1. INTRODUCTION

This report presents the findings of the Spring 2023 Labour Force Survey (LFS). The LFS mainly provides information on the characteristics of persons in the labour force (employed and unemployed). It also presents demographic information on the general population, some characteristics of persons not in the labour force as well as household characteristics.

The concepts used in the Survey are in accordance with the International Labour Organization (ILO) guidelines, and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this Report present the methodology, the main findings with emphasis on the characteristics of the labour force and those that are out of the labour force, and other findings on housing characteristics. The Appendix presents the detailed tables.

2. METHODOLOGY

As in previous LFS, planning and execution of the Spring 2023 LFS was undertaken by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

Sampling design

The sampling frame for the LFS is the ESO's Household Register, which is a listing of all household dwelling units in the Cayman Islands. The last update of the Register was conducted in April 2021. Updates were also based on information from the 2021 Population and Housing Census. As of January 25, 2022, the Register listed 29,699 household dwelling units, which is the sampling frame used for this edition of the LFS.

Samples for the LFS were drawn from districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands. Probability proportionate to household count by district, as determined from the ESO Household Register, was used when allocating the number of selected households across strata. Households were randomly selected from all six districts; within each district, the households were selected with equal probability. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

P_h = probability of selection for the sample households in the h-th stratum (district)

M_h = total number of households in the sample frame for the h-th stratum

m_h = the number of sample households selected in the h-th stratum

Based on the sampling design, a sample of 1,999 household addresses was randomly selected, representing 6.7 percent of the 29,699 households.

Fieldwork

Since the October 2014 LFS, the ESO has been using tablets for electronic data collection in Grand Cayman. Included in the Appendix (page 120) is a copy of the questionnaire that was uploaded to the tablet for this edition of the LFS.

The reference week for the Spring 2023 LFS was the week 9th April to 15th April 2023. The data collection took place over a six-week period from 16th April to 24th May 2023. The administrative data (births, deaths, and work permit) as of the end of June 2023, which were used in estimating the total population, were collected in early-July 2023.

The ESO hosted its usual in-person training exercise to prepare for the fieldwork. A total of 50 persons, including ESO survey staff, were recruited in Grand Cayman, most of whom have prior household survey experience (census and/or LFS). In the Sister Islands (Cayman Brac and Little Cayman), three persons were recruited to administer the LFS using the questionnaires on tablets. Therefore, a total of 53 persons were eventually selected to conduct interviews in the Cayman Islands.

Weights

The 2023 population estimate was derived by adding the natural increase (births minus deaths) data collected from the Health Services Authority and immigration (work permits, permanent residents and change of status) from the Cayman Islands Customs and Border Control (CBC) Department in the first six months of 2023 compared to the 2022 year-end population estimate.

The raising factors for Caymanian, PR/PR-WRW, and Non-Caymanian sub-populations were then calculated based on their respective population estimates,

$$\text{Raising factor}_{si} = \frac{\text{Population}_{si}}{\text{Survey Count}_{si}}$$

Where:

Population_{si} = estimated population based on administrative data of status_{*i*}
(*i*=Caymanian, Permanent Residents, and Non-Caymanians)

Survey Count_{si} = number of individuals from the LFS per status.

The household characteristics were raised using the district response rates adjusted for non-responses at the household level.

Table 1: Response Rate by District, Spring 2023

District	Sample Size ¹	In Scope Households ²	Fully and Partially Completed	Response Rate ³
Total	1,999	1,680	1,647	98.0
George Town	1,035	846	826	97.6
West Bay	418	361	360	99.7
Bodden Town	371	333	324	97.3
North Side	52	39	37	94.9
East End	48	41	40	97.6
Sister Islands	75	60	60	100.0

1 Of the original 1999 sample household addresses only 1680 were found to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

3 Response Rate represents those households fully and partially completed divided by in scope households.

Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPj) software on tablets. Coding of industries and occupation were also conducted internally using the International Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. A data file was then created with information from all households who completed the LFS interview (fully and partially). Finally, indicators were generated from this file using SPSS, and the final tables presented in this Report were prepared using Excel.

Standard errors for main estimates

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this Report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

Data representing the weighted responses of one individual in the Survey are suppressed and indicated by the symbol "...".

The estimates presented in this Report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*), the

more reliable is the estimate. Because of this, comparisons of the larger estimates may be used with confidence, but small estimates must be treated with caution. The *standard errors*, *confidence intervals*, and *coefficients of variation (C.V.)* of the estimates for key variables for the Spring 2023 LFS are shown in Tables 2 and 3.

3. DEFINITION of KEY CONCEPTS

Population

In the LFS, population means the “resident” population; that is, persons staying or intending to stay in the Cayman Islands for at least six months. Visitors/tourists are not included in the resident population. Persons in institutions for more than six months are excluded. Family members of resident households who were abroad at the time of the survey but had intentions to return to the Islands were also considered residents.

The population is categorised into three sub-populations by immigration status: Caymanians, Permanent Residents (PR), and Non-Caymanians. Permanent Residents include Non-Caymanians married to Caymanians, Permanent Residents with a government contract, Permanent Residents with rights to work (PR-WRW), and Permanent Residents without rights to work.

Labour Force

The labour force comprises members of the non-institutionalised population (i.e., those not in residential institutions such as general penitentiary, retirement homes) 15 years of age and over, who were employed or unemployed during the reference week. All persons in the PR labour force in all tables and sections of this Report refer explicitly to PR-WRW only. Persons categorised as PR without rights to work are included in the Non-Caymanian labour force.

Employed

Employed persons are those who, during the reference week, did any work for pay or profit; that is, paid work in the context of an employer-employee relationship or self-employment. It also includes unpaid family workers who contributed directly to the operation of a farm, business, or professional practice owned or operated by a related member of the household. Based on the International Labour Organization (ILO) guidelines, work can be for as little as an hour during the reference week; it excludes unpaid domestic housework and volunteer work but includes those temporarily away from their jobs.

Unemployed

Unemployed persons are those who, during the reference week, are:

- (a) without work;
- (b) currently available for work and
- (c) actively looking for a job, or had definite arrangements to start a job within 4 weeks.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, status, sex, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

$$\text{Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Not in the Labour Force

These are persons in the non-institutional population (i.e., those not in residential institutions such as general penitentiary or retirement homes) – 15 years of age and over - who, during the reference week, were neither employed nor unemployed.

Household

A household comprises either one person living alone or a group of persons (not necessarily related) living at the same address, with common housekeeping, i.e., sharing at least one meal a day and sharing living arrangements. This concept is used for persons sharing an apartment or house or a one-room together. For further clarification, please see:

4. MAIN FINDINGS

The population of the Cayman Islands was estimated at 83,671, consisting of 38,926 Caymanians, 6,433 Permanent Residents (including 4,463 WRW), and 38,312 Non-Caymanians. Among them, 58,669 individuals comprised the labour force, with 57,266 employed and 1,404 unemployed. These findings result in an overall labour force participation rate of 83.4 percent, which varied by sex and status. The unemployment rate stood at 2.4 percent, varying by status and sex (Tables 4 and 5). Figure 1 illustrates the population and labour force composition.

4.1 POPULATION ESTIMATES

The mid-year population of the Cayman Islands was estimated at 83,671 for the period ending June 2023. Most of the population resides in Grand Cayman, with concentration in George Town, accounting for 50.2 percent of the total population. This was followed by West Bay, covering 21.3 percent of the population, and Bodden Town, with 20.7 percent. In contrast, smaller portions of the population reside in East End and North Side, accounting for 2.6 and 2.5 percent, respectively. Moreover, the combined population of the Sister Islands’ (Cayman Brac and Little Cayman) accounted for 2.7 percent (Table 6).

The average household size was recorded at 2.44 persons. North Side and East End exhibited the highest average household sizes, registering 2.95 and 2.82, respectively. In contrast, the Sister Islands demonstrated the smallest average household size, with a figure of 1.87 persons.

Table 6: Population Estimates by District, Spring 2023

District	Total Population		Average Household Size	Total Households	
	#	%		#	%
Total	83,671	100.0	2.44	34,259	100.0
George Town	42,037	50.2	2.36	17,788	51.9

East End	2,166	2.6	2.82	767	2.2
Sister Islands	2,260	2.7	1.87	1,206	3.5

Note: The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.

Sex and Age

In Spring 2023, the estimated population had a sex distribution of 50.5 percent males and 49.5 percent females (Table 7).

Children under the age of 15 made up 15.9 percent of the population, while the elderly (aged 65 years and older) comprised 6.6 percent. Collectively termed as the 'dependent population,' these two cohorts accounted for 22.6 percent of the overall populace.

The working-age population, those 15 years and older, accounted for 84.1 percent of the population. This group typically engages in employment or job-seeking endeavours, marking their 'productive years'. Within this category, persons aged 15 to 64 years are

recognised as the main providers of support for the dependent population (children and the elderly). The relationship between these dependent groups and the 15 to 64 cohort results in a dependency ratio of 29.1 percent.

Status

Caymanians made up the largest proportion of the population, accounting for 46.5 percent of the population, while Non-Caymanians and Permanent Residents had a population share of 45.8 and 7.7 percent, respectively. In comparison to Spring 2022, the Caymanian population increased by 1.3 percent (Table 7).

Among Caymanians, the working-age population accounted for 80.9 percent, while for Permanent Residents and Non-Caymanians, 88.3 percent and 87.1 percent were of working age (refer to Appendix Table 1.5). Higher percentages among the latter two groups are to be expected, given that the residency of most expatriates is contingent upon work permits.

4.2 LABOUR FORCE

The labour force is represented by persons of working-age (15 years and older) who worked, as well as those who, at the time of the survey, did not have a job but were available and looking for work during the reference period. The Spring 2023 LFS recorded 58,669 persons in the labour force (Table 8).

Sex and age

In Spring 2023, males constituted 52.8 percent of the labour force, with females comprising the remaining 47.2 percent. In terms of age distribution, the labour force was predominantly composed of individuals aged 35 to 44 years (29.5%), followed by those aged 25 to 34 years (25.4%), and individuals aged 45 to 54 years (23.4%).

Status

The labour force distribution by nationality status showed that 38.3 percent were Caymanians, 54.8 percent were Non-Caymanians, and 6.9 percent were PR-WRW (Table 8).

Labour Force Participation Rate

Table 9 shows the sex distribution of the labour force participation rate across various demographic attributes, namely: nationality status, age, and education. The total labour force participation rate (LFPR) was recorded at 83.4 percent (Table 9). Concerning status, Non-Caymanians and Permanent Residents WRW exhibited the highest labour force participation rates at 91.5 percent and 91.3 percent, respectively. This outcome aligns with expectations, considering the work permit-oriented immigration system. Conversely, Caymanians had the lowest LFPR at 73.0 percent.

Among specified educational attainment levels, the labour force participation rate ranged from 57.4 percent among those with “primary and below” to 90.4 percent among those with “post-secondary” education.

A review of age-specific LFPRs revealed that persons 25 to 54 years old were more likely to be engaged in work or looking for work. The recorded rates ranging from 94.1 percent among persons 45 to 54 years to 95.4 percent among those 25 to 34 years of age. Further analysis showed that males (87.3%) had higher rates of labour force participation than females (79.4%). This trend was consistent when considering educational attainment as well, with males displaying greater LFPRs across all levels of education compared to females.

4.3 EMPLOYED

The term "employed" includes individuals within the labour force who engaged in work for compensation, profit, or familial benefit for a minimum of one hour during the reference week, April 9th to April 15th, 2023. Additionally, individuals who held a job but did not perform work during the reference week were also classified as employed, recognising their temporary absence. A total of 57,266 persons were employed in Spring 2023 (Table 10).

Sex and Age

Males outnumbered females among the employed, with a count of 30,394 compared to 26,872, representing percentage shares of 53.1 and 46.9, respectively (Table 10). The majority of the employed labour force consisted of individuals aged 25 to 54 years, accounting for 78.9 percent. In contrast, individuals aged 15 to 24 years and the elderly (65 years and older) made up 4.7 percent and 3.4 percent, respectively, of the employed labour force.

Status

A total of 21,615 Caymanians constituted 37.7 percent of the employed labour force. The employment counts for Non-Caymanians and PR-WRW were estimated at 31,749 and 3,902, respectively (Table 10).

Employment Status

The employed labour force was predominantly composed of individuals who “worked for someone”, representing 91.2 percent. Self-employed persons, including business owners with and without employees, accounted for 8.2 percent of the employed labour force. Among employed males, 10.6 percent were self-employed in comparison to 5.6 percent among females (Table 12). Furthermore, Caymanians (16.4%) exhibited a higher likelihood of owning businesses compared to Permanent Residents WRW (11.9%) and Non-Caymanians (2.2%) (Table 12).

Occupation

The top five occupations, collectively accounting for 79.5 percent of total employment, were professionals (19.8%); service and sales workers (19.1%); craft and related trades workers (15.3%); elementary occupations (12.9%), and technicians and associate professionals (12.3%) (Figure 2).

An analysis by sex revealed that the majority of employed males were engaged as craft and related trades workers (26.6%); professionals (16.1%); service and sales workers (14.4%); technicians and associate professionals (11.7%); and managers (10.9%). In contrast, employed females were primarily occupied as service and sales workers (24.5%); professionals (24.0%); elementary occupations (17.1%); technicians and associate professionals (13.1%), and managers (10.1%) (Appendix Table 3.26).

Prominent occupations among employed Caymanians were professionals (20.1%), technicians and associate professionals (17.6%), managers (17.3%), service and sales workers (15.4%) and clerical support workers (8.1%). Non-Caymanians were mainly occupied as service and sales workers (21.8%); craft and related trades workers (20.3%); professionals (19.4%); elementary occupations (18.0%), and technicians and associate professionals (8.2%). Permanent Residents WRW principally worked as professionals (21.8%); service and sales workers (17.8%); technicians and associate professionals (17.3%); craft and related trades workers (15.8%), and managers (12.4%) (Appendix Table 3.27).

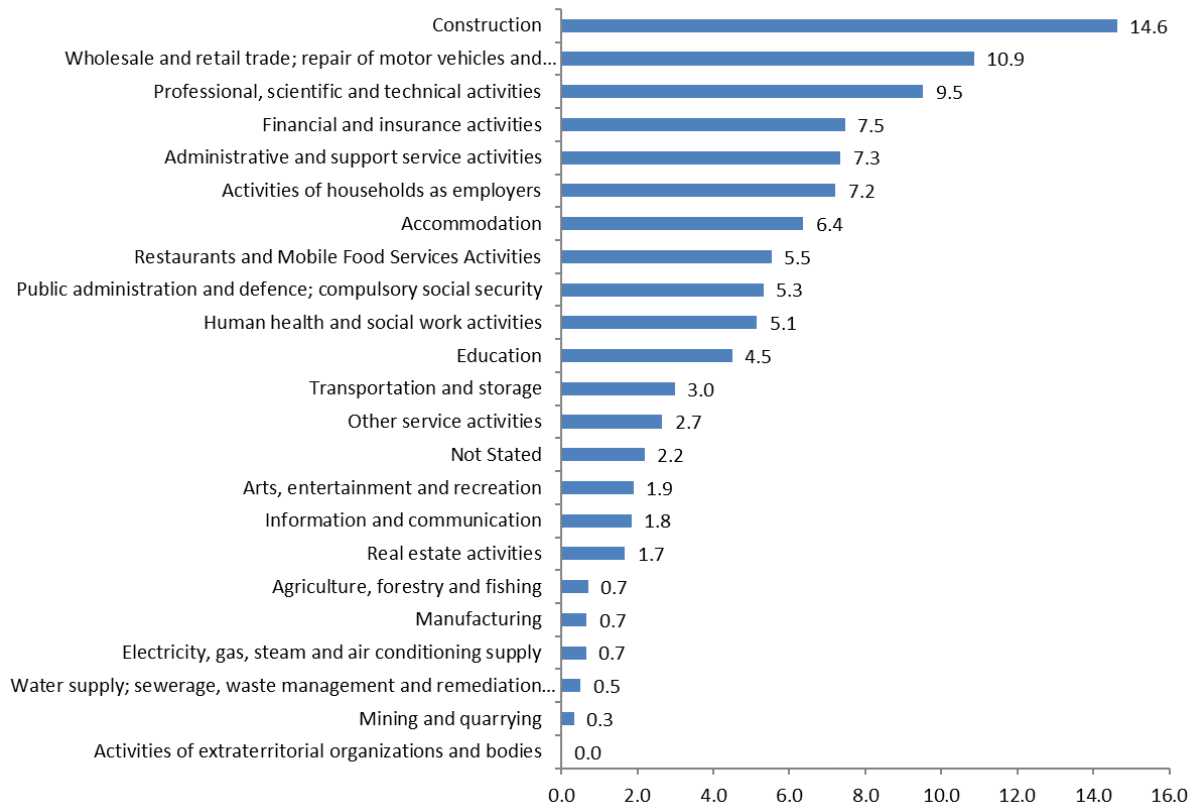

Figure 2: Employment by Occupation Percentage Distribution, Spring 2023

Industry

The top six industries accounted for 57.0 percent of the employed labour force. They were as follows: construction (14.6%); wholesale and retail trade (10.9%); professional, scientific, and technical activities (9.5%); financial and insurance activities (7.5%); administrative and support service activities (7.3%) and accommodation (7.2%) (see Figure 3).

Figure 3: Employment by Industry Percentage Distribution, Spring 2023

Hours of Work

The number of hours worked is defined as the number of hours worked during the reference period of April 9th to April 15th, 2023, by the respondent at his/her job(s), which includes all hours spent on work activities and overtime hours but excludes vacation leave, sick leave, public holidays and other forms of paid or unpaid leave.

On average, employed persons worked 43.7 hours per week. A more detailed analysis indicated that males worked an average of 1.6 hours more than females. Further breakdown by status revealed that Caymanians worked an average of 42.5 hours per week, while Permanent Residents WRW and Non-Caymanians averaged 44.6 and 44.4 hours per week, respectively (Appendix Tables 3.31 and 3.32).

Earnings from Main Job

Approximately 63.9 percent of employed individuals earned CI\$2,400 or more per month (Tables 13 and 14). The proportion was higher among employed males (69.1%) than employed females (58.0%). While a higher proportion of Caymanians (74.4%) earned CI\$2,400 or more per month compared to Permanent Residents WRW (68.3%) and Non-Caymanians (56.2%).

Employment by the size of business

The majority of the employed labour force worked in large businesses with 50 or more employees (31.0%) and in micro-business with one to five employees (24.4%). This pattern persisted consistently when considering sex and status. Notably, the highest proportion of Caymanians (35.3%), Permanent Residents WRW (32.7%) and Non-Caymanians (27.8%) were employed by large businesses. Similarly, the majority of both males (31.2%) and females (30.8%) were also employed by large organisations.

4.3.1 UNDEREMPLOYED

‘Underemployment’ is defined as ‘Involuntary part-time’ work, where workers who could (and would like to) be working for a full work week can find only part-time work. The underemployed accounted for 2.3 percent of the employed in Spring 2023 (Table 16). By sex, this rate stood at 2.2 percent among males and 2.4 percent among females. A breakdown by status showed that Caymanians had an underemployment rate of 4.2 percent, whereas Permanent Residents WRW and Non-Caymanians had rates of 1.5 percent and 1.1 percent, respectively. The highest rates of underemployment were

observed among individuals aged 15 to 24 (8.9%) and those 65 years and older (6.8%), followed by those with primary and below education levels (4.4%) (Table 16).

4.4 UNEMPLOYED

The unemployed labour force amounted to 1,404, yielding an unemployment rate of 2.4 percent (Table 17a). The unemployed labour force mainly consisted of persons aged 15 to 24 years (370 persons), accounting for 26.4 percent of the total unemployed. In terms of sex, a higher percentage of females (58.1%) were unemployed in comparison to males (41.9%). Additionally, the count of unemployed Caymanians reached 842 individuals, contributing to an unemployment rate of 3.7 percent.

$$** \text{ Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Sex, age, and status

Unemployment categorised by sex reveals that males had an unemployment rate of 1.9 percent, while females experienced a higher rate of 2.9 percent. An assessment of age-specific unemployment rates shows that persons aged 15 to 24 (12.0%) were more likely to be unemployed, while those 45 to 54 (1.3%) were less likely to experience unemployment. Further disaggregation by nationality status shows that Permanent Residents WRW and Caymanians had the highest unemployment rates of 4.3 and 3.7 percent, respectively. While Non-Caymanians had a lower rate of 1.2 percent (see Table 17b).

Educational attainment

Table 17b shows that among Caymanians, individuals with no formal education were far more likely to be unemployed than their educated counterparts, with an unemployment rate of 20.0 percent. While educated Caymanians were less prone to unemployment, with rates ranging from 4.2 percent among persons whose highest level of education was primary and below to 1.5 percent among those with a post-secondary level of education.

Among Permanent Residents WRW, unemployment decreased as educational attainment increased from high school (6.6%) to college/university (2.5%). In contrast, the reverse was true among Non-Caymanians, as this group experienced increased unemployment with higher levels of education, with rates ranging from 0.3 percent among those with high school education to 2.0 percent for those with college/university.

Reasons for not having work

The majority of the unemployed persons (49.2%) reported “no work available” as the main reason for not working. This reason was also cited by most males (49.0%) and females (49.3%). This trend was consistent among unemployed Caymanians (52.3%) and unemployed PR-WRW (77.8%). In comparison, the majority of unemployed Non-Caymanians (44.2%) identified “waiting for work permit” as their main reason for not having work (see Appendix Tables 5.8 and 5.9).

Job search

When asked about the various methods utilised to search for jobs (a multiple response question), the most popular responses among the unemployed were “send out résumés or complete applications” (57.3%) and “contact an employer directly” (43.2%). The unemployed also chose to “check websites” (38.6%) and “ask friends or relatives” (37.8%) (Appendix Tables 5.14 and 5.15).

Prior work and period without work

The majority (71.8%) of the unemployed stated that they had previous jobs; of these, 41.2 percent have been without work for more than one year (Appendix Tables 5.16 and 5.18).

Among the unemployed Caymanians, 669 (79.5%) had previous jobs, while 172 (20.5%) never had a job; 42.9 percent of those with previous jobs were unemployed for more than a year (Appendix Tables 5.17 and 5.19).

Training

A total of 561 (40.0%) unemployed persons reported that they had been trained for a specific occupation. Further examination by status shows that occupational training was more common among Non-Caymanians (50.8%). While smaller portions of Caymanians (36.4%) and Non-Caymanians (33.3%) had been trained (Appendix Table 5.26).

4.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work, or did not seek work during the reference week, were classified as not being in the labour force. A total of 11,689 persons were not in the labour force, most of whom were Caymanians (71.0%). Females accounted for 61.4 percent of the persons not in the labour force. Most of the persons outside the labour force were aged 15 to 24 years (34.0%), closely followed by those 65 years and older (30.3%). The proportion of persons not in the labour force varied by educational attainment, ranging from 0.5 percent among individuals with no education” to 44.9 percent for high school (Table 18).

Reasons for not having work

When asked the reasons for not working, most of the persons not in the labour force stated that they were “retired/elderly” (36.1%) or “student/in training” (31.3%). These were also the leading reasons reported by sex; however, among Non-Caymanians, the top two reasons were “student/in training” (41.4%) and “home/family duties” (29.9%).

4.5.1 POTENTIAL LABOUR FORCE

Based on the ILO definition, the potential labour force consists of all working-age persons (15 years and older) who, during the reference week, were neither employed nor unemployed and were either classified as unavailable jobseekers or available potential job seekers. *Unavailable jobseekers* are persons who carried out activities to ‘seek employment,’ and were not ‘currently available’ but would become available within a subsequent short period. *Available potential jobseekers* are persons who did not carry out activities to ‘seek employment’ but wanted employment and were ‘currently available.’

Of the 11,689 persons not in the labour force, 912 persons constituted the potential labour force. The majority of these persons were Caymanian (75.5%), female (64.4%) and aged 65 or older (23.8%) (see Appendix Table 6.30).

5. OTHER FINDINGS

5.1 HOUSING CHARACTERISTICS

Most of the households (53.0%) occupied rented dwelling units, while 42.9 percent owned their own homes (Table 20). Approximately 9 out of every 10 households responded affirmatively to having cell phones (98.5%), air condition (95.8%) and internet connectivity (93.8%). While, a minority of households had domestic helpers (12.6%) or possessed landline telephones (16.5%). The total number of households was estimated at 34,259, based on post-survey results¹.

¹ The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.
