1. INTRODUCTION

This report presents the findings of the Fall 2019 Labour Force Survey (LFS). The LFS mainly provides information on the characteristics of persons in the labour force (employed and unemployed). It also presents demographic information on the general population, as well as on characteristics of persons not in the labour force and on household characteristics.

The concepts used in the survey are in accordance with the International Labour Organization (ILO) guidelines, and therefore, the indicators produced from the Survey are comparable to those used internationally.

The remaining sections of this report present the methodology (Section 2), the main findings with emphasis on the characteristics of the labour force, and those that are out of the labour force (Section 3) and other findings on housing characteristics (Section 4). The Appendix presents the detailed tables.

2. METHODOLOGY

As in previous LFS, planning and execution of the Fall 2019 LFS was undertaken by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

Sampling design

The sampling frame for the LFS is the ESO's Household Register, which is a listing of all household dwelling units in the Cayman Islands derived. A comprehensive update of the register was conducted between May and December 2018. Updates were also based on information from the Spring 2018 LFS and Fall 2018 LFS. As of February 2019, the Register listed 27,391 household dwelling units, which is the sampling frame used for this edition of the LFS.

Samples for the LFS were drawn from districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum Sister Islands. Probability proportionate to household count by district, as determined from the ESO Household Register, was used when allocating the number of selected households across strata. Households were randomly selected from all of the six districts; within each district, the households were selected with equal probability. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

P_h = probability of selection for the sample households in the h-th stratum (district)

M_h = total number of households in the sample frame for the h-th stratum

m_h = the number of sample households selected in the h-th stratum

Based on the sampling design, a sample of 1,202 household addresses was randomly selected representing 4.4 percent of the 27,391 households.

Fieldwork

Since the October 2014 LFS, the ESO has been using tablets for electronic data collection in Grand Cayman. However, for the Fall 2019 LFS paper forms were used in the Sister Islands due to logistical issues. Attached in the Appendix (page 127) is a copy of the questionnaire that was uploaded to the tablet for this edition of the LFS.

The reference week for the Fall 2019 LFS was the week September 22nd to September 28th, 2019. The data collection took place over a six-week period starting September 29, 2019 and ended on November 4, 2019. The administrative data (births, deaths, and work permits) as of the end of December 2019 which were used in estimating total population, were collected in early-February 2020.

Experienced supervisors from the ESO conducted four evenings of training in preparation for the fieldwork. A total of 58 persons, including ESO survey staff, were trained in Grand Cayman, most of whom have prior household survey experience (census and/or LFS). Fifty-four persons were eventually selected to conduct interviews in Grand Cayman. In the Sister Islands (Cayman Brac and Little Cayman), three persons were trained for two days to administer the LFS using the questionnaires on paper.

Weights

The 2019 population estimate was derived by adding the natural increase (births minus deaths) data collected from the Health Services Authority, and immigration (work permits and change of status) from the Immigration Department in the last semester of 2019 to the 2018 year population estimate.

The raising factors for Caymanian, PR/PR-WRW and Non-Caymanian sub-populations were then calculated based on their respective population estimates,

$$Raising\ factor_{si} = \frac{Population_{si}}{Survey\ Count_{si}}$$

Where:

$Population_{si}$ = estimated population based on administrative data of status_i
(_i=Caymanian, Permanent Residents, and Non-Caymanians)

$Survey\ Count_{si}$ = number of individuals from the LFS per status.

The household characteristics were raised using the district response rates adjusted for non-responses at the household level.

Table 1: Response Rate by District, Fall 2019

District	Sample Size ¹	In Scope Households ²	Fully and Partially Completed	Response Rate ³
Total	1,202	959	917	95.6
George Town	655	520	502	96.5
West Bay	233	186	179	96.2

North Side	29	20	18	90.0
East End	29	18	17	94.4
Sister Islands	50	45	37	82.2

1 Of the original 1,202 sample household addresses only 959 were found out to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

3 Response Rate represents those households fully and partially completed divided by in scope households.

Data processing

The survey returns were processed internally by ESO staff members. Data capture was built into the ESO Mobile LFS Project (LFSPrj) software on tablets; returns for the Sister Islands were entered manually on the tablets. Coding of industries and occupation were also conducted internally using the International Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified with cross-referencing information stored on the tablets or with a phone call to the respondent. A data file was then created with information from all households who completed the LFS interview (fully and partially). Finally, indicators were generated from this file using SPSS, and the final tables presented in this Report were prepared using Excel.

Standard errors for main estimates

Given the nature of the sample design used in the LFS, the estimates were computed with a 2.5 percent margin of error. The estimates published in this report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference of one person for the same category in different tables is due to rounding.

Data representing the weighted responses of one individual in the survey are suppressed and indicated by the symbol "..."

The estimates presented in this report are all liable to sampling error. Their absolute sampling error increases with their magnitude, while the relative error decreases the greater the size of the estimate. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*) the more reliable is the estimate. Because of this, comparisons of the larger estimates may be used

with confidence, but small estimates must be treated with caution. The *standard errors*, *confidence intervals* and *coefficients of variation* (C.V.) of the estimates for key variables for the Fall 2019 LFS are shown in Tables 2 and 3.

3. DEFINITION of KEY CONCEPTS

Population

In the LFS, population means the “resident” population; that is, persons staying or intending to stay in the Cayman Islands for at least six months. Visitors/tourists are not included in the resident population. Persons in institutions for more than six months are excluded. Family members of resident households who were abroad at the time of the survey but have intentions to return to the Islands are also considered as residents.

The population is categorized into three sub-populations by immigration status: Caymanians, Permanent Residents (PR) and Non-Caymanians. Permanent Residents include Non-Caymanians married to Caymanians, Permanent Residents with a government contract, Permanent Residents with rights to work (PR-WRW) and Permanent Residents without rights to work.

Labour Force

The labour force is composed of those members of the non-institutionalised population (i.e. those not in residential institutions such as general penitentiary, retirement homes) 15 years of age and over, who during the reference week were employed or unemployed. All persons in the PR labour force in all tables and sections in this Report refer explicitly to PR-WRW only. Persons categorized as PR without rights to work are included in the Non-Caymanian labour force.

Employed

Employed persons are those who, during the reference week, did any work for pay or profit; that is, paid work in the context of an employer-employee relationship, or self-employment. It also includes unpaid family workers who contributed directly to the operation of a farm, business or professional practice, owned or operated by a related member of the household. Based on guidelines of the International Labour Organization (ILO), work can be for as little as an hour during the reference week; it excludes unpaid domestic housework and volunteer work but includes those temporarily away from their jobs.

Unemployed

Unemployed persons are those who, during the reference week are:

- (a) without work;
- (b) currently available for work and
- (c) actively looking for a job, or had definite arrangements to start a job within 4 weeks.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, status, sex, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

$$\text{Unemployment Rate} = \frac{\text{Number of Unemployed}}{\text{Labour Force}} \times 100$$

Not In the Labour Force

These are persons in the non-institutional population (i.e. those not in residential institutions such as general penitentiary, retirement homes) – 15 years of age and over - who, during the reference week, were neither employed nor unemployed.

Household

A household comprises either one person living alone or a group of persons (not necessarily related) living at the same address, with common housekeeping, i.e. sharing at least one meal a day and sharing living arrangements. This concept is used for persons sharing an apartment or house or a one-room together. 4. MAIN FINDINGS

The population of the Cayman Islands was estimated at 69,914. There were 37,363 Caymanians, 5,437 Permanent Residents (of which 5,190 are PR-WRW) and 24,394 Non-Caymanians. The labour force was comprised of 49,089 persons, with 47,394 of them employed and 1,695 unemployed. The labour force participation rate was 82.8 percent, while the unemployment rate was 3.5 percent. The unemployment rate and labour force participation rate varied by sex and status (Tables 4 and 5). Figure 1 illustrates the composition of the population and the labour force.

4.1 POPULATION ESTIMATES

For the calendar year ending December 2019, the estimated population of the Cayman Islands stood at 69,914. The majority of Cayman's population lives in Grand Cayman, particularly in George Town, which accounted for 52.3 percent of the population. West Bay had 20.3 percent of the population, and Bodden Town had 20.0 percent, while North Side population stood at 2.3 percent and East End 2.0 percent respectively. The Sister Islands' (Cayman Brac and Little Cayman) combined population accounted for 3.2 percent (Table 6).

The average household size was 2.4 persons. North Side had the highest household size with 2.9 persons, while the Sister Islands had the smallest with 1.9 persons.

Table 6: Population Estimates by District, Fall 2019

District	Total Population		Average Household Size	Total Households

East End	1,411	2.0	2.8	510	1.8
Sister Islands	2,238	3.2	1.9	1,166	4.0

*The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.

Sex and Age

The estimated population in Fall 2019 comprised of 49.4 percent males and 50.6 percent females (Table 7).

Children younger than 15 years old accounted for 15.2 percent of the population, while the elderly (65 years or older) represented 7.9 percent. These two groups together are referred to as the 'dependent population' and accounted for a little less than one quarter of the population (23.2%).

The working-age population, which is the age group comprising persons who are 15 years and older accounted for 84.8 percent of the population. Persons in this age group are usually working or looking for work and are said to be in their 'productive years'. Within this group,

persons aged 15 to 64 years are considered to be the ones on whom children (0-14 years) and elderly (65 and above) depend. The ratio of the latter population groups to the 15 to 64 years old group shows a dependency ratio¹ of 30.5 percent.

* Due to rounding, sub – totals may differ from the sum

Status

Caymanians comprise the majority (53.4%) of the population while Non-Caymanians and Permanent Residents had a population share of 36.6 and 9.9 percent, respectively. In comparison to Fall 2018, the Caymanian population was 1.8 percent higher (Table 7).

Among Caymanians, 78.6 percent were in the working-age population compared to 96.4 and 90.6 percent of all Permanent Residents and Non-Caymanians, respectively (Appendix Table 1.5). The latter is expected since the residency of most expatriates is dependent on work permits.

¹ The dependency ratio is calculated: $\frac{\text{Population aged (0-14)+(65+) years}}{\text{Population aged (15-64) years less DK/NS}} * 100$

4.2 LABOUR FORCE

The labour force is comprised of persons in the working-age population who worked, as well as those who at the time of the survey, did not have a job, but were available and looking for work during the reference period. In Fall 2019, there were 49,089 persons who were in the labour force (Table 8).

Sex and age

In Fall 2019, 51.4 percent of the labour force were males, while females accounted for the remaining 48.6 percent. Most persons in the labour force were reported in the age group 35 to 44 years (27.4%) just slightly more than the group 45 to 54 years (24.6%) while the group 25 to 34 years comprised 23.0 percent.

Status

The labour force distribution by nationality status in Fall 2019 indicated that 43.3 percent were Caymanians, 46.7 percent were Non-Caymanians, and 9.9 percent were PR-WRW (Table 8).

Labour Force Participation Rate

The overall labour force participation rate (LFPR)² was 82.8 percent (Table 9). Non-Caymanians overall had the highest labour force participation rate (92.9%) as expected due to the work permits oriented immigration system. Caymanian LFPR was 72.4 percent.

In table 9, for educational attainment, the labour force participation rate ranged from 57.2 percent among those with “primary and below” to 89.0 percent among those with “college or university” education.

By age, those from 25 to 54 years old have the highest LFPRs. The participation rate for females was lower than males in all of the educational attainment categories except primary and below.

² The number of persons in the labour force expressed as a percentage of the working age population.

4.3 EMPLOYED

The employed consists of those persons in the labour force who worked for pay, profit or family gain for at least one hour during the reference week, which was the week of September 22nd to September 28th, 2019. Persons who, for some reason or the other, did not work during the reference week, but had a job were also categorized as employed as such persons were temporarily absent from work. The number of employed persons was 47,394 (Table 10).

4.3.1 UNDEREMPLOYED

‘Underemployment’ is defined as ‘Involuntary part-time’ work, where workers who could (and would like to) be working for a full work-week can find only part-time work. The underemployed accounted for 2.1 percent of the employed in Fall 2019 (Table 16). The underemployment rate for females was 2.5 percent, while for males, it was 1.8 percent.

Caymanians had an underemployment rate of 3.1 percent, Permanent Residents WRW had 1.5 percent and Non-Caymanians had 1.4 percent. Persons aged 65 and above have the highest underemployment rate (4.6%) along with those who have completed primary school and below education (2.5%), (Table 16).

Sex, age and status

The unemployed persons between ages 35 and 44 years comprised the highest segment of the unemployed (28.5%). The unemployment rate was highest between the ages 15 and 24 years (7.8%). The unemployment rate for males (3.4%) and females (3.5%). Caymanians had the highest unemployment rate of 5.6 percent; Permanent Residents WRW had 3.6 percent and Non-Caymanians, 1.4 percent. (see Table 17a and 17b)

Educational attainment

As shown in Table 17b, among the unemployed Caymanians, those with post-secondary education and college/university education have unemployment rates of 1.8 percent and 2.0 percent, respectively. Persons with middle school and high school education have the highest unemployment rates of 10.5 percent and 9.3 percent, respectively.

Among the unemployed PR-WRW, persons who completed high school had an unemployment rate of 9.7 percent. Among the Non-Caymanians, the highest unemployment rates were for persons who completed college/university education (2.7%).

Reasons for not having work

Majority of the unemployed persons (59.7%) stated “no work available,” as the main reason for being unemployed. This reason was also cited by most males (74.2%) and females (45.0%). Similar trends were also seen among Caymanians (66.7%), while the largest group of the unemployed Non-Caymanians (33.3%) reported “waiting for work permit” as the main reason for not having work (see Appendix Tables 5.8 and 5.9).

Job search

When asked about their main methods of job search, which was a multiple response question, the most popular responses among the unemployed were “send résumé” (56.6%) and “check websites” (51.7%). Persons who were classified as “unemployed” also ask friends (48.7%) and register with NWDA (48.2%) (Appendix Tables 5.14 and 5.15).

Prior work and period without work

The majority (82.0%) of the unemployed stated they had previous jobs, of these only 31.8 percent have been without work for more than one year (Appendix Tables 5.16 and 5.18).

Among the unemployed Caymanians, 1,143 (95.2%) had previous jobs while 57 (4.8%) never had a job; 32.5 percent of those with previous jobs were unemployed for more than a year (Appendix Tables 5.16, 5.17, 5.18 and 5.19).

Training

Approximately five out of ten of the unemployed persons (54.2%) received training for a specific occupation. Among unemployed Caymanians, 50.0 percent had the training, while most Non-Caymanians (77.8%) received training for a specific occupation (Appendix Table 5.26).

4.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work or did not seek work during the reference week were classified as not being in the labour force. A total of 10,173 persons were not in the labour force, the majority of whom were Caymanians (79.5%). Females accounted for 59.3 percent of the persons not in the labour force. Most of the

persons outside the labour force were aged 65 years and older (36.1%) and those aged 15 –24 years old (29.0%). Persons who had high school or lower-level education (59.1%) made up the majority of those not in the labour force (Table 18 and Appendix Tables 6.1 and 6.2).

When asked for the reasons for not working, most of the persons not in the labour force stated they were “retired/elderly” (38.6%) or “home/family duties” (3.5%). Retirees and students also dominate the composition of the Caymanian sub-group. Permanent Residents WRW and Non-Caymanians outside the labour force were mostly with “student/in training” (62.5%), while Non-Caymanians outside the labour force were mostly “home/family duties” (41.5%).

4.5.1 POTENTIAL LABOUR FORCE

Based on the ILO definition, the potential labour force consists of all persons of working age (15 years and older) who, during the reference week, were neither employed nor unemployed and were either classified as unavailable jobseekers or available potential job seekers. *Unavailable jobseekers* are persons who carried out activities to ‘seek employment’, were not ‘currently available’ but would become available within a subsequent short period. *Available potential jobseekers* are persons who did not carry out activities to ‘seek employment’, but wanted employment and were ‘currently available’.

Of the 10,173 persons who were not in the labour force, 947 persons were considered potential labour force, all of whom carried out job search for a job in the future but are not currently available. Majority of these persons were Caymanians (66.4%) and aged 65 and over the years (22.6%) (see Appendix Table 6.30).

5. OTHER FINDINGS

5.1 HOUSING CHARACTERISTICS

The majority of households (48.3%) were in owned homes, while 48.2 percent rented them (Table 20). Majority of the households had internet connectivity (86.7%), computer/laptops (68.4%), cable/satellite television (51.3%), and air-condition (92.6%). Notably, only 28.2 percent have a land-line telephone, but almost all (98.4%) had at least one cell phone. Approximately, 12.1 percent has a domestic helper, and 49.0 percent of households reported having housing structure insurance. The total number of households was estimated to be 28,834, based on post-survey results³
