1. INTRODUCTION

This report presents the findings of the Fall 2020 Labour Force Survey (LFS). The LFS mainly provides information on the characteristics of persons in the labour force (employed and unemployed). It also presents demographic information on the general population, as well as on some characteristics of persons not in the labour force and on household characteristics.

The concepts used in the Survey are in accordance with the International Labour Organization (ILO) guidelines, and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this Report present the methodology (Section 2), the main findings with emphasis on the characteristics of the labour force, and those that are out of the labour force (Section 3), and other findings on housing characteristics (Section 4). The Appendix presents the detailed tables.

2. METHODOLOGY

As in previous LFS, planning and execution of the Fall 2020 LFS was undertaken by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

Sampling design

The sampling frame for the LFS is the ESO's Household Register, which is a listing of all household dwelling units in the Cayman Islands. A comprehensive update of the Register was conducted between May and December 2018. Updates were also based on information from the Spring 2019 LFS and Fall 2019 LFS. As of September 1, 2020, the Register listed 27,723 household dwelling units, which is the sampling frame used for this edition of the LFS.

Samples for the LFS were drawn from districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands. Probability proportionate to household count by district, as determined from the ESO Household Register, was used when allocating the number of selected households across strata. Households were randomly selected from all six districts; within each district, the households were selected with equal probability. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

P_h = probability of selection for the sample households in the h-th stratum (district)

M_h = total number of households in the sample frame for the h-th stratum

m_h = the number of sample households selected in the h-th stratum

Based on the sampling design, a sample of 1,499 household addresses was randomly selected, representing 5.4 percent of the 27,723 households.

Fieldwork

Since the October 2014 LFS, the ESO has been using tablets for electronic data collection in Grand Cayman. However, for the Fall 2020 LFS, paper forms were used in the Sister Islands due to logistical issues. Included in the Appendix (page 120) is a copy of the questionnaire that was uploaded to the tablet for this edition of the LFS.

The reference week for the Fall 2020 LFS was the week September 20th to September 26th, 2020. The data collection took place over a four-week period starting September 27, 2020, and ended on October 18, 2020. The administrative data (births, deaths, and work permits) as of the end of December 2020, which were used in estimating the total population, were collected in early-February 2021.

Due to the restrictions in place because of COVID-19, the ESO did not host its usual in-person training exercise to prepare for the fieldwork. A total of 42 persons, including ESO survey staff, were recruited in Grand Cayman, most of whom have prior household survey experience (census and/or LFS). In the Sister Islands (Cayman Brac and Little Cayman), three persons were recruited to administer the LFS using the questionnaires on paper. Therefore, a total of forty-five persons were eventually selected to conduct interviews in the Cayman Islands.

Weights

The 2020 population estimate was derived by adding the natural increase (births minus deaths) data collected from the Health Services Authority and immigration (work permits and change of status) from the Cayman Islands Customs and Border Control (CBC) Department in the last semester of 2020 to the 2019 year population estimate.

The raising factors for Caymanian, PR/PR-WRW, and Non-Caymanian sub-populations were then calculated based on their respective population estimates,

$$Raising\ factor_{si} = \frac{Population_{si}}{Survey\ Count_{si}}$$

Where:

$Population_{si}$ = estimated population based on administrative data of status_i
(i=Caymanian, Permanent Residents, and Non-Caymanians)

$Survey\ Count_{si}$ = number of individuals from the LFS per status.

The household characteristics were raised using the district response rates adjusted for non-responses at the household level.

Table 1: Response Rate by District, Fall 2020

District	Sample	In Scope	Fully and Partially	Response
Total	1,499	1,157	1,113	96.2
George Town	828	643	621	96.6
West Bay	299	232	219	94.4
Bodden Town	253	199	193	97.0
North Side	34	22	21	95.5
East End	33	22	22	100.0
Sister Islands	52	39	37	94.9

1 Of the original 1499 sample household addresses only 1157 were found out to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

3 Response Rate represents those households fully and partially completed divided by in scope households.

Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPrij) software on tablets; returns for the Sister Islands were entered manually on the tablets. Coding of industries and occupation were also conducted internally using the International Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. A data file was then created with information from all households who completed the LFS interview (fully and partially). Finally, indicators were generated from this file using SPSS, and the final tables presented in this Report were prepared using Excel.

Standard errors for main estimates

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this Report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

Data representing the weighted responses of one individual in the Survey are suppressed and indicated by the symbol "..."

The estimates presented in this Report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*) the

more reliable is the estimate. Because of this, comparisons of the larger estimates may be used with confidence, but small estimates must be treated with caution. The *standard errors*, *confidence intervals*, and *coefficients of variation* (C.V.) of the estimates for key variables for the Fall 2020 LFS are shown in Tables 2 and 3.

3. DEFINITION of KEY CONCEPTS

Population

In the LFS, population means the “resident” population; that is, persons staying or intending to stay in the Cayman Islands for at least six months. Visitors/tourists are not included in the resident population. Persons in institutions for more than six months are excluded. Family members of resident households who were abroad at the time of the survey but had intentions to return to the Islands were also considered residents.

The population is categorised into three sub-populations by immigration status: Caymanians, Permanent Residents (PR), and Non-Caymanians. Permanent Residents include Non-Caymanians married to Caymanians, Permanent Residents, with a government contract, Permanent Residents with rights to work (PR-WRW), and Permanent Residents without rights to work.

Labour Force

The labour force is composed of those members of the non-institutionalised population (i.e. those not in residential institutions such as general penitentiary, retirement homes) 15 years of age and over, who during the reference week were employed or unemployed. All persons in the PR labour force in all tables and sections in this Report refer explicitly to PR-WRW only. Persons categorised as PR without rights to work are included in the Non-Caymanian labour force.

Employed

Employed persons are those who, during the reference week, did any work for pay or profit; that is, paid work in the context of an employer-employee relationship or self-employment. It also includes unpaid family workers who contributed directly to the operation of a farm, business, or professional practice owned or operated by a related member of the household. Based on the International Labour Organization (ILO) guidelines, work can be for as little as an hour during the reference week; it excludes unpaid domestic housework and volunteer work but includes those temporarily away from their jobs.

Unemployed

Unemployed persons are those who, during the reference week, are:

- (a) without work;
- (b) currently available for work and
- (c) actively looking for a job, or had definite arrangements to start a job within 4 weeks.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, status, sex, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

$$\text{Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Not In the Labour Force

These are persons in the non-institutional population (i.e., those not in residential institutions such as general penitentiary, retirement homes) – 15 years of age and over - who, during the reference week, were neither employed nor unemployed.

Household

A household comprises either one person living alone or a group of persons (not necessarily related) living at the same address, with common housekeeping, i.e., sharing at least one meal a day and sharing living arrangements. This concept is used for persons sharing an apartment or house or a one-room together. 4. MAIN FINDINGS

The population of the Cayman Islands was estimated at 65,786. There were 37,815 Caymanians, 5,866 Permanent Residents (of which 4,258 are PR-WRW) and 22,105 Non-Caymanians. The labour force was comprised of 43,922 persons, with 41,644 of them employed and 2,279 unemployed. The labour force participation rate was 80.4 percent, while the unemployment rate was 5.2 percent. The unemployment rate and labour force participation rate varied by sex and status (Tables 4 and 5). Figure 1 illustrates the composition of the population and the labour force.

4.1 POPULATION ESTIMATES

For the calendar year ending December 2020, the estimated population of the Cayman Islands stood at 65,786. The majority of Cayman's population lives in Grand Cayman, particularly in George Town, which accounted for 52.9 percent of the population. Bodden Town had 20.9 percent of the population, and West Bay had 19.7 percent, while North Side population was 2.2 percent and East End 1.8 percent. The Sister Islands' (Cayman Brac and Little Cayman) combined population accounted for 2.6 percent (Table 6).

The average household size was 2.4 persons. North Side had the largest household size with 2.9 persons, while the Sister Islands had the smallest with 1.9 persons.

Table 6: Population Estimates by District, Fall 2020

District	Total Population		Average Household Size	Total Households

Total	65,786	100	2.4	27,084	100

East End	1,184	1.8	2.8	428	1.6
Sister Islands	1,703	2.6	1.9	888	3.3

*The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully- updated Household Register.

Sex and Age

The estimated population in Fall 2020 comprised of 49.9 percent males and 50.1 percent females (Table 7).

Children younger than 15 years old accounted for 17.0 percent of the population, while the elderly (65 years or older) represented 8.3 percent. Together, these two groups are referred to as the 'dependent population' and accounted for one-quarter of the total population (25.3%).

The working-age population, the age group comprising 15 years and older, accounted for 83.0 percent of the population. Persons in this age group are usually working or looking for work and are said to be in their 'productive years'. Within this group, persons aged 15 to 64 years are considered to be the ones on whom children (0-14 years) and elderly (65 and

above) depend. The ratio of the latter population groups to the 15 to 64 years old group shows a dependency ratio¹ of 30.4 percent.

Status

Caymanians comprise the majority (57.5%) of the population, while Non-Caymanians and Permanent Residents had a population share of 33.6 and 8.9 percent, respectively. In comparison to Fall 2019, the Caymanian population was 1.2 percent higher (Table 7).

Among Caymanians, 78.1 percent were in the working-age population compared to 72.6 and 94.3 percent of all Permanent Residents and Non-Caymanians, respectively (Appendix Table 1.5). The latter is expected since the residency of most expatriates is dependent on work permits.

¹ The dependency ratio is calculated: $\frac{\text{Population aged (0-14)+(65+) years}}{\text{Population aged (15-64) years less DK/NS}} * 100$

4.2 LABOUR FORCE

The labour force is comprised of persons in the working-age population who worked, as well as those who, at the time of the survey, did not have a job but were available and looking for work during the reference period. In Fall 2020 LFS, 43,922 persons were in the labour force (Table 8).

Sex and age

In Fall 2020, 51.8 percent of the labour force were males, while females accounted for the remaining 48.2 percent. Most persons in the labour force were reported in the age group 35 to 44 years (28.5%), more than the group 25 to 34 years (23.8%) while the group 45 to 54 years comprised 23.5 percent.

Status

The labour force distribution by nationality status in Fall 2020 indicated that 48.4 percent were Caymanians, 43.6 percent were Non-Caymanians, and 8.1 percent were PR-WRW (Table 8).

Labour Force Participation Rate

The overall labour force participation rate (LFPR)² was 80.4 percent (Table 9). Non-Caymanians overall had the highest labour force participation rate (91.8%) as expected due to the work permits oriented immigration system. Caymanian LFPR was 72.0 percent.

In table 9, for educational attainment, the labour force participation rate ranged from 41.9 percent among those with “primary and below” to 88.5 percent among those with “college or university” education.

By age, those from 25 to 54 years old have the highest LFPRs. The participation rate for females was lower than males in all of the educational attainment categories.

² The number of persons in the labour force expressed as a percentage of the working age population.

4.3 EMPLOYED

The employed consists of persons in the labour force who worked for pay, profit, or family gain for at least one hour during the reference week, which was September 20th to September 26th, 2020. Persons who, for some reason or the other, did not work during the reference week but had a job were also categorised as employed as such persons were temporarily absent from work. The number of employed persons was 41,644 (Table 10).

Sex, age, and status

The unemployed persons between ages 25 and 34 comprised the highest segment of the unemployed (34.9%). The unemployment rate was highest between the ages 15 and 24

years (17.6%). The unemployment rate for males was 4.2% and for females 6.2%. Caymanians had the highest unemployment rate of 8.3 percent; Permanent Residents WRW had 2.8 percent and Non-Caymanians, 2.2 percent (see Table 17a and 17b).

Educational attainment

As shown in Table 17b, among the unemployed Caymanians, those with high school education and middle school education have unemployment rates of 12.0 percent and 11.4 percent, respectively. Generally, persons with high school and middle school education have the highest unemployment rates of 7.5 percent and 7.0 percent, respectively.

Among the PR-WRW and Non-Caymanians, unemployed persons who had university/college education had the highest rates and had similar unemployment rates of 3.1 percent.

Reasons for not having work

Majority of the unemployed persons (70.4%) stated “no work available” as the main reason for being unemployed. This reason was also cited by most males (67.2%) and females (72.7%). Similar trends were also seen among Caymanians (74.3%) and unemployed PR-WRW (100%) and Non-Caymanians (47.1%) as the main reason for not having work (see Appendix Tables 5.8 and 5.9).

Job search

When asked about their main methods of job search, which was a multiple response question, the most popular responses among the unemployed were “send résumé” (63.2%) and “ask friends” (55.7%). Persons who were classified as “unemployed” also chose “to contact an employer” (48.5%) and register with Workforce Opportunities and Residency Cayman (WORC) (44.1%) (Appendix Tables 5.14 and 5.15).

Prior work and period without work

The majority (87.4%) of the unemployed stated they had previous jobs; of these, only 32.4 percent have been without work for more than one year (Appendix Tables 5.16 and 5.18).

Among the unemployed Caymanians, 1,545 (87.8%) had previous jobs while 214 (12.2%) never had a job; 35.4 percent of those with previous jobs were unemployed for more than a year (Appendix Tables 5.16, 5.17, 5.18 and 5.19).

Training

Approximately five out of ten of the unemployed persons (53.8%) received training for a specific occupation. Among unemployed Caymanians, 51.4 percent had the training, while most Non-Caymanians (64.7%) received training for a specific occupation (Appendix Table 5.26).

4.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work, or did not seek work during the reference week were classified as not being in the labour force. A total of 10,697 persons were not in the labour force, the majority of whom were Caymanians (77.3%). Females accounted for 57.9 percent of the persons, not in the labour force. Most of the persons outside the labour force were aged 65 years and older (32.5%) and those aged 15 –24 years old (32.3%). Persons who had high school or lower-level education (62.8%) made up most of those not in the labour force (Table 18 and Appendix Tables 6.1 and 6.2).

When asked for the reasons for not working, most of the persons not in the labour force stated they were “retired/elderly” (42.9%) or “home/family duties” (33.3%). “Retirees” and persons doing “home/family duties”. Permanent Residents WRW (37.0%) and Non-Caymanians (34.5%) outside the labour force were mostly with “home/family duties” or “student in training” 25.9 percent and 22.4 percent, respectively also dominate the composition of the Caymanian sub-group.

4.5.1 POTENTIAL LABOUR FORCE

Based on the ILO definition, the potential labour force consists of all working age persons (15 years and older) who, during the reference week, were neither employed nor unemployed and were either classified as unavailable jobseekers or available potential job seekers. *Unavailable jobseekers* are persons who carried out activities to ‘seek employment,’ were not ‘currently available’ but would become available within a subsequent short period. *Available potential jobseekers* are persons who did not carry out activities to ‘seek employment’ but wanted employment and were ‘currently available.’ Of the 10,697 persons who were not in the labour force, 944 persons were considered potential labour force, all of whom carried out job search for a job in the future but are not

currently available. The majority of these persons were Caymanians (55.4%) and aged 35 to 44 (20.8%) (see Appendix Table 6.30).

5. OTHER FINDINGS

5.1 HOUSING CHARACTERISTICS

The majority of households (48.0%) were in rented homes, while 47.4 percent owned them (Table 20). Majority of the households had internet connectivity (92.3%), computer/laptops (73.1%), cable/satellite television (47.9%), and air-condition (95.6%). Notably, only 30.1 percent have a land-line telephone, but almost all (98.5%) had at least one cell phone. Approximately 12.1 percent has a domestic helper, and 52.4 percent of households reported having housing structure insurance. The total number of households was estimated to be 27,084, based on post-survey results³
