## **1. INTRODUCTION**

This report presents the findings of the Fall 2016 Labour Force Survey (LFS). The LFS was conducted on a yearly basis from 2007 to 2014, in October, due to budget reduction. However, the Spring LFS was reinstituted in 2015.

The LFS provides information on the characteristics of persons in the labour force. The concepts used in the survey are in accordance with the International Labour Organization (ILO) guidelines, and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this report present the methodology (Section 2), the main findings with emphasis on the profile of the labour force, and those that are out of the labour force (Section 3) and other findings on expenses and housing characteristics (Section 4).

## **2. METHODOLOGY**

Planning and execution of the Fall 2016 Labour Force survey (LFS) was done by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

The ESO's Household Register, which is comprised of a listing of all household dwelling units countrywide, provided the sampling frame for the survey. A comprehensive update to the register was conducted between February and August 2016 based on information obtained from the 2015 Household Budget Survey, the October 2015 LFS, new building permits issued and new information from field update, which revised the register to 25,851 household dwelling units. A sample of 1,401 household addresses was randomly selected for the Fall survey, representing 5.4 percent of all household addresses. The total number of households during the survey period was eventually adjusted to 25,561 based on post-survey results, which showed that 290 selected household addresses were confirmed to have no occupant households at the time of the survey.

### **Sample design**

The Cayman Islands was divided into six strata along the same geographical lines as the Districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands.

Probability proportionate to household population by district, as determined by the ESO Household Register, was used when allocating the number of selected households across

strata. Households were randomly selected from all of the six districts; within each district, the households were selected with equal probability, and the final sample represented approximately 5.4 percent of households within respective districts. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

$P_h$  = probability of selection for the sample households in the h-th stratum (district)

$M_h$  = total number of households in the sample frame for the h-th stratum

$m_h$  = the number of sample households selected in the h-th stratum

### Fieldwork

In the October 2014 LFS, the ESO introduced the use of tablets for electronic data collection on Grand Cayman. This was the first time LFS interviews were conducted without using paper questionnaires. The Sister Islands however continue to administer the paper questionnaire due to the lack of an on-site trained IT supervisor. Attached in the Appendix (page 121) is a copy of the questionnaire that was uploaded to the tablet.

The reference week for the Fall LFS was the week September 25 – October 1, 2016. The data collection took place over a six-week period starting October 2, 2016 and ended on November 11, 2016.

Staff from the ESO conducted Four evenings of training in preparation for the fieldwork phase of the survey. A total of 38 persons, most of whom have prior household survey experience (census and/or LFS), received training on how to conduct the LFS using tablets. Thirty three persons were selected to conduct interviews in Grand Cayman. In the Sister Islands (Cayman Brac and Little Cayman), four persons were trained for two day on how to conduct the LFS using the questionnaires on tablets. All four persons were selected to conduct interviews. The trained interviewers comprised staff members of the ESO and temporary survey enumerators.

### Weights

The Fall 2016 population estimate was derived by adding the 2016 natural increase (births minus deaths) and immigration data (work permits and change of status) to the 2016 year end population estimate. Data were obtained from the Health Services Authority and the CI Immigration Department for the period July 1- December 31, 2016. The basic sampling weight, or expansion factor, was then calculated based on the estimated population and the sample population adjusted for non-responses at the household level.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

### Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPRJ) software on tablets which was first implemented in October 2014. Coding of industries and occupation were also conducted internally using the International Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. A data file was then created with information from all households who completed the LFS interview (fully and partially). Finally, indicators were generated from this file using SPSS.

### Standard errors for main estimates

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

The estimates presented in this report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*) the more reliable is the estimate. Because of this, comparisons of the larger estimates may be used with confidence, but small estimates must be treated with caution. Consequently, estimates of

25 or lower (but not zero) have been suppressed as indicated by '...' or regrouped as they are considered to be unreliable or not useful.

*Standard Errors, Confidence Intervals and Coefficients of Variation (C.V.)* of the estimates for key variables for the Fall 2016 LFS are shown in the Tables 2 and 3.

### 3. MAIN LABOUR FORCE FINDINGS

In Fall 2016, the population of the Cayman Islands was estimated at 61,361. There were 34,113 Caymanians, 5,467 Permanent Residents and 21,781 Non-Caymanians. The labour force was comprised of 42,196 persons, with 40,411 of them employed and 1,785 unemployed. The labour force participation rate was 83.4 percent while the unemployment rate was 4.2 percent. The unemployment rate and labour force participation rate varied by sex and status (Tables 4 and 5). Figure 1 illustrates the composition of the population and the labour force.

### 3.1 POPULATION ESTIMATES

In Fall 2016, the estimated population stood at 61,361. The majority of Cayman's population lives in Grand Cayman, particularly in George Town which accounted for 52.0 percent. West Bay had 19.0 percent of the population while Bodden Town had 20.6 percent. The Sister Islands' (Cayman Brac and Little Cayman) combined population accounted for 3.4 percent (Table 6).

The average household size was 2.4 persons per household. Bodden Town had the highest household size with 2.8 persons, followed by George Town, West Bay and East End with 2.3 persons. The district that recorded the smallest household size was Sister Islands with 1.8 persons.

**Table 6: Population Estimates by District, Fall 2016**

	#	%		#	%
<b>Total</b>	<b>61,361</b>	<b>100</b>	<b>2.4</b>	<b>25,561</b>	<b>100</b>

East End	1,460	2.4	2.3	645	2.5
Sister Islands	2,099	3.4	1.8	1,146	4.5

#### *Sex and Age*

The estimated population according to sex distribution in Fall 2016 comprised 47.9 percent males and 52.1 percent females (Table 7).

Children younger than 15 years old accounted for 17.5 percent of the population while the elderly (65 years or older) represented 6.7 percent (Appendix Table 1.4). These two groups together are referred to as the 'dependent population' and accounted for 24.2 percent.

The working age population which is the age group comprising persons who are 15 years and older accounted for 82.5 percent of the population. Persons in this age group are usually working or looking for work and are said to be in their 'productive years'. It is this group that

children and elderly depend on. Therefore, the distribution of the population by age indicates a dependency ratio of one to three, i.e., for every dependent person, there are three persons in the working age population.

65+	4,100	6.7	4,040	6.7	60	1.5

### *Status*

The proportion of Caymanians (55.6%) in the population is higher than both Non-Caymanians (35.5%) and Permanent Residents (8.9%). Although Caymanians had the highest population proportion, it decreased slightly from 56.7 percent in 2015 to 55.6 percent in spring 2016 (Table 7). Among Caymanians, 77.3 percent were in the working age population compared to 99.1 and 86.5 percent of Permanent Residents and Non-Caymanians, respectively (Appendix Table 1.5). This is expected since the local economy has a high proportion of expatriates that supply labour in various sectors of the economy.

### 3.2 LABOUR FORCE

The labour force is comprised of persons in the working-age population who worked, as well as those who at the time of the survey, did not have a job, but were available and looking for work during the reference period. In Fall 2016, there were 42,196 persons who were in the labour force (Table 8).

#### *Sex and age*

In Fall 2016, females accounted for 50.1 percent of the labour force while the remaining 49.9 percent were males.

The age group 35 to 44 years accounted for 31.2 percent of the labour force in Fall 2016, followed by the 25 to 34 years (23.5%).

*Status*

The labour force distribution by status in Fall 2016 indicated that 47.2 percent were Caymanians, 41.6 percent Non-Caymanians and 11.2 percent Permanent Residents with Rights to Work (WRW) (Table 8).

*Labour Force Participation Rate*

The overall labour force participation rate (LFPR)<sup>1</sup> was 83.4 percent (Table 9). Non-Caymanians overall had the highest labour force participation rate (93.9%) when compared to Permanent Residents WRW (84.5%) and Caymanian (75.6%).

In the category of educational attainment, the labour force participation rate ranged from 42.5 percent among those with primary school and below education to 91.7 percent among those with post-secondary education. The participation rate for females was lower than males in all of the educational attainment categories.

### 3.3 EMPLOYED

The employed consists of those persons in the labour force who worked for pay, profit or family gain for at least one hour during the reference week, which was the week September 25 to October 1, 2016. Persons who, for some reason or the other, did not work during the reference week, but had a job were also categorized as members of the employed labour force. Such persons were temporarily absent from work. In Fall 2016, the number of employed persons in the labour force was 40,411 (Table 10).

### *Sex and Age*

The number of males employed in the labour force was 20,015. This number is slightly lower than employed females, which numbered 20,396 (Table 10). Those in the 35 to 44 age group accounted for the biggest share of the employed (32.0%). Persons aged 15 to 24 years and the elderly (65+ years) represented 6.7 and 2.8 percent of the employed, respectively.

### *Status*

Employed Caymanians in Fall 2016 totalled 18,525 and accounted for 45.8 percent of the employed labour force. Employed Non-Caymanians and Permanent Residents WRW totalled 17,482 and 4,404, respectively. These two groups accounted for 54.2 percent of the employed labour force (Table 10).

### *Hours of Work*

The number of hours worked by the respondent was captured using two approaches. The first approach is the *Usual Hours* worked and the second, *Actual Hours* worked. Usual Hours worked is defined as the typical number of hours worked during a normal workweek by the respondent at his/her job(s). Actual hours worked is defined as the exact number of hours worked during the reference period of September 25 to October 1, 2016, by the respondent at his/her job(s). Usual and Actual Hours worked includes all hours spent on work activities and overtime hours but excludes vacation leave, sick leave, public holidays and other forms of paid or unpaid leave.

Approximately one in every four (26.8%) unemployed persons had post-secondary or higher level education. Among unemployed Caymanians, 23.2 percent of them had post-secondary education or higher compared to 34.6 percent and 46.7 percent of unemployed Non-Caymanians and Permanent Residents WRW respectively, (Appendix Table 5.6 and 5.7).

The majority (81.9%) of the unemployed stated they worked before, and 43.3 percent have been without work for more than six (6) months, (Appendix Tables 5.14 and 5.16). Unemployed persons mainly worked previously as elementary occupations (23.0%); service and sales workers (20.2%); and craft and related trade workers (18.2%); and (Appendix Table 5.18 and 5.19).

When asked about their main methods of job search, which was a multiple response question, unemployed persons' most popular responses were to contact an employer (62.0%); ask friends (61.1%); and, send résumés (51.6%). Unemployed persons also registered with the National Workforce Development Agency (NWDA) (40.4%) and to a lesser extent checked websites (31.8%). Caymanians (44.4%) were more likely than Permanent Residents WRW (25.4%) to have registered with the NWDA (Appendix Table 5.12 and 5.13).

The top five preferred occupations that the unemployed were looking for were service and sales (25.5%); craft and related trade (21.4%); elementary occupations (16.4%); clerical support (11.4%); and, technicians and associate professionals (9.7%), (Appendix Table 5.8 and 5.9).

The top five preferred industries where the unemployed looked for work were construction (24.6%); wholesale and retail trade (11.5%); public administration and defence (11.1%); financial and insurance activities (9.6%); and, education (5.4%), (Appendix Table 5.10 and 5.11).

Over half (56.7%) of the unemployed persons received training for a specific occupation (Appendix Tables 5.24). The majority of those who received training (54.1%) did so before 2012.

Caymanians (75.4%) were more likely than Permanent Residents WRW (9.7%) and Non-Caymanians (15.0%) to have completed training before 2012 (Appendix Tables 5.29 and 5.30).

Among the unemployed, 63.3 percent relied mainly on parents and spouse/partners for financial support. A further 15.1 percent depended on savings and investments, and 7.3 percent relied on their other relatives and friends (Appendix Tables 5.22 and 5.23).

### 3.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work and did not seek work during the reference week were classified as not being in the labour force. A total of 8,417 persons were not in the labour force, the majority of who were females (59.8%), between 65 years and older (34.4%) and 15 – 24 years (31.9%), (Appendix Table 6.1 and 6.2). Persons who had high school or lower level education (65.8%) and college/university education (18.9%) also made up the majority of those not in the labour force (Appendix Table 6.6). Additionally, Caymanian females, who numbered 3,681, were more likely to be classified as not in the labour force (Table 19).

### 3.5.1 POTENTIAL LABOUR FORCE

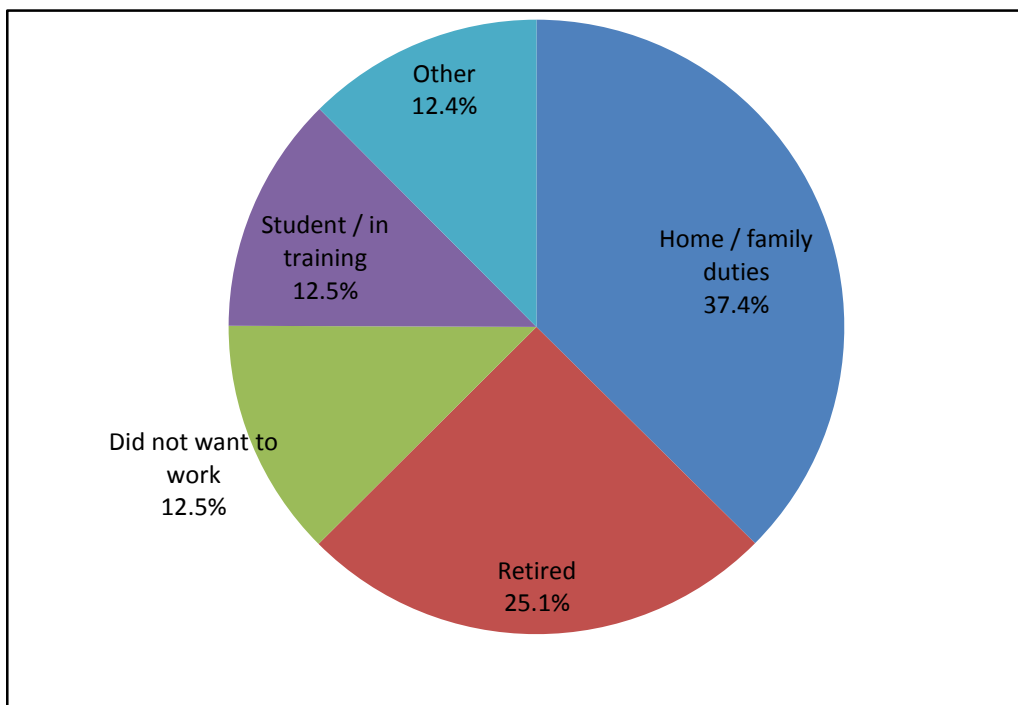

Based on the ILO definition, the potential labour force consists of all persons of working age (15 years and older) who, during the reference week, were neither employed nor unemployed and were either classified as unavailable jobseekers or available potential jobseekers. *Unavailable jobseekers* are persons who carried out activities to 'seek employment', were not 'currently available' but would become available within a subsequent short period. *Available potential jobseekers* are persons who did not carry out activities to 'seek employment', but wanted employment and were 'currently available'.
