more. The results, which indicate the size of businesses where they work, revealed that most of the employed persons (10,601 or 27.1%) worked in businesses with 1 - 5 employees and 10,007 persons or 25.6 percent worked in businesses with 50 or more employees (Tables 15a and 15b).

Further analysis by industry shows that all employed persons who work in the activities of households as employers industry work with 1 - 5 employees (99.1%). Additionally, those who worked in administrative and support services (30.4%); construction (29.1%); and, wholesale and retail trade (28.6%) were also more likely to have worked in businesses with 1 - 5 employees.

In contrast, persons who worked in public administration (49.9%); accommodation (43.9%); financial and insurance activities (42.5%); human health and social work activities (38.2%); and,

professional, scientific and technical activities (38.1%) industries were more likely to have worked in big companies with 50 or more persons.

3.3.1 UNDEREMPLOYMENT

'Underemployment' is defined as 'Involuntary part-time' work, where workers who could (and would like to) be working for a full work-week can find only part-time work. The underemployed accounted for 2.8 percent of the employed in Fall 2015 (Table 16). Underemployment was 3.4 percent for males and 2.2 percent for females. Caymanians had a higher rate of underemployment (4.2%) than Permanent Residents WRW (2.1%) and Non-Caymanians (1.6%). Persons age 65 and above have the highest underemployment rate (11.7%) and those who have only completed middle year education (6.4%) (Table 16).

3.4 UNEMPLOYED

Based on the ILO guidelines, a person of working age is deemed to be unemployed if he/she is without a job, but is currently available for work and has been seeking employment within the reference period. In Fall 2015 there were 1,732 unemployed persons, and the unemployment rate was 4.2 percent (Table 17 and 18). The unemployed were mainly persons who were 35 - 44 years and older (26.0%), females (60.4%), or Caymanians (69.8%).

$$** \text{ Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Sex, age and status

The unemployment rate for persons between 15 and 24 years (13.8%) remained the highest compared to other subgroups of the unemployed. Females experienced a higher unemployment rate (5.2%) than Males (3.3%). The unemployment rate among Permanent Residents WRW was 6.6 percent, which was higher than both Caymanians (6.2%) and Non-Caymanians (1.4%) (Table 18).

Educational attainment and other information

Approximately one in every three (36.4%) unemployed persons had post-secondary or higher level education. Among unemployed Caymanians, 26.9 percent of them had post-secondary education or higher compared to 77.8 percent and 42.1 percent of unemployed Non-Caymanians and Permanent Residents WRW respectively, (Appendix Table 5.7).

The majority (84.4%) of the unemployed stated that they worked before, and 48.6 percent have been without work for more than twelve (12) months, (Appendix Tables 5.14 and 5.16). Unemployed persons mainly worked previously as service and sales workers (32.2%); elementary occupations (15.6%); and technicians and associate professionals (15.2%), (Appendix Table 5.18 and 5.19).

When asked about their main means of job search, which was a multiple response question, unemployed persons' most popular responses were to ask friends (71.8%); send résumés (60.5%); and, contact an employer (54.9%). Unemployed persons also registered with the National Workforce Development Agency (NWDA) (33.4%) and to a lesser extent checked websites (32.1%). Caymanians (81.6%) were more likely than the Permanent Residents WRW (4.9%) and Non-Caymanians (13.5%) to have registered with the NWDA (Appendix Table 5.12 and 5.13).

The top five preferred occupations that the unemployed were looking for were clerical support (24.0%); service and sales (21.1%); technicians and associate professionals (13.3%); elementary occupations (13.2%); and professionals (10.1%) (Appendix Table 5.8 and 5.9).

The top five preferred industries where the unemployed looked for work were accommodation and food services (15.2%); wholesale and retail trade (12.8%); construction (11.5%); financial and insurance activities (10.3%); and public administration and defence (7.7%) (Appendix Table 5.10 and 5.11).

Under one half (41.7%) of the unemployed persons received training for a specific occupation (Appendix Tables 5.24 and 5.26). The majority of those who received training (76.4%) did so

before 2011. Caymanians (55.0%) were more likely than Permanent Residents WRW (20.8%) and Non-Caymanians (24.2%) to have completed training before 2011 (Appendix Tables 5.29 and 5.30).

Among the unemployed, 70.7 percent relied mainly on parents or spouse/partners for financial support. A further 11.1 percent relied on their other relatives and friends, and 10.0 percent on savings and investments (Appendix Tables 5.22 and 5.23).

3.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work and did not seek work during the reference week were classified as being not in the labour force. A total of 8,499 persons were not in the labour force, the majority of whom were females (55.5%), 65 years and older (32.3%) and between 15 – 24 years (29.2%), (Appendix Table 6.1 and 6.2). The main reason given by the elderly (65 years and older) for being out of the labour force was retired (81.4%) while persons between 15 – 24 years old was studies/in training (90.8%) (Table 20).

The majority of persons not in the labour force had high school or lower level education (63.6%) while 22.5 percent of the respondents had a college/university education (Appendix Table 6.6).

Figure 4: Percent Persons Not in the Labour Force by Main Reason for Not Looking for Work, Fall 2015

Most males not in the labour force were in school/training (39.1%) or retired/elderly (35.5%). Females not in the labour force were also mostly in retired/elderly (36.3%), engaged in home/family duties (23.0%) or were attending school/training (21.1%) (Table 20). The main means of financial support for persons not in the labour force were parents (26.7%), spouse/partner (24.3%) and savings/investments (16.8%) (Appendix Table 6.18 and 6.19).

3.5.1 POTENTIAL LABOUR FORCE

Based on the ILO definition, the potential labour force consists of all persons of working age (15 years and older) who, during the reference week, were neither employed nor unemployed and were either classified as unavailable jobseekers or available potential jobseekers. *Unavailable jobseekers* are persons who carried out activities to 'seek employment', were not 'currently available' but would become available within a short subsequent period. *Available potential jobseekers* are persons who did not carry out activities to 'seek employment', but wanted employment and were 'currently available'.

Table 21: Persons Not in the Labour Force by Selected Characteristics and Potential Labour Force, Fall 2015

College / University	164	25.5	123	83.2	41	8.3

* Due to rounding, sub – totals may differ from the sum

Of the 8,449 persons who were classified in the not in the labour force category, only 643 persons were either unavailable jobseekers (148) or available potential jobseekers (496). The potential labour force consisted mainly of males (53.3%), Caymanian (75.7%), 45 years and older (53.2%) and high school level or higher education (86.3%) (Table 21).

4. OTHER FINDINGS

4.1 HOUSING CHARACTERISTICS

The majority of households (48.0%) owned their homes, while 47.8 percent rented their homes (Table 22).

Table 22: Percent of Households by Selected Characteristics, Fall 2015

Total Households	23,682
Owned Households	48.0
Rented Households	47.8
Households with Household Employees	19.8
Households with Landlines	34.0
Households with Cell Phones	98.2
Households with Internet Connectivity	72.3
Households with Computer	73.5
Households with Cable	65.0
Households with Air Condition	90.6
Households with Housing Insurance	46.7

Majority of the households had internet connectivity (72.3%), computer² (73.5%), cable/satellite television (65.0%), and air-condition (90.6%). About two in every three households (66.0%) had no land-line telephone, but almost all (98.2%) had at least one cell phone. Approximately, one in every four households (19.8%) had a household employee and less than half of the households (46.7%) reported having housing insurance.

In Fall 2015, the mean monthly rent reported for accommodation furnished or unfurnished was CI\$905.56 and the mean rental value for owner occupied dwelling was CI\$2,027.69 (Appendix Table 8.7).

² Computer includes desktops, laptops, tablets and e-readers.
