1. INTRODUCTION

This report presents the findings of the Fall 2022 Labour Force Survey (LFS). The LFS mainly provides information on the characteristics of persons in the labour force (employed and unemployed). It also presents demographic information on the general population, some characteristics of persons not in the labour force, and household characteristics.

The concepts used in the Survey are in accordance with the International Labour Organization (ILO) guidelines, and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this Report present the methodology (Section 2), the main findings with emphasis on the characteristics of the labour force, and those that are out of the labour force (Section 3), and other findings on housing characteristics (Section 4). The Appendix presents the detailed tables.

2. METHODOLOGY

As in previous LFS, planning and execution of the Fall 2022 LFS was undertaken by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

Sampling design

The sampling frame for the LFS is the ESO's Household Register, which is a listing of all household dwelling units in the Cayman Islands. The last update of the Register was conducted in April 2021. Updates were also based on information from the 2021 Population and Housing Census. As of January 25, 2022, the Register listed 29,699 household dwelling units, which is the sampling frame used for this edition of the LFS.

Samples for the LFS were drawn from districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands. Probability proportionate to household count by district, as determined from the ESO Household Register, was used when allocating the number of selected households across strata. Households were randomly selected from all six districts; within each district, the households were selected with equal probability. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

P_h = probability of selection for the sample households in the h-th stratum (district)

M_h = total number of households in the sample frame for the h-th stratum

m_h = the number of sample households selected in the h-th stratum

Based on the sampling design, a sample of 2,000 household addresses was randomly selected, representing 6.7 percent of the 29,699 households.

Fieldwork

Since the October 2014 LFS, the ESO has been using tablets for electronic data collection in Grand Cayman. Included in the Appendix (page 124) is a copy of the questionnaire that was uploaded to the tablet for this edition of the LFS.

The reference week for the Fall 2022 LFS was the week September 24th to October 1st, 2022. The data collection took place over a four-week period commencing October 2, 2022. The administrative data (births, deaths, and work permits) as of the end of December 2022, which were used to estimate the total population, were collected in early-January 2023.

The ESO hosted its usual in-person training exercise to prepare for the fieldwork. A total of 57 persons, including ESO survey staff, were recruited in Grand Cayman, most of whom have prior household survey experience (census and/or LFS). In the Sister Islands (Cayman Brac and Little Cayman), 3 persons were recruited to administer the LFS questionnaire using tablets. Therefore, a total of 60 persons were eventually selected to conduct interviews in the Cayman Islands.

Weights

The 2022 population estimate was derived by adding the natural increase (births minus deaths) data collected from the Health Services Authority and immigration (work permits, permanent residents and change of status) from the Cayman Islands Customs and Border Control (CBC) Department in the second semester of 2022 to the 2021 year population estimate.

The raising factors for Caymanian, PR/PR-WRW, and Non-Caymanian sub-populations were then calculated based on their respective population estimates,

$$Raising\ factor_{si} = \frac{Population_{si}}{Survey\ Count_{si}}$$

Where:

$Population_{si}$ = estimated population based on administrative data of status_i
(i=Caymanian, Permanent Residents, and Non-Caymanians)

$Survey\ Count_{si}$ = number of individuals from the LFS per status.

The household characteristics were raised using the district response rates adjusted for non-responses at the household level.

Table 1: Response Rate by District, Fall 2022

District	Sample Size ¹	In Scope Households ²	Fully and Partially Completed	Response Rate ³
Total	2,000	1,725	1,678	97.3
George Town	1,035	883	856	96.9
West Bay	419	358	352	98.3
Bodden Town	370	332	322	97.0
North Side	51	42	40	95.2
East End	48	43	43	100.0
Sister Islands	77	67	65	97.0

1 Of the original 2000 sample household addresses only 1725 were found to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3 - Refusals.

3 Response Rate represents those households fully and partially completed divided by in scope households.

Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPj) software on tablets. Coding of industries and occupation were also conducted internally using the International Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CSPRO (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. An anonymised data file was then created with information from all households who completed the LFS interview (fully and partially). Finally, indicators were generated from this file using SPSS, and the final tables presented in this Report were prepared using Excel.

Standard errors for main estimates

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this Report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

Data representing the weighted responses of one individual in the Survey are suppressed and indicated by the symbol "...".

The estimates presented in this Report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*) the

more reliable is the estimate. Because of this, comparisons of the larger estimates may be used with confidence, but small estimates must be treated with caution. The *standard errors*, *confidence intervals*, and *coefficients of variation* (C.V.) of the estimates for key variables for the Fall 2022 LFS are shown in Tables 2 and 3.

3. DEFINITION of KEY CONCEPTS

Population

In the LFS, population means the “resident” population; that is, persons staying or intending to stay in the Cayman Islands for at least six months. Visitors/tourists are not included in the resident population. Persons in institutions for more than six months are excluded. Family members of resident households who were abroad at the time of the survey but had intentions to return to the Islands were also considered residents.

The population is categorised into three sub-populations by immigration status: Caymanians, Permanent Residents (PR), and Non-Caymanians. Permanent Residents include Non-Caymanians married to Caymanians, Permanent Residents, with a government contract, Permanent Residents with rights to work (PR-WRW), and Permanent Residents without rights to work.

Labour Force

The labour force is composed of those members of the non-institutionalised population (i.e. those not in residential institutions such as general penitentiary, retirement homes) 15 years of age and over, who during the reference week were employed or unemployed. All persons in the PR labour force in all tables and sections of this Report refer explicitly to PR-WRW only. Persons categorised as PR without rights to work are included in the Non-Caymanian labour force.

Employed

Employed persons are those who, during the reference week, did any work for pay or profit; that is, paid work in the context of an employer-employee relationship or self-employment. It also includes unpaid family workers who contributed directly to the operation of a farm, business, or professional practice owned or operated by a related member of the household. Based on the International Labour Organization (ILO) guidelines, work can be for as little as one hour during the reference week; it excludes unpaid domestic housework and volunteer work but includes those temporarily away from their jobs.

Unemployed

Unemployed persons are those who, during the reference week, are:

- (a) without work;
- (b) currently available for work and
- (c) actively looking for a job, or had definite arrangements to start a job within 4 weeks.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, status, sex, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

$$\text{Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Not In the Labour Force

These are persons in the non-institutional population (i.e., those not in residential institutions such as general penitentiary, retirement homes) – 15 years of age and over - who, during the reference week, were neither employed nor unemployed.

Household

A household comprises either one person living alone or a group of persons (not necessarily related) living at the same address, with common housekeeping, i.e., sharing at least one meal a day and sharing living arrangements. This concept is used for persons sharing an apartment or house or a one-room together. For further clarification, please see:

<https://www.eso.ky/labourforcesurveys.html>.

Table 2: Standard Errors of Key Labour Force Indicators by Status

Selected Characteristics	Estimate	Standard Errors	(95%) Confidence Interval		C.V

4. MAIN FINDINGS

The population of the Cayman Islands was estimated at 81,546, representing 38,724 Caymanians, 6,629 Permanent Residents (of which 4,058 were PR-WRW) and 36,193 Non-Caymanians. Among these, the labour force was made up of 57,582 individuals, of which 56,355 were employed, and 1,227 were unemployed. From the 2022 LFS Fall results, national labour market indicators were derived, including the labour force participation rate of 83.0 percent and the unemployment rate of 2.1 percent, which both varied by status and sex (Tables 4 and 5). Figure 1 illustrates the composition of the population and the labour force.

Table 4: Main Labour Force Indicators by Status, Fall 2022

	Total	Caymanian	Permanent Res.	Non-Caymanian
Population	81,546	38,724	6,629	36,193

Unemployment Rate	2.1	2.1	2.2

Figure 1: Main Labour Force Composition, Fall 2022

4.1 POPULATION ESTIMATES

The end-of-year population of the Cayman Islands was estimated at 81,546 for the period ending December 2022. The majority of the population resides in Grand Cayman, particularly in George Town, which accounted for 50.2 percent or roughly half of total population. Followed by the districts of West Bay and Bodden Town, with 20.8 percent each. While East End and North Side accounted for 2.8 and 2.6 percent, respectively, and the combined population of the Sister Islands' (Cayman Brac and Little Cayman) represented 2.8 percent (Table 6).

The average household size was estimated at 2.39 persons. Bodden Town and North Side had the largest with averages of 2.75 and 2.73 persons, respectively, while the Sister Islands had the smallest with an average of 1.76 persons per household.

Table 6: Population Estimates by District, Fall 2022

District	Total Population		Average Household Size	Total Households	
	#	%		#	%
Total	81,546	100.0	2.39	34,133	100.0
George Town	40,957	50.2	2.28	18,003	52.7
West Bay	16,943	20.8	2.42	7,012	20.5
Bodden Town	16,957	20.8	2.75	6,166	18.1
North Side	2,110	2.6	2.73	774	2.3
East End	2,274	2.8	2.63	866	2.5
Sister Islands	2,304	2.8	1.76	1,313	3.8

*The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.

Sex and Age

The estimated population in Fall 2022 comprised 50.7 percent males and 49.3 percent females (Table 7).

Children under the age of 15 years represented 14.9 percent of the population, while the elderly (65 years or older) accounted for 7.5 percent. These two groups are jointly referred to as the 'dependent population' and accounted for 22.4 percent of the total population.

The working-age population, defined as those 15 years and older, accounted for 85.1 percent of the population. These persons are usually engaged in work or work-search activities and are said to be in their 'productive years'. Within this group, persons aged 15 to 64 years are considered

those whom the dependent population (children and the elderly) are reliant. The ratio of dependents to the 15 to 64 years age group results in a dependency ratio¹ of 31.0 percent.

Table 7: Population Estimate by Selected Characteristics

Selected Characteristics	Census 2021 Population		Fall 2022 Population		Fall 2022/Census 2021 Change	
	#	%	#	%	#	%

Non-Caymanian	26,680	37.5	36,193	44.4	9,513	35.7
Age Group						
0 - 14	11,315	15.9	12,164	14.9	849	7.5
15 - 24	6,806	9.6	7,011	8.6	205	3.0
25 - 34	12,221	17.2	16,089	19.7	3,868	31.6
35 - 44	13,956	19.6	16,784	20.6	2,828	20.3
45 - 54	12,499	17.6	14,331	17.6	1,832	14.7
55 - 64	8,191	11.5	8,777	10.8	586	7.1
65+	5,602	7.9	6,110	7.5	508	9.1
DK/NS	515	0.7	281	0.3	(235)	(45.5)

* Due to rounding, sub-totals may differ from the sum

Status

The population of the Cayman Islands is primarily composed of Caymanians (47.5%), followed by Non-Caymanians (44.4%), with the remainder being Permanent Residents (8.1%). In comparison to Census 2021, the Caymanian population grew by 1.8 percent (Table 7).

The working-age population comprised 79.2 percent of all Caymanians compared to 91.5 and 90.2 percent of all Permanent Residents and Non-Caymanians, respectively (Appendix Table 1.5).

¹ The dependency ratio is calculated: $\frac{\text{Population aged (0-14)+(65+) years}}{\text{Population aged (15-64) years less DK/NS}} * 100$

4.2 LABOUR FORCE

The labour force is represented by persons of working age (15 years and older) who worked, as well as those who at the time of the survey, did not have a job but were available and looking for work during the reference period. The Fall 2022 LFS recorded 57,582 persons in the labour force (Table 8).

Table 8: Labour Force by Selected Characteristics, Fall 2022

Selected Characteristics	Labour Force	
	#	% Distribution
Total	57,582	100.0

College / University	18,844	32.7
Other	40	0.1
Not Stated	484	0.8

* Due to rounding, sub-totals may differ from the sum

Sex and age

In Fall 2022, 53.6 percent of the labour force were males, while females accounted for the remaining 46.4 percent. The labour force mainly comprised of persons aged 35 to 44 years (27.4%), followed by those 25 to 34 years (26.2%) and persons 45 to 54 years (23.5%).

Status

The distribution of the labour force by status shows that 38.0 percent were Caymanians, 54.9 percent were Non-Caymanians, and 7.0 percent were PR-WRW (Table 8).

Labour Force Participation Rate

Table 9 shows the sex distribution of labour force participation by selected demographic characteristics, including status, age group and educational attainment. The overall labour force participation rate (LFPR)² was 83.0 percent (Table 9). By status, Permanent Residents WRW and Non-Caymanians had notably higher labour force participation rates of 93.5 percent and 92.0 percent, respectively when compared to Caymanians, who had an LFPR of 71.4 percent. Due to the work permit-oriented immigration system, this was an expected result.

Among educational attainment levels, the labour force participation rates ranged from 38.9 percent among those with no achievement (“None”) to 90.4 percent among those with “College/University” education. Age-specific LFPRs reveal that persons 25 to 54 were most likely engaged in work or work-search activities. Among these, participation rates were highest among those 45 to 54 (94.4%) years age group and lowest among persons 25 to 34 (93.6%) years.

Further analysis shows that males (87.6%) had higher rates of labour force participation than females (78.3%). This pattern is also evident in educational attainment, as males recorded larger LFPRs at all levels of education in comparison to females.

² The number of persons in the labour force expressed as a percentage of the working age population.

Table 9: Labour Force Participation Rate by Selected Characteristics, Fall 2022

Selected Characteristics	Total	Male	Female
Total	83.0	87.6	78.3
Status

4.3 EMPLOYED

The employed refers to persons in the labour force who worked for pay, profit, or family gain for at least one hour during the reference week, September 24th to October 1st, 2022. Persons who did not work during this period but had a job were also categorised as employed since they were only temporarily absent from work. The estimated employed population was 56,355 persons (Table 10).

Sex and Age

Among the employed, males (30,202) outnumbered females (26,153), with a percentage share of 53.6 (Table 10). The employed labour force was mainly represented by persons aged 25 to 54 years which accounted for 77.3 percent. While persons aged 15 to 24 years and the elderly (65+ years), respectively represented 5.8 and 3.6 percent of the employed labour force.

Status

A total of 21,095 Caymanians accounted for 37.4 percent of the employed labour force. Employed Non-Caymanians were estimated at 31,302, and Permanent Residents WRW at 3,957 (Table 10).

Employment Status

The employed labour force primarily comprised of employees, who worked for someone, with a share of 91.3 percent of employed persons. Self-employed persons (business owners with and without employees) accounted for 8.3 percent of the employed labour force. Among employed males, 10.9 percent were self-employed compared to 5.3 percent among females. In contrast, Caymanians (17.0%) and Permanent Residents WRW (16.8%) were notably more likely employed in their own businesses, relative to Non-Caymanians (1.4%) (Tables 11 and 12).

Occupation

The top five occupations, which collectively accounted for 79.1 percent of total employment, were Professionals (18.8%); Service and Sales Workers (17.0%); Craft and Related Trades Workers (16.5%); Elementary Occupations (14.2%), and Technicians and Associate Professionals (12.6%) (Figure 2).

Analysis by sex reveals that males were most commonly employed as Craft and Related Trades Workers (29.0%); Professionals (14.8%); Technicians and Associate Professionals (11.6%); Elementary Occupations (11.3%); and Service and Sales Workers (11.2%). While employed females were mainly occupied as Service and Sales Workers (23.7%); Professionals (23.3%); Elementary Occupations (17.6%); Technicians and Associate Professionals (13.8%), and Managers (9.5%) (Appendix Table 3.26).

The top occupations among employed Caymanians were Professionals (18.5%), Technicians and Associate Professionals (17.6%), Managers (15.8%), Service and Sales workers (12.8%) and Craft and Related Trades Workers (11.8%). Non-Caymanians were mainly occupied as Service and Sales Workers (20.3%); Elementary Occupations (20.3%); Craft and Related Trades Workers (20.0%); Professionals (17.8%), and Technicians and Associate Professionals (9.1%). Permanent Residents WRW predominantly worked as Professionals (27.9%); Managers (17.8%); Technicians and Associate Professionals (14.2%); Craft and Related Trades Workers (13.2%), and Service and Sales Workers (12.7%) (Appendix Table 3.27).

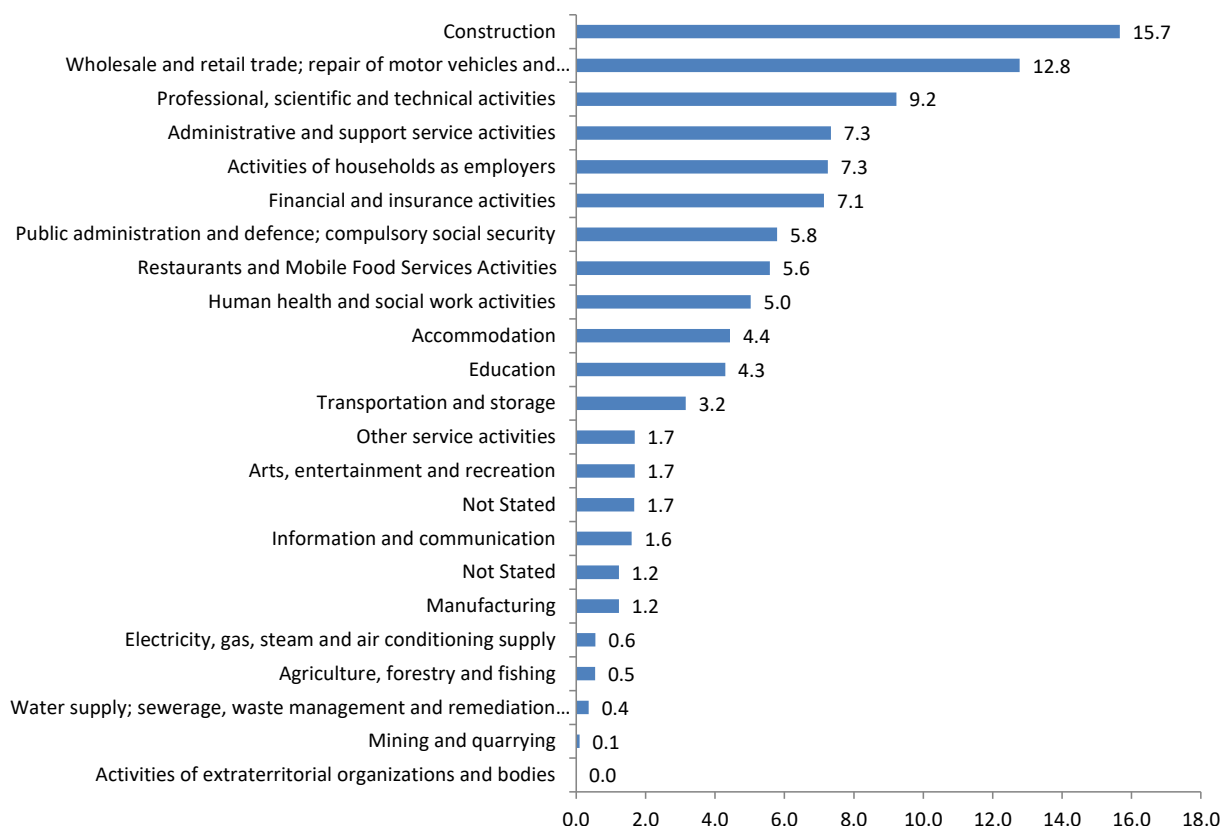

Figure 2: Employment by Occupation Percentage Distribution, Fall 2022

Industry

The top six industries accounted for 59.4 percent of the employed labour force. They were as follows: construction (15.7%); wholesale and retail trade (12.8%); professional, scientific and technical activities (9.2%); administrative and support service activities (7.3%); activities of households as employers (7.3%) and financial and insurance activities (7.1%) (see Figure 3).

Figure 3: Employment by Industry Percentage Distribution, Fall 2022

Hours of Work

The number of hours worked is defined as the number of hours worked during the reference period of September 24th to October 1st, 2022, by the respondent at his/her job(s), which includes all hours spent on work activities and overtime hours but excludes vacation leave, sick leave, public holidays and other forms of paid or unpaid leave.

Employed persons were found to have worked 37.9 hours on average per week. Further analysis shows that males worked an average of 1.7 hours more than females. While a breakdown by status reveals that Non-Caymanians worked 38.9 hours on average per week, compared to Permanent Residents WRW who worked 37.5 hours and Caymanians with an average of 36.4 hours worked per week (Appendix Tables 3.32 and 3.33).

Earnings from Main Job

Approximately 59.2 percent of employed persons earned CI\$2,400 or more per month (Tables 13 and 14). The proportion was higher among employed males (63.3%) compared to employed females (54.5%). In comparison, Permanent Residents WRW (76.1%) and Caymanians (72.4%) were more likely than Non-Caymanians (48.2%) to have earned CI\$2,400 or more per month.

Employment by the size of business

The largest proportion of the employed labour force worked in large businesses with 50 or more employees (30.9%) and in micro-business with one to five employees (28.9%). Similarly, the highest proportion of Caymanians (36.4%) and Permanent Residents WRW (30.5%) were also employed by large businesses, while Non-Caymanians (30.4%) were most likely employed by micro-businesses (Table 15a and 15b).

4.3.1 UNDEREMPLOYED

‘Underemployment’ is defined as ‘Involuntary part-time’ work, where workers who could (and would like to) be working for a full work week can find only part-time work. The underemployed accounted for 5.1 percent of the employed in Fall 2022 (Table 16). The underemployment rate for males was 4.9 percent, compared to females, with a rate of 5.3 percent. Caymanians and Permanent Residents WRW had above-average underemployment rates of 6.4 percent and 6.6

percent respectively, while Non-Caymanians had a lower rate of 4.0 percent. More detailed analysis shows that the rate of underemployment was highest among the employed population whose highest level of education was “primary and below” (9.3%), (Table 16).

4.4 UNEMPLOYED

The unemployed labour force totalled 1,227 and led to an unemployment rate of 2.1 percent (Table 17a). The unemployed labour force mainly consisted of persons aged 25 to 34 years (421 persons), accounting for 34.3 percent of the total unemployed. Overall, males (640) outnumbered females (587) among the unemployed, while the total unemployed Caymanians stood at 796 persons.

* Due to rounding, sub – totals may differ from the sum

$$** \text{ Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Sex, age, and status

The rate of unemployment was similarly distributed among males (2.1%) and females (2.2%) while varying by age, with rates ranging from 6.5 percent among the labour force aged 15 to 24 to rates under 1.0 percent among those 65 years and older (0.9%) and 45 to 54 years (0.8%). The 2022 Fall LFS determined that the highest unemployment rate was among Caymanians (3.6%), followed by Permanent Residents WRW with a rate of 2.5 percent, while the lowest rate of 1.0 percent was observed among Non-Caymanians (see Table 17b).

Educational attainment

Table 17b shows that among Caymanians and Permanent Resident WRW, the likelihood of unemployment generally decreased as their level of education increased. However, the opposite was true for Non-Caymanians, as those who were College/University graduates (2.2%) were about four times more likely to be unemployed than other Non-Caymanians with middle (0.5%) or high school (0.5%) education.

Reasons for not having work

The majority of unemployed persons (53.2%) reported “no work available” as their main reason for being unemployed. This reason was also most frequently cited among males (61.6%) and females (44.0%). This reason was also mainly reported among Caymanians (68.9%) and PR-WRW (60.0%), while unemployed Non-Caymanians (43.4%) identified “waiting for work permit” as their main reason for not having work (see Appendix Tables 5.8 and 5.9).

Job search

When asked about the various methods utilised to search for jobs (a multiple response question), the most popular responses among the unemployed were “ask friends or relatives” (46.9%), “send out résumés or complete applications” (45.6%), “contact an employer directly” (44.7%) and “check websites” (36.5%) (Appendix Tables 5.14 and 5.15).

Prior work and period without work

The majority (74.8%) of the unemployed reported that they had previous jobs; of these, 45.5 percent have been without work for more than one year (Appendix Tables 5.16 and 5.18).

Among unemployed Caymanians, 725 or 91.1 percent were found to have previously held a job, and of these, 354 or 48.8 percent were unemployed for more than a year (Appendix Tables 5.17 and 5.19).

Training

A total of 581 (47.4%) unemployed persons reported that they had been trained for an occupation. The majority of Non-Caymanians (56.6%) expressed that they had received training, while occupational training was less likely among unemployed Caymanians (44.4%) and PR-WRW (40.0%) (Appendix Table 5.26).

4.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work, or did not seek work during the reference week were classified as not being in the labour force. A total of 11,801 persons were not in the labour force, most of whom were Caymanians (74.3%). The population not in the labour force was predominantly represented by females (62.9), persons 65 years of age and older (34.3%), followed by those 15-24 years (29.6%). This population also mainly included persons with high school (42.7) education as their highest level of attainment, followed by those with up to post secondary (17.7%) or college/university (16.9) education (Table 18).

When asked the reasons for not working, the most frequent responses were “retired/elderly” (36.3%) or “student/in training” (29.1%). A similar pattern was observed by sex, while with respect to status, Non-Caymanians (25.5%) and PR-WRW (28.2%) most frequently identified “student/in training” as their main reason for not working (Table 19).

4.5.1 POTENTIAL LABOUR FORCE

Based on the ILO definition, the potential labour force consists of all working-age persons (15 years and older) who, during the reference week, were neither employed nor unemployed and were either classified as unavailable jobseekers or available potential job seekers. *Unavailable jobseekers* are persons who carried out activities to ‘seek employment’ and were not ‘currently available’ but would become available within a subsequent short period. *Available potential jobseekers* are persons who did not carry out activities to ‘seek employment’ but wanted employment and were ‘currently available.’

Of the 11,801 persons who were not in the labour force, 803 persons were classified as potential labour force. The majority of these persons were Caymanian (68.2%), female (67.6%) and by age, mainly comprised of persons 45 to 54 years (22.4%) and 25 to 34 years (20.2%) (see Appendix Table 6.30).

5. OTHER FINDINGS

5.1 HOUSING CHARACTERISTICS

Most of the households (51.8%) rented the accommodation they occupied, while 44.7 percent owned their homes (Table 20). Approximately 9 out of every 10 households responded affirmatively to having cell phones (98.8%), air condition (95.2%) and internet connectivity (94.0%). While only 17.9 percent possessed landline telephones, and 8.7 percent of households had domestic helpers. The total number of households was estimated to be 34,133, based on post-survey results³.

Table 20: Percent of Households by Selected Characteristics, Fall 2022

Total Households	34,133
Owned Households	44.7
Rented Households	51.8
With Domestic Helpers	8.7
With Landlines	17.9
With Cell Phones	98.8
With Internet Connectivity	94.0
With Computer/Laptops	68.5
With Tablets/E-Readers	46.8
With Cable/Satellite	39.0
With Internet TV	66.3
With Air Condition	95.2
With Housing Structure Insurance	53.3

³ The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.
