

## 4. EMPLOYMENT

### A Note on the Labour Force Survey

The Labour Force Survey (LFS) is in most countries, the most important source for labour market information.

The labour force comprises persons 15 years and over residing in the country who are employed or actively seeking work during the reference period. In the Cayman Islands, the LFS is also used as the basis for population estimates. The LFS seeks information on respondents' labour market status and profile during a specific reference period, normally a period of one week, immediately prior to the start of the survey.

The first LFS in the Cayman Islands was conducted in 1991. The LFS is a random sample survey. This means that not every household are surveyed and those selected are done so purely by chance. However, since all households have an equal chance of selection, the more often the survey is conducted, the higher the chance of repeat selection. It must be stressed that, the 'sample selection' is generated by computer and is completely random.

Labour Force Surveys are carried out in many countries around the world. The International Labour Organization (ILO) has published recommendations concerning the definitions to be used in LFS. The LFS in the Cayman Islands uses internationally agreed concepts and definitions.

The LFS data reported to the Economics and Statistics Office (ESO) are treated in strict confidence and used for statistical purposes and published in aggregate form only.

It must be stressed that the results from the LFS are **estimates**. Results from sample surveys are always subject to some uncertainty because only a part of the total has been measured. This is called the sampling error. The uncertainty in the estimates can be calculated and the results are given as so called confidence intervals. For example the population in the Cayman Islands was estimated at 57,009 in the 2008 LFS, and the 95% confidence interval was calculated to be between 55,200 to 58,800.

In the LFS, population means the "resident population"; that is persons staying or intending to stay in the Cayman Islands for at least **six** months. Visitors/tourists who are here for less than 6 months are not included in the resident population. Also persons in institutions for more than 6 months and resident students abroad for more than 6 months are excluded.

**4.01a Labour Force Indicators by Status, 2005 - 2009**
