1. INTRODUCTION

This report presents the findings of the Spring 2022 Labour Force Survey (LFS). The LFS mainly provides information on the characteristics of persons in the labour force (employed and unemployed). It also presents demographic information on the general population, as well as on some characteristics of persons not in the labour force as well as household characteristics.

The concepts used in the Survey are in accordance with the International Labour Organization (ILO) guidelines, and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this Report present the methodology (Section 2), the main findings with emphasis on the characteristics of the labour force, and those that are out of the labour force (Section 3), and other findings on housing characteristics (Section 4). The Appendix presents the detailed tables.

2. METHODOLOGY

As in previous LFS, planning and execution of the Spring 2022 LFS was undertaken by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

Sampling design

The sampling frame for the LFS is the ESO's Household Register, which is a listing of all household dwelling units in the Cayman Islands. The last update of the Register was conducted in April 2021. Updates were also based on information from the 2021 Population and Housing Census. As of January 25, 2022, the Register listed 29,699 household dwelling units, which is the sampling frame used for this edition of the LFS.

Samples for the LFS were drawn from districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands. Probability proportionate to household count by district, as determined from the ESO Household Register, was used when allocating the number of selected households across strata. Households were randomly selected from all six districts; within each district, the households were selected with equal probability. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

P_h = probability of selection for the sample households in the h-th stratum (district)

M_h = total number of households in the sample frame for the h-th stratum

m_h = the number of sample households selected in the h-th stratum

Based on the sampling design, a sample of 2,001 household addresses was randomly selected, representing 6.7 percent of the 29,699 households.

Fieldwork

Since the October 2014 LFS, the ESO has been using tablets for electronic data collection in Grand Cayman. Included in the Appendix (page 120) is a copy of the questionnaire that was uploaded to the tablet for this edition of the LFS.

The reference week for the Spring 2022 LFS was the week April 24th to April 30th, 2022. The data collection took place over a six-week period starting May 1, 2022, and ended on June 7, 2022. The administrative data (births, deaths, and work permits) as of the end of June 2022, which were used in estimating the total population, were collected in early-July 2022.

The ESO hosted its usual in-person training exercise to prepare for the fieldwork. A total of 60 persons, including ESO survey staff, were recruited in Grand Cayman, most of whom have prior household survey experience (census and/or LFS). In the Sister Islands (Cayman Brac and Little Cayman), three persons were recruited to administer the LFS using the questionnaires on tablets. Therefore, a total of sixty-four persons were eventually selected to conduct interviews in the Cayman Islands.

Weights

The 2022 population estimate was derived by adding the natural increase (births minus deaths) data collected from the Health Services Authority and immigration (work permits, permanent residents and change of status) from the Cayman Islands Customs and Border Control (CBC) Department in the first semester of 2022 to the 2021 year population estimate.

The raising factors for Caymanian, PR/PR-WRW, and Non-Caymanian sub-populations were then calculated based on their respective population estimates,

$$\text{Raising factor}_{si} = \frac{\text{Population}_{si}}{\text{Survey Count}_{si}}$$

Where:

Population_{si} = estimated population based on administrative data of status_i
(i=Caymanian, Permanent Residents, and Non-Caymanians)

Survey Count_{si} = number of individuals from the LFS per status.

The household characteristics were raised using the district response rates adjusted for non-responses at the household level.

Table 1: Response Rate by District, Spring 2022

Table 1: Response Rate by District

District	Sample	In Scope	Fully and Partially	Response
Total	2,001	1,791	1,743	97.3
George Town	1,032	898	875	97.4
West Bay	432	402	398	99.0
Bodden Town	369	341	327	95.9
North Side	49	40	39	97.5
East End	47	42	40	95.2
Sister Islands	72	68	64	94.1

1 Of the original 2001 sample household addresses only 1791 were found to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

3 Response Rate represents those households fully and partially completed divided by in scope households.

Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPrj) software on tablets. Coding of industries and occupation were also conducted internally using the International Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. A data file was then created with information from all households who completed the LFS interview (fully and partially). Finally, indicators were generated from this file using SPSS, and the final tables presented in this Report were prepared using Excel.

Standard errors for main estimates

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this Report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

Data representing the weighted responses of one individual in the Survey are suppressed and indicated by the symbol "..."

The estimates presented in this Report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of

the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*) the more reliable is the estimate. Because of this, comparisons of the larger estimates may be used with confidence, but small estimates must be treated with caution. The *standard errors*, *confidence intervals*, and *coefficients of variation* (C.V.) of the estimates for key variables for the Spring 2022 LFS are shown in Tables 2 and 3.

3. DEFINITION of KEY CONCEPTS

Population

In the LFS, population means the “resident” population; that is, persons staying or intending to stay in the Cayman Islands for at least six months. Visitors/tourists are not included in the resident population. Persons in institutions for more than six months are excluded. Family members of resident households who were abroad at the time of the survey but had intentions to return to the Islands were also considered residents.

The population is categorised into three sub-populations by immigration status: Caymanians, Permanent Residents (PR), and Non-Caymanians. Permanent Residents include Non-Caymanians married to Caymanians, Permanent Residents, with a government contract, Permanent Residents with rights to work (PR-WRW), and Permanent Residents without rights to work.

Labour Force

The labour force is composed of those members of the non-institutionalised population (i.e. those not in residential institutions such as general penitentiary, retirement homes) 15 years of age and over, who during the reference week were employed or unemployed. All persons in the PR labour force in all tables and sections of this Report refer explicitly to PR-WRW only. Persons categorised as PR without rights to work are included in the Non-Caymanian labour force.

Employed

Employed persons are those who, during the reference week, did any work for pay or profit; that is, paid work in the context of an employer-employee relationship or self-employment. It also includes unpaid family workers who contributed directly to the operation of a farm, business, or professional practice owned or operated by a related member of the household. Based on the International Labour Organization (ILO) guidelines, work can be for as little as an hour during the reference week; it excludes unpaid domestic housework and volunteer work but includes those temporarily away from their jobs.

Unemployed

Unemployed persons are those who, during the reference week, are:

- (a) without work;
- (b) currently available for work and
- (c) actively looking for a job, or had definite arrangements to start a job within 4 weeks.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, status, sex, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

$$\text{Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Not In the Labour Force

These are persons in the non-institutional population (i.e., those not in residential institutions such as general penitentiary, retirement homes) – 15 years of age and over - who, during the reference week, were neither employed nor unemployed.

Household

A household comprises either one person living alone or a group of persons (not necessarily related) living at the same address, with common housekeeping, i.e., sharing at least one meal a day and sharing living arrangements. This concept is used for persons sharing an apartment or house or a one-room together. For further clarification, please see:

<https://www.eso.ky/labourforcesurveys.html>.

4. MAIN FINDINGS

The population of the Cayman Islands was estimated at 78,554, representing 38,425 Caymanians, 6,756 Permanent Residents (of which 4,156 were PR-WRW) and 33,373 Non-Caymanians. Among these, 54,398 persons made up the labour force, with 52,764 employed and 1,634 unemployed. These results translate to an overall labour force participation rate of 82.3 percent, which varied by sex and status. While the unemployment rate stood at 3.0 percent and also varied by status but held constant by sex (Tables 4 and 5). Figure 1 illustrates the composition of the population and the labour force.

Table 4: Main Labour Force Indicators by Status, Spring 2022

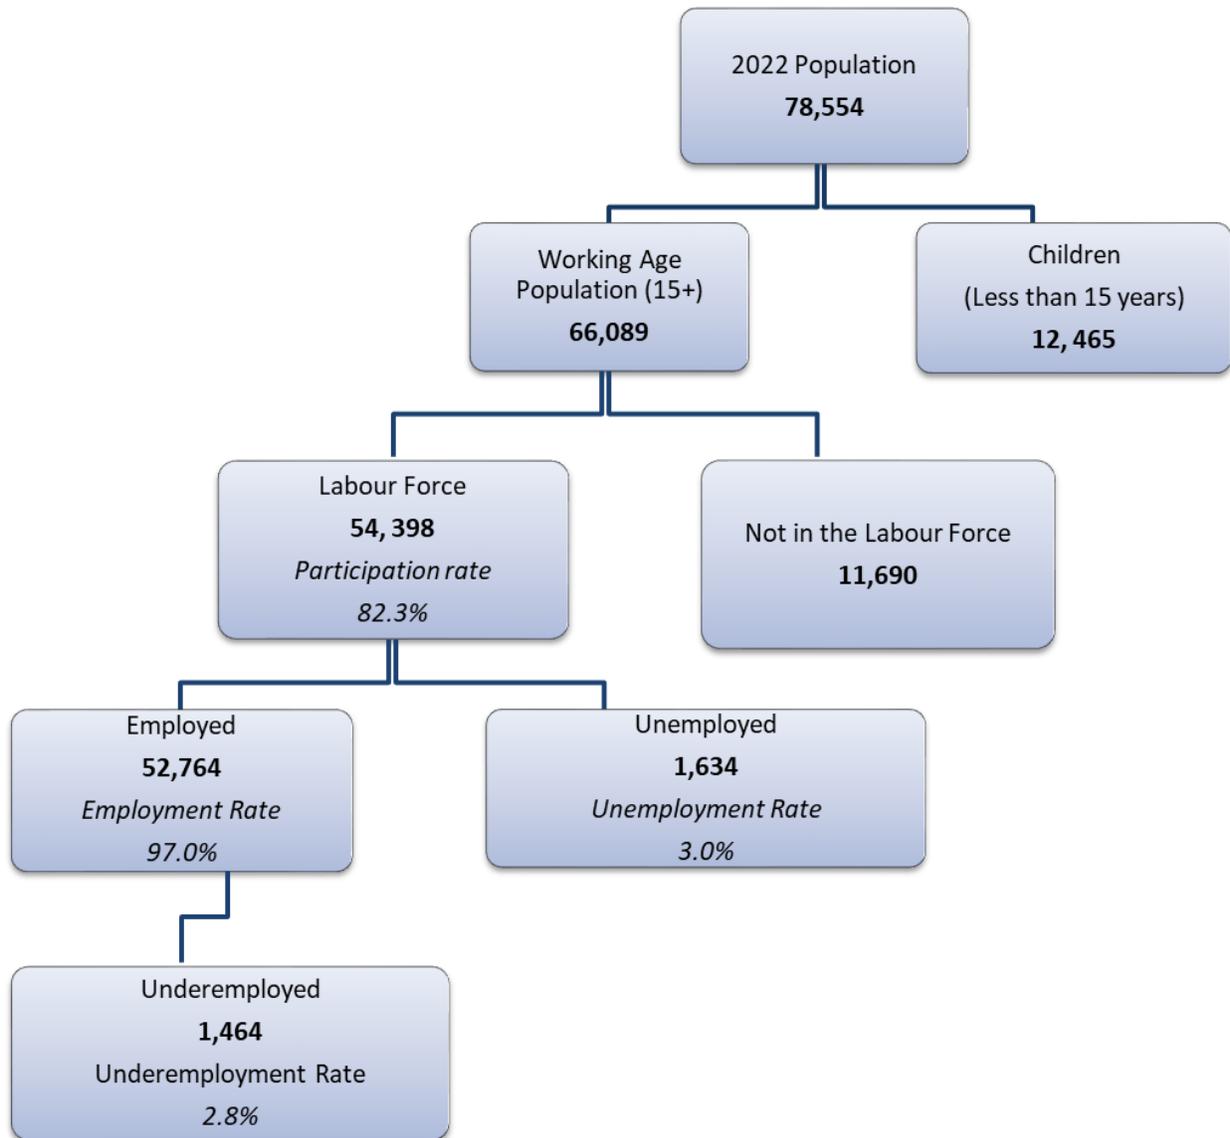

Indicators	Total	Caymanian	Permanent Res.	Non-Caymanian
Population	78,554	38,425	6,756	33,373

Labour Force Participation Rate	82.3	86.0	78.6
Unemployment Rate	3.0	3.0	3.0

Figure 1: Main Labour Force Composition, Spring 2022

4.1 POPULATION ESTIMATES

The mid-year population of the Cayman Islands was estimated at 78,554 for the period ending June 2022. Most of the population resides in Grand Cayman, particularly in George Town, which accounts for 46.2 percent of the population. This was followed by West Bay which covered 23.1 percent of the population, and Bodden Town, with 22.2 percent. East End and North Side accounted for 2.9 and 2.5 percent, respectively, while the combined population of the Sister Islands’ (Cayman Brac and Little Cayman) combined population accounted for 3.1 percent (Table 6).

The average household size was 2.49 persons. Bodden Town and East End had the largest household size with 2.90 persons, while the Sister Islands had the smallest with 1.96 persons.

Table 6: Population Estimates by District, Spring 2022

District	Total Population		Average Household Size	Total Households	
	#	%		#	%
Total	78,554	100.0	2.49	31,607	100.0
George Town	36,322	46.2	2.37	15,352	48.6
West Bay	18,133	23.1	2.41	7,511	23.8
Bodden Town	17,436	22.2	2.90	6,014	19.0
North Side	1,951	2.5	2.79	698	2.2
East End	2,266	2.9	2.90	781	2.5
Sister Islands	2,446	3.1	1.96	1,251	4.0

*The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully- updated Household Register.

Sex and Age

The estimated population in Spring 2022 comprised 49.5 percent males and 50.5 percent females (Table 7).

Children younger than 15 years of age represented 15.9 percent of the population, while the elderly (65 years or older) accounted for 7.7 percent. These two groups are jointly referred to as the ‘dependent population’ and accounted for 23.6 percent of the total population.

The working-age population, defined as those 15 years and older, accounted for 84.1 percent of the population. These persons are usually engaged in work or work-search

activities and are said to be in their 'productive years'. Within this group, persons aged 15 to 64 years are considered those whom the dependent population (children and the elderly) are reliant on. The ratio of the latter population groups to the 15 to 64 years old group shows a dependency ratio¹ of 31.0 percent.

Table 7: Population Estimate by Selected Characteristics

Selected Characteristics	Census 2021 Population		Spring 2022 Population		2022/2021 Change	
	#	%	#	%	#	%
Total	71,105	100.0	78,554	100.0	7,449	10.5
Sex						
Male	29,943	42.1	38,883	49.5	8,940	29.9
Female	29,327	41.2	39,671	50.5	10,344	35.3
DK/NS	5					
Status						
Caymanian	38,047	53.5	38,425	48.9	378	1.0
Permanent Res.	6,378	9.0	6,756	8.6	378	5.9
Non-Caymanian	26,680	37.5	33,373	42.5	6,693	25.1
Age Group						
0 - 14	11,315	15.9	12,465	15.9	1,150	10.2
15 - 24	6,806	9.6	7,605	9.7	799	11.7
25 - 34	12,221	17.2	14,332	18.2	2,111	17.3
35 - 44	13,956	19.6	14,542	18.5	586	4.2
45 - 54	12,499	17.6	14,061	17.9	1,562	12.5
55 - 64	8,191	11.5	9,262	11.8	1,071	13.1
65+	5,602	7.9	6,068	7.7	466	8.3
DK/NS	515	0.7	217	0.3	(298)	(57.9)

* Due to rounding, sub – totals may differ from the sum

Status

Caymanians made up the majority (48.9%) of the population, while Non-Caymanians and Permanent Residents had a population share of 42.5 and 8.6 percent, respectively. In comparison to Census 2021, the Caymanian population was 1.0 percent higher (Table 7).

The working-age population comprised 80.9 percent of all Caymanians compared to 88.3 and 87.1 percent of all Permanent Residents and Non-Caymanians, respectively (Appendix Table 1.5). Larger rates among the latter are expected since the residency of most expatriates is dependent on work permits.

¹ The dependency ratio is calculated: $\frac{\text{Population aged (0-14)+(65+) years}}{\text{Population aged (15-64) years less DK/NS}} * 100$

4.2 LABOUR FORCE

The labour force is represented by persons of working-age (15 years and older) who worked, as well as those who, at the time of the survey, did not have a job but were available and looking for work during the reference period. The Spring 2022 LFS, recorded 54,398 persons in the labour force (Table 8).

Table 8: Labour Force by Selected Characteristics, Spring 2022

Selected Characteristics	Labour Force	
	#	% Distribution
Total	54,398	100.0
Sex		
Male	28,386	52.2
Female	26,013	47.8
Status

Middle School	2,098	3.9
High School	18,258	33.6
Post Secondary	13,489	24.8
College / University	19,300	35.5
Not Stated	244	0.4

** Due to rounding, sub – totals may differ from the sum*

Sex and age

In Spring 2022, 52.2 percent of the labour force were males, while females accounted for the remaining 47.8 percent. Most of the persons comprising the labour force were aged 35 to 44 years (25.4%), closely followed by those 25 to 34 years (25.1%) and persons 45 to 54 years (24.0%).

Status

The distribution of the LFS by nationality status showed that 41.2 percent were Caymanians, 51.1 percent were Non-Caymanians, and 7.6 percent were PR-WRW (Table 8).

Labour Force Participation Rate

Table 9 shows the sex distribution of the labour force participation rate by selected demographic characteristics, including nationality status, age group and educational attainment. The overall labour force participation rate (LFPR)² was 82.3 percent (Table 9). By status, Non-Caymanians had the highest labour force participation rate (95.7%) as expected due to the work permit-oriented immigration system. While Caymanians had the lowest LFPR of 72.2 percent.

Among educational attainment levels, the labour force participation rate ranged from 48.0 percent among those with “primary and below” to 88.7 percent among those with “post secondary” education.

A review of age-specific LFPRs revealed that persons 25 to 54 years old were more likely to be engaged in work or looking for work. They recorded rates ranging from 92.9% among persons 45 to 54 years to 95.4% among those 25 to 34 years of age. Further analysis showed that males (86.0%) had higher rates of labour force participation than females (78.6%). This is also evident in educational attainment, as males recorded larger LFPRs at all levels of education in comparison to females.

² The number of persons in the labour force expressed as a percentage of the working age population.

Table 9: Labour Force Participation Rate by Selected Characteristics, Spring 2022

Selected Characteristics	Total	Male	Female
Total	82.3	86.0	78.6
Status

4.3 EMPLOYED

The employed refers to persons in the labour force who worked for pay, profit, or family gain for at least one hour during the reference week, which was April 24th to April 30th, 2022. Persons who did not work during the reference week but had a job were also categorised as employed as they were only temporarily absent from work. The number of employed persons was 52,764 (Table 10).

Sex and Age

Among the employed, males (27,532) outnumbered females (25,232) with a percentage share of 52.2 (Table 10). The employed labour force was mainly represented by persons aged 25 to 54 years which accounted for 75.2 percent. While persons aged 15 to 24 years and the elderly (65+ years) respectively represented 6.2 and 4.0 percent of the employed labour force.

Status

A total of 21,299 Caymanians accounted for 40.4 percent of the employed labour force. Employed Non-Caymanians was estimated at 27,511 and Permanent Residents WRW at 3,955 (Table 10).

Employment Status

The employed labour force primarily comprised of employees who worked for someone, with a share of 91.2 percent. Self-employed persons (business owners with and without employees) accounted for 8.2 percent of the employed labour force. Among employed males, 10.2 percent were self-employed compared to 6.1 percent among females. While Caymanians (15.7%) were more likely than Permanent Residents WRW (11.1%) and Non-Caymanians (2.0%) to own businesses (Tables 11 and 12).

Occupation

The top five occupations, which were collectively responsible for 77.9 percent of total employment, were professionals (20.5%); service and sales workers (16.8%); elementary occupations (14.2%); craft and related trades workers (13.9%), and technicians and associate professionals (12.5%) (Figure 2).

Analysis by sex revealed that most employed males were occupied as craft and related trades workers (25.5%); professionals (17.7%); service and sales workers (13.7%); managers (12.0%); and elementary occupations (11.4%). While employed females were mainly occupied as professionals (23.5%); service and sales workers (20.2%); elementary occupations (17.2%); technicians and associate professionals (16.2%), and clerical support workers (10.3%) (Appendix Table 3.25).

The leading occupations among employed Caymanians were technicians and associate professionals (18.3%), professionals (17.5%); managers (17.4%); service and sales workers (12.5%) and clerical support workers (11.8%). Non-Caymanians were mainly occupied as professionals (22.1%); elementary occupations (21.1%); service and sales workers (20.2%); craft and related trades workers (17.6%), and technicians and associate professionals (8.1%). Permanent Residents WRW principally worked as professionals (25.5%); managers (16.7%); service and sales workers (15.7%); craft and related trades workers (12.5%), and technicians and associate professionals (11.6%) (Appendix Table 3.26).

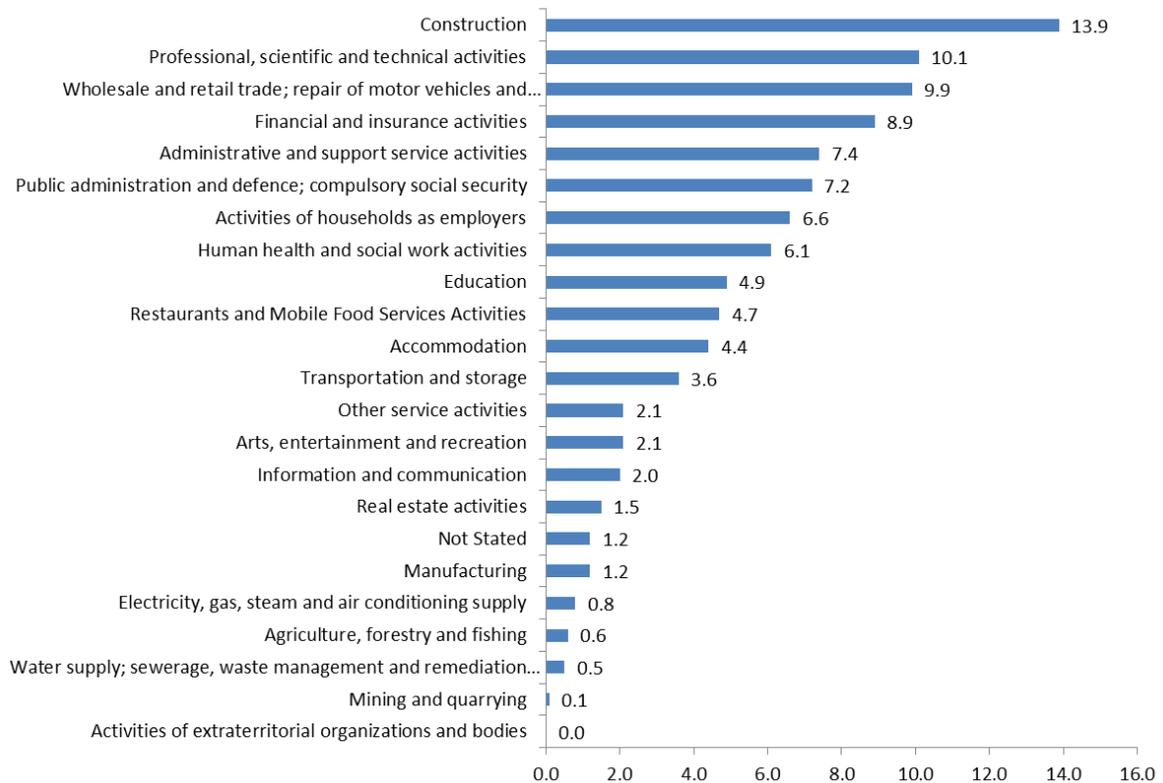

Figure 2: Employment by Occupation Percentage Distribution, Spring 2022

Industry

The top six industries accounted for 57.4 percent of the employed labour force. They were as follows: construction (13.9%); professional, scientific, and technical activities (10.1%); wholesale and retail trade (9.9%); financial and insurance activities (8.9%); administrative and support service activities (7.4%) and public administration and defense (7.2%) (see Figure 3).

Figure 3: Employment by Industry Percentage Distribution, Spring 2022

Hours of Work

The number of hours worked is defined as the number of hours worked during the reference period of April 24th to April 30th, 2022, by the respondent at his/her job(s), which includes all hours spent on work activities and overtime hours but excludes vacation leave, sick leave, public holidays and other forms of paid or unpaid leave.

Employed persons were found to have worked 41.8 hours on average per week. Further analysis showed that males worked an average of 1.2 hours more than females. A breakdown by status revealed that Non-Caymanians worked for 42.7 hours on average per week, compared to Permanent Residents WRW who worked 41.8 hours and Caymanians with an average of 40.7 hours worked per week (Appendix Tables 3.31 and 3.32).

Earnings from Main Job

Approximately 62.3 percent of employed persons earned CI\$2,400 or more per month (Tables 13 and 14). The proportion was higher among employed males (63.8%) compared to employed females (60.6%). While Caymanians (74.0%) were more likely than Permanent Residents WRW (70.8%) and Non-Caymanians (52.0%) to have earned CI\$2,400 or more per month.

Employment by the size of business

The majority of the employed labour force worked in large businesses with 50 or more employees (34.2%) and in micro-business with one to five employees (23.7%). Similarly, the highest proportion of Caymanians (41.9%), Permanent Residents WRW (37.0%) and Non-Caymanians (27.7%) were also employed by large businesses.

4.3.1 UNDEREMPLOYED

'Underemployment' is defined as 'Involuntary part-time' work, where workers who could (and would like to) be working for a full work week can find only part-time work. The underemployed accounted for 2.8 percent of the employed in Spring 2022 (Table 16). The underemployment rate for males was 3.1 percent, compared to females with a rate of 2.4 percent. Caymanians had an underemployment rate of 4.2 percent, while Permanent Residents WRW and Non-Caymanians each had a rate of 1.8 percent. The largest rates of underemployment were observed among persons whose highest level of education was primary and below (12.6%), followed by persons 65 years and older (8.3%) (Table 16).

4.4 UNEMPLOYED

The unemployed labour force totalled 1,634 and led to an unemployment rate of 3.0 percent (Table 17a). The unemployed labour force mainly consisted of persons aged 15 to 24 years (454 persons), accounting for 27.8 percent of the total unemployed. Overall, males (854) outnumbered females (780) among the unemployed, while total unemployed Caymanians stood at 1,140.

$$** \text{ Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Sex, age, and status

The rate of unemployment was evenly distributed by sex at 3.0 percent each, among males and females. On the contrary, age-specific unemployment rates ranged from a high of 12.2 percent among the 15 to 24 age group to 1.7 percent among those 45 to 54 years. Disaggregation of the unemployment rate by nationality status shows that Caymanians had the highest unemployment rate of 5.1 percent, followed by Permanent Residents WRW with 4.8 percent and Non-Caymanians with a rate of 1.1 percent (see Table 17b).

Educational attainment

Table 17b shows that among Caymanians, the likelihood of unemployment decreased as their level of education increased. Most notably, those with no education were far more likely to be unemployed than their educated counterparts, with an unemployment rate of 50 percent. While the remaining rates ranged from 5.1 percent among the unemployed who only completed Primary and below to 1.3 percent among College/University graduates.

Among Permanent Residents WRW and Non-Caymanians, the rates of unemployment were largest among persons whose highest educational levels were High School (10.4%) and College/University (1.8%) respectively.

Reasons for not having work

The majority of the unemployed persons (53.8%) stated “no work available” as the main reason for being unemployed. This reason was also cited by most males (58.3%) and females (48.9%). This reason was also mainly reported among Caymanians (64.7%) and unemployed PR-WRW (36.4%). While unemployed Non-Caymanians (34.1%) identified “home/family duties” as their main reason for not having work (see Appendix Tables 5.8 and 5.9).

Job search

When asked about the various methods utilised to search for jobs, (a multiple response question), the most popular responses among the unemployed were “send out résumés or complete applications” (59.0%) and “ask friends or relatives” (51.9%). The unemployed also chose “to contact an employer directly” (45.7%) and “register with Workforce Opportunities and Residency Cayman (WORC)” (35.2%) (Appendix Tables 5.14 and 5.15).

Prior work and period without work

The majority (74.7%) of the unemployed stated that they had previous jobs; of these, 59.3 percent have been without work for more than one year (Appendix Tables 5.16 and 5.18).

Among the unemployed Caymanians, 888 (77.9%) had previous jobs, while 251 (22.1%) never had a job; 64.2 percent of those with previous jobs were unemployed for more than a year (Appendix Tables 5.17 and 5.19).

Training

A total of 774 (47.4%) unemployed persons reported that they had been trained for a specific occupation. Among unemployed Caymanians, only 39.7 percent had completed training, while occupational training was more common among Permanent Residents WRW (72.7%) and Non-Caymanians (59.7%) (Appendix Table 5.26).

4.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work, or did not seek work during the reference week were classified as not being in the labour force. A total of 11,690 persons were not in the labour force, the majority of whom were Caymanians (73.8%). Females accounted for 60.6 percent of the persons, not in the labour force. Most of the persons outside the labour force were aged 15 to 24 years (33.3%), closely followed by those 65 years and older (33.0%). The proportion of persons not in the labour force varied by educational attainment, ranging from 0.4 percent among those whose highest level of education was “other” to 41.9 percent by those with high school as their highest level of education (Table 18 and Appendix Tables 6.1 and 6.2).

When asked the reasons for not working, most of the persons not in the labour force stated that they were “retired/elderly” (35.2%) or “student/in training” (31.3%). Males were more likely students or in training (42.8%), while females indicated being retired or elderly (38.7) as their main reason for not working. A review by nationality status found that among the population outside of the labour force, Caymanians had the highest probability of being retired or elderly (43.3%). Permanent Residents WRW mainly indicated “other” (32.0%) as their reason for not working, while the greatest proportion of Non-Caymanian responded, “student/in training” (31.0%) (Table 19).

4.5.1 POTENTIAL LABOUR FORCE

Based on the ILO definition, the potential labour force consists of all working-age persons (15 years and older) who, during the reference week, were neither employed nor unemployed and were either classified as unavailable jobseekers or available potential job seekers. *Unavailable jobseekers* are persons who carried out activities to ‘seek employment,’ were not ‘currently available’ but would become available within a subsequent short period. *Available potential jobseekers* are persons who did not carry out activities to ‘seek employment’ but wanted employment and were ‘currently available.’

Of the 11,690 persons who were not in the labour force, 975 persons were considered potential labour force. The majority of these persons were Caymanian (61.9%), female (61.0%) and aged 15 to 24 (25.1%) (see Appendix Table 6.30).

5. OTHER FINDINGS

5.1 HOUSING CHARACTERISTICS

Most of the households (51.6%) owned the homes they occupied, while 44.9 percent rented their accommodation (Table 20). Approximately 9 out of every 10 households responded affirmatively to having had cell phones (98.6%), air condition (95.9%) and internet connectivity (94.5%). While, a minority of households had domestic helpers (10.8%) or possessed landline telephones (22.3%). The total number of households was estimated to be 31,607, based on post-survey results³.

Table 20: Percent of Households by Selected Characteristics, Spring 2022

Total Households	31,607
Owned Households	51.6
Rented Households	44.9
With Domestic Helpers	10.8
With Landlines	22.3
With Cell Phones	98.6
With Internet Connectivity	94.5
With Computer/Laptops	74.3
With Tablets/E-Readers	52.0
With Cable/Satellite	46.5
With Internet TV	57.8
With Air Condition	95.9
With Housing Structure Insurance	60.2

³ The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.
