1. Executive Summary

1.1 The international economy recorded robust growth in 2017 and higher inflation in 2017, driven by increased investment and trade.

1.2 The Cayman Islands' gross domestic product (GDP) expanded anew in 2017 at an estimated rate of 2.9 percent, marginally lower than the 3.1 percent growth recorded in 2016.

1.3 Growth was indicated in all sectors led by hotels and restaurants, construction, real estate, renting and business activities including legal and accounting services, and electricity and water supply.

1.4 Nominal GDP per capita income was estimated at \$49,228, higher relative to the \$48,314 recorded for 2016. A faster pace of growth in nominal GDP drove the increase for the year.

1.5 The average inflation rate in 2017 was 2.0 percent, compared to -0.7 percent a year ago. Inflationary pressures emanated mainly from increased domestic demand coupled with a rise in international crude oil prices.

1.6 Total employment increased by 1.1 percent to 40,856 from a year ago. The growth in employment was, however, outweighed by a stronger growth in the labour force which resulted in a rise in the unemployment rate to 4.9 percent in 2017. The unemployment rate among Caymanians was estimated at 7.3 percent.

1.7 In 2017, merchandise imports grew by 2.7 percent to reach \$876.0 million, supported by increases of 17.0 percent and 1.0 percent in oil-related and non-oil imports, respectively.

1.8 Money supply (M2) expanded by 18.4 percent to register at \$7.3 billion in 2017. This monetary expansion was due mainly to a 22.0 percent increase in foreign currency-denominated deposits, augmented by a 7.9 percent growth in local currency deposits.

1.9 Domestic credit from commercial banks grew by \$104.7 million (or 3.4%) to settle at \$3,188.5 million. Credit to the private sector increased by 5.0 percent while that to the public sector contracted by 13.3 percent. The increase in private

sector credit was due mainly to higher credit for households' domestic property and motor vehicles.

1.10 Indicators for the financial services industry showed a mix overall performance with trust companies, stock exchange listings and market capitalization, new company registration and new partnership registrations growing, while bank and trust licences, insurance licences and mutual funds (including master funds) declined.

1.11 In 2017, total visitors to the Cayman Islands increased to total 2.1 million. Growth of 8.5 percent and 1.0 percent in stay-over arrivals and cruise passengers, respectively, spurred arrivals during the year.

1.12 Building intention indicators were mixed in 2017. The value of planning approvals in Grand Cayman rose by 96.4 percent to \$798.7 million, mainly due to a large hotel project. On the other hand, the value of building permits in Grand Cayman declined by 5.0 percent to \$234.7 million.

1.13 Real estate activity declined during the year as the total value of property transfers fell by 3.5 percent to \$830.2 million, due solely to freehold transfers as leasehold transfers increased in value.

1.14 The central government's overall surplus in 2017 reached \$140.6 million (4.5% of GDP) compared with \$99.6 million (3.4% of GDP) in 2016. The larger surplus resulted from a higher increase in revenue (6.7%) relative to the rise in expenditure (0.8%).

1.15 The central government's total outstanding debt continued to decline, settling at \$449.1 million (14.5 percent of GDP) at the end of 2017, lower by \$34.8 million compared to the level at end 2016.

1.16 GDP is projected to grow in 2018 by 3.0 percent, due largely to expected growth in the construction of private and public sector projects, and continued growth in tourism-related services. Stable growth is projected in the financing and insurance sector. The inflation rate is expected at 2.7 percent arising principally from external pressures. The overall unemployment rate is projected to fall to 4.4 percent.

The Cayman Islands Economic Performance: Summary Indicators

Indicators	2015	2016	2017
Real GDP (\$million)*	2,627.8	2,708.1	2,786.8
GDP growth in real terms (%)*	3.0	3.1	2.9
Real GDP per capita (\$)*	44,498	44,155	44,154
Nominal GDP per capita (\$)*	48,440	48,314	49,228
Nominal GDP (\$million)*	2,860.6	2,963.2	3,107.0
Population (year-end)	60,414	61,361	63,415
Of which Caymanians	34,237	34,113	35,878
Population (mid-year)	59,054	61,331	63,115
Average inflation rate (%)	(2.3)	(0.7)	2.0
Employment	39,138	40,411	40,856
Unemployment rate (% of labour force)	4.2	4.2	4.9
Total imports (in \$million)	821.9	852.6	876.0
Total imports (% of GDP)	28.7	28.8	28.2
Total money supply (M2, in \$million)	5,898.0	6,155.3	7,285.9
Domestic credit (in \$million)	2,981.2	3,083.9	3,188.5
Mutual funds (including master funds)	10,940	10,586	10,559
Insurance licenses	739	740	724
Banking and trust licenses	184	159	150
Trust companies	118	117	118

New company registrations	11,875	11,174	13,046
New partnership registrations	3,377	3,356	3,872
Stay-over tourists (in thousands)	385.4	385.5	418.4
Cruise ship passengers (in thousands)	1,716.8	1,711.8	1,728.4
Grand Cayman building permits (\$million)	186.9	247.0	234.7
Cayman Islands planning approvals (\$million)	458.8	406.7	798.7
Cayman Islands property transfers (\$million)	612.2	860.3	830.2
Overall fiscal balance of the central government (\$million)	116.1	99.6	140.6
Overall fiscal balance of the central government (% of GDP)	4.1	3.4	4.5
Outstanding debt of the central government (\$million)	511.0	483.9	449.1
Outstanding debt of the central government (% of GDP)	17.9	16.3	14.5

*Preliminary estimate for 2017 based on indicators.

2. Global and Regional Macroeconomic Environment

Global economic growth strengthened during 2017, as investment spending regained momentum in advanced economies. International trade also rebounded as conditions improved for several commodity-exporting countries. This review is culled from reports of the International Monetary Fund and other international organizations.

2.1 Economic Growth

Global economic growth was bolstered to 3.8 percent in 2017, relative to 3.2 percent in 2016. The acceleration in growth was the highest since 2011 and reflected increased investments and international trade. Global investment spending accelerated in advanced economies as well as some emerging market and developing economies. Consistent with the increase in global investment, world trade recovered firmly in 2017 after two years of weakness. The improvement in world trade was more prominent in emerging market and developing economies, notably China.

Advanced economies grew by 2.3 percent, an improvement from the 1.7 percent growth in 2016 (see Table 2.1). All major economies within this category recorded higher growth rates in 2017 with the exception of the United Kingdom (UK) which registered a slower pace of growth rate relative to 2016. Greater levels of investment spending, facilitated by enhanced gross fixed capital formation and stock accumulation, resulted in the improved performance of advanced economies.

Table 2.1: Global Economic Growth

	2014	2015	2016	2017
	% Change in GDP

India	7.4	8.2	7.1	6.7

Source: International Monetary Fund (World Economic Outlook (WEO), April 2018)

The US economy expanded by 2.3 percent in 2017, stronger than the 1.5 percent growth in 2016. This growth was facilitated by higher levels of personal consumption expenditure, non-residential fixed investment and exports. Growth in investment may have benefited from the persistent low levels of interest within the US economy.

Economic growth in the UK moderated marginally to 1.8 percent in 2017 compared with 1.9 percent in the prior year, owing to a decline in the services industries. The Euro Area, however, recorded stronger growth of 2.3 percent relative to 1.8 percent in 2016 by means of increased exports, personal and government consumption, and business investment.

Canada's growth rate accelerated to 3.0 percent from 1.4 percent in the past year due to increased household final consumption expenditure, business investment and exports. Economic growth in Japan strengthened to 1.7 percent in comparison to 0.9 percent in 2016 as business spending and private consumption expanded.

Table 2.2: Caribbean Region Economic Growth¹

	2014	2015	2016	2017
	% Change in GDP

Trinidad & Tobago	-0.3	1.5	-6.0	-2.6

Source: International Monetary Fund (WEO, April 2018)

Emerging market and developing economies grew by 4.8 percent in 2017 compared with 4.4 percent in the previous year. Growth in net exports and

¹ The Caribbean comprises Antigua and Barbuda, The Bahamas, Barbados, Dominica, Dominican Republic, Grenada, Haiti, Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, and Trinidad and Tobago.

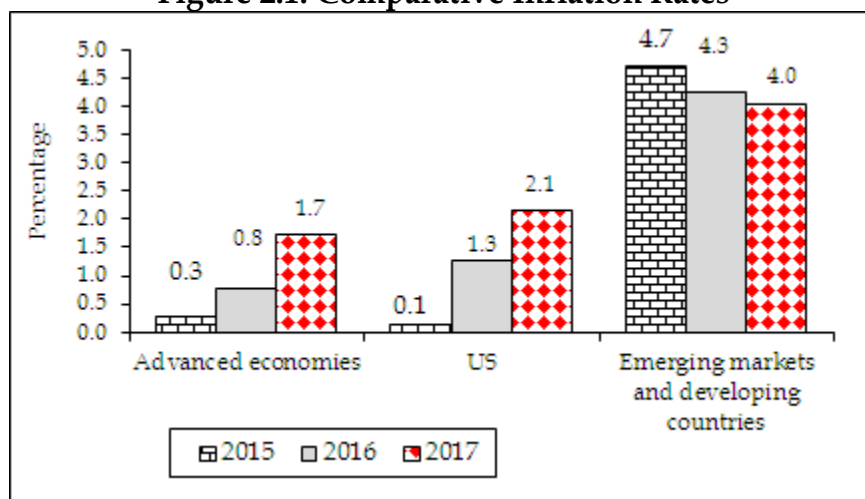

private consumption, particularly in China and India, were the main contributors to the improved outcome for emerging market and developing economies. Higher levels of fixed investment also supported growth in this group.

The Caribbean recorded growth of 2.7 percent in 2017 compared with 3.4 percent in the preceding year (see Table 2.2). This lower growth rate was reflected in all Caribbean economies except The Bahamas and St. Vincent & the Grenadines. The weakening in the growth rate for the Caribbean was due to the effects of higher international commodity prices and adverse weather conditions, mainly the negative impact from hurricanes Irma and Maria. The Dominican Republic continued to dominate the region with the highest growth rate, advancing by 4.6 percent, albeit weaker compared to 6.6 percent in 2016.

2.2 Inflation

The world economy recorded an overall inflation of 3.0 percent in 2017, higher than the 2.8 percent in 2016. Similarly, inflation in advanced economies accelerated to 1.7 percent from 0.8 percent in the preceding year (see Figure 2.1). Inflation in the US rose to 2.1 percent in the review period relative to 1.3 percent in 2016. However, the inflation rate in emerging markets and developing economies moderated to 4.0 percent in 2017 from 4.3 percent in 2016. Notably, Russia and India registered inflation of 3.7 percent and 3.6 percent compared with 7.1 percent and 4.5 percent in 2016, respectively.

Figure 2.1: Comparative Inflation Rates

Source: International Monetary Fund (WEO, April 2018)

Inflationary pressures during the year were heavily influenced by global commodity prices which increased relative to the previous year according to the IMF's Primary Commodities Price Index. There were higher prices for crude oil, natural gas, metals and agricultural products. The increase in crude oil prices was attributed to unplanned production stoppages on the US Gulf Coast and in Libya, the North Sea and Venezuela. Additionally, an extension of the OPEC agreement on production targets coupled with robust world economic growth also added upward pressure on oil prices. The higher natural gas price index resulted from strong demand for liquefied natural gas in China and increased crude oil prices. Metal prices rose due to strong demand for base metals, particularly aluminium, and limited supply in China partly influenced by reductions in production capacity. The increase in agricultural prices was associated with unfavourable weather conditions during the year.

Inflation in the Caribbean followed the trend of inflation in advanced economies during the review period as the region was impacted by higher global commodity prices, stronger global demand and adverse weather events. The Caribbean recorded inflation of 3.8 percent relative to 2.6 percent in 2016 (see Table 2.3). All countries registered higher inflation with the exception of Trinidad & Tobago. The highest price increases were observed in Antigua & Barbuda, Barbados and Jamaica.

2.3 International Finance

Overall net borrowing² (fiscal deficit) as a percentage of GDP among advanced economies remained relatively unchanged at 2.6 percent in 2017. The US fiscal

² Net lending/net borrowing is equal to total revenue less total expenditure less net acquisition of nonfinancial assets and liabilities. It is viewed as an indicator of the financial impact of

deficit or net borrowing increased to 4.6 percent of GDP in 2017 from 4.2 percent in 2016. In contrast, the overall fiscal deficit of the Euro Area improved to 0.9 percent of GDP in 2017 from 1.5 percent in 2016. The UK's fiscal deficit to GDP ratio fell to 2.3 percent in 2017 relative to 3.0 percent in 2016. Canada's fiscal deficit decreased to 1.0 percent of GDP in 2017 from 1.1 percent of GDP in 2016.

Policy interest rates were increased in some of the major world economies during 2017, notably in the USA, UK and Canada. In the USA, the Federal Reserve Bank increased the target range for its federal funds rate three times (March, June and December) during the review period. This monetary stance was taken against the background of continued strengthening of the labour market, a gradual uptick in inflation and consistent gains in economic activity. On the last occasion, the Federal Reserve Bank raised the rate from a range of 1.00 percent to 1.25 percent to a range of 1.25 percent to 1.50 percent effective December 13, 2017.

Table 2.4: Key Interest Rates (% , at the end of Quarter)

		US ¹	UK	Canada	Euro Area
		Rates in %

	Q3	1.13	0.25	1.00	0.00
	Q4	1.38	0.50	1.00	0.00
1. Mid-point of the federal funds rate range used in this table					

Source: Bank of England; US Federal Reserve Bank, European Central and Bank of Canada

The Bank of England raised its official rate from 0.25 percent to 0.50 percent with effect on November 1, 2017. This policy action was implemented to return inflation to its target rate while at the same time sustaining economic growth and employment. The Bank of Canada increased its overnight target rate from 0.50 percent to 1.00 percent effective September 6, 2017. This increase was predicated on a stronger than expected economic performance, particularly in consumer spending, business investment and exports. The European Central Bank

governments' activities on the rest of the economy. A positive balance is referred to as net lending while a negative balance is referred to as net borrowing.

maintained the interest rate on its main refinancing operations at 0.00 percent. The Governing Council noted that key interest rates are to remain at present levels for an extended period of time.

The US Dollar depreciated in value against most of its major trading partners. Specifically, the US Dollar depreciated against the Canadian Dollar by 2.1 percent on average, as higher crude oil prices positively impacted export revenue for Canada. There was an average depreciation of 3.7 percent against the Euro, emanating in part from Europe's drive to expand and strengthen trade deals with major players in the world economy, while the US weakened and exited various trade agreements. In contrast, the US Dollar appreciated by 4.8 percent against the Great Britain Pound Sterling (GBP) due primarily to the continued impact of Brexit³ on the UK economy as well as higher interest rates in the US. The Cayman Islands Dollar, by being pegged to the US Dollar, moved in tandem with the currency relative to the major trading currencies.

Figure 2.2: Average Quarterly Foreign Currency per U.S Dollar

Source: United States Federal Reserve Bank

2.4 Regional and International Tourism⁴

International tourist arrivals grew by 7.0 percent to reach 1,322.0 million in 2017, representing the strongest increase since 2010.

³ The UK officially commenced negotiations with the European Union (EU) on Brexit in June 2017. The UK is due to leave the EU on March 29, 2019 after Article 50 of the Treaty on the European Union was invoked by the UK government on March 29, 2017.

⁴ Source: World Tourism Organization and Caribbean Tourism Organization..

The African and European regions displayed the strongest growth in international arrivals, growing by 8.0 percent each. The Asia and Pacific region followed with growth of 6.0 percent while the Americas recorded growth of 3.0 percent. Global arrivals to the Middle East region grew by 5.0 percent in 2017, reversing the 4.0 percent contraction recorded in 2016. This growth was attributed to the global economic upswing and the robust outbound demand from many traditional and emerging source markets. Particularly, tourism spending from Brazil and Russia rebounded after years of declines.

Amidst two major hurricanes during the year, Caribbean tourism achieved yet another landmark in 2017 by surpassing 30.0 million stay-over arrivals for the year. The robust performance was largely linked to sustained economic growth in major source markets.

Figure 2.3: Stay-Over Arrivals Growth (%)
Selected Caribbean Countries, 2017

Source: World Tourism Organization, Caribbean Tourism Organization and other official sources.

The European source market remained strong, improving by 6.2 percent to 5.8 million arrivals, despite uncertainties surrounding Brexit and national security issues. The US source market also maintained growth traced in part to increased growth and lower unemployment levels.

As shown in figure 2.3, the highest stay-over growth rates were recorded for Saint Lucia 11.0 percent, Belize 10.8 percent, and Bermuda 10.3 percent. Strong

stay-over rates were also recorded in Grenada and Jamaica which grew by 8.2 percent and 7.8 percent, respectively. In contrast to the previous year's performance, stay-over arrivals to the hurricane-hit territories fell, with visitors to the British Virgin Islands decreasing by 17.9 percent. Declines were also recorded for Antigua & Barbuda, Aruba, Curacao, Trinidad & Tobago and the Turks & Caicos Islands.

Consistent with the growth in stay-over visitors, cruise tourism continued to grow, totaling 27 million visits to the region in 2017. This represented a growth of 2.4 percent for the period.

Coupled with the increases in stay-over and cruise arrivals, the region also benefited from higher visitor expenditure, with total expenditure reaching US\$37.0 billion in 2017. This reflected growth of 2.6 percent over the period and represented the eighth consecutive year of growth. Stay-over visitors were estimated to have spent US\$34.2 billion or US\$1,230 per trip in 2017 relative to US\$1,129 per trip in 2016.

3. Macroeconomic Performance

The year in review was marked by robust GDP growth, a higher unemployment rate and a general increase in average price levels.

3.1 Economic Growth

The Cayman Islands' real Gross Domestic Product (GDP) is estimated to have grown by 2.9 percent in 2017, marginally lower than the 3.1 percent recorded in 2016. In real terms, gross domestic product is estimated at \$2,786.8 million, relative to \$2,708.1 million in 2016 (see Table 3.1). The economic expansion brings the average growth over the last five years to 2.6 percent.

Table 3.1: Cayman Islands' Gross Domestic Product

	2013	2014	2015	2016	2017E

1 Using mid- year population figures.

E Preliminary based on sector economic indicators

Source: Economics and Statistics Office

The average income of residents in these Islands as measured by per capita GDP⁵ at constant prices was relatively unchanged at \$44,154 as growth in income was matched by the mid-year population growth. In nominal terms, the estimated average income was \$49,228, approximately 1.9 percent higher than in 2016.

Actual indicators for the year point to expansions across all sectors of the economy in 2017. The services sector, which accounted for 94.3 percent of GDP in 2017, led the economic performance with a 2.7 percent growth rate (see Table 3.2).

⁵ GDP per Capita is defined as GDP at constant 2007 prices and current prices divided by the mid-year population.

E- Preliminary estimates based on sector economic indicators

*Financial Intermediation Services Indirectly Measured (FISIM) is the difference between the interest rates charged to borrowers and the interest rates paid to lenders. It is an implicit charge to customers for the service provided by financial intermediaries.

The construction industry's performance, measured by the market value of goods and services produced in the sector, was the most robust with an estimated expansion of 7.2 percent in 2017. Key indicators such as the volume of building materials including imported aggregates was higher during the period, sustaining the growth trend observed since 2012. However, growth in the sector was weaker than the recorded growth of 7.9 percent in 2016 due to the completion of some projects in 2016 and the late start of some major development projects in 2017.

The hotels and restaurants sector's activity is estimated to have soared in 2017. The sector was impacted by a sharp uptick in arrivals of 8.5 percent for the year, with a notable increase in the fourth quarter. During the latter period, arrivals from air and cruise segments jumped by 19.4 percent and 26.4 percent relative to the corresponding quarter of the previous year.

The financing and insurance services sector which accounted for approximately 40.0 percent of GDP was estimated to have expanded by 1.4 percent. Growth in the sector occurred in the context of a marginal turnaround in demand from external markets, evidenced by increased registrations across some financial segments. Growth in the banking sector was also boosted by continued expansion in domestic credit. The domestic banking sector is estimated to have grown by 1.5 percent in 2017, due plausibly to higher interest income as domestic credit grew. Insurance services, included under this rubric, grew at a slower pace by 1.0 percent relative to 3.8 percent in 2016, as health insurance claims increased amidst a fall in premiums.

The real estate, renting and business activities sector was estimated to have increased by 2.9 percent with business services (mainly legal and accounting services) dominating the growth, supported by a rise in both new company and new partnership registration. Real estate activities are estimated to have also expanded, albeit at a slower pace as the value of traded transfers declined.

Electricity and water supply, other services and transport, storage and communication recorded robust growth of 2.6 percent, 2.1 percent and 2.5 percent, respectively. These performances may be partly associated with the higher level of population on the Islands, as well as the increase in economic activity across most sectors. Growth in the transport sector also benefitted from the higher volume of tourist and cargo transportation. Government services expanded anew in 2017 by 3.7 percent, mainly indicated by higher staff levels.

The wholesale and retail trade sector had an estimated growth of 1.8 percent, bolstered by non-oil merchandise imports which grew by 1.0 percent (see Section 3.4). This sector also benefitted from the multiplier effects of the performance of the construction sector as well as other sectors which altogether generated higher employment in 2017 compared to 2016.

3.2 Inflation

The Cayman Islands recorded an average inflation of 2.0 percent for 2017, a sharp contrast when compared to the general reduction in the price levels of 0.7

percent a year ago. Consumer prices rose largely on account of an increase in the price of crude oil in the global market. Inflationary pressures also emanated from a rise in demand associated with the increasing domestic population and higher employment levels. The increased demand also resulted in higher imported inflation as economic growth drove higher prices in the US, Cayman's major import market.

Table 3.3: Average Inflation Rates

Categories	Avg. Inflation Rates	
	2016	2017
Food & Non-alcoholic Beverages	0.1	0.9
Alcohol and Tobacco	0.6	2.8
Clothing and Footwear	0.7	2.2
Housing and Utilities	-2.7	2.3
Household Equipment	-0.3	3.4
Health	-0.1	2.4
Transport	-1.7	4.9
Communication	0.8	1.2
Recreation and Culture	1.3	0.4
Education	1.5	1.7
Restaurants and Hotels	1.5	2.2
Misc. Goods and Services	0.7	-0.5
Overall CPI Inflation	-0.7	2.0

Source: Economics and Statistics Office

Price increases were seen across most divisional indices with only miscellaneous goods and services recording declines during the year. Transport, household equipment and housing and utilities were the main divisions driving the increase for the period. The price index for transport rose by 4.9 percent as the average cost of fuels and lubricants, and passenger transport by air increased by 5.0 percent and 10.8 percent, respectively. Higher cost of transport was propelled by a recovery in oil prices in the world market. Specifically, the average spot price of crude oil⁶ rose by 23.3

percent in 2017 relative to a decline of 15.7 percent in 2016. The household equipment index increased by 3.4 percent, potentially due to rising demand from a larger population and higher import prices. Similarly, the housing and utilities index inched up by 2.3 percent as the average cost for rental and maintenance and repair of dwelling rose by 4.1 percent and 2.4 percent, respectively. The impact of higher import prices and increased demand was also reflected in the price indices for alcoholic beverages and tobacco which increased by 2.8 percent, and clothing and footwear which increased by 2.2 percent.

The decline in the index for miscellaneous goods and services of 0.5 percent was mainly attributed to reductions in the cost of personal effects and insurance during the first quarter of the year.

Source: Economics and Statistics Office

Core inflation, the overall inflation without food and non-alcoholic beverages, electricity and fuel, reflected an increase of 2.5 percent in 2017 compared to 0.4 percent a year ago (see Table 3.4). The average cost of electricity and fuels was higher by 1.9 percent for the year. While the index for food and non-alcoholic beverages recorded an average increase of 0.9 percent compared to a year ago when it went up by 0.1 percent.

3.3 Labour Force and Employment

The labour force expanded during the review period, increasing by 1.8 percent to 42,941. This growth was attributed to Caymanian labour which increased by 4.2 percent and Non-Caymanian labour which increased by 0.7 percent. The number of Permanent Residents with the rights to work (WRW) in the labour force declined by 5.0 percent during the year.

Table 3.5: Summary of Labour Force Indicators

Labour Force Indicators	2016	2017
Population	61,361	63,415
Working Age Population	50,613	52,772

* With rights to work (WRW) only

Source: ESO Fall Labour Force Surveys (2016, 2017)

Despite the increase in the labour force, the overall Labour Force Participation Rate (LFPR) declined to 81.4 percent relative to 83.4 percent in the previous year. This decline was due to a larger increase in the working age population than the labour force. There were reductions in the LFPR for all status groups during the review period.

Total employment increased marginally by 1.1 percent (or 445) to 40,856. The increase in employment was concentrated among Caymanians, where employment increased by 734 to 19,259. Employment among Non-Caymanians declined by 43 to 17,439 while employment of Permanent residents WRW fell by 246 to 4,158.

The unemployment rate rose by 0.6 percentage point to 4.9 percent in 2017. This increase was attributed to a general rise in unemployment across all status groups. The Non-Caymanian group recorded the highest increase of unemployment, rising by 181 to 380. The number of unemployed Caymanians rose by 3.9 percent (or 57) to 1,515, while unemployment among the Permanent Resident WRW status group increased by 9.8 percent to 190.

3.4 External Sector

Merchandise Imports. Total merchandise imports rose by 2.7 percent to \$876.0 million in 2017, due to higher purchase value of both fuel and non-fuel products. The imported value of fuel products rose by 17.0 percent to \$109.0 million, reflecting increases in both volume and price. Given the rapid growth in the value of fuel imports, its share of total imports rose to 12.4 percent in 2017 from 10.9 percent in 2016 (see Figure 3.2).

Imports of non-fuel products rose by 1.0 percent to \$767.0 million during the year, driven largely by *miscellaneous manufactured* and *manufactured goods* which increased by 10.1 percent and 9.0 percent, respectively. Of the categories recording declines, *commodities and transactions not classified elsewhere*, specifically gold and machinery and transport equipment registered the largest reductions in imports.

Figure 3.2: Imports by Broad Economic Categories

Source: Economics and Statistics Office

With regards to the Broad Economic Categories (BEC), all categories increased with the exception of *capital goods (excluding transport equipment)* and *consumer goods not elsewhere specified*. *Food and beverages*, which accounted for the largest share of imports (23.2 percent), increased by 1.7 percent to \$203.6 million. *Industrial supplies not elsewhere specified* rose by 9.1 percent to \$155.3 million and fuels and lubricants increased by 17.0 percent to \$109.0 million. There were respective increases of 1.8 percent to \$84.3 million and 8.9 percent to \$90.7 million in *transport equipment* and *goods not elsewhere specified*.

The volume of fuel imported into the Cayman Islands grew by 2.0 percent to 52.9 million imperial gallons. Of this, diesel increased by 6.1 percent to 35.4 million imperial gallons, while propane rose 0.6 percent to 2.1 million imperial gallons. However, the volume of imported gas declined by 1.3 percent to 11.3 imperial million gallons, while the volume of aviation fuel fell by 17.9 percent to 4.1 million imperial gallons.

The volume of imported cargo increased by 5.9 percent to 288.7 thousand tonnes, its highest level since 2008 when the volume reached 316.2 thousand tonnes. There were notable increases in construction material with imported aggregates rising by 16.2 percent to 221.5 thousand tonnes. In contrast, imports of cement declined by 0.6 percent to 39.5 thousand tonnes.

Figure 3.3: Quantity of Imported Fuel and Imported Cargo

Source: Customs Department and Port Authority of the Cayman Islands

Exports: Total merchandise exports, which mainly comprise re-exports, declined by 34.8 percent to \$27.7 million in 2017. This decline was due primarily to a reduction of 78.9 percent to \$6.2 million in the *commodities and transactions not elsewhere classified*, specifically the export of gold.

Current account⁷: The current account deficit of the balance of payments was estimated to have deteriorated in 2017 to \$997.2 million or 32.1 percent of GDP (see Table 3.6). Higher deficits are estimated for the goods, primary and secondary income sub-accounts. The goods sub-account is estimated to have deteriorated in line with the rise in imports and supported by the fall-off in exports.

Within the services sub-account, the surplus improved relative to 2016 largely due higher net receipts for travel, financial and other business services and lower net outflows (payments) for telecommunications and other services. In contrast, net receipts for insurance and pension services declined while net payments for transportation increased.

⁷ The current account of the balance of payments measures the total value of the country's transaction against the rest of the world in terms of trade in goods and services, income and transfers. A deficit in the current account means that the Cayman Islands made more payments to the rest of the world compared to its receipts from these transactions.

The primary income and secondary income sub-accounts recorded higher deficits compared with 2016. With regard to the secondary income account, net outflows of workers' remittances were estimated to have increased by \$17.1 million to \$210.0 million. This outturn represented a sharper increase in outflows relative to inflows. Other current transfers registered higher net outflows of \$0.4 million to \$39.7 million for the year.

3.5 Money and Credit⁸

Broad liquidity: Liquidity was buoyant in 2017, expanding by 18.4 percent (\$1.1 billion) over the period (see Figure 3.5 and Table 3.7). This occurred as households and businesses continued to rely on the commercial banking system for financing, saving and facilitating transactions. This heavy reliance on the financial system is evidenced by an increase in the ratio of broad liquidity to nominal GDP (a measure of financial deepening) from 207.7 percent in 2016 to 234.8 percent in 2017.

During the period local currency denominated broad money increased by 7.5 percent, owing to increases of 7.9 percent and 3.4 percent in KYD deposits and currency in circulation, respectively. Additionally, there was a 22.0 percent increase in foreign currency deposits, largely observed within savings and fixed deposit accounts. Consequent on the growth in foreign currency deposits, the share of foreign currency deposits relative to the total money stock increased to 77.4 percent relative to 75.1 percent in 2016. KYD deposits accounted for 21.0 percent while KYD currency in circulation accounted for 1.6 percent.

Despite the notable increase in deposits during the review period, the overall loans-to-deposits ratio of commercial banks moderated, as higher deposits outweighed the increase in domestic credit. As at end 2017, domestic credit reflected 44.5 percent of total deposits relative to 51.1 percent at the end of 2016, indicating that commercial banks could be more liquid than a year ago. The fall in the loan-to-deposit resulted in its lowest annual level since December 2007 when it was 41.7 percent.

Figure 3.5: Liquidity Indicators

Source: Cayman Islands Monetary Authority and ESO

⁸ Some additions and percentage changes may not be exact due to rounding to one decimal place.

The expansion in broad liquidity largely facilitated a 29.0 percent increase in net foreign assets. This was in contrast to a marginal decline in net domestic assets of 1.6 percent.

Source: Cayman Islands Monetary Authority and ESO

Net foreign assets: Net foreign assets (NFA) of the Cayman Islands Monetary Authority (CIMA) and commercial banks expanded by 29.8 percent and 3.6 percent, respectively (see Table 3.8). CIMA's NFA rose by \$4.4 million during the review period, a deceleration from the increase of \$11.4 million seen a year earlier. The improvement in commercial banks' NFA reflected a 6.9 percent increase in foreign assets coupled with a 12.6 percent reduction in foreign liabilities. The increase in foreign assets resulted as banks increased their foreign currency balance held with banks and branches by 40.3 percent. This was partly financed by reductions in non-resident loans and total investments of 3.0 percent and 24.0 percent respectively. The reduction in foreign liabilities was due to a

13.2 percent decline in non-resident deposits and a 2.0 percent fall in other liabilities.

The ratio of foreign currency-denominated liabilities to total liabilities (a financial soundness indicator which measures the relative importance of foreign currency funding within the banking system) stood at 85.7 percent in 2017 which was lower than the 86.2 percent recorded in 2016. The reduction was largely influenced by declines in both non-resident foreign currency deposits and other foreign currency liabilities. Notwithstanding, foreign currency liabilities continued to be a primary source of funding in the Cayman Islands which can be considered a “pseudo dollarized economy.” The large ratio of foreign currency deposits provides strong support for the fixed exchange rate under the currency board system.

Table 3.8: Net Foreign Assets, CI\$ million

	Dec-15	Dec-16	Dec-17	% Change

Source: Cayman Islands Monetary Authority and ESO

Net domestic credit: Domestic credit increased by 3.4 percent to \$3,188.5 million in 2017, driven by increased lending to the private sector. Credit to the private sector rose by 5.0 percent as household loans expanded by 5.8 percent, the impact of which was partly tempered by a reduction of 2.6 percent in loans to businesses. In contrast, the total level of outstanding debt by the public sector declined by 13.3 percent as the central government continued a policy of debt amortization in adherence with the requirements of the Framework of Fiscal Responsibility (FFR) (see Table 3.9).

Table 3.9: Net Domestic Credit, CI\$ million

Credit to Private Sector	2,684.7	2,809.0	2,950.2	5.0

Source: Cayman Islands Monetary Authority and ESO

Credit to households, which accounted for approximately two-thirds of the banking sector's domestic credit portfolio, increased by 5.8 percent (or \$109.8 million) to \$1,992.5 million in 2017. Growth in consumer loans was driven by expansions in credit for domestic property (7.4%), motor vehicles (10.1%) and education and technology (7.3%) (see Table 3.10). These increases were partly offset by a contraction in credit for miscellaneous activities of 6.2 percent.

In line with the increased demand for household credit the weighted average rate on KYD loans increased during the period. The increase in rates was partly impacted by an increase in the prime lending rate for the period and occurred despite the expansion in money supply.

Commercial loans, which accounts for approximately one third of total domestic credit, declined by 2.6 percent (or \$23.5 million) for the year to close at \$884.1 million (see Table 3.10). Other financial corporations reflected the largest reduction in credit, declining by \$76.9 million (or 55.9%), followed by production and manufacturing sector, which accessed \$12.7 million (or 7.4%) less credit.

Notwithstanding the general reduction in business credit, there were notable increases in loans to the trade and commerce sector and the service sector of \$52.9 million (or 10.1%) and \$13.2 million (or 18.2%), respectively.

Table 3.10: Net Credit to the Private Sector, CI\$ million

Residential mortgage foreclosures: Data from CIMA showed that the average foreclosure inventory in 2017 reached 160 properties valued at US\$46.2 million. This represented a reduction from the 171 properties valued at US\$50.8 million in 2016 (see Figure 3.6).

Similarly, the average quarterly foreclosure rate (the value of foreclosure inventory over the total value of residential mortgages) inched downwards to 2.1 percent in 2017 from 2.4 percent in 2016.

Figure 3.6: Residential Mortgages Foreclosures Inventory

Source: Cayman Islands Monetary Authority and Economics and Statistics Office

Interest rates: Given the increases in the Federal Funds Target Rate (FFTR) during 2017, the Cayman Islands prime lending rate increased for the third consecutive year, rising by 67 basis points to 4.42 percent from 3.75 percent a year ago.

As depicted in Figure 3.7, KYD weighted average interest rate on outstanding loans also increased, rising by 56 basis points to 7.58 percent over the review period.

The weighted average rate on KYD deposits increased to 0.21 percent at the end of 2017 from 0.19 percent the previous year (see Figure 3.7).

Figure 3.7: Cayman Islands' Interest Rates (% , End of Quarter)

Source: Cayman Islands Monetary Authority and ESO

4. Key Sector Developments

Cayman's financial services industry posted mixed performance while tourist arrivals soared. The construction sector indicators posted mixed trends while the total value of real estate transfers declined. The utilities sector comprising electricity and water grew during the year.

4.1 Financial Services

In 2017, the financial sector reflected growth in trust companies, stock exchange listings, market capitalization, new company registration and new partnership registrations, while bank and trust licences, insurance licences and mutual funds (including master funds) declined.

Banks & Trusts: The Cayman Islands continued to be a major player in the global financial market, ranking ninth in the world based both on the value of the banking sector's assets and liabilities. Despite an increase in global asset and liability positions, the value of cross border assets domiciled in the Cayman Island's declined by 9.8 percent to US\$931.9 billion and the value of international liabilities decreased by 10.4 percent to US\$932.1 billion.

The decline in international assets and liabilities was observed for both banking and non-banking financial institutions, and could possibly be due continued bank consolidation and increased regulation in the sector. Notwithstanding, both the local foreign currency and domestic currency positions increased over the period. Foreign currency assets stood at \$17.2 billion while foreign currency liabilities stood at \$57.7 billion. These assets and liabilities were registered in the domestic economy with other legally domiciled licenced entities considered as resident entities⁹. On the other hand, assets denominated in domestic currency (KYD) stood at US\$2.2 billion while liabilities amounted to US\$2.0 billion at the end of 2017.

The number of bank and trust licenses exhibited a downtrend from 308 at the end of 2005 to 150 at the end of 2017. As shown in Table 4.1, 'Class A' banks remained unchanged relative to end 2016 at 11 while 'Class B' banks fell by 9 to 139.

⁹ Inclusive of domestic positions in foreign currency of non-banks which are all entities that are non-deposit taking institutions (General Government, Non-Financial Corporations, Households, Non-Bank Financial Corporations, etc.).

Table 4.1: Bank & Trust Companies, 2014-2017

The number of 'Class B' banks, which are legally restricted to conduct business offshore with non-residents, continued to decline in 2017, partly due to restructuring and consolidation in the global banking sector. The number of institutions also reflected the challenge faced by Caribbean banks in maintaining correspondent banking relationships with global banks engaging in 'de-risking' activities as they strive to remain compliant with regulations¹⁰.

European banks accounted for the largest reduction in the segment with four European banks exiting the territory. Despite the reduction, Europe remained the second largest source market (21.3 percent) behind South America (22.7 percent). The USA, South America, Caribbean & Central America, Canada & Mexico and the Middle East & Africa markets each had one bank exiting the territory during

¹⁰ The regulatory requirements include the requirements of the Securities and Exchange Commission (SEC), Financial Action Task Force (FATF), anti-money laundering and counterterrorism financing (AML/CTF) standards and the supplementing guidelines issued by the Bank for International Settlements (BIS).

the year while the number of banks from the Asia & Australia region remained at 21.

Insurance: The size of the insurance sector contracted in 2017, with the total number of insurers decreasing by 16 (or 2.2%) to 724 (see Table 4.3). This decrease was due to reductions in both ‘domestic’ and ‘captive’ insurance licenses. The decline stemmed from commutations between reinsurance companies and reinsured parties as well as mergers and acquisitions of healthcare systems in the US, and their captives.

Class A (domestic) insurers: Domestic insurers declined by 1 (or 3.4%) during the year, leaving 28 entities on record at end 2017 (see Table 4.3): 19 ‘Class A’ external insurers and 9 ‘Class A’ local insurers.

Based on unaudited consolidated financial statements at the end of 2017, the gross premium of domestic insurance companies amounted to \$449.3 million. Health insurance accounted for the largest share of total premiums with 53.7 percent followed by property (16.4%) and liability (7.5%). Domestic insurance companies recorded net earned premium of \$407.6 million.

Ceded premiums amounted to \$103.2 million, or 23.0 percent of the gross premium with ceded premiums for property insurance and health contributing the largest share. Net claims and adjustment expenses amounted to \$297.0 million with the majority of payments being health-related claims (61.4%).

Class B, C and D or captives (international) insurers: The total number of captive insurance license was 696 at the end of 2017, a decline of 15 (or 2.1 percent). Class B {captives and segregated portfolio companies (SPC)} and Class C (special purpose vehicles) licences fell by 2.0 percent and 4.0 percent to 669 and 24, respectively. Class D licences remained at 3.

The financial performance of captives as measured by key indicators was mixed in 2017. Net premiums totalled US\$12.4 billion, 15.6 percent lower than in 2016 while total assets increased by 2.2 percent to US\$61.1 billion.

The composition of the captive industry was similar to previous years with North America remaining the dominant risk location, accounting for 89.8 percent of the registered insurers.

Mutual Funds: During the review period the license of 1,243 mutual funds were terminated, with only 1,169 new funds registered. Consequently, the stock mutual fund registration declined by 0.3 percent relative to 2016 to finish the year with 10,559 registered funds. All categories reflected declines except registered funds, which increased by 0.5 percent to 7,331. Master funds decreased by 0.8 percent to 2,816 while the number of administered and licenced funds fell by 8.8 percent and 10.0 percent to 331 and 81, respectively.

Stock Exchange. The number of stock listings on the Cayman Islands Stock Exchange (CSX) rose by 216 to settle at 1,238 for the period ending December 2017. This increase was due to higher listings for specialist debt securities¹¹ (up 213 to 702), sovereign debt securities¹² (up by 38 to 272), insurance linked securities (up by 8 to 42) and primary equities (up by 1 to 4). In contrast, there

¹¹ Specialist Debt Securities include debentures, debenture stock, loan stock, bonds, certificates of deposit and any other instrument creating or acknowledging indebtedness.

¹² Sovereign debt securities issued by a national government within a given country and denominated in a foreign currency.

was a reduction in the listings of mutual funds. There were no changes in the listings for secondary equities and retail debt securities for the year.

Table 4.5: Stock Listings, 2014-2017.

Retail Debt Security	-	2	1	1

Source: Cayman Islands Stock Exchange

Consistent with the increase in the number of stock listings, market capitalization rose by 23.4 percent to US\$241.4 billion, the highest value attained since the inception of the CSX. This improvement resulted mainly from an increase in specialist debt securities, which rose by US\$38.5 billion to US\$132.1 billion. Consequently, the share of specialist debt securities to total market capitalization increased to 54.7 percent. Increased market capitalization was also recorded for sovereign debt securities, mutual funds, insurance linked securities and retail debt securities. Primary equities registered a marginal decline while secondary equities were unchanged.

Companies Registration: The addition of 13,046 companies outweighed the termination of 10,203 companies from the registry for 2017 (Table 4.7). As a result

¹³ The figures for mutual funds and domestic equity refer to market capitalization. Figures for specialist debt, Eurobond and secondary equity is based on par values.

the total number of registered companies increased by 3.2 percent to 99,327 during the year (see Table 4.7). The exempt category continued to be the preferred vehicle for the conduct of business, accounting for 84.2 percent of all incorporated companies. The number of exempt companies in the registry rose by 3.7 percent to 83,675. The number of foreign companies, which are companies registered in Cayman but incorporated elsewhere, increased by 3.8 percent to 4,601. There were 889 active limited liability companies at the end of 2017 relative to 192 at the end of 2016. In contrast, the number of non-resident and resident companies recorded declines of 15.2 percent and 1.7 percent to 3,871 and 6,291, respectively.

The rise in new company registrations reflected an increase of 16.8 percent, reversing the slight contraction recorded the previous year. Exempt companies, which represented 85.4 percent of all new registrations, rose by 13.5 percent to 11,138. Resident companies also improved, increasing by 12.5 percent to 583. There were 711 new limited liability companies in 2017 compared with 205 in 2016. However, there were decreases in new registrations for non-resident companies (down 13.8% to 25) and foreign companies (down 3.4% to 589).

Source: Cayman Islands General Registry

Companies terminated from the register in 2017 declined by 3,898 or 27.6 percent. Of the terminations in 2017, 63.4 percent was removed by the Registrar,

which originated mainly from the exempt category, 30.5 percent was voluntary dissolutions primarily from the exempt category, and 3.0 percent represented voluntary cessation of foreign companies. Termination of exempt companies registered the largest decline, decreasing from 12,211 terminated in 2016 to 8,022 terminated in 2017.

Partnerships Registration: The total number of registered partnerships increased by 12.5 percent to 22,655 at the end of 2017 as the number of new partnerships surpassed the number of terminated partnerships. Exempt limited partnerships recorded an increase of 24.9 percent to 22,346, while foreign partnerships rose by 58.9 percent to 286. The number of limited partnerships remained at 23 at the end of the review period.

Registration of new partnerships in 2017 totalled 3,872 relative to 3,356 in the previous year. This improvement was due to increases in all categories.

Figure 4.2: New Partnership Registrations, 2007-2017

Source: Cayman Islands General Registry

4.2 Tourism

There was an influx of additional visitors to the Cayman Islands during 2017. Total visitor arrivals increased by 2.4 percent to just over 2.1 million for the review period driven largely by a significant increase in stay-over arrivals. Increased demand for the Islands' shores was also seen among cruise visitors.

Figure 4.3: Tourist Arrivals, 2014-2017

Source: Department of Tourism

Stay-over arrivals: Stay-over arrivals rose to 418,403 in 2017 reflecting a growth of 8.5 percent. The increase was the first time in two years that the growth in arrivals has exceeded both international and regional average growth rates. This surge of tourists to the Islands mainly originated from the USA market, which supplied 13.4 percent more visitors during the year. The Canadian market also showed a notable recovery of 6.4 percent, the highest growth rate from that market since 2014. In contrast, the European and other regional markets declined by 17.0 percent and 12.2 percent, respectively.

Table 4.8: Stay-over Arrivals by Country of Origin, 2014-2017

	2014	2015	2016	2017	% Change
In Thousands					
USA	288.0	291.8	300.6	341.0	13.4

Canada	24.9	24.3	23.3	24.8	6.4
Others	33.4	35.0	32.4	28.4	(12.2)
Total	382.8	385.4	385.5	418.4	8.5
USA (% share)	75.2	75.7	78.0	81.5	

Source: Department of Tourism

Growth in total arrivals was partly due to the Islands benefiting from the temporary closure of some markets in the region due to hurricanes Irma and Maria during the year.

Cruise market. Favorable supply conditions in the tourism market boosted cruise arrivals to the Cayman Islands during the year. Consequently, the number of cruise visitors rose to 1,728,444 in 2017, marking a new record for the segment. The rise in cruise arrivals was concentrated in the last quarter of the year which recorded growth of 26.4 percent relative to the corresponding quarter of 2016. This was in contrast to year-on-year declines in the each of the first three quarters of the year.

Figure 4.4: Cruise Arrivals, 2014-2017

Source: Department of Tourism

4.3 Construction

Indicators for building intentions, as measured by planning permits, project approvals and certificates of occupancy were mixed for 2017.

Building Permits: Building permits totalled \$234.7 million in the review period, falling by 5.0 percent relative to a year ago. Contractions were recorded across all but two categories (see Table 4.9).

The 'other' category accounted for the largest decline of \$14.3 million or 46.3 percent for the period. Similarly, there was a sharp decline in the government category of \$11.5 million or 98.5 percent. The decline in planned government expenditure relative to the previous year largely reflected the non-recurrence of the John Gray high school expansion valued at approximately \$9.0 million.

Table 4.9: Grand Cayman Building Permits 2014-2017

	Building Permits (CIS\$ Million)				%		Number of Permits				%
	2014	2015	2016	2017			2014	2015	2016	2017

Source: Cayman Islands Planning Department

Declines were also seen in the hotel category which fell by \$1.7 million or 37.5 percent and the industrial category which fell by \$0.33 million or 8.3 percent.

In contrast to the general trend, the value of permits issued in the residential sector rose by \$14.3 million or 9.1 percent during the period. The growth was due to an increase in the housing category of 27.0 percent, which offset a decline in the apartment category of 12.1 percent. Major projects within the housing category included several multi-million-dollar homes.

Notwithstanding the fall in total value, the number of building permits issued during the year increased by 9.3 percent to reach 879 with the apartment category showing the greatest increase.

Project Approvals: In contrast to a decline in the previous year, the value of project approvals nearly doubled in 2017, reaching \$798.7 million at the end of the year. This increase was largely attributed to robust growth in all except two categories.

The value of residential project approvals spiked to \$338.6 million or by 90.4 percent, largely reflecting a rebound in the apartment category, which rose by \$148.8 million. Higher approvals in this category were boosted by a number of luxury complexes which received approvals in the first quarter of the year. The housing category also climbed by 11.3 percent to \$118.4 million.

Table 4.10: Grand Cayman Planning Approvals, 2014-2017

	Project Approvals (CIS\$ Million)				%		Number of approvals				%
	2014	2015	2016	2017			2014	2015	2016	2017

Source: Cayman Islands Planning Department

Within the non-residential category, project approvals were boosted by increases of \$244.9 million and \$54.0 million in the hotel and industrial categories, respectively. The total value of approvals in the hotel category increased by \$244.9 million, mainly due to the Pageant Beach Hotel project valued at approximately \$200 million. A significant increase in value was also recorded in the other category which increased by \$44.7 million to \$84.5 million.

Despite the positive trend in approvals, the government and commercial categories weakened to \$4.5 million (or 68.1%) and \$50.1 million (or 67.2%), respectively.

The number of project approvals also expanded over the period, largely due to a significant growth in the 'other' and residential categories. Declines in the commercial and hotel categories partially offset the general increase.

Certificates of Occupancy: Certificates of occupancy (CO) trended downward for the third consecutive year, registering a value \$117.4 million for the year. This downturn was traced to declines in most categories. Within the residential sector, a contraction in apartment certificates by 51.6 percent to \$16.4 million offset an increase in housing certificates by 12.2 percent to \$72.5 million.

Despite the fall in value, the total number of certificates issued for occupancy improved by 5.2 percent to 341, with increases shown in the houses, government and commercial categories.

Table 4.11: Certificates of Occupancy Grand Cayman, 2014-2017

4.4 Real Estate

The real estate sector displayed a mixed performance in 2017 with the total value of property transfers declining, despite a rise in volume.

Table 4.12: Property Transfers, 2014-2017

	2014	2015	2016	2017	% Change
Freehold					
number	1,718	1,787	1,792	1,875	4.6

value (CI\$M)	562.8	612.2	860.3	830.2	(3.5)

Source: Lands and Survey Department

The value of property transfers totalled \$830.2 million, decreasing by 3.5 percent in the review period. This decline was mainly traced to a reduction in freehold transfers by 5.5 percent, as leasehold properties increased notably. Meanwhile, the total number of property transfers increased by 4.8 percent to reach 2,069, the highest volume in the past four years.

4.5 Utilities and Telecommunications

Utilities: Consistent with the general improvement in economic conditions and the growth in the resident population, demand for utilities increased in 2017 relative to 2016.

Water consumption increased by 2.8 percent to 1,907 million gallons. This was matched by a corresponding 3.9 percent increase in water production as major distributors ensured adequate supply.

Table 4.13 Utilities Production/Consumption, 2014-2017

	Dec-14	Dec-15	Dec-16	Dec-17	% Change

Source: Cayman Islands Water Authority, Cayman Water Company, Caribbean Utilities Company

Electricity consumption increased by 2.5 to 621.8 thousand megawatt hours for 2017. The higher consumption level resulted from both a rise in the customer base as well as a higher average rate of consumption per customer. Residential consumption levels increased by 4.6 percent to 312.8 thousand megawatt hours while commercial consumption increased by 0.4 percent. Public consumption also increased by 1.2 percent to settle at 6.9 thousand megawatt hours.

Telecommunications¹⁴: Consistent with the growing use of the internet, the number of broadband connections at end-September 2017 increased by 28.5 percent relative to the corresponding period of 2016.

¹⁴ Data for telecommunications reflect the total for the first three quarters of 2017, due to missing data for the last quarter of the year.

In contrast, usage of fixed and mobile call minutes declined by 2.6 percent during the review period. Despite the fall in total minutes, the number of fixed and mobile handsets in operation increased by 3.7 percent, possibly due to the higher demand for mobile data as well as the continuous introduction of new phone models.

Table 4.14: Telecommunication Sector Indicators, 2014-2017

	Sep-14	Sep-15	Sep-16	Sep-17	% Change
Fixed and Mobile handsets in operation	122,521	125,799	125,758	130,438	3.7

5. Fiscal Operations of the Central Government

The central government's surplus reached its highest level in 2017, as government revenue exceeded expenditure for the fifth consecutive year. This performance was generated from increased revenue which outpaced a rise in expenditure.

5.1 Overview

Continuing on its promise of prudent fiscal management, the central government recorded its highest overall fiscal surplus on record of \$140.6 million. The record fiscal balance was in comparison to a surplus of \$99.6 million in 2016 (see Figure 5.1).

Total revenue increased 6.7 percent to \$753.2 million, outweighing a 0.8 percent increase in total expenditure to \$645.4 million. The rise in total revenue emanated from increases in both coercive and non-coercive revenue, while the higher expenditure emanated from increases in both current and capital spending.

Figure 5.1: Central Government's Fiscal Balance (CI\$ Million)

Source: Cayman Islands Treasury Department and ESO

Consistent with the higher overall balance, there was a 39.1 percent increase in the central government's current surplus to \$167.1 million for the review period. This was due to the overall increase in revenue, the impact of which was partly offset by an increase in current expenditure of \$0.2 million to \$586.0 million.

5.2 Revenue

The central government's total revenue grew by 6.7 percent to reach \$753.2 million in 2017. This growth was greater than the increase in the overall revenue base (nominal GDP) and as a result the revenue-to-GDP ratio increased to 24.2 percent relative to 23.8 percent in 2016.

Table 5.2: Revenue Collection of Central Government

	2014	2015	2016	2017	% Change
Millions of Cayman Islands Dollars

Other Operating Revenue	0.4	0.3	0.4	1.0	165.1

Source: Cayman Islands Treasury Department

Growth in total revenue was due to increases in both coercive revenue, which increased by 5.9 percent to \$705.0 million, and non-coercive revenue, which increased by 20.6 percent to \$48.1 million. The increase in coercive revenue was seen in most categories with only two declining while all categories of non-coercive revenue increased (see Table 5.2).

Revenue from domestic taxes on goods and services: Domestic tax collection increased by 6.1 percent to \$451.0 million in 2017 (see Table 5.3), with its contribution to total coercive revenue increasing to 64.0 percent from 63.8 percent in 2016. Higher collections were seen among all categories with the exception of traders' licences. Work permit and residency fees, financial services licences and tourist accommodation charges registered the largest increases in revenue in absolute dollar terms.

Licencing fees collected from financial services increased by 2.2 percent to \$251.8 million with partnership fees (up by 15.9% to \$47.1 million) and other company fees - exempt (up by 7.1% to \$95.6 million) registering the largest increases (see Table 5.4).

Source: Cayman Islands Treasury Department

Revenue collected from work permit and residency fees rose by 11.6 percent to \$88.9 million. This outturn benefitted from a 4.7 percent increase in the number of work permits.

Other domestic taxes recorded an increase of 12.6 percent to \$85.1 million. Within this category, tourist accommodation charges rose by 21.5 percent to \$24.6 million due to the strong growth in stay over arrivals. Similarly, within 'other' taxes, revenue generated from motor vehicle charges increased by 10.3 percent to \$11.1 million.

Other stamp duties rose by 12.2 percent to \$10.6 million despite a reduction in the total value of traded properties. Similarly, there were increased collections by Information and Communication Technology Authority (ICTA) of licence fees which grew by 8.5 percent to \$8.9 million.

There was a 4.8 percent reduction in revenue sourced from traders' licences, the only domestic tax category to record a decline for the period.

Revenue from international trade and transactions: During 2017, taxes on international trade and transactions rose by 2.1 percent to \$178.0 million. Despite the increase, receipts from international trade and transactions as a share of coercive revenue decreased from 26.2 percent in 2016 to 25.2 percent in 2017.

Within the category, revenue collected from alcoholic beverages increased by 4.3 percent to \$20.8 million due predominantly to higher imports of liquor and

champagne. Other import duties also rose by 4.2 percent to \$103.4 million due to increases in several non-oil import categories. Additionally, revenue collected from cruise ship departure charges increased by \$0.1 million to \$10.4 million as the number of cruise passengers rose during the year.

In contrast, motor vehicle import duties declined by 1.3 percent to \$16.6 million as the value of motor vehicle imports decreased. The environmental protection fund fees remained at \$5.7 million.

Table 5.5: Revenue from Import Duties

	2014	2015	2016	2017	Absolute Change	% Change
Millions of Cayman Islands Dollars						
Import Duties	162.6	156.0	158.4	161.9	3.5	2.2

Taxes on International Trade and Transactions	177.9	172.0	174.3	178.0	3.6	2.1

Source: Cayman Islands Treasury Department

Other coercive revenue: Revenue collected from taxes on property rose by 18.9 percent to \$69.7 million largely due to a rise in land transfer charges of \$15.9 million to \$17.5 million.

For the year, both fines and ‘other taxes’ declined by 19.8 and 19.0 percent, respectively. The reduction in fines reflected lower court and immigration fines, while the fall in ‘other taxes’ emanated from a decrease of \$1.1 million to \$0.2 million in miscellaneous income.

Non-coercive revenue: For 2017, non-coercive revenue which accounts for 6.4 percent of total revenue increased by 20.6 percent to \$48.1 million. This improvement stemmed from increases in all three categories. Sales of goods and services rose by 11.1 percent to \$40.0 million largely due to an increase from service fees. Investment revenue grew from \$3.5 million to \$7.1 million while other operating revenue increased from \$0.4 million to \$1.0 million.

5.3 Expenditure

The central government's total expenditure for 2017 amounted to \$645.4 million, 0.8 percent higher than in 2016 (see Table 5.1). As a proportion of GDP, total expenditure decreased to 20.8 percent in 2017 from 21.6 percent in 2016. The higher level of expenditure was due primarily to an increase of 8.5 percent in gross capital expenditure and net lending.

Current expenditure: Current expenditure rose by \$0.2 million to \$586.0 million in 2017 (see Table 5.6), continuing on the increase of \$40.8 million observed in the previous year. The rise in expenditure for the review period reflected higher spending on personnel as all other current expenditures declined.

Table 5.6: Current Expenditure of the Central Government

	2014	2015	2016	2017	% Change
	Millions of Cayman Islands Dollars				
Current Expenditure	551.2	545.0	585.8	586.0	0.0
Personnel Costs	244.8	243.8	254.5	273.6	7.5
Supplies & Consumables	93.1	83.8	93.6	86.7	(7.4)
Subsidies	126.7	125.2	137.8	133.1	(3.4)
Transfer Payments	27.6	27.5	32.4	29.9	(7.8)
Depreciation	26.3	32.1	34.2	32.8	(3.9)
Interest Payments	29.2	28.0	27.1	25.6	(5.7)
Other Operating Expenses	3.5	4.5	6.2	4.4	(28.8)

Source: Cayman Islands Treasury Department

Personnel costs rose by 7.5 percent to \$273.6 million, largely attributed to an increase in the number of employees in the central government. Consequently, payments for wages and salaries rose by \$17.0 million to \$214.8 million while other personnel costs increased by \$1.2 million to \$2.2 million. Additionally, there was increased spending on health care of \$0.5 million to \$34.5 million.

During 2017, the central government spent \$6.9 million less on supplies and consumables with the total spending amounting total \$86.7 million relative to \$93.6 million in 2016. Lower purchases could be seen in 'other supplies and consumables' which declined by 60.0 percent to \$2.9 million and general insurance, which fell by 24.3 percent to \$4.3 million, among others. There was, however, lower spending on services by 4.6 percent to \$45.8 million.

Payment of subsidies to public entities (statutory authorities and government owned companies) and non-governmental organizations declined by \$4.7 million

to \$133.1 million. The total subsidy was reduced by 1.3 percent to \$99.8 million while the subvention to non-governmental organizations was lowered by 9.4 percent to \$33.2 million. Among public entities, the largest declines in subsidies were registered for Cayman Airways Limited (down by \$1.7 million to \$15.1 million), Cayman National Museum (down by \$0.6 million to \$0.4 million) and Cayman Islands National Insurance Company (down by \$0.4 million to \$29.2 million). In relation to non-governmental organizations, medical care for overseas providers (down by \$2.1 million to \$18.8 million) received the largest reduction in subsidies.

Transfer payments, which are benefits aimed at protecting a section of the population against certain social risks, decreased by 7.8 percent to \$29.9 million. Scholarships and bursaries registered the largest decline, decreasing by \$2.5 million to \$10.4 million. Transfer payments on financial assistance vouchers fell by \$0.6 million to \$1.7 million.

Interest payments for the year fell by 5.7 percent to \$25.6 million in 2017 as the level of outstanding debt fell relative to 2016.

Other executive expenses, which comprise expenditures mainly for social intervention projects and other government measures not classified as transfer payments or subsidies to public authorities, decreased by 28.8 percent to \$4.4 million in 2017. Significant declines were seen among settlement of claims (down by \$0.5 million to no payments) and other executive expenses (down by \$0.5 million to \$0.2 million).

Capital expenditure and net lending: Spending on gross capital expenditure and net lending amounted to \$59.4 million (1.9% of GDP) relative to \$54.7 million (1.8% of GDP) in 2016. The increase in capital expenditure was more than sufficient to cover the 'wear and tear' (depreciation) of old assets and as such net capital expenditure and net lending, which is gross capital expenditure and net lending less depreciation, increased by 29.1 percent to \$26.5 million.

Table 5.7: Capital Expenditure and Net Lending of Central Government

	2014	2015	2016	2017	% Change
	Millions of Cayman Islands Dollars				
Gross Capital Expenditure and Net Lending	44.1	43.7	54.7	59.4	8.5
Equity Investments	10.9	14.8	18.9	9.1	(51.5)
Equity Injections and Working Capital support to Public Entities	26.8	19.6	22.3	35.3	58.2
Executive Assets	5.8	8.9	12.1	15.4	26.8
Net Lending	0.6	0.4	1.4	(0.5)	(133.6)
Net Capital Expenditure and Net Lending	17.8	11.6	20.6	26.5	29.1
Depreciation	26.3	32.1	34.2	32.8	(3.9)

Source: Cayman Islands Treasury Department

Equity injections and working capital support to public entities was the largest contributor to the increase, rising by 58.2 percent to \$35.3 million. The growth in equity injections and working capital support to public entities was due mainly to increased funding provided to the Cayman Islands Development Bank (up by \$7.4 million to \$8.3 million) and Cayman Airways Limited (up by \$7.0 million to \$13.6 million). Capital expenditure on executive assets increased by 26.8 percent to \$15.4 million. This was largely due to higher spending on land purchases (up by \$5.0 million to \$5.4 million) and the George Town Revitalization project (up by \$2.3 million to \$4.4 million). In contrast, there was a reduction in the amount of equity investments for ministries and portfolios which fell by 51.5 percent to \$9.1 million.

5.4 Primary Balance

Given the increase in the overall surplus and the continued reduction in interest payments, the primary balance which is the overall fiscal balance excluding interest payments increased to a surplus of \$166.2 million or 5.3 percent of GDP in 2017 from a surplus of \$126.7 million or 4.3 percent of GDP in 2016. The primary balance is a standard indicator of the central government's capacity to service debt obligations.

Figure 5.2: Primary Fiscal Balance

Sources: Cayman Islands Treasury Department and ESO

5.5 Net Financing and Debt Service Indicators

With the increased surplus for 2017, the government had more cash at its disposal, specifically, the net cash balance increased by \$105.8 million during 2017 compared with an increase of \$72.4 million in the previous year after loan repayments and disbursements (see Table 5.8).

Table 5.8: Financing of Central Government

	2014	2015	2016	2017	% Change

Source: Cayman Islands Treasury Department

With no new borrowings and loan repayments of \$34.8 million, the central government's outstanding debt fell to \$449.1 million at the end of 2017 from \$483.9 million at the end of 2016¹⁵ (see Figure 5.3). The reduction in debt coupled with the increase in GDP for the year placed the debt-to-GDP ratio at 14.5 percent, lower than the 16.3 percent recorded at the end of 2016. At the end of

¹⁵ Central government's outstanding debt is comprised of debt managed directly by the Treasury Department and excludes government-guaranteed debt and other contingent liabilities.

2017, the outstanding debt comprised 59.1 percent from external sources and 40.9 percent from domestic commercial banks.

Figure 5.3: Central Government's Outstanding Debt, Debt-to-GDP Ratios and Debt Composition

Source: Cayman Islands Treasury Department, ESO

The central government's interest payments-to-current revenue ratio declined from 3.8 percent in 2016 to 3.4 percent in 2017 while the debt service-to-GDP and debt service-to-current revenue ratios rose to 1.9 percent and 8.0 percent from 1.8 percent and 7.7 percent in 2016, respectively (see Table 5.9).

6. Macroeconomic Outlook for 2018

The Islands' economic growth in 2018 is projected at 3.0 percent, conditional on the timing of some investment projects, upbeat growth in tourism and stable demand for financial services. Domestic inflation is expected to accelerate relative to 2017 due to increased commodity prices and increased global demand.

6.1 Global Outlook¹⁶

Global growth is forecasted at 3.9 percent in 2018, marginally higher than the 3.8 percent recorded in 2017 (see Table 6.1). Output in advanced economies is anticipated to expand by 2.5 percent, 2.2 percent and 1.7 percent in 2018, 2019 and 2020, respectively. The U.S. economy is projected to generate an improving output growth of 2.9 percent in 2018, before decelerating to 2.7 percent and 1.9 percent in 2019 and 2020, respectively. Economic growth in the U.S. is anticipated to remain strong as the multiplier effect of the fiscal expansion permeates the economy. Notwithstanding, a foreseen continued tightening of interest rates could dampen the growth momentum, despite the Federal Reserve's commitment to maintain some symmetry around the inflation target.

Table 6.1: Macroeconomic Indicators 2015-2020

	2015	2016	2017	2018	2019	2020

Sources: International Monetary Fund (April 2018) for data on the US, World, and Advanced Economies, and the Economics and Statistics Office for Cayman Islands data.

¹⁶ This global outlook is based on information culled from the International Monetary Fund (April 2018) and other international organizations.

Growth in advanced economies is expected to slow down over the medium term once the cyclical upswing and fiscal stimulus has run its course. Global growth should, however, remain robust due to continued recovery and increasing commodity prices. The Euro area is expected to sustain its cyclical upswing in 2018 before tapering off in 2019 and 2020. Economic activity in the Canadian economy is expected to accelerate marginally as commodity prices recover over the medium term. Continued uncertainty is expected to weigh on the U.K., which is projected to expand at rates lower than the average growth among advanced economies.

Global headline inflation is projected to accelerate over the medium term mainly due to higher oil and commodity prices. Oil prices¹⁷ are projected to increase by 18.0 percent in 2018 while non-fuel commodity prices will also be higher by 5.6 percent for the year. In the United States, average inflation is projected at 2.5 percent, higher than the 2.1 percent in 2017. Average inflation among advanced economies is expected at 2.0 percent for 2018, 1.9 percent for 2019 and 2.0 percent for 2020.

6.2 Domestic Growth

Economic output in the Cayman Islands is projected to expand by 3.0 percent in 2018 before decelerating marginally to 2.7 percent and 2.2 percent in 2019 and 2020, respectively. For 2018, all sectors are expected to contribute to growth led by construction, hotels and restaurants, other services, financing and insurance and business services including legal and accounting services (see Tables 6.1 and 6.2).

The construction sector is expected to continue leading the economic expansion in 2018 and over the medium term. Construction is forecasted to grow by 8.4 percent, 10.5 percent and 6.8 percent in 2018, 2019 and 2020, respectively. Approved public sector projects such as the on-going expansion of the Owen Roberts International Airport and preliminary work on the George Town cruise berthing project are expected to continue impacting the sector.

Notwithstanding, growth in construction value added over the medium-term is expected to be driven in large part by private sector projects including those that will increase the accommodation capacity for tourist arrivals and other commercial activities. Some significant projects approved in 2017 and expected to contribute to construction growth over the medium term include: a new hotel

¹⁷ Simple average of prices of U.K. Brent, Dubai Fateh, and West Texas Intermediate Crude Oil.
Source: World Economic Outlook (WEO) by the International Monetary Funds (IMF).

at the old Pageant Beach location and the continued development of Camana Bay, including the expansion of the underpass as well as the construction of a new supermarket. The sector is also expected to be boosted by the construction of a new hotel by NCB Investments as well an 81-unit apartment complex by Periwinkle Ltd.

* 2017 figures are advance estimates based on key indicators; 2018 figures are projections.

The recently completed and forthcoming projects aimed at increasing the accommodation capacity for tourist arrivals are assumed to boost growth in hotels and restaurants, and recreation and culture. This forecast is also conditional on the improving markets, particularly the U.S. which remains the

dominant market for the Islands' tourist services. The forecast for tourism-related services further assumes continued product enhancements and diversification of source markets. Despite the increased capacity and expectations for permanently higher tourism capacity, growth in the sector is expected to slow gradually over the medium term as other regional markets improve their capacity post hurricanes Irma and Maria.

The 2017 UNWTO forecasts for world tourism arrivals are between 4.0 percent and 5.0 percent for 2018. Tourist arrivals within the Americas are expected to grow within the range of 3.5 percent and 4.5 percent, as higher income levels induce the demand for travel. In the Cayman Islands, for the first three months of 2018, stay-over visitors grew by 20.6 percent compared to the same period in 2017; overall stay-over visitors is expected to be higher by 9.0 percent by the end of December 2018. Cruise arrivals to the Cayman Islands in the first three months of 2018 totalled 671,935, 17.6 percent higher than the same period a year ago. Cruise arrivals is expected to remain strong in the remaining months and improve by 7.0 percent for 2018.

The above-cited sectors are expected to boost employment and stimulate growth in domestic demand for services in several sectors such as wholesale and retail trade; transport, storage and communication; real estate, and renting and business activities; and electricity and water supply.

The financial services sector is expected to continue its robust performance over the medium term, conditioned mainly on continuing growth in domestic lending and increase demand propelled by higher domestic and global growth. The potential for the Federal Reserve Bank to gradually increase interest rates will, however, continue to pose a risk to the demand for credit.

6.3 Domestic Inflation

The consumer price index (CPI) inflation rate is forecasted at 2.7 percent in 2018, continuing the acceleration observed in 2017. A gradual increase in the population level, increased demand and higher commodity prices are expected to push up the general price levels over the medium-term. The forecasted acceleration of consumer prices in the U.S. is also expected to induce inflationary pressure on local prices, given that majority of merchandise imports are sourced from U.S. markets.

In the first quarter of 2018, the inflation rate was estimated at 3.2 percent.

6.4 Domestic Labour Market

The demand for labour is expected to track the GDP growth forecasts with an increase in employment opportunities expected from planned development projects. Over the medium-term, new employment is also expected from the Islands' hotel industry with the addition of new facilities coupled with the increase in arrivals.

The supply of local labour is assumed to increase at the average historical growth rate of the working-age population. The forecasted increase in local labour supply (Caymanians and Permanent Residents with rights to work) stems mainly from the natural increase in the working age population. Given the projected rise in the labour force and employment, the unemployment rate is forecasted at 4.4 percent of the labour force in 2018. The rate is the expected to decline to 4.2 percent and 4.0 percent in 2019 and 2020, respectively.
