# The Cayman Islands Quality of Life Survey Report Fall 2024

Published: March 2025

## Welcome

How should wealth and happiness be measured?  
Is wealth best expressed as dollars and cents or  
through the meaningfulness of experiences?  
What is a good balance between financial security  
and a high quality of life? Is happiness the result  
of a high quality of life?

This report examines the changing relationship  
between wealth, prosperity, and quality of life as a  
measurable concept. It is primarily based on a  
simple random representative survey of 1,586  
households (2,982 persons age 18+) across all  
districts in the Cayman Islands. The data collected  
provided essential insights and a narrative of how  
the Cayman Islands residents communicate their  
priorities and redefine the meaning of a good  
quality of life.

## 1. THE CAYMAN ISLANDS' QUALITY OF LIFE SCORES

### SUMMARY

### Quality of Life Score

**82.9%**

Caymanian: 81.8%

Fall Survey different from Spring 2024 Survey +0.7

### Health and Wellness

**84.8%**

Caymanian: 82.9%

Different from Spring 2024 survey +0.3

### Employment and Job Quality

**80.6%**

Caymanian: 79.8%

Different from Spring 2024 survey +5.4

### Material Living Conditions

**84.7%**

Caymanian: 84.0%

Different from Spring 2024 survey -3.9

### Economic and Physical Safety

**85.7%**

Caymanian: 84.3%

Different from Spring 2024 survey -0.8

### Leisure and Social Activities

**80.7%**

Caymanian: 80.5%

Different from Spring 2024 survey -1.0

### Natural and Living Environment

**75.4%**

Caymanian: 74.5%

Different from Spring 2024 survey +5.0

## 2. SUMMARY INDICATORS – SATISFACTION & DISSATISFACTION

<b>Quality of Life Indicators - Selected</b>	<b>Overall Satisfaction (%) &amp; Positive (+)</b>	<b>Overall Dissatisfaction (%) &amp; Negative (-)</b>	<b>Caymanian Satisfaction (%) &amp; Positive (+)</b>	<b>Caymanian Dissatisfaction (%) &amp; Negative (-)</b>
<b>Health and Wellness</b> (Pg 13-23)	<b>84.8%</b>		<b>82.9%</b>	
<i>Health Services and Conditions</i>				
Skills & Competence of Staff	89.4	4.4	86.8	7.4
Overall Cleanliness of Facility	93.7	1.7	92.0	3.0
Friendliness & Courtesy of Staff	89.5	2.9	87.3	4.7
The Treatment /Medicine Prescribed	89.6	3.2	86.8	5.5
Waiting time for Health Services	65.7	23.0	61.8	27.0
Physical Wellness Satisfaction	85.1	6.5	77.5	11.3
Mental Wellness Satisfaction	84.8	2.9	80.0	4.8
Spiritual Wellness Engagement	92.3	7.7	93.1	6.9
<b>Employment and Job Quality</b> (Pg 24-36)	<b>80.6%</b>		<b>79.8%</b>	
Relevant Employment Skills (Job Matching)	89.6	8.9	90.7	7.7
Qualification for Current Job	78.0	17.7	79.9	15.7
Job/Occupation Satisfaction	81.8	6.9	80.4	8.8
Salary and Benefit Package	60.8	21.3	58.8	22.9
Career Progression	71.9	10.5	70.7	11.6
<b>Material Living Conditions</b> (Pg 37-41)	<b>84.7%</b>		<b>84.0%</b>	
Bill in Arrears (Not behind/behind)	79.8	20.2	77.0	23.0
NB: Satisfaction (%) and the dissatisfaction (%) may not add to 100% due to <b>Neutral Response</b>				

<b>Quality of Life Indicators - Selected</b>	<b>Overall Satisfaction (%) &amp; Positive (+)</b>	<b>Overall Dissatisfaction (%) &amp; Negative (-)</b>	<b>Caymanian Satisfaction (%) &amp; Positive (+)</b>	<b>Caymanian Dissatisfaction (%) &amp; Negative (-)</b>
<b>Economic and Physical Safety (Pg 42-65)</b>	<b>85.7%</b>		<b>84.3%</b>	
Ever lived in Poverty*	75.7	3.4	71.2	4.6
Meals Given Up to to Lack of Resources	92.4	6.8	91.1	7.8
Percentage of Persons giving up meals	94.7	5.3	93.5	6.5
Items given up due to lack of resources	62.1	37.9	62.1	37.9
Coping with insufficient cash	82.5	17.5	84.7	15.3
Finance unexpected payment CI\$ (2,000-5,000)	47.9	21.4	51.4	22.0
Economic/Financial Outlook (positive)	47.3	6.9	42.8	8.2
Standard of Living Satisfaction	75.8	11.7	76.2	12.7
Life Circumstances Change in last 2yrs	30.0	16.3	24.9	20.9
<i>Physical Safety</i>				
Feeling of Safety in the Cayman Islands	81.9	18.1	81.5	18.5
Feeling of Safety in the Community	83.0	17.0	82.6	17.4
Feeling of Safety at public spaces	81.5	18.5	81.3	18.7
Feeling of Safety at nights in the community	76.8	23.2	75.6	24.4
<i>Crime and Protection**</i>				
Status of Crime in Cayman Islands	52.5	47.5	41.7	58.3
Status of Crime in Community	87.5	12.5	84.6	15.4
Police Protection in Cayman Islands	90.6	9.4	85.1	14.9
Police Protection in Community	89.6	10.4	83.4	16.6
*Poverty Positive (Never lived in poverty), Poverty Negative (Always lived in poverty). **Positive means Crime stayed the same or decreased; Negative means Crime increased. Positive for Police Protection means the same or increased; Negative means Police Protection decreased.				

<b>Quality of Life Indicators - Selected</b>	<b>Overall Satisfaction (%) &amp; Positive (+)</b>	<b>Overall Dissatisfaction (%) &amp; Negative (-)</b>	<b>Caymanian Satisfaction (%) &amp; Positive (+)</b>	<b>Caymanian Dissatisfaction (%) &amp; Negative (-)</b>
<b>Leisure and Social Activities (Pg 66-83)</b>	<b>80.7%</b>		<b>80.5%</b>	
Worklife Balance	76.7	9.9	75.6	12.3
<i>Social Support Network</i>				
Relationship with family	93.0	1.9	91.0	2.7
Relationship with co-workers	86.4	2.4	85.0	3.2
Support when Sick	95.8	4.2	96.6	3.4
Support when Financial Problems	89.5	10.5	88.8	11.2
Support when Emotional Issues	91.7	8.3	92.6	7.4
General personal support	93.0	7.0	94.7	5.3
<i>Loneliness</i>	72.9	27.1	76.0	24.0
<i>Neighbourhood Social Cohesion</i>				
Helpful neighbourhood	68.0	6.7	68.9	8.5
Close-knit neighbourhood	57.3	12.7	57.8	15.4
Trustworthy neighbourhood	59.7	6.5	62.2	8.1
Incompatible neighbours**	14.3	55.0	15.7	57.3
Neighbourhood cultural differences**	19.2	39.0	20.2	40.4
Neighbourhood unknown to each other**	27.1	44.8	26.8	48.9

**NB:** Satisfaction (%) and the dissatisfaction (%) may not add to 100% due to **Neutral Response**.

\*\*Dissatisfaction with incompatible neighbours, neighbourhood cultural differences and neighbourhood unknown to each other represented disagreement with the negative phrasing of the respective questions. 1) people in this neighbourhood generally do not get along with each other; 2) people in this neighbourhood generally do not share the same values, and 3) people in this neighbourhood are unknown to each other.

<b>Quality of Life Indicators - Selected</b>	<b>Overall Satisfaction (%) &amp; Positive (+)</b>	<b>Overall Dissatisfaction (%) &amp; Negative (-)</b>	<b>Caymanian Satisfaction (%) &amp; Positive (+)</b>	<b>Caymanian Dissatisfaction (%) &amp; Negative (-)</b>

Adult education and lifelong learning		44.2	11.6	44.2	19.1
<b>NB: Satisfaction (%) and the dissatisfaction (%) may not add to 100% due to Neutral Response</b>					

### 3. EXECUTIVE SUMMARY

1. **Quality of life score.** The Cayman Islands' quality of life (QOL) was assessed, and the score was 82.9%, lower than that of the spring 2024 survey by 0.7%. This score is based on a comprehensive assessment of various quality of life factors. Residents ranked their health as the most essential quality of life at 34.5 percent. Followed by employment and job quality, material living conditions, economic and physical safety, and leisure and social activities. The natural and living environment was scored the least important (see Table 1). The Caymanian overall QOL score was 81.8%.
2. **Health and wellness.** The most significant component, health and wellness, had a satisfaction score of 84.8%, while for Caymanians, it was 82.9%. This score emanated from the satisfaction score on health services and conditions, which was 80.9%; physical wellness, 81.6%; mental wellness, 84.4%; and spiritual wellness, 92.3%. The lowest component of health and wellness was the waiting time for services from public hospitals and clinics (weighted average - 70.9%), impacted by dissatisfaction, which was 23%. Caymanians scored dissatisfaction at 27.0%.
3. **Employment and job quality.** This component scored 80.6%, representing an improvement of 5.4% relative to the Spring 2024 survey. The Caymanian satisfaction score under this rubric was 79.8%. This QOL edition includes respondents' satisfaction with salary and benefit packages and career progression among employed persons, enhancing accuracy in measurement.

4. **Material living conditions.** An estimated 11.6% of households lived in overcrowded housing, a higher number of families with bills in arrears, and more disconnection from household services influenced the 84.7% score in this section, which was lower than in the spring QOL by 3.9%. The score for Caymanians was slightly lower, at 84.0%.
5. **Economic and physical safety.** This rubric was assigned a score of 85.7%, lower than the 86.5% in Spring 2024 but slightly higher than the 84.3% for Caymanians. Self-assessed poverty increased from 4.9% in Spring 2024 to 5.6% in Fall 2024, and food insecurity was rated higher at 6.8%, higher than 5.7% in Spring 2024. The physical security indicators in this QOL edition showed higher dissatisfaction among Caymanians than all residents.
6. **Leisure and social activities.** This section scored 80.7% based on work-life balance (76.4%) and social cohesion and connections (85.0%), which measures the interconnectedness of different social groups within the Cayman Islands including loneliness. For Caymanians, the satisfaction score was 80.5%. Approximately 27.1% of residents reported episodes of loneliness, with 24.0% among Caymanians.
7. **Natural and living environment.** This section scored 75.4%, higher than the 70.4% in Spring 2024. This was due to the addition of significant new indicators, increasing the accuracy measurement. The section comprised respondents' sentiments on environmental preservation, natural disasters and emergencies, household disaster preparedness and economic and social development. The economic and social development included responses to development indicators, road transport and investment in human resource development. The scoring of Caymanian respondents was 74.1%, amidst strong dissatisfaction on most economic and social developmental and environmental preservation indicators.

## Dimensions Ranking of the Quality of Life.

The QOL ranking was derived from the Fall 2024 survey. The results are virtually the same when compared to the Spring 2024 survey; the Fall 2024 survey results are as follows:

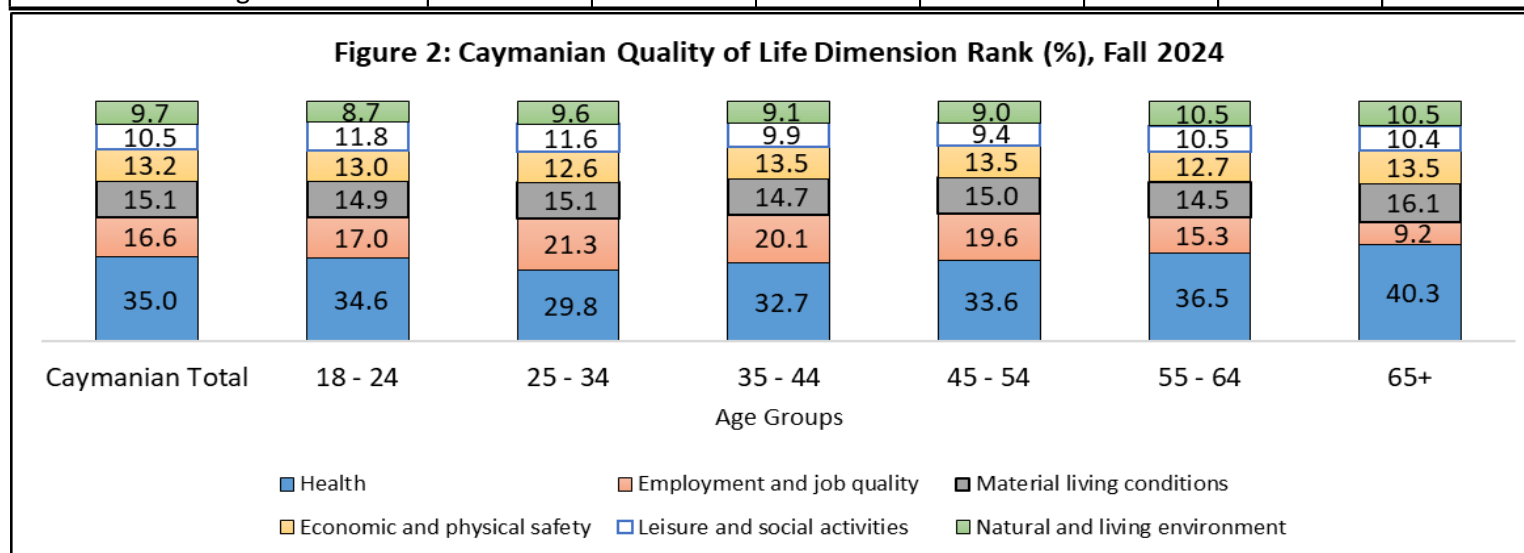

Table 1: Preference ranking of the quality of life dimensions, Fall 2024									
	Total	Caymanian	Non-Caymanian	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands
	Percent (%)								
Quality of life score	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Health	34.5	35.0	34.1	36.4	33.9	34.0	23.3	28.1	30.6
Employment and job quality	18.0	16.6	19.4	17.9	17.2	18.8	16.8	17.5	21.3
Material living conditions	14.6	15.1	14.1	14.0	15.2	14.5	15.0	16.5	17.0
Economic and physical safety	13.1	13.2	13.0	12.7	13.6	13.0	14.1	14.9	12.2
Leisure and social activities	10.3	10.5	10.2	9.9	10.7	10.1	15.4	11.4	9.9
Natural and living environment	9.5	9.7	9.3	9.1	9.3	9.6	15.4	11.6	9.0

FIGURE 1: QUALITY OF LIFE DIMENSIONS RANK (%) FALL 2024

For Caymanians, the preference ranking of the quality of life dimensions are as follows:

Table 2: Caymanian preference ranking of the quality of life dimensions by district, Fall 2024							
	Caymanian	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands
	Percent (%)						
<b>Quality of life score</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
Health	35.0	38.1	34.7	33.4	23.2	31.0	28.8

Leisure and social activities	10.5	9.8	10.8	10.4	15.3	10.7	11.5
Natural and living environment	9.7	9.0	9.7	9.9	14.8	11.5	9.5

#### 4. HEALTH AND WELLNESS

84.8%

Health is not just the absence of disease but a critical enabler that allows individuals to live life to the fullest. It is shaped by how individuals grow, live, learn, work, and age. Emotional well-being and a positive outlook are key indicators of how people perceive and experience quality of life. Reliable access to timely and appropriate health care provides peace of mind and promotes positive health outcomes. The survey captures data on self-perceived health' (SPH), a measure of physical well-being and a tool for predicting mortality and chronic disease incidence. Studies have shown that this self-assessment is a reliable indicator of chronic diseases, functional ability, and psychological well-being. To this end, overall health is evaluated and scored using the following categories.

The overall health score was **84.8 percent**, which is a simple average of the sub-components: health services and conditions, physical wellness, mental wellness, and spiritual wellness.

## Health Services and Conditions

80.9%

Quality in healthcare encompasses the degree to which healthcare services meet the expectations and needs of patients and healthcare providers. As populations age, so does the workforce, creating a growing need for healthcare and healthcare workers to maintain quality healthcare. In response to the Survey question: *On the last occasion you went to the public hospital/clinic, how satisfied were you with the staff's competence, the overall cleanliness of the facility, the friendliness and courtesies of the staff, the treatment/medicine prescribed, and the waiting time for services?* The

weighted satisfaction score<sup>1</sup> The Fall QOL survey's average weighted score for health services and conditions was 80.9 percent (see Table 4.1). This is an average of all weighted responses components in Table 4.1. The satisfaction score averaged 85.6 percent as all the components had higher satisfaction scores than weighted response, except waiting time for service.

80.9%	Cayman Islands Residents Satisfaction Responses						
	Very Satisfied	Satisfied	Neither	Dissatisfied	Very Dissatisfied	Satisfaction Score (%)	Weighted Response (%)
	Percent (%)						
Skills and competence of staff	30.5	58.9	6.2	3.5	0.9	89.4	82.9
Overall cleanliness of facility	34.1	59.6	4.6	1.4	0.3	93.7	85.1
Friendliness & Courtesy of Staff	29.9	59.6	7.6	2.3	0.6	89.5	83.2
The treatment/medicine prescribed	26.7	62.9	7.2	2.4	0.8	89.6	82.5
Waiting time for service	18.6	47.1	11.3	16.1	6.9	65.7	70.9
Average Scores (%)	28.0	57.6	7.4	5.1	1.9	85.6	80.9

**Table 4.1: Overall Satisfaction with facility and services of public health hospitals and clinics**

<sup>1</sup> The sub components weighted satisfaction response is very satisfied 1.0, satisfied 0.8, neither satisfied nor dissatisfied 0.6, dissatisfied 0.4, very dissatisfied 0.2.

Respondents to the QOL survey ranked services and conditions at the public hospitals and/or clinics regarding staff competence, facility cleanliness, friendliness and courtesy of staff, treatment and medicine prescribed, and waiting time for service (waiting time on the day of the appointment and waiting for an appointment booking). As exhibited in Table 4.1, the highest weighted response satisfaction was the overall cleanliness of the facility (85.1%). This was followed by the friendliness and courtesy of staff (83.2%), skills and competence of staff (82.9%), prescribed treatment/medicine (82.5%), and waiting time for service (70.9%). When only the satisfaction score (very satisfied and satisfied) is considered, the overall score was 85.6 percent, and all the scores were in the high 80s except for waiting time for service, which was 65.7 percent.

79.6%	Caymanians Satisfaction Responses						
	Very Satisfied	Satisfied	Neither	Dissatisfied	Very Dissatisfied	Satisfaction Score (%)*	Weighted Response (%)
	Percent (%)						
Skills and competence of staff	30.3	56.5	5.9	5.9	1.5	86.8	81.7
Overall cleanliness of facility	33.8	58.2	5.0	2.3	0.7	92.0	84.4
Friendliness & Courtesy of Staff	29.3	58.0	7.9	3.9	0.8	87.3	82.2
The treatment/medicine prescribed	25.7	61.0	7.7	4.3	1.2	86.8	81.1
Waiting time for service	16.8	45.0	11.2	17.4	9.6	61.8	68.4
Average Scores (%)	27.2	55.8	7.5	6.8	2.8	82.9	79.6

**Table 4.2: Caymanians Satisfaction with facility and services of public health hospitals and clinics**

\* Satisfaction score is the total of very satisfied and satisfied responses.

\*\* Weighted response score uses all responses in a weighting from 0 and 1 as explained in Endnote 1.

The weighted average score of Caymanian respondents on the services and conditions at the public hospitals and/or clinics was 79.6 percent. Except waiting time for service (see Table 4.2), most components were rated higher than the overall ranking of all residents.

Responses indicate that across the districts, residents of the Sister Islands were most content with the services and conditions of the public hospitals and clinics (81.9%). They are followed by residents of West Bay (81.2%) and North Side (81.2%), George Town (80.9%), Bodden Town (80.6%), and East End (77.5%) (see Table 4.3). The district scores represent a satisfaction rating of all public hospitals and clinics, not necessarily the location where services were rendered.

	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands
Average Weighted Response (%)						
Skills and Competence of Staff	83.1	82.1	82.6	91.6	79.3	82.3
Overall Cleanliness	84.6	83.9	86.0	97.0	84.1	85.8
Friendliness & Courtesy	83.6	81.9	83.6	85.8	77.5	83.6
The treatment/medicine prescribed	82.9	82.3	81.8	82.6	78.4	83.5
Waiting time for service	70.6	75.9	68.7	48.9	68.0	74.3
<b>Average Satisfaction Score (%)</b>	<b>85.8</b>	<b>85.6</b>	<b>83.6</b>	<b>84.0</b>	<b>86.9</b>	<b>91.8</b>
<b>Average Weighted Response (%)</b>	<b>80.9</b>	<b>81.2</b>	<b>80.6</b>	<b>81.2</b>	<b>77.5</b>	<b>81.9</b>

**Table 4.3: District Satisfaction with Services and Facility of Public Hospitals and Clinics**

Using the satisfaction score (satisfied and very satisfied), the highest would still be the Sister Islands (91.8%), followed by East End, George Town, West Bay, North Side and Bodden Town.

## Physical Wellness

81.6%

Physical wellness consists of recognising the need for physical activity, healthy foods, and rest to help prevent illness and injury or manage chronic health conditions. Physical health allows people to do everyday activities without undue fatigue or physical stress. In response to “How satisfied are you with your Physical Health?” on average, 81.6 percent of respondents were generally satisfied using the weighted average satisfaction. The satisfaction score was 85.1 percent, among Caymanians was 77.5 percent (see Table 4.4) and 91.7 percent among non-Caymanians. Generally, male respondents (87.0%) were more satisfied with their physical health than females (83.3%).

	81.6%	Total	Male	Female	Caymanian	Permanent Resident	Non-Caymanian
<b>Total</b>		72,712	36,033	36,680	30,937	8,717	33,058
<b>Physical Health</b>		Percent (%)

*Table 4.5: Satisfaction with Physical Health*

Among the districts, respondents residing in the North Side had the highest physical health satisfaction rate, at 94.1 percent (see Table 4.5). This was followed by East End (90.4%), George Town (87.7%), West Bay (83.9%), and Sister Islands. Bodden Town had the lowest satisfaction rate of 78.8 percent.

In response to the question “*In the past year, how many days were you absent from work due to illness?*”, on average, respondents (employed persons) were away from work 5.9 sick days (or 2.4% of working days<sup>2</sup>) a year. Caymanians had 6.9 sick days (2.8%), permanent residents had 9.9 sick days (4.0%), and non-Caymanians had 3.9 sick days (1.6% of working days), the lowest.

The productive days for the employed labour market were 97.6 percent after accounting for the 2.4 percent of unproductive days (sick days).

<sup>2</sup> Working days include a 5-day work week less public holidays.

## Mental wellness

**84.4%**

Mental wellness, a key determinant of job satisfaction and productivity, is a state of well-being in which an individual realises their abilities, can cope with the everyday stresses of life, can work productively and fruitfully, and can contribute to the community. It

encompasses the emotional, physical, spiritual, and mental self. Research on well-being underscores that promoting positive mental health and alleviating chronic challenges such as anxiety and depression are significant avenues to enhance the quality of life. In response to the survey question, “In general, would you say that your mental health is... {excellent, good, fair, poor or very poor}, respondents weighted average rating for their mental health at 84.4 percent (see Table 4.6) and satisfaction score was 84.8 percent. Among female respondents, mental health positive response (83.1%) (excellent & good) was lower than that of their male (86.5%) counterparts. Approximately 3.5 percent of females rated their mental health as

	84.4%	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
Mental Health		Percent (%)					
Excellent		40.9	43.5	38.5	33.6	42.8	47.2
Good		43.9	43.1	44.6	46.4	46.1	41.0
Fair		12.3	11.2	13.4	15.2	10.4	10.0

Table 4.7: Mental Health Rating by Districts

poor or very poor (see Table 4.6). Non-Caymanian respondents rated their mental health at 88.2 out of 100. In contrast, Caymanians rated their mental health at 79.9 percent, as a higher proportion of Caymanians rated their mental health as poor or very poor (4.8%).

Among the districts, 90.4 percent of North Side respondents rated their mental health as excellent or good (see Table 4.7). Among Bodden Town respondents, 4.5 percent rated their mental health as poor and very poor (see Table 4.7).

Of the estimated 1,508 respondents with self-rated “poor” mental health,

35.1 percent are within the 25-34 age group, while another 21.8 percent are 65+ (see Table 4.8). Of the estimated 552 respondents with “very poor” mental health, 16.3 percent were from the 18 to 24 and 45 to 54 age groups, while another 23.7 percent were from the 35 to 44 and 65+ age groups.

As displayed in Table 4.9.1, among employed respondents, 41.4 percent rated their mental health as “excellent,” 43.5 percent rated it as “good,” and another 11.4 percent rated it as “fair.” Among unemployed respondents, 67.3 percent were rated as “excellent” or “good”, and 72.7 percent for persons not in the labour force. The highest proportion of “poor” and “very poor” mental health was unemployed or not in the labour force, with 8.9 percent and 6.3 percent, respectively.

Mental Health	Total/Age	18 - 24	25 - 34	35 - 44	45 - 54	55 - 64	65+

Positive response (excellent & good)		12.9	44.7	50.8	42.5	29.3	19.7
Negative response (poor & very poor)		23.6	44.0	38.9	25.5	22.6	45.5

**Table 4.8: Mental Health Satisfaction by Age Group**

Of the persons who reported “poor” mental health, 63.0 percent were employed, 2.7 percent were unemployed, and 34.2 percent were not in the labour force (see Table 4.9.2). Relative to reported “poor” mental health displayed in Table 4.9.2, a larger share of the persons reporting “very poor” mental health were unemployed (14.9%) and not in the labour force (46.0%).

Very poor	100.0	39.1	14.9	46.0

*Table 4.9.2: Mental Health Rating by Economic Status*

According to the Centers for Disease Control (CDC), morbidity and mortality weekly report, “loneliness and isolation are indicators of social disconnection that can lead to poor mental and physical health outcomes, including increased risk for heart disease, stroke, dementia, type 2 diabetes, depression, anxiety, and premature mortality. Loneliness and lack of social connection are widespread and pose a threat to mental and physical health.”<sup>3</sup>

<sup>3</sup> Loneliness, Lack of Social and Emotional Support, and Mental Health Issues — United States, 2022 [https://www.cdc.gov/mmwr/volumes/73/wr/mm7324a1.htm#:~:text=Loneliness%20and%20isolation%20are%20indicators,mortality%20\(1%E2%80%9333\).](https://www.cdc.gov/mmwr/volumes/73/wr/mm7324a1.htm#:~:text=Loneliness%20and%20isolation%20are%20indicators,mortality%20(1%E2%80%9333).)

Responses to the QOL survey revealed that 33.7 percent of persons who reported loneliness as “often/always” also reported “poor” mental health, and 45.1 percent reported “very poor” mental health (see Table 4.10). Persons responding with “some of the time”, 49.7 percent of respondents reported “fair” to “poor” mental health. Most of the persons reporting “excellent” mental health also reported “hardly ever” (20.5%) and never (45.6%) being lonely. Persons reporting “good” mental health also reported “hardly ever” (24.1%) and “never” (35.3%) being lonely (see Table 4.10). As shown in Table 4.10B, there are 1,146 persons deemed at-risk. These are lonely people with poor mental health, which account for about 1.6 percent of the population 18 years and older.

**Table 4.10A: Mental Health and Loneliness**

## Spiritual wellness

92.3%

Spiritual wellness encompasses a sense of purpose and meaning in life, including one's morals and ethics, which may or may not involve religious activities. Spirituality is expressed in many forms, whether tied to a religion, a moral philosophy, or an inherent sense of connectedness with something greater than oneself. Therefore, intense spirituality means contemplating one's purpose in life, achieving greater mindfulness of individual impact on others, living in harmony with one's surroundings and balancing personal needs. In response to the survey question: *"How often do you say/recite prayers, attend church/religious gatherings, engage in spiritual healing/practices, and practice meditation?"* 90 percent of respondents say or recite prayers, 75.9 percent attend church (including online) and religious gatherings, 56.0 percent engage in spiritual healing<sup>4</sup> and 45.8 percent practice some form of meditation (see Table 4.11).

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
No Response (%)	7.7	9.3	6.1	6.9	9.1	8.0
Spirituality (%)	92.3	90.7	93.9	93.1	90.9	92.0

Table 4.11: Spirituality

7.7 percent of respondents did not engage in any form of spirituality. Therefore, 92.3 percent of persons are involved in at least one form of spirituality (see Figure 4.1).

<sup>4</sup> Spiritual practices is a systematic and purposeful intervention performed by one or more people to help each other, focused on improving their condition. Ways to enhance spiritual health include connecting with the faith community, volunteering or helping others, practicing yoga, meditating, spending time in nature, focusing on hobbies, and speaking with a chaplain or a trusted person.

## 5. EMPLOYMENT AND JOB QUALITY

The Cayman's economy should work better for everyone. To achieve this, businesses, workers, investors, and the government should work together to create good jobs that allow workers to thrive and benefit.

Workers thrive when quality jobs are created such that employees' work is valued, contributes to the organisation's goals, offers a voice in the workplace and opportunities to learn and grow, and allows for financial security and future planning. It also includes wages to cover living expenses and build wealth, safe and welcoming working conditions, predictable work hours, and benefits such as health insurance, paid leave, and retirement savings. Improving job quality requires better communication and relationships among stakeholders to ensure that more jobs in the local economy

are of good quality.

The overall satisfaction was **80.6 percent**, averaged from the subcomponents above.

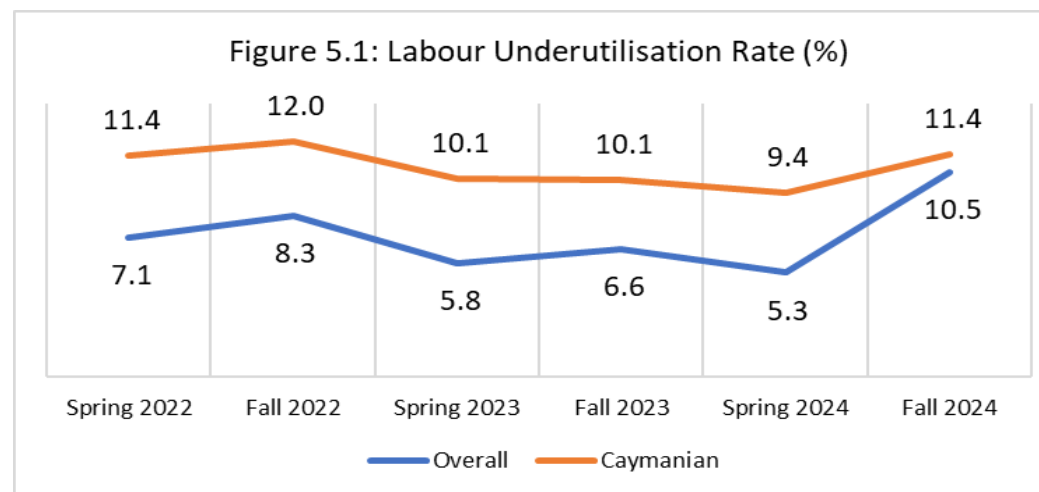

## Employment Opportunities and Employability

89.5%

**Employment Opportunities and Employability:** Employability is the lifelong process of acquiring experience, new knowledge, purposeful learning, and skills that improve marketability and enhance the potential to obtain and maintain employment through various shifts in the labour market. It is based on a set of individual characteristics. It is not equivalent to employment but is a prerequisite for gainful employment. Essentially, employability is the relative ability to find and stay employed,

as well as make successful transitions from one job to the next, either within the same company or field or to a new one, at the discretion of an individual and as circumstances or economic conditions may dictate. The employment opportunity score was **89.5 percent** (100 – LUR%), derived from the labour underutilisation rate (LUR). This gives an estimate of the overall job creation in the economy relative to the available labour supply.

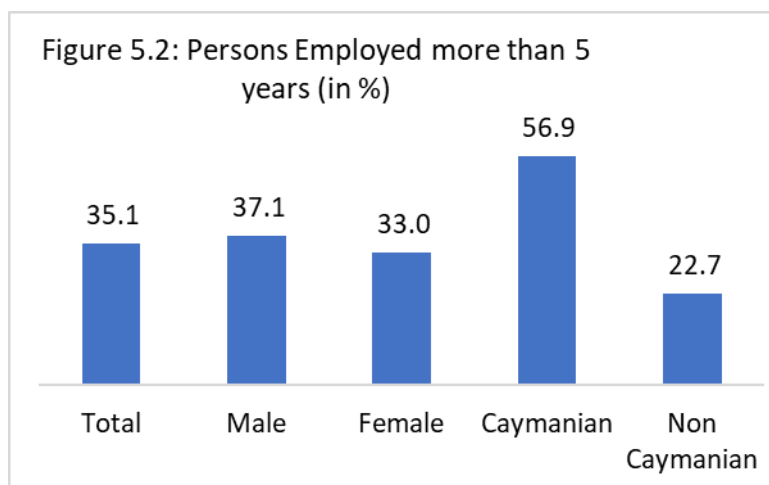

**Labour Underutilisation Rate (LUR).** The LUR indicates the number of persons classified as unemployed, plus those classified as part-time under-employed, and those outside the labour force who are available for work but not seeking work (disgruntled workers) as a percentage share of the total labour force. This shows the mismatches between labour supply and demand, translating into an unmet need for employment among the population.

For the Cayman Islands, the labour underutilisation rate was 7.1 percent in Spring 2022 (see Figure 5.1). This improved to 5.3 percent in Spring 2024, then worsened to 10.5 percent in Fall 2024, indicating the **labour utilisation rate is 89.5 percent**. The LUR for Caymanians improved to 9.4 percent in Spring 2024, then worsened to 11.4 percent in Fall 2024. This means the labour market has unused labour capacity; in Fall 2024, more people were available for jobs than in Spring 2024 due to disgruntled job seekers.

**Length of Employment.** The length of time an employee has worked for their current employer is job tenure. Long-tenured employees typically have worked for a company for more than five years, while short-tenured employees often have worked there for less than five years. Fair and competitive compensation packages play a crucial role in employee retention. Employability encompasses the ability to find jobs and stay in those jobs. When employees feel adequately rewarded for their contributions, they are less likely to seek opportunities elsewhere. In addition to remuneration, employees find value in having opportunities for career growth and professional development, workplace recognition, work-life balance, meaningful and challenging work, Job security, strong company values and culture and supportive management and co-workers. In Fall 2024, the share of residents (35.1%) and Caymanians (56.9%) spent more than five (5) years at the same place of employment (see Figure 5.2). The transient nature of the non-Caymanian labour market impacted the overall low job retention rate.

**Job Creation.** Over the six years 2018 to October 2024, approximately 15,773 jobs were created at 2,253 jobs per year. Creating jobs is crucial, but developing quality or good jobs is more essential. These jobs pay well enough to allow for a reasonable living standard, provide stability and security, and provide opportunities for career progression. Over time, good jobs equip workers with opportunities for self-development, responsibility, purpose and fulfilment. Alternatively, some 'low-quality jobs' come with a range of social and economic costs, which have social consequences like exclusion, fractured families, addiction, and crime, as well as reduced mental and physical well-being.

### Job Quality.

67.3%

A quality job is one in which an employee's work is valued, and allowed to contribute to the organisation's goals. Quality jobs offer employees a voice in the workplace, opportunities to learn and grow, and allow for financial security and future planning. Other defining characteristics of a quality job include wages to cover living expenses and build wealth, safe and welcoming working conditions, predictable work hours, and benefits such as health insurance, paid leave, and retirement savings. Improving job quality requires fostering better communication and enhancing stakeholder relationships to ensure more quality jobs in the local economy. In assessing quality jobs,

the percentage of employees with income greater than their self-assessed standard of living costs was compared, as depicted in the table. The job quality score (67.3%) average income to standard of living costs, 55.7 percent, and the job satisfaction survey, 78.9 percent.

**Individual Total Income vs. Standard of Living Costs.** In the quality of life and labour force surveys, respondents were asked, *"What is the estimated monthly cost that you think is necessary to maintain your standard of living?"* and to provide their total income (employed or otherwise), which was compared. The overall comparison revealed that **55.7 percent** of persons' total income is greater than their standard of living. The share of Males (60.4%) with income exceeding their standard of living was higher than that of females (61.2%). Employed persons with an income-to-standard of living gap were 33.7 percent, unemployed persons had a gap of 75.1 percent, while persons not in the labour force were 34.9 percent.

## Job Satisfaction. How satisfied are you with your occupation/job?

Generally, job satisfaction occurs when employees feel they have a stable job, room to grow in their careers, and a good balance between work and personal life. In other words, employees are happy because the work meets their standards. Several studies conclude that employee satisfaction can stimulate positive energy, creativity, and motivation to succeed, and good job security makes people happier. Therefore, satisfied employees can work towards long-term goals and feel a greater sense of purpose. The Job weighted satisfaction score was 78.9 percent (see Table 5.1).

Overall, 81.8 percent of respondents expressed satisfaction (very satisfied and satisfied) with their occupation/job (see Table 5.1). Among Caymanian respondents, 80.4 percent are satisfied, with more males than females reporting job satisfaction.

	78.9%	Total	Male	Female	Caymanian	Permanent Resident	Non-Caymanian
Occupation/Job	Percent (%)						
Very Satisfied		20.4	21.3	19.6	20.3	25.5	19.4

<b>Satisfaction Score (satisfied &amp; very satisfied)</b>		<b>81.8</b>	<b>83.2</b>	<b>80.3</b>	<b>80.4</b>	<b>84.5</b>	<b>82.2</b>
<b>Weighted Average Satisfaction (%)</b>		<b>78.9</b>	<b>79.6</b>	<b>78.3</b>	<b>78.1</b>	<b>80.8</b>	<b>79.1</b>

Table 5.1: Satisfaction with Occupation/Job

Across the districts, the Sister Islands recorded the highest percentage of satisfied (satisfied and very satisfied) respondents with their jobs, 94.0 percent (see Table 5.2). George Town residents were the second happiest with their jobs, 83.8 percent. The district of North Side had the lowest percentage of people expressing job happiness, at 74.2 percent, while 11.6 percent of Bodden Town responded with dissatisfaction or very dissatisfaction (see Table 5.2).

Occupation/job	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands
	Percent (%)					
Very satisfied	22.7	20.5	16.2	24.6	7.3	47.4
Satisfied	61.2	61.6	60.5	49.6	71.3	46.5
Neither satisfied nor dissatisfied	10.9	11.5	11.7	21.1	12.4	1.8
Dissatisfied	4.3	5.9	10.6	4.7	7.8	4.3

<b>Weighted Score ( ___/100)</b>	<b>80.1</b>	<b>79.2</b>	<b>76.1</b>	<b>78.8</b>	<b>75.2</b>	<b>87.4</b>

*Table 5.2: Satisfaction with Occupation/Job*

## Employable Skills

85.0%

Employment opportunities are available for individuals to secure jobs in a specific field or industry, considering factors such as job market conditions, required skills, and career growth prospects. Generally, a decent/good job ensures employees can work and live with dignity, earn enough money to avoid poverty and have employment rights. In addition to educational requirements, good jobs help build vital skills, earn stable incomes, and contribute to economic growth. In a thriving economy, the changing job market must be characterised by high-quality jobs, worker security, extensive job training, and a good work-life balance. To this end, employee skills were

examined. The overall score of **85.0 percent** is a simple average of satisfaction scores from educational attainment (93.8%), relevant employment skills (89.6%), qualification for the current job (95.7%), salary and benefit package (70.3%) and career progression (75.4%).

Figure 5.4: Overall Employed by Educational Attainment (%)

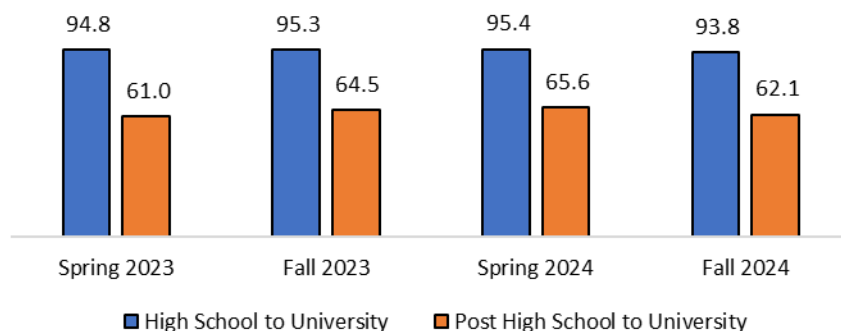

Figure 5.5: Caymanian Employed by Educational Attainment (%)

**Education and Training.** For the Cayman Islands, post-High combined with university education as a proportion of the employed labour force increased from 61.0 percent in Spring 2023 to 62.1 percent in Fall 2024, indicating that education and training are instrumental in embracing available job opportunities. Education levels from high school to university as a share of the employed labour market declined marginally, from 94.8 percent in Spring 2023 to **93.8 percent in Fall 2024** (see Figure 5.4). Among Caymanians, the movement was similar. Persons with high school and university education employed labour force share declined slightly from 95.0 percent to 94.1 percent between Spring 2023 and Fall 2024 (see Figure 5.5). The high school to university education levels tell a similar story.

**Relevant Employment Skills<sup>5</sup>.** *How closely is your current job related to your education, training, and experience?*

Approximately **89.6 percent** of employed persons felt that their qualifications matched (exactly—61.2%; closely—16.2% and somewhat—12.2%) their current job. For Caymanians, it was 90.7 percent (exactly—60.4%; closely—17.8% and somewhat—12.5%). When educational qualification as a stand-alone is evaluated, 17.7 percent of respondents felt overqualified for their current post, and 15.7 percent of Caymanians. Overall, 8.9 percent of persons' qualifications were unrelated to their jobs; for Caymanians, it was 7.7 percent.

**Qualification for Current Job<sup>6</sup>.** *Considering your education, training and work experience, how would you rate your qualifications for the current job?* Approximately 17.7 percent of employed respondents felt overqualified for their current job, while another **78.0 percent** matched exactly. **Therefore, 95.7 percent of the employed jobs exactly matched or were overqualified for their current job.** For Caymanians, it was 79.9 percent an exact match with 15.7 percent overqualified. Among the employed persons 1.7 percent were underqualified for their jobs; for Caymanians, it was 1.6 percent.

<sup>5</sup> These figures are from the Labour Force Survey report October 2024.

<sup>6</sup> These figures are from the Labour Force Survey report October 2024.

**Salary and Benefits Package.** As part of an employee benefits package, a remuneration package is the total compensation offered to an employee for their services or work. It may include a base salary, additional cash, and non-cash incentives (like flexible work and other benefits). As depicted in Table 5.3, 60.8 percent of respondents were satisfied (satisfied and very satisfied) with their job remuneration package, and Caymanians were marginally less satisfied with 58.8 percent. About 21.3 percent of all respondents were dissatisfied (dissatisfied and very dissatisfied) with the salary and benefits, and Caymanians had marginally higher dissatisfaction at 22.9 percent.

Respondents from East End were the least satisfied with their pay and benefit package. The most satisfied were persons from the Sister Islands with a 69.3 percent satisfaction rate. Generally, males were more satisfied than females, non-Caymanians over Caymanians (see Table 5.4).

*Table 5.3: Satisfaction with Salary & Benefits Remuneration Package*

Sister Islands	69.3	72.0	66.5	56.4	50.0	83.3

*Table 5.4: District, Sex, and Status Satisfaction Score of Salary/Remuneration Package*

**Career Progression.** Career progression includes personal or professional growth and advancement, often characterised by skill development, increased responsibilities, and expanded roles. It may not necessarily include job promotion, which involves moving to a higher position or rank within an organisation, usually accompanied by a change in title, salary, and authority. Career progression is essential for achieving career goals and overall professional and personal development, which is accompanied by benefits (satisfaction, new opportunities, and hastening the timeframe for goal achievement).

To obtain respondent sentiments on their career progression, the survey question was, “[How satisfied are you with your career progression?](#)”. Approximately 71.9 percent of respondents were satisfied (satisfied and very satisfied) with their career progression, and another 17.5 percent were indifferent. Respondents' dissatisfaction rate (dissatisfied and very dissatisfied) was 10.5 percent. Among Caymanians, the satisfaction rate was 70.7 percent, with 11.6 percent dissatisfied (see Table 5.5). More females (12.7%) are dissatisfied with their career progression than males (8.6%).

	<b>75.4%</b>	Total	Male	Female	Caymanian	Permanent Resident	Non-Caymanian

**Table 5.6: Satisfaction with Career Progression**

**Real Employment Income.** Average income increased from CI\$3,286 in 2016 to CI\$4,739 in Fall 2024, reflecting a 44.2 percent increase, an annual average of 4.4 percent. More important is the real income, which accounts for inflation. Therefore, tracking the difference between nominal and real income is critical to understanding changes in purchasing power. Inflation-adjusted mean income at 2016 prices, real income based on the LFS and Census surveys, increased from CI\$3,286 in 2016 to CI\$3,498 in Fall 2024, an average increase of 0.65 percent. Therefore, the value of goods and services the average income earner purchased at the end of 2024 is higher by 0.65 percent ten (10) years on; in other words, the take-home value of goods and services is marginally above that of 2016 due to the debilitating effects of inflation.

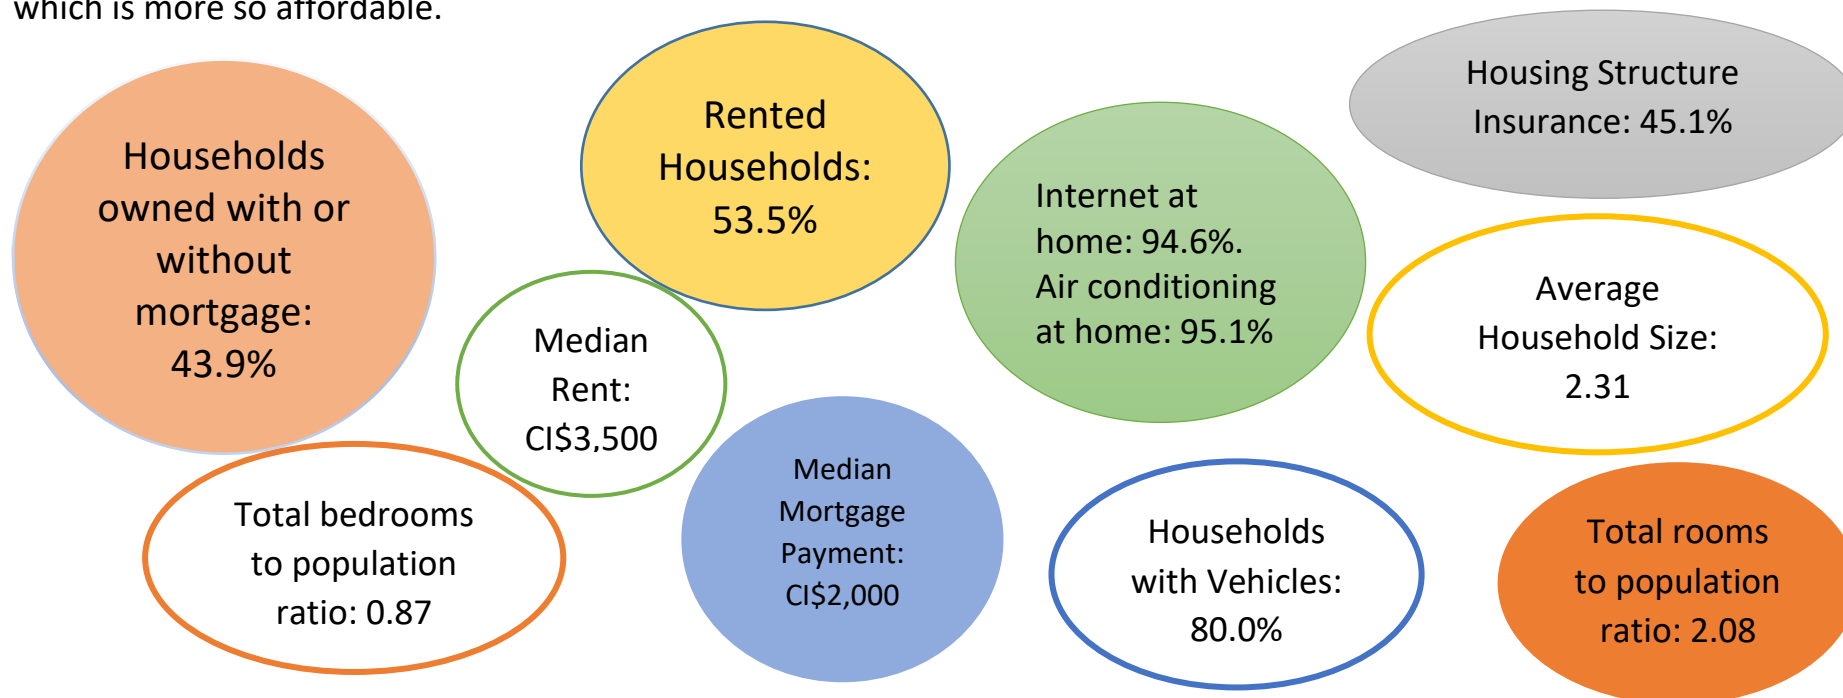

## 6. MATERIAL LIVING CONDITIONS

84.7%

Material living conditions refer to an individual's living standard, expressed through three sub-dimensions: household income, household debt, household consumption, and housing conditions.

**Housing conditions.** Poor living conditions are usually associated with substandard and unsanitary housing, lack of access to basic amenities such as clean water and proper sanitation, overcrowding, and unhealthy environments. The leading cause of these problems worldwide is the severe lack of housing, which is more so affordable.

## Housing needs and overcrowding

88.4%

In Fall 2024, the total number of households<sup>7</sup> were estimated at 38,377 at an average of 2.31 persons per household<sup>8</sup>. Bodden Town had the largest average household size, with 2.71 persons, and the smallest was Sister Islands, with 2.06 persons. Almost half of the households are in the capital city, George Town. Population growth and density can lead to a shortage of homes, and if affordable homes supply lags demand, it can lead to overcrowding. Further, the increasing cost of rented homes makes them much more unaffordable, especially for low-income workers. Generally, this leads to an increase in inadequate housing, that is, housing in poor condition or situated in a hidden high-density area.

Generally, overcrowding is where more people are located within a given space (especially for sleeping) than is considered tolerable from a safety and health perspective. Safety and health perspectives vary based on the environment and local cultural norms.

Table 6.1 shows the rate of overcrowded households, measured as a ratio of the household adult counts to the household dwelling room counts, equating to **11.6 percent overcrowding**.<sup>9</sup> The estimated number of overcrowded households also means that **88.4 percent of households are deemed not to be overcrowded**.

<sup>7</sup> A household comprises EITHER: one person living alone; or a group of persons (not necessarily related) living at the same address AND with common housekeeping, i.e., sharing at least one meal a day AND sharing living arrangements. This concept is used for persons sharing an apartment or house or a one-room together. Note: Sharing a meal does not necessarily mean everyone in the household partakes in the same meal at the same time. Sharing a meal also includes access to food prepared or groceries purchased by household members.

<sup>8</sup> These figures are from the Labour Force Survey report October 2024.

<sup>9</sup> A size of room threshold could also be added to the definition, however, data on size were unavailable.

Table 6.1: Overcrowding

	Total Households	Household Rooms > Occupants	Household Reporting # of Rooms	Over Crowding <sup>1</sup>	Over Crowding <sup>2</sup>	Over Crowding <sup>3</sup>	Over Crowding <sup>1</sup>	Over Crowding <sup>2</sup>	Over Crowding <sup>3</sup>

<sup>2</sup> based on Age Classification (No Child)

<sup>3</sup> based on the numbers of rooms

**Income inequality.** The income quintile share ratio (S80/S20 ratio), which is a basic measure of income distribution, is calculated as the ratio of total income received by the top twenty (20) percent of the population with the highest income (the top quintile) to that obtained by the twenty percent of the population with the lowest income (the bottom quintile)<sup>10</sup>. From the Labour Force Survey Fall 2024 data, the income quintile share ratio of employed persons who provided their income on the survey was 4.4 times. This income inequality ratio means that persons at the top of the income scale earn,

<sup>10</sup> The income quintile share ratio calculated as the ratio of total income received by the 20% of the population with the highest income (the top quintile) to that received by the 20% of the population with the lowest income (the bottom quintile)

on average, 4.4 times more than those at the bottom. Similarly, **the top twenty percent of households (employment income) earn 8.3 times more than the bottom twenty percent of households**. The Gini index<sup>11</sup>, or Gini coefficient, measures income inequality by determining how income is distributed across the population, **calculated at 0.397**. An improvement in the income distribution means that the GINI coefficient should be trending to zero (0).

**Arrears in Bills Payment:** *During the past six (6) months, were you behind in paying any of the following expenses?* About **79.8 percent of respondents indicated that within the last six months, they were not behind on any bill payments**. Of all respondents, 4.9 percent were behind on electricity payments, 4.2 percent on rent payments, 3.1 percent on water, 3.0

*Table 6.2: Percentage of Persons Behind on Bill Payment*

	Total	Caymanian
Electricity	4.9	6.0
Rent Payments	4.2	2.0
Water	3.1	3.9
Other Loans Repayment	3.0	3.9
Credit Card Payments	1.5	2.2
Telephone	1.5	1.7
Insurance Services	1.0	1.5
Mortgage Payments	0.9	1.7
Child Support/Maintenance	0.1	0.2
Not Behind on Bill Payments	79.8	77.0

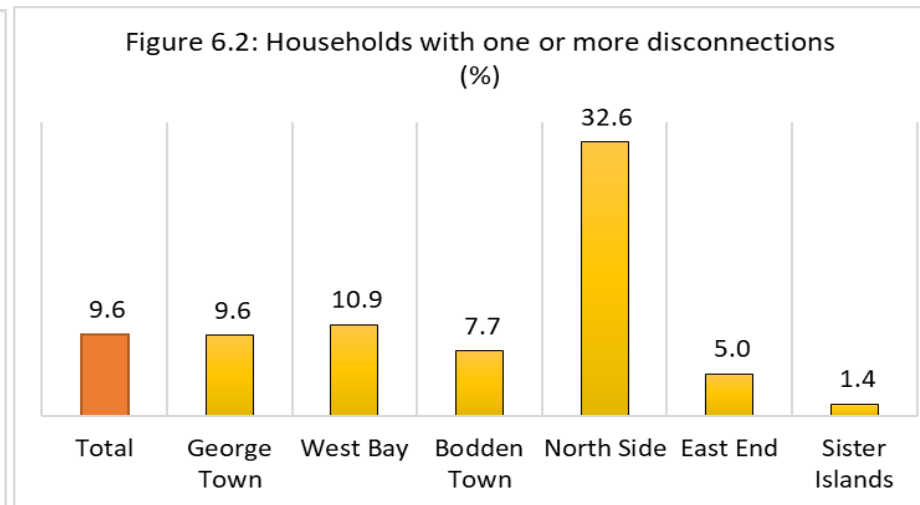

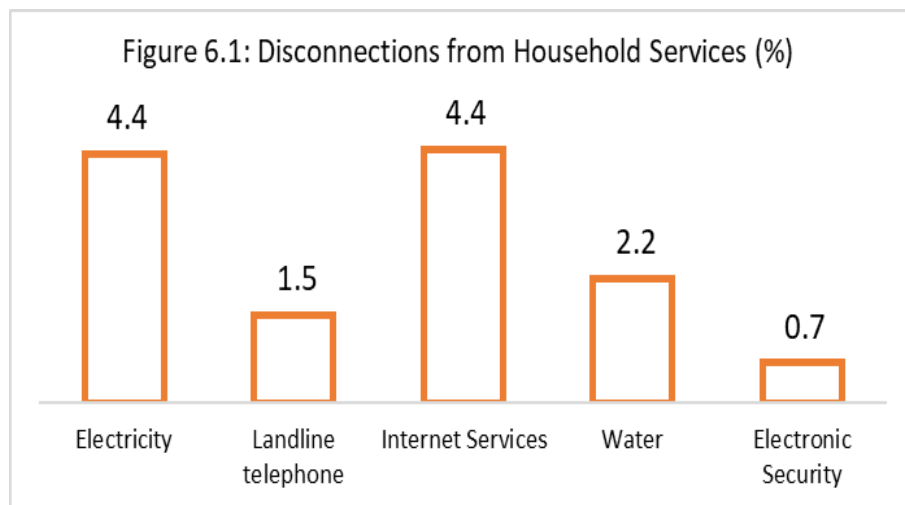

percent on other loans payments and 1.5 percent on credit cards and telephone. Approximately 0.9 percent was behind on mortgage payments (see Table 6.2).

**Household Expenses.** Regarding household expenses (electricity, rent, mortgages, and water supply), approximately 13.1 percent was behind, and for Caymanians, it was 13.6 percent (see Table 6.2). For overall expenses, respondents' responses indicate that 20.2 percent of the adult population (18+) was behind on paying their bills, while for Caymanians, it was 23.0 percent.

**Disconnection from household services.** Of the estimated 38,377 households in the Cayman Islands, 9.6 percent reported being disconnected within the last six months (March – September 2024), 4.4 percent from electricity and internet services, and 2.2 percent from city water. As shown in Figure

<sup>11</sup> Gini index of 0.0 represents perfect equality, while an index of 1.0 implies perfect inequality.

6.2, the highest disconnection was in North Side (32.6%), followed by West Bay (10.9%), George Town (9.6%) and Bodden Town (7.7%). Sister Islands had the lowest percentage of disconnections.

## 7. ECONOMIC AND PHYSICAL SAFETY

85.4%

In the context of quality of life, economic security and vulnerability are analysed in relation to wealth and debt. At the same time, physical and personal safety is measured by the recorded incidence of criminal offences and perceived crime levels in areas where people live. Economic security is analysed with statistics that measure situations where people may find themselves, such as being unable to cope with unexpected financial expenses or being in arrears with a mortgage, rent, utility bills or hire purchase payments. The analysis of physical safety is based on crime statistics and information on the population's perceptions regarding crime, violence or vandalism in the area where they live. The overall satisfaction was **85.4** percent, averaged from the subcomponents below.

## Self-assessed Poverty and Food Security

*Looking back over your life in the Cayman Islands, how often do you think you lived in poverty?*

Poverty is a state or condition in which an individual lacks the financial resources and essentials for a certain standard of living. It can have diverse environmental, social, economic, and political causes and effects. Self-assessed poverty looks at relative poverty as opposed to absolute poverty. The former is when households receive 50% less than average household incomes. So, they have some money, but still not enough to afford anything above the basics. Absolute poverty is when household income is below a predetermined poverty level. This makes it impossible for the person or family to meet the basic needs of life, including food, shelter, safe drinking water, education, healthcare, etc.

**Self-assessed poverty.** Responses to the QOL survey questions answering “often” and “most of the time” are considered to have been living in poverty, and those persons responding “occasionally” are deemed to be vulnerable to poverty. This self-assessed poverty measure is 5.6 percent, while another 7.7 percent were vulnerable to the effects of poverty (see Table 7.1). Therefore, **the proportion of persons not in poverty (self-assessed) was 94.4 percent.** For Caymanians, the self-assessed poverty measure is 7.8 percent, and the poverty vulnerability measure is 8.4 percent.

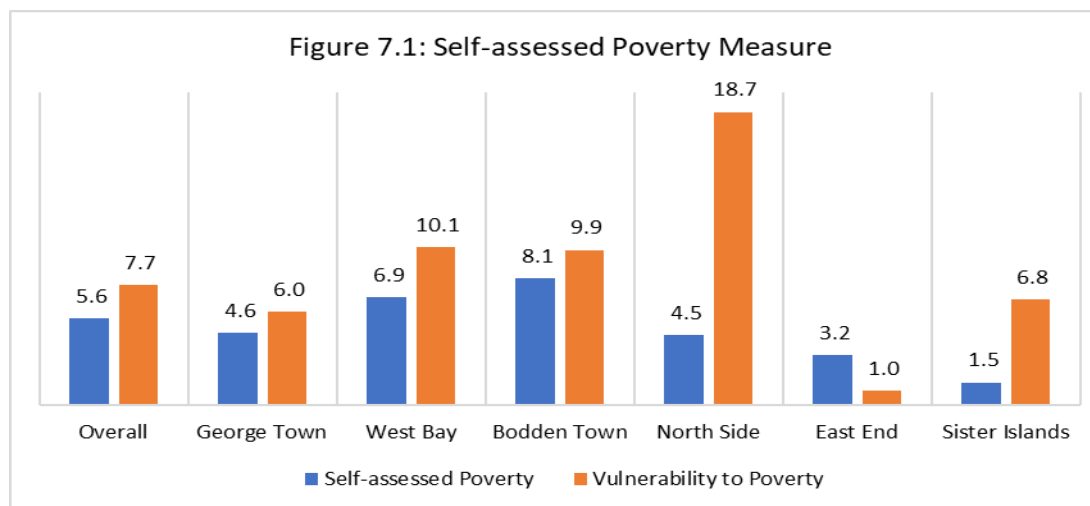

The effects of poverty are not limited to lack of income and material resources. In addition to economic deprivation, poverty violates human dignity and erodes and nullifies the rights to adequate food, housing, health, safe water, education, and others.

	Total	Male	Female	Caymanian	Non Caymanian
<b>Ever lived in poverty</b>	Percent (%)				
Never	75.7	76.7	74.7	71.2	78.9
Rarely	9.1	9.3	9.0	9.8	9.1
Occasionally	7.7	6.9	8.4	8.4	7.3
Often	2.2	2.0	2.4	3.2	1.2
Most of the time	3.4	3.3	3.5	4.6	2.1

*Table 7.1: Self-assessed Ever Lived in Poverty*

The lowest level of self-assessed poverty was in the Sister Islands, with 1.5 percent, followed by East End, with 3.2 percent, while the highest was in West Bay, with 6.9 percent (see Figure 7.1). Responses of “occasionally” were deemed a poverty vulnerability measure, which was highest in North Side (18.7%), followed by West Bay (10.1%) and Bodden Town (9.9%). East End had the lowest vulnerability to poverty.

**Self-assessed Food security.** *Have you had to give up meals within the last four (4) weeks due to a lack of resources of any kind?* As shown in Table 7.2, approximately 6.8 percent of persons gave up meals within the last four weeks due to a lack of resources to obtain food. Caymanians had a food insecurity rate of 7.8 percent compared to 6.1 percent for non-Caymanians. Food insecurity among females (7.4%) was higher than among males (6.1%) (see Table 7.2).

Across the districts, 9.3 percent of West Bay residents have had to give up meals, followed by North Side (8.7%), Bodden Town (8.6%), George Town (5.4%), Sister Islands (5.3%) and East End (1.3%).

Table 7.2: Meals given up due to Lack of Resources, Sex, Status and District

No	94.1	90.4	91.2	71.9	98.7	94.7
Prefer not to say	0.5	0.3	0.2	19.4	-	-

**Meal Days given up.** *How many days in the last four (4) weeks have you given up at least one meal due to a lack of resources of any kind?* As depicted in Figure 7.2, of the approximately 3,783 persons who have given up at least one meal in the last four weeks of the reference period, the vast majority (71.6%) of persons gave a meal for up to five days. On the other hand, 13.1 percent gave meals for 24 days or more for the month. Caymanians gave up the most meals (9.6%) and non-Caymanians (7.5%). Approximately 5.3 percent of persons gave up a meal with more Caymanians giving up meals than non-Caymanians (see Figure 7.5). Similarly, more females (6.0%) than males (4.5%) gave up meals due to the lack of resources. The highest proportion of people giving up meals were from West Bay (7.8%) and Bodden Town (7.8%), followed by the North Side (6.5%), Sister Islands (4.6%), and George Town (3.5%) (see Figure 7.4).

Figure 7.2: No. of Persons gave lunch in last 4 weeks

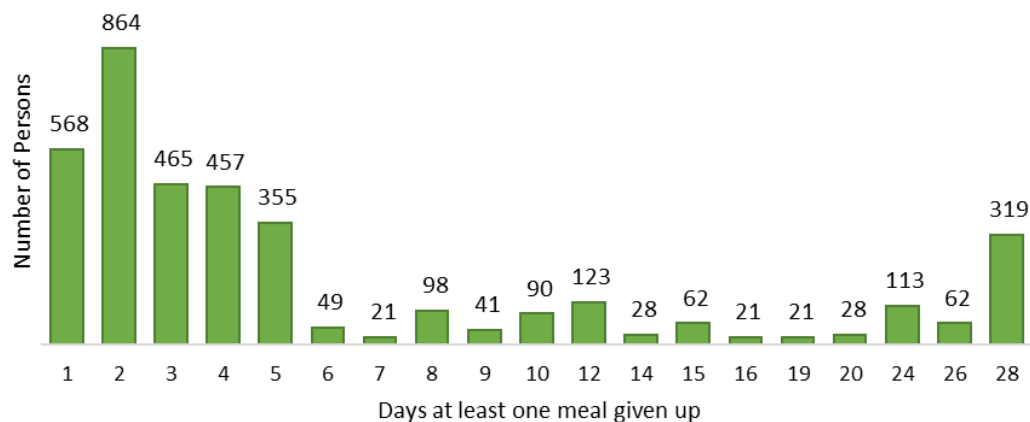

Figure 7.3: Percentage of meals given up

Figure 7.4: Percentage of Persons giving up meal

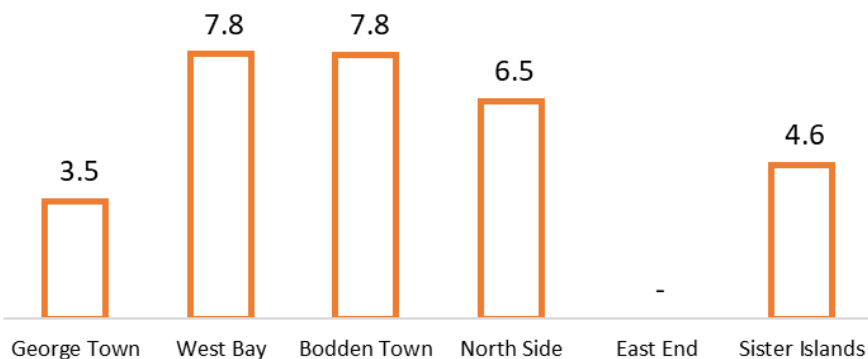

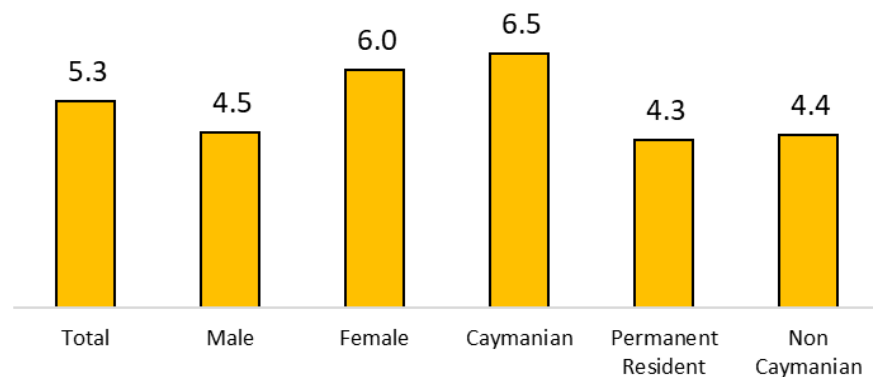

Figure 7.5: Percentage of Persons giving up meals

**Expenditure priorities.** In addition to goods and services that were unaffordable to households due to lack of money, to ascertain what household members are giving up to keep their budget from exploding, the question asked was, *which of the following items have you personally gone without in the last six months due to a lack of resources?* Utilising this multiple responses, 62.1 percent of household members revealed that they did not have a shortage of money during the last six months of 2024. In responding to this multiple response question, by category, household members gave up the following to keep their budgets from exploding: new clothing - 19.2 percent; dining out - 18.4 percent; new shoes – 17.6 percent; paid holiday with family - 17.5 percent; going to social gatherings – 12.4 percent; paid hobby or sports – 10.5 percent; and personal transport expenses – 4.3 percent.

**Coping with insufficient money.** In the last six months, when dealing with inadequate spending power, 15.0 percent of the population has been involved in an expenditure reduction strategy (see Table 7.5). This reduction strategy is used by 15.3 percent of Caymanians (see Table 7.6). During the last six months, approximately 23.2 percent of respondents continued wearing worn clothing, while another 17.5 percent resorted to buying second-hand or used clothing (see Table 7.5). Roughly 14.7 percent of residents will go without vehicles and needed household items, while 4.4 percent will liquidate assets to obtain additional cash. Similarly, almost one in four Caymanians (24.6%) will continue wearing worn clothing when faced with strained financial resources (see Table 7.6). One in eight Caymanians (13.2%) would buy used clothing, 17.4 percent would go without needed household appliances and vehicles, and 6.1 percent would sell assets to raise needed cash.

	Total	Caymanian	*Total Non-Caymanian
Items given up	Percent (%)		
New Clothes	19.2	18.5	19.8
Dining Out	18.4	19.0	18.0
New Shoes	17.6	17.7	17.6

Caymanians, in North Side, 48.9 percent of respondents continued to wear worn clothing due to financial constraints. Approximately 27.9 percent in West Bay, Bodden Town 20.1 percent, and George Town 20.1 percent (see Table 7.7). On

average, 21.5 percent of North Side respondents engage in expenditure reduction. This was followed by Bodden Town (18.6%), West Bay (16.7%), George Town (12.9%), and Sister Islands (10.8%). East End had the lowest proportion of expenditure reduction.

## Economic/Financial Security – income and savings

80.2%

Financial security measures the ability to afford living expenses, live comfortably on income, and save for the future. An important indicator of financial security is having enough emergency savings to cover unexpected costs and avoiding high-interest debt. In other words, financial security is when an individual is comfortable affording their regular expenses and optimistic about their financial future. Financial security is essential since it gives an individual the confidence to rebound after a crisis.

In response to *“What is the main source of financing you would use to immediately finance an unexpected payment ...”* the results are displayed in Table 7.9. Using the middle option between CI\$2,000 and CI\$5,000, which includes the monthly mean and median incomes, financial security as measured by the financial resources available from savings (47.9%), relatives (21.5%), friends (9.2%) and selling an asset (1.6%). Therefore, it stood at **80.2 percent**.

	Finance less than \$2,000	Finance between \$2,000 - \$5,000	Finance between \$5,000 - \$10,000
<b>Residents Finance Unexpected Payment</b>	Percent (%)		
Use Personal savings	69.4	47.9	31.2
Borrow from relatives	13.7	21.5	17.0
Borrow from friend	7.5	9.2	7.0
Sell an assets to get money	1.2	1.6	2.9
<b>Non-interest funding</b>	<b>91.8</b>	<b>80.2</b>	<b>58.2</b>
Borrow from a financial institution	5.9	15.2	36.1
Borrow from other informal lenders	1.6	3.1	4.0
Other	0.8	1.5	1.7

**Table 7.9: Sources of Financing Unexpected Payments**

**Unexpected Finance less than \$2,000.** 69.4 percent of individuals said they could finance less than CI\$2,000 of unexpected payments from personal savings, with 21.2 percent borrowing from relatives and friends. However, approximately 7.5 percent of individuals would need to borrow from institutions (formal and informal), and 1.2 percent sell assets to finance up to CI\$2,000 unexpectedly.

For Caymanians, 70.2 percent could be financed from personal savings. Approximately 20.0 percent would be borrowed from relatives and friends, followed by institutions (formal and informal) at 7.2 percent and others at 2.5 percent.

**Unexpected Finance between \$2,000 and \$5,000.** The Cayman Islands employed labour force median and mean incomes fall within the range of CI\$2,000 and CI\$5,000, and the ability to finance unexpected expenditures was as follows: savings 47.9 percent; relatives/friends' 30.7 percent; financial institutions 18.3 percent; and others 3.1 percent.

Table 7.10 demonstrates that 51.4 percent of Caymanians would finance unexpected expenses from personal savings. Approximately 26.8 percent would be borrowed from relatives and friends, followed by institutions (formal and informal) at 18.5 percent and others at 3.5 percent.

**Unexpected Finance between \$5,000 and \$10,000.** As the unexpected payment of over CI\$5,000 exceeds the monthly median and mean incomes of CI\$3,600 and CI\$4,762, respectively, approximately 31.2 percent of individuals are prepared for such expenditure from personal savings. Respondents would seek help from relatives and friends (24.0%), financial institutions (40.1%) and other sources (4.6%).

As financing requirements increase, 34.8 percent of Caymanians finance unexpected expenses from personal savings. Approximately 21.3 percent borrow from relatives and friends, followed by institutions (formal and informal) at 39.1 percent and others at 4.9 percent.

	Finance less than \$2,000	Finance between \$2,000 - \$5,000	Finance between \$5,000 - \$10,000
<b>Caymanians Finance Unexpected Payment</b>	Percent (%)		
Use Personal savings	70.2	51.4	34.8
Borrow from relatives	15.6	22.1	18.4
Borrow from friend	4.4	4.7	2.9

Borrow from a financial institution	6.4	17.1	37.2
Borrow from other informal lenders	0.8	1.4	1.9
Other	0.9	1.6	1.8

**Table 7.10: Caymanian Sources of Financing Unexpected Payments**

As depicted in Table 7.11, approximately 84.4 percent of George Town residents could finance an unexpected payment of up to CI\$5,000 from personal savings, borrow from relatives and friends or sell assets (see Table 7.11). West Bay followed this with 84.4 percent, the Sister Islands with 75.8 percent, Bodden Town with 72.6 percent, East End with 63.0 percent, and North Side with 53.9 percent.

Caymanians in North Side seem to have the least personal savings available for unexpected expenses, with 21.7 percent. George Town and East End are likelier to afford unexpected expenditures up to CI\$5,000. Caymanians from Sister Islands and George Town are less likely to afford personal savings up to CI\$5,000. Caymanian Residents from Bodden Town and North Side are more likely to borrow from the financial institutions.

	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands
<b>Residents Finance Unexpected Payment</b>	Percent (%)					
Personal Savings	52.0	45.9	45.9	12.6	16.9	58.4

**Table 7.11: Sources of Financing Unexpected Payments up to CI\$5,000**

More people rely on financial institutions for unexpected expenses between CI\$5,000 and CI\$10,000 (see Appendix Table 7A).

## Economic/financial outlook

93.1%

Economic outlooks are mainly influenced by various factors such as income, education level, family size, financial literacy, risk perception and emotions. Changes in spending structures and income levels also play a crucial role in shaping household financial outlook.

*Is there anything you expect to happen within the*

*next two years which will improve or reduce the standard of living, increase or decrease income, or none of these?*

Generally, 47.3 percent of persons see their income and standard of living increasing over the next two years. By contrast, approximately 6.9 percent of residents see a dim economic and financial outlook (lower income and standard of living).

42.8 percent of Caymanians hold an optimistic view of improved income and living standards over the next two years. Almost half of all respondents believe things will stay the same (45.9%). Nonetheless, when combined, **93.1 percent of respondents don't think their economic circumstances will worsen over the next two years.**

**Table 7.12: Change in Circumstances in the next 2 years**

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>93.1</b>						
<b>Economic Circumstances</b>	<b>Percent (%)</b>					
Improved standard of living	21.4	21.9	20.8	20.6	29.8	19.7
Reduced standard of living	5.3	6.0	4.6	6.2	5.0	4.5
Increased Income	25.9	25.7	26.1	22.2	22.7	30.2
Reduced Income	1.6	1.5	1.7	2.0	0.3	1.6
Stay the Same/None of these	45.9	44.9	46.8	49.0	42.1	43.9
<b>Optimistic Outlook</b>	<b>47.3</b>	<b>47.6</b>	<b>46.9</b>	<b>42.8</b>	<b>52.5</b>	<b>50.0</b>
<b>Pessimistic Outlook</b>	<b>6.9</b>	<b>7.5</b>	<b>6.3</b>	<b>8.2</b>	<b>5.4</b>	<b>6.1</b>
<b>Improved/Stay the same</b>	<b>93.1</b>	<b>92.5</b>	<b>93.7</b>	<b>91.8</b>	<b>94.6</b>	<b>93.9</b>

Among the districts, East End leads the way with the highest optimism, followed by North Side and the Sister Islands.

Approximately two in every three people in East End expect higher income in the future, while in North Side, it's one in every two persons and, for all other districts, at least two in every five persons.

The Sister Islands residents are least pessimistic about their economic prospects, with 2.3 percent. In contrast, at least 20.4 percent of North Side residents believe they will see a slight decline in their income and living standards in the next two years (see Table 7.13).

Among Caymanians, 48.2 percent of those in West Bay remain optimistic about the near term, followed by East End (43.3%), North Side (42.1%), Sister Islands (42.1%), Bodden Town (41.1%) and George Town (40.7%) (see Table 7.14).

Table 7.13: Change in Circumstances in the next 2 years

## Resources to support the standard of living

80.0%

The standard of living is the material well-being of the average person in a given population, typically measured using gross domestic product (GDP) per capita. In contrast, the quality of life represents the more intangible aspects of the standard of living. One alternative standard of living data set is the Human Development Index (HDI), which uses many factors, from life expectancy and education to gross national income (GNI). The standard of living focuses on basic material factors such as income, gross domestic product (GDP), life expectancy, and economic opportunity. This quality of life (QOL) focuses on obtaining Cayman Islands residents' sentiments on their standard of living.

**Standard of Living.** *How satisfied are you with the following aspects of your standard of Living?* 75.8 percent of respondents were happy (satisfied and very satisfied) with their current standard of living (see Table 7.15). Similarly, 76.2 percent of Caymanians, 75.1 percent of non-Caymanians, and 74.9 percent of females were contented with their standard of living.

	76.3%	Total	Male	Female	Caymanian	Permanent Resident	Non-Caymanian
Standard of Living		Percent (%)					
Very Satisfied		18.7	19.2	18.2	18.6	25.4	17.1
Satisfied		57.1	57.5	56.7	57.6	51.8	57.9
Neither		12.4	11.8	13.0	11.1	12.4	13.6

<b>Weighted Average Satisfaction (%)</b>		<b>76.3</b>	<b>76.7</b>	<b>76.0</b>	<b>76.0</b>	<b>78.2</b>	<b>76.1</b>

Table 7.15: Satisfaction with their Standard of Living

Across the districts, a higher proportion of East End residents are satisfied with their standard of living than in the other districts. The Sister Islands (81.7%) were followed by North Side (84.7%), George Town (77.5%), West Bay (74.6%), and Bodden Town (68.3%) (see Table 7.16).

Standard of Living	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands
	Percent (%)					
Very satisfied	20.5	18.7	17.1	26.4	3.9	10.8

<b>Weighted Average Score ( ___/100)</b>	<b>77.4</b>	<b>75.9</b>	<b>73.3</b>	<b>81.3</b>	<b>76.3</b>	<b>76.1</b>

Table 7.16: Satisfaction with their Standard of Living

**Life Circumstances.** In response to the QOL survey question, *“Has anything happened within the last two years to you which has improved or reduced standard of living; increased or decreased income; remained the same, 83.7 percent of those surveyed responded that their living circumstances improved or stayed the same (Did not worsen).* Among Caymanians, it was 79.1 percent, and 88.7 percent were non-Caymanians (see Table 7.17).

Among the districts, George Town recorded the highest percentage of residents whose life circumstances had not deteriorated during the last two years, 86.1 percent (see Figure 7.2). This was followed by Sister Islands and West Bay with 84.9 and 84.8 percent, respectively. The districts with the highest percentage of residents whose living circumstances improved the least in the last two years were Sister Islands (23.5%) and Bodden Town (26.2%).

Table 7.17: Life Circumstances Last Two Years

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>Economic Circumstances</b>	<b>Percent (%)</b>					
Improved standard of living	14.0	14.0	14.0	10.9	18.1	15.8
Reduced standard of living	10.6	10.6	10.7	14.2	12.8	6.7
Increased Income	16.0	16.4	15.7	14.0	16.8	17.7
Reduced Income	5.7	5.1	6.3	6.7	6.4	4.6
Remain the same	53.6	53.9	53.3	54.2	46.0	55.2
<b>Circumstance Improved</b>	<b>30.0</b>	<b>30.4</b>	<b>29.7</b>	<b>24.9</b>	<b>34.9</b>	<b>33.5</b>

<b>Improved/Remained the same</b>	<b>83.7</b>	<b>84.3</b>	<b>83.0</b>	<b>79.1</b>	<b>80.9</b>	<b>88.7</b>

Figure 7.2: Overall Economic Circumstances last 2 years (in %)

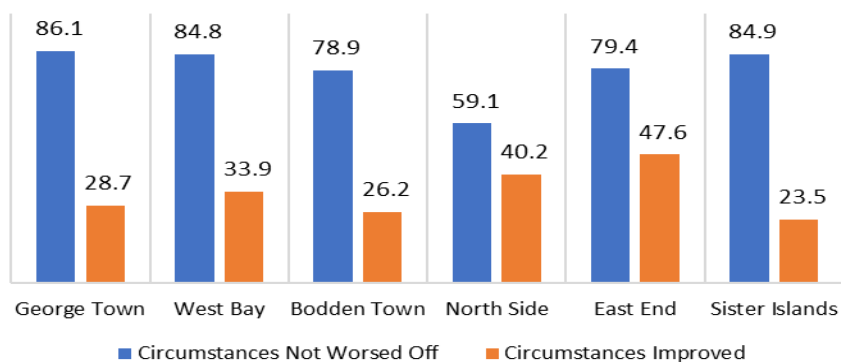

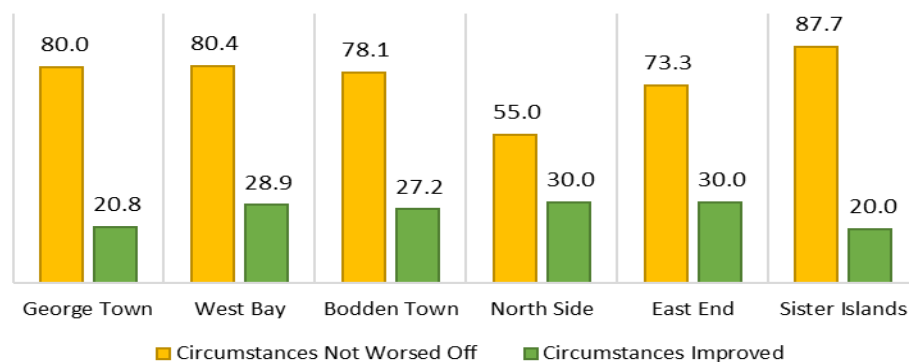

Figure 7.3: Caymanian Economic Circumstances Last 2 Years (in %)

Across all districts, 30.0 percent of Caymanians' livelihood improved during the last two years except for North Side and East End. On average, the next improvement was more pronounced in West Bay, with 28.9 percent of the persons 18 years and older seeing improvement in income and standard of living. In comparison, 45.0 percent of Caymanians reported being worse off in North Side (see Figure 7.3).

## Physical Safety

80.8%

Physical safety refers to the need for protection from bodily harm, danger, and threat. Individuals who do not feel physically safe are unable to focus on higher levels of needs as they are preoccupied with survival. The most important element of human survival is keeping themselves and their family safe. Without a sense of physical safety – both individually and more broadly as a community – persons are unable to focus on other factors that support their wellbeing

*Based on your knowledge and awareness, did your personal security feeling increase, stay about the same, or decrease?* Approximately 80.8 percent of respondents reported feeling safe in the Cayman Islands. Respondents felt safer in their community, with a safety score of 83.0 percent, than in the Cayman Islands, which scored 81.9 percent (see Table 7.18).

	Unsafe		Safe		Positive Response (%)
	Very unsafe	Unsafe	Safe	Very safe	
<b>Overall Feeling of Safety</b>	Percent (%)				
I feel .....in my community	10.0	7.0	58.5	24.5	<b>83.0</b>
I feel .....in the Cayman Islands	9.5	8.6	62.0	19.9	<b>81.9</b>
I feel....to go public space	8.8	9.7	64.2	17.3	<b>81.5</b>
I feel going out at night in the community is.....	8.7	14.5	60.8	16.0	<b>76.8</b>
<b>Safety Score ( ___/100)</b>	<b>9.3</b>	<b>9.9</b>	<b>61.4</b>	<b>19.4</b>	<b>80.8</b>

*Table 7.18: Residents Personal Security Feelings*

Their feeling of safety extends to visiting public spaces, scoring 81.5 percent. Going out at night was scored the lowest, with 76.8 percent safety feelings. Similarly, as shown in Table 7.19, on average, 80.2 percent of Caymanians felt safe going about their business in the Cayman Islands. 24.4 percent of Caymanians felt that going out at night was marginally more unsafe than going around their community, in the islands and utilising public spaces (see Table 7.19).

	Unsafe		Safe		Positive Response (%)
	Very	Unsafe	Safe	Very safe	
Caymanians Feeling of Safety	Percent (%)				
I feel .....in my community	9.7	7.7	58.5	24.0	82.6

I feel .....in the Cayman Islands	80.5	86.4	77.8	95.6	78.6	76.2
I feel....to go public space	80.1	85.4	78.1	71.8	82.1	93.5
I feel going out at night in the community is...	75.2	82.5	71.9	41.7	64.3	87.5
<b>Average Safety Score (____/100)</b>	<b>79.1</b>	<b>85.2</b>	<b>77.0</b>	<b>74.5</b>	<b>76.8</b>	<b>86.2</b>

For all residents, only 25.7 percent of respondents felt safe going out at night in North Side, and 68.7 percent felt safe going to public spaces (see Table 7.20). Across the districts, approximately 31.8 percent of persons felt unsafe in North Side (as 68.2% felt safe so the remainder felt unsafe), and Bodden Town followed with 23.4 percent feeling unsafe. East End and Sister Islands are the districts with the highest feelings of safety, with 88.9 and 84.9 percent, respectively.

Caymanians in the Sister Islands expressed the highest level of safety feelings at 86.2 percent, followed by West Bay (85.2%), George Town (79.1%), Bodden Town (77.0%), East End (76.8%), and North Side (74.5%) (see Table 7.20).

Public education on crime is one of the most essential strategies for preventing crime. People who know what actions can be taken to reduce their crime risk and how they can enhance neighbourhood safety are the core of a safer community. By reminding people that a problem exists and showing them how to address the situation, you enable them to act.

In assessing their knowledge of crime and policing, respondents were asked, “Based on your knowledge and awareness, rate the crime rate, policing, and security as increased, stayed about the same, or decreased.” About 44.2 percent of respondents believed that crime in the Cayman Islands stayed the same, 47.5 percent thought it increased, and only 8.4 percent said it decreased. On average, only 12.5 percent believed that crime increased in their community, and 13.6 percent responded that crime declined.

In response to the awareness of the change in police protection, 89.6 percent expressed a positive response (stay the same & increase) that police protection increased or stayed the same in the communities. The positive response was similar in the Cayman Islands, with 90.6 percent.

Regarding knowledge and awareness of crime, 68.5 percent of Caymanians believe that crime in their community stayed the same, 16.1 percent decreased, and 15.4 percent increased. However, in response to crime in the Cayman Islands, 58.3 percent said crime increased, 32.9 percent stayed the same, and 8.8 percent decreased.

The positive responses (increase & stayed the same) regarding police protection in the community and the Cayman Islands were 83.4 percent and 85.1 percent, respectively. Alternatively, police protection decreased in the community and the Cayman Islands by 83.4 percent and 85.1 percent, respectively.

## 8. LEISURE AND SOCIAL ACTIVITIES

80.7%

Leisure activities refer to actions individuals undertake during their time off from work. Leisure activity encompasses the practices of individuals in their spare time for different reasons like relaxation or growth. Leisure activities enhance personal satisfaction and promote social interactions, increasing access to social resources. This interaction plays a significant role in improving overall quality of life. The rationale for including this dimension stems from recognising that effectively utilising one's free time can enhance personal happiness and foster greater success in social interactions. To this end, the dimensions examined were work-life balance, and social cohesion and connections. Overall, this dimension averages the satisfaction of work-life balance (76.4%) and social cohesion and interactions (85.0%) for a **score of 80.7 percent**.

## Work-life balance

*How satisfied are you with your work-life balance?* 76.4 percent of residents indicated they are happy with their work-life balance, equivalent to three out of every four people.

It is generally accepted that rest is essential to maintaining a healthy work-life balance when engaging in various activities. Similarly, overworking can lead to negative consequences such as burnout, fatigue, and decreased productivity. Employees and employers must recognise the importance of maintaining a healthy balance between work and personal life. Achieving a healthy work-life balance varies based on individual circumstances and preferences, but it's crucial for promoting overall well-being. The weighted average satisfaction was 76.4 percent, of which Caymanian was 75.4 percent and non-Caymanian 77.0 percent.

The Fall QOL survey satisfaction score was 75.7 percent. Caymanians who are contented with their work-life balance responded with a score of 75.6 percent, while another 12.3 percent are generally dissatisfied (dissatisfied and very dissatisfied).

	76.4%	Total	Male	Female	Caymanian	Permanent Resident	Non-Caymanian
Work-life balance		Percent (%)					
Very Satisfied		17.1	17.6	16.5	17.2	19.6	16.4

Table 8.1: Satisfaction with Work-Life Balance

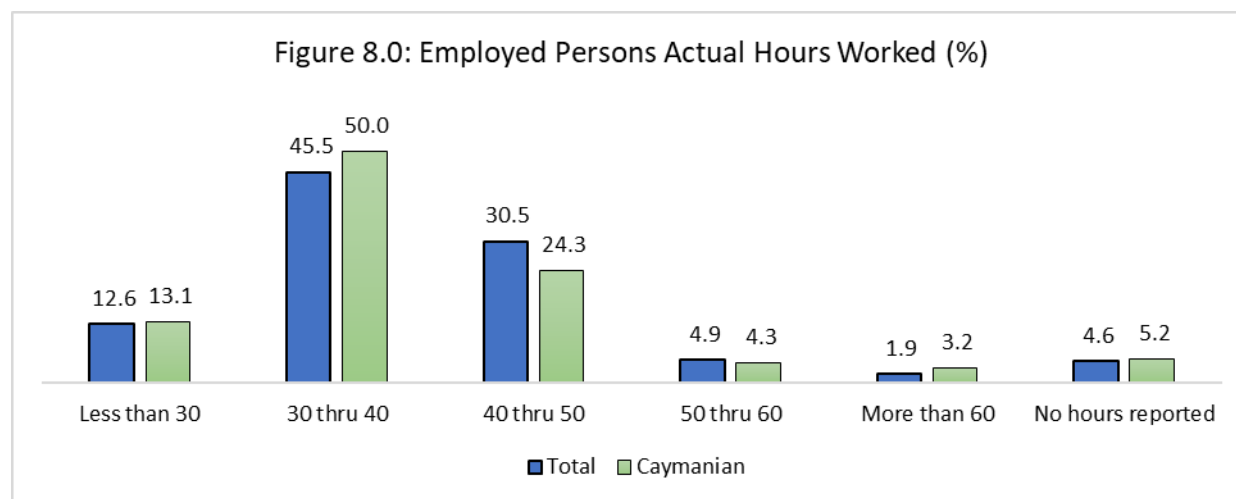

How do you allocate 24 and 48 hours on a typical weekday and weekend? On average, during a typical weekday, 31.3 percent of this time was used for sleeping (7.5 hrs per day), similar to the average work time (7.0 hrs per day). Leisure hours averaged 4.0 hours, and family time 3.3 hours per day. Local travel time averaged 1.4 hours per day, and 0.8 hours is used for physical exercise. Regarding Caymanians, family and leisure time are higher than the average at 3.6 and 4.3 hours, respectively. Non-Caymanian work time is higher than the average, and leisure and family time are lower (see Table 8.2).

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian

Sleep time	16.2	16.1	16.3	16.2	16.0	16.3

Table 8.2: Work-Life Balance - hours allocation

On weekends, 45.4 percent of total hours were spent on family and leisure time. Non-Caymanians spent more time working on the weekends and less time with family (see Table 8.2).

Figure 8.0 shows that at least 76.0 percent of the employed worked between 30 and 50 hours per week (see Figure 8.0). Approximately 6.8 percent of residents and 7.5 percent of Caymanians worked greater than 50 hours per week. Persons who are said to be overworked work more than 50 hours per week.

## Social cohesion and connections

85.0%

Social cohesion measures the interconnectedness and unity of different groups within a society. It encompasses the sense of belonging to a community and the relationships between its members. This concept embodies efforts to establish societal balance, foster economic growth, and strengthen national identity. Additionally, social cohesion aims to advance equal citizenship by reducing inequality, economic disparities, and societal divisions. It reflects people's aspirations for personal development, a sense of belonging that links individual freedom to social justice, economic efficiency to equitable resource allocation, and pluralism to shared conflict resolution mechanisms.

Social cohesion is crucial to societal well-being and health outcomes. Socio-demographic factors affect perceptions of social cohesion. A cohesive society focuses on economic growth and a stable political structure built over time through a sense of belonging, values, and commitment. The following indicators were used to gauge social cohesion and connection. The overall satisfaction was **85.0** percent, which is the average of the subcomponents below.

## Relationship with Family.

How satisfied are you with your relationship with your family?

The results show that relations with family continue to be strong in the Cayman Islands, with 93.0 percent satisfaction among respondents. It was led by 94.9 percent among permanent resident holders, 94.3 percent non-Caymanians, and Caymanians 91.0 percent.

Comparing the districts, solid family bonds exist in East End (99.1), North Side (96.7%), and the Sister Islands (94.0%) satisfaction with their family relationships. The two lowest were George Town and Bodden Town. All districts had greater than 90 percent satisfaction.

Table 8.4: Satisfaction with Family Relationship

**Relationship with Co-workers.** *How satisfied are you with your relationship with co-workers?* 81.3 percent of persons aged 18 and older are generally satisfied with their co-workers. The weighted average satisfaction among Caymanians was 80.6 percent, and 81.6 percent for non-Caymanians (see Table 8.5). Males' relationships with co-workers slightly edged out females with 81.8 percent.

	81.3%	Total	Male	Female	Caymanian	Permanent Resident	Non-Caymanian

## Social Support Network.

88.5%

Researchers have said that having a strong support system has many positive benefits. Some of the best benefits include higher levels of well-being, better coping skills, and a longer, healthier life. Having a support system has also been proven to reduce depression, anxiety and stress. In obtaining public sentiments on social support systems, the question posed was, *how many persons can you count on for help if you are sick, have*

*financial problems, have emotional issues, or need other support?* Approximately 2.4 percent have no one to rely on for help. For Caymanians, the average was 1.8 percent and 2.8 percent for non-Caymanians. There are also more males (2.7%) than females (2.1%) without people to rely on in the event of needed help.

**Sickness.** *In the Cayman Islands, how many persons can you rely on if you are sick?* 4.2 percent of the population has no one to rely upon in the event of sickness. By contrast, 95.8 percent had one or more persons to rely on; this

	Total	Male	Female	Caymanian	Permanent Resident	Non-Caymanian

Table 8.6: Number of Persons to rely on in times of sickness

support network was highest among Caymanians (96.6%), with non-Caymanians (95.4%) and permanent residents (94.7%) having the lowest (see Table 8.6).

**Financial problems.** *In the Cayman Islands, how many persons can you rely on if you have financial problems?* 11.2 percent of Caymanians indicated that if they have financial problems, they have no one to turn to for help (this excludes institutions like Social Services); 10.5 percent of all residents, including permanent residents and non-Caymanians, indicated that they had no one to rely on for financial assistance. Generally, 89.5 percent of persons in the Cayman Islands indicated they have one or more persons to rely on if they encounter financial hardship.

Table 8.9: Number of Persons to rely on for support in other personal events

Approximately 8.2 percent of non-Caymanians had no one to rely on for personal support as they were more likely to have their support structure abroad. Among gender, there were more males without support (“None”) than females.

## Loneliness.

Loneliness is the distress or discomfort that results from perceiving a gap between one's desires for social connection and actual experiences. It can be seen as emotional or social loneliness. The former refers to the feeling of a lack of a meaningful relationship with a significant other or a close friend. Social loneliness is the experience of an insufficient broad social network, including friends, neighbours, or colleagues. According to many experts, it is not necessarily about being alone. Instead, the feeling of being alone and isolated impacts the individual state of mind. And as such researchers suggest that loneliness is associated with social isolation, poor social skills, introversion, and depression. In obtaining public sentiments on loneliness, the question posed was, *how often do you feel lonely?* Approximately 72.9 percent of respondents reported occasional loneliness (occasionally, hardly ever, never). For Caymanians, occasional loneliness was 76.0 percent. As displayed in Table L1, more females (27.4%) reported episodes of loneliness (often/always and some of the time) than males (26.7%). Loneliness is more prevalent among non-Caymanians (32.0%) than Caymanians (24.0%) and Permanent Residents (18.7%). The inability of most low-paid non-Caymanian workers to afford their families to reside in the Cayman Islands could be a plausible reason.

	<b>72.7%</b>	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>Loneliness</b>		Percent (%)

**Table L1: Frequency of Loneliness**

Occasional Loneliness include Occasionally, Hardly ever, and Never

Loneliness is more prevalent in the Sister Islands than in all the other districts, as 43.9 percent was reported. The Sister Islands were followed by Bodden Town (31.6%), East End (31.4%), George Town (27.6%), and North Side (19.9%). West Bay reported the lowest loneliness response, with 19.7 percent.

	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands

**Table 8.11: Overall Satisfaction Scores for Neighbourhood Social Cohesion**

neighbourhood sharing the same values (64.4%).

**Helpful Neighbourhood.** Good neighbours are considerate, tolerant, and understanding of others and their different lifestyles, which help build thriving communities. Despite this, different behaviours can cause problems for neighbours, and some are more serious than others. Nonetheless, a good neighbourhood is all about people helping people

and creating positive energy. Approximately 68 percent of respondents agreed that their current neighbourhood comprises people willing to help others (see Table 8.11). This is consistent among Caymanian (68.9%) respondents and slightly less among non-Caymanians (66.5%) and females (66.6%). One in four persons was indifferent and 6.7 percent disagreed (disagree and strongly disagree).

**Close-knit neighbourhood.** Close-knit neighbourhoods generally comprise trusted networks of immediate neighbours, which encourages sharing items, helping each other out, combining buying power, organising events, and generally increasing local trust, sharing and resilience. Respondents expressed some agreement that their neighbourhood is somewhat close-knit, as 57.3 percent were in agreement. While only 12.7 percent of persons disagreed with the close-knit neighbourhood question, some 29.9 percent were indifferent (neither agree nor disagree). Just about 57.8 percent of

Table 8.13: Trusted People in the Neighbourhood

**Trusted neighbourhood.** Trusted neighbours should have their neighbours' best interests at heart. They should treat their neighbours' homes and families as their own, keep their commitments, and be willing to help the neighbourhood. Approximately 59.7 percent of respondents agreed that people in their neighbourhood could be trusted, although one in three persons neither agreed nor disagreed, and 6.5 percent disagreed. Among respondents' responses, 62.2 percent of Caymanians agreed, and 57.6 percent of non-Caymanians (see Table 8.13).

## Incompatible neighbours.

Neighbourhood disputes are often disagreements between neighbours about something, resulting in distress and frustration.

When faced with the statement “people in this neighbourhood generally do not get along”, only 14.2 percent agreed, 55.0 percent disagreed, and 30.7 percent were indifferent (see Table 8.14). Of Caymanian respondents, 15.7 percent agreed with the statement, 57.3 percent disagreed, and 27.0 percent neither agreed nor disagreed.

	69.0%	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>People in this neighbourhood generally do not get along</b>

Table 8.14: People in the Neighbourhood do not get along

**Neighbourhood cultural differences.** Cultural differences are variations in customs, beliefs, values, and behaviours between individuals from different cultural backgrounds. Recognising and respecting cultural differences is essential for fostering an inclusive and diverse work neighbourhood. Only 19.2 percent of respondents agreed that “people in his neighbourhood do not share the same values”, while 39 percent disagreed and 41.8 percent abstained from agreeing or disagreeing (see Table 8.15). Approximately 20.2 percent of Caymanians agreed, and 18.7 percent of non-Caymanians disagreed.

## Neighbourhood members unknown to each other.

Neighbourhood lacking in friendliness or warmth feeling. That is unfriendly behaviour towards others in the neighbourhood in a way that shows a lack of interest in speaking or helping.

Approximately 27.1 percent of respondents believe that most people in their neighbourhood are unknown to each other (see Table 8.16). Most responders disagreed that the neighbourhood members are unknown to each other; 44.8 percent and 28.1 percent were indifferent.

Table 8.16: People in the Neighbourhood are unknown to each other

## 9. NATURAL AND LIVING ENVIRONMENT

The environment is often discussed in the context of sustainability, but it's also crucial for an individual's quality of life.

Environmental conditions directly affect human health and well-being and indirectly impact ecosystems and biodiversity. They can also lead to more severe consequences like natural disasters or industrial accidents. Many residents increasingly desire to enjoy the benefits of a high-quality environment, from fundamental rights such as access to clean water to intangible aspects like noise-free residential and work environments and easy access to nature and green spaces.

75.4%

Local environmental factors mainly influence an individual's quality of life. Therefore, an accurate quality of life assessment can be obtained through surveys that gather information based on individuals' self-reported perceptions of environmental issues instead of relying solely on aggregated measures of environmental conditions such as air pollution or emissions. The following indicators averaged **75.4 percent** and were used to gauge the natural and living environment.

## Environmental Preservation

71.3%

Recycling converts waste materials, usually thrown away, into new materials and objects. Recycling waste reduces the quantity of harmful materials in the environment by making sure these materials are kept away from landfills. The Department of Environmental Health (DEH) oversees all of the Islands' recycling. There are many reasons why recycling is essential. It can help reduce carbon footprint, but it also helps reduce the need to harvest raw materials, save energy, reduce greenhouse gases, and prevent pollution. The most effective way to reduce garbage is to avoid creating it in the first place. The principle of Reducing waste, Reusing, and Recycling resources and products is often called the "3Rs." **REDUCING** - means choosing to use things carefully to minimise the amount of waste generated. **REUSING** - involves the repeated use of items or parts of items which still have usable aspects. **RECYCLING** - means the use of garbage itself as a resource.

**Household Environment Engagement.** Respondents were asked, *"In the past 6 months, how often did this household {Reuse/recycle; separate/sort waste; conserve electricity; reduce waste; conserve water}?"*. Responses are displayed in Table 9.1.

An optimal indicator for waste management would be the treatment rates of the waste produced in the Cayman Islands by type of treatment. In the absence of this metric, our focus is on household responses. At the household level, 62.4 percent indicated that they

75.1%	Always	Most of the time	Sometimes	Never	Household Engagement in Environmental Activities (%)
	Percent (%)				
Reuse/recycle materials	20.8	14.7	26.9	37.6	62.4
Separate/Sort Waste	49.5	25.8	17.4	7.2	92.8
Conserve Energy	51.3	24.6	16.7	7.4	92.6
Reduce Waste	17.2	13.1	24.2	45.4	54.6
Conserve Water	25.9	20.2	27.3	26.6	73.4
Average Engagement (%)	32.9	19.7	22.5	24.9	75.1

**Table 9.1: Household Engagement in Environmental Activities**

recycle and reuse materials sometimes, most of the time or always. In embracing the Department of the Environment's "Reduce, Recycle Reuse", 92.8 percent engage in sorting waste for the landfill. In addition, 54.6 percent of households responded that they reduce waste, albeit at various degrees; conservation of energy and water was 92.6 percent and 73.4 percent, respectively.

### **Environmental Satisfaction.** "How satisfied are you with the following aspects of Cayman's Natural Environment?"

Respondents' environmental satisfaction was scored at 68.5 percent. This emanated from scoring waste management, recycling practices, green spaces and walkable communities, marine and land protected areas and marine and coastal ecosystems (see Table 9.2).

<b>68.5%</b>	<b>Total</b>	<b>Male</b>	<b>Female</b>	<b>Caymanian</b>	<b>Permanent Resident</b>	<b>Non Caymanian</b>
<b>Environmental Satisfaction</b>	<b>Percent (%)</b>					
Waste management	70.4	71.1	69.8	67.3	68.4	74.0
Recycling practices	66.7	67.3	66.1	63.9	62.0	70.5

*Table 9.2: Satisfaction with Cayman's Natural & Living Environment*

**Waste Management Satisfaction.** Waste management is collecting, treating, recycling, and disposing of different waste materials. Respondents scored waste management at 70.4 percent. 19.6 percent were dissatisfied with waste management practices and policies, 62.5 percent were satisfied or very satisfied, and 18.0 percent were indifferent.

Dissatisfaction was highest among Caymanians, with a score of 25.6 percent, while for non-Caymanian respondents, it was 13.8 percent. Among gender respondents, males (64.2%) were more satisfied than females (60.8%).

Caymanian respondents from Bodden Town (30.6%) and West Bay (28.2%) were the most dissatisfied with waste management practices (see Appendix Table 19A to G). This was followed by George Town (23.9%) and the Sister Islands (20.6%), North Side (9.6%), and East End (6.7%).

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>Waste management</b>	Percent (%)					
Very satisfied	12.1	13.0	11.2	9.6	11.1	14.7
Satisfied	50.4	51.2	49.6	47.0	41.6	55.9
Neither satisfied nor dissatisfied	18.0	17.0	18.9	17.7	27.7	15.6

<b>Weighted Score ( ___/100)</b>	<b>70.4</b>	<b>71.1</b>	<b>69.8</b>	<b>67.3</b>	<b>68.4</b>	<b>74.0</b>

Table 9.3: Satisfaction with Waste Management

**Recycling Practices Satisfaction.** Recycling is the action or process of converting waste into reusable material. Approximately 51.9 percent of respondents were satisfied or very satisfied with known recycling practices (see Table 9.4). One in four respondents was indifferent to recycling. Caymanians (29.3%) and permanent residents (31.9%) respondents had higher overall dissatisfaction than non-Caymanians (15.6%). Approximately 45.2 percent of Sister Islands Caymanian respondents were dissatisfied with the current recycling practices (see Table 19A to G). This was followed by Bodden Town (36.4%), West Bay (29.9%), George Town (25.4%), North Side (11.5%) and East End (10.0%).

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>Recycling practices</b>	Percent (%)					
Very satisfied	9.0	9.1	8.8	7.5	7.1	10.8
Satisfied	42.9	44.6	41.3	39.4	33.0	48.8
Neither satisfied nor dissatisfied	24.8	23.7	25.7	23.7	27.9	24.9

Table 9.4: Satisfaction with Recycling Practices

**Green Spaces and Walkable Communities** indirectly impact health by improving air quality and limiting the impact of heat waves by reducing urban temperatures. Green spaces can also positively affect humans' physical health by filtering the air from pollutants and reducing noise pollution. Building walkable communities contributes to reducing automobile-based transportation.

Approximately 53.4 percent of respondents to the QOL survey were satisfied or very satisfied with the current green spaces and walkable communities. Non-Caymanian (62.4%) respondents were more satisfied with the number of green spaces and walkable communities than Caymanians (45.8%). Approximately 31.8 percent of Caymanians were dissatisfied with the provision of adequate green spaces and walkable communities.

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>Green spaces and walkable communities</b>	Percent (%)					
Very satisfied	7.6	8.2	7.0	5.9	5.4	9.7
Satisfied	45.8	45.9	45.7	39.9	40.9	52.7
Neither satisfied nor dissatisfied	23.9	23.8	24.0	22.4	28.7	24.0
Dissatisfied	19.4	19.1	19.6	26.1	21.6	12.5
Very dissatisfied	3.3	3.0	3.7	5.7	3.4	1.2
<b>Satisfaction Score (very satisfied &amp; satisfied)</b>	<b>53.4</b>	<b>54.1</b>	<b>52.7</b>	<b>45.8</b>	<b>46.3</b>	<b>62.3</b>
<b>Weighted Score ( ___/100)</b>	<b>67.0</b>	<b>67.5</b>	<b>66.5</b>	<b>62.9</b>	<b>64.7</b>	<b>71.4</b>

Table 9.5: Satisfaction with Green Spaces and Walkable Communities

Caymanian respondents from the Bodden Town district were most dissatisfied with the current stock of green spaces and walkable communities, 41.2 percent (see Appendix 19D). The other districts following Bodden Town were West Bay (30.5%), George Town (29.5%), Sister Islands (23.4%), North Side (17.3%) and East End (13.8%).

**Marine and Land Protected Areas.** Marine and land-protected areas are meant to preserve biodiversity and buffer coasts against rising tides and storm surges, such as sea grapes and mangroves. Similarly, the wetlands provide value to the ecosystem. These include natural water quality improvement, flood protection, shoreline erosion control, opportunities for recreation and aesthetic appreciation and natural products for the Island's use at no cost. The question was posed to respondents concerning the Cayman Islands environmental zone, marine reserve, wildlife interaction zone, line fishing zone, terrestrial protected area, port anchorage area and port control zone.

Although one in four respondents was indifferent to the marine and land protection areas, approximately 58.6 percent expressed satisfaction. Caymanian respondents (25.6%) were dissatisfied with the current protected areas.

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>Marine and land protected areas</b>	Percent (%)					
Very satisfied	9.0	9.7	8.3	6.1	8.0	11.9
Satisfied	49.6	52.4	46.9	46.3	41.3	55.0
Neither satisfied nor dissatisfied	24.9	22.8	26.9	21.9	33.0	25.5

Very dissatisfied	3.0	2.5	3.5	5.6	1.7	0.9
<b>Satisfaction Score (very satisfied &amp; satisfied)</b>	<b>58.6</b>	<b>62.1</b>	<b>55.2</b>	<b>52.4</b>	<b>49.3</b>	<b>67.0</b>
<b>Weighted Score ( ___/100)</b>	<b>69.6</b>	<b>70.8</b>	<b>68.4</b>	<b>65.4</b>	<b>67.6</b>	<b>74.1</b>

Table 9.6: Satisfaction with Marine and Land Protected Areas

Among the districts, Caymanian respondents' dissatisfaction was highest in West Bay (25.6%), East End (24.1%), George Town (23.7%), Bodden Town (23.7%), North Side (21.2%) and Sister Islands (10.9%) (see Appendix Table 19A to G).

**Marine and Coastal Ecosystems.** Marine ecosystems refer to the habitats and ecosystems found in the ocean, while coastal ecosystems refer to the habitats and ecosystems found on the border between the land and sea. Protecting important marine and coastal ecosystems that provide a wide range of benefits, including natural solutions to climate impacts through mitigation, adaptation, and resilience, complementing essential efforts to reduce greenhouse gas

emissions, contributes to the quality of life for residents.

Marine ecosystems include marshes, mangrove forests, and coral reefs.

Approximately 17.6 percent of respondents were dissatisfied with the marine and coastal ecosystems. Nonetheless, 56.4 percent were satisfied, with about half of Caymanians (49.7%) satisfied (see Table 9.7).

Caymanian respondents from North Side rated their dissatisfaction at 38.3 percent, followed by West Bay with 25.4 percent. Caymanians from George

Town and Bodden Town have a dissatisfaction rate of 24.4 percent, while East End and the Sister Islands had 20.7 percent and 18.8 percent, respectively.

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian

Table 9.8: Caymanian Dissatisfaction with Cayman's Natural Environment by District

## Natural disasters and emergencies

81.2%

Disaster risk management involves implementing policies and strategies to minimise new disaster risks, alleviate existing risks, and handle residual risks. This helps enhance resilience and reduce disaster losses. Prevention focuses on halting the occurrence of hazards, whether natural, technological, or human-caused. While preventing all hazards is impossible, effective evacuation plans, environmental planning, and design standards can reduce the risk of loss of life and injury.

Mitigation involves preventing emergencies, reducing their likelihood, or minimising their harmful effects. Preparedness includes planning, organising, training, and taking corrective action to respond to various hazards and emergencies. Recovery activities begin after the emergency to restore critical community functions and manage stabilisation efforts, including debris clean-up, financial assistance, rebuilding infrastructure, and providing care for displaced populations. Reducing the negative impact of disasters at the national and household levels correlates directly with residents' quality of life.

Disaster or crisis management is how we prepare for, respond to and recover from disasters. From natural disasters such as floods, earthquakes and hurricanes to accidents, terrorist attacks and war, disaster management aims to minimise their impact when they occur and assist in the emergency response.

The response to the question “How [satisfied are you with disaster and emergency management in the Cayman Islands?](#)” The satisfaction scores **averaged 81.2 percent**. This comprised disaster mitigation (81.3%), disaster preparedness (81.5%), disaster response (81.1%) and disaster recovery (80.9%) (see Table 9.9A). As displayed in Table 9.9B, the satisfaction score was highest in George Town (87.1%) and lowest in East End (75.3%), influenced by a low recovery score.

Table 9.9B: Satisfaction Scores (very satisfied and satisfied) with Disaster and Emergency Management

**Disaster Mitigation.** Mitigation can be perceived as a sustained action that reduces or eliminates long-term risk to people and property from natural hazards and their effects. It describes the ongoing effort at the government and individual levels to lessen the impact of disasters upon families, homes, communities and the economy. The department responsible for disaster management in the Cayman Islands government is the Hazard Management Unit, and the evaluation is done in the context of this unit's work in addition to other organisations. Generally, respondents rated disaster mitigation efforts at 85.9 percent (satisfied and very satisfied), with only 3.0 percent dissatisfied (see Table 9.10). Non-Caymanian respondents' satisfaction scored 87.7 percent, and Caymanians scored 85.1 percent.

	81.3%

<b>Weighted Average Score ( ___/100)</b>	<b>81.3</b>	<b>81.5</b>	<b>81.1</b>	<b>80.6</b>	<b>81.2</b>	<b>82.0</b>

Table 9.10: Satisfaction with Disaster Mitigation

Respondents from North Side rated satisfaction (satisfied and very satisfied) regarding disaster mitigation efforts at 87.9 percent, followed by George Town, with 87 percent (Appendix Table 20B to G). All the districts scored in the mid-80s except for East End, with 79.9 percent.

**Disaster Preparedness.** Disaster preparedness consists of measures undertaken in advance by governments, organisations, communities, or individuals to better respond to and cope with the immediate aftermath of a disaster. The objective is to reduce the loss of life and livelihoods. Simple initiatives can go a long way, such as training for search and rescue, establishing early warning systems, developing contingency plans, or stockpiling equipment and supplies. Disaster preparedness plays a vital role in building communities' resilience.

Generally, respondents rated disaster preparedness at 87.2 percent (satisfied and very satisfied), with only 2.8 percent dissatisfied (see Table 9.11). The satisfaction score of non-Caymanian respondents was 88.9 percent, and that of Caymanian respondents was 86.5 percent.

Table 9.11: Satisfaction with Disaster Preparedness

Respondents from Bodden Town rated satisfaction (satisfied and very satisfied) regarding disaster preparedness at 89.4 percent, followed by George Town, with 88.5 percent (see Appendix Table 20A to G). All the districts scored in the 80s except for East End, with 76.3 percent.

**Disaster Response.** Disaster response includes the actions taken directly before, during, or immediately after a disaster. The objective is to save lives, ensure health and safety, and meet the subsistence needs of the people affected. As depicted in Table 9.12, respondents rated the government disaster response with 85.4 percent satisfaction (satisfied and very satisfied).

					Permanent	Non

*Table 9.12: Satisfaction with Disaster Response*

Caymanian respondents rated it at 84.6 percent, while non-Caymanians rated it at 87.1 percent satisfaction. Respondents from George Town rated satisfaction (satisfied and very satisfied) regarding disaster response efforts at 87.4 percent,

followed by Bodden Town, with 86.3 percent (Appendix Table 20A to G). West Bay satisfaction was at 83.6 percent, followed by North Side (82.9%), Sister Islands (78.2%) and East End (73.4%).

**Disaster Recovery.** The ability to restore access and functionality to infrastructure after a disaster event. Overall, respondents rated disaster recovery at 85.1 percent satisfaction (satisfied and very satisfied). Caymanian rating was 85.3 percent relative to non-Caymanian 86.2 percent (see Table 9.13).

<b>80.9%</b>	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian

Table 9.13: Satisfaction with Disaster Recovery

## Household Disaster Preparedness

79.5%

Family education about disasters and how they affect household members, the development of a plan, the practice of its implementation in authentic and organised ways, and ensuring that the supplies to support the household in the event of an emergency are crucial parts of disaster preparedness for the household. Households ranked their satisfaction with disaster preparedness by supplies, medicine, safety of the occupied dwelling, ability to get to a shelter and financial savings for disaster recovery.

On average, households are 79.5 percent satisfied with their disaster preparedness. For Caymanian respondents, satisfaction with financial savings reserved for unexpected disaster expenditure (74.6%) was generally lower than in other areas of disaster preparation (see Table 9.15). Nonetheless, the Caymanian satisfaction score was 79.8 percent, even higher when only positive satisfaction (81.9%) is considered.

	79.5%	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
Household Disaster Preparedness	Percent (%)						
Supply of food, medical and other items		81.5	81.3	81.7	81.9	82.1	80.9
Safety of your residence for disaster		80.8	80.5	81.1	82.3	81.3	79.2
Getting to a shelter in the event of a disaster		80.7	80.9	80.5	80.4	80.5	81.1
Financial savings reserved for unexpected disaster expenditure		75.1	76.0	74.2	74.6	77.0	75.1
<b>Satisfaction Score (satisfied &amp; very satisfied)</b>		<b>81.5</b>	<b>81.3</b>	<b>81.7</b>	<b>81.9</b>	<b>82.1</b>	<b>80.9</b>

*Table 9.15: Overall Satisfaction (satisfied & very satisfied) Scores with Household Disaster Preparedness*

**Supply of food, medical, and other items for disasters.** Generally, respondents were satisfied with their stock of disaster items available for household use during a disaster. The satisfaction score (satisfied and very satisfied) was 86.4 percent, and 5.7 percent were unhappy with the disaster preparations. Caymanians' satisfaction was 86.2 percent, while non-Caymanians' satisfaction was 87.4 percent (see Table 9.16). Among the districts, North Side (98.9%) and East End (95.1%) had the highest level of satisfaction, while the Sister Island (81.8%) recorded the lowest (see Appendix Table 21A to F).

*Table 9.16: Supply of food, medical and other items*

**Safety of residence for disaster.** Regarding the safety of their dwelling, 85.7 percent of respondents are satisfied with its ability to withstand a disaster. Approximately 5.5 percent of respondents were unsatisfied with its safety, and 8.8 percent were unsure. Caymanians were satisfied with a satisfaction rating of 88.2 percent, while non-Caymanians were 84.1 percent (see Table 9.17).

Respondents across the districts are generally satisfied with the safety of their dwellings in disasters (see Table 21A to F). Despite the high level of satisfaction, structural insurance coverage was 45.1 percent, which indicates that more than half of households are prepared to self-insure.

*Table 9.18: Getting to a shelter in the event of a disaster*

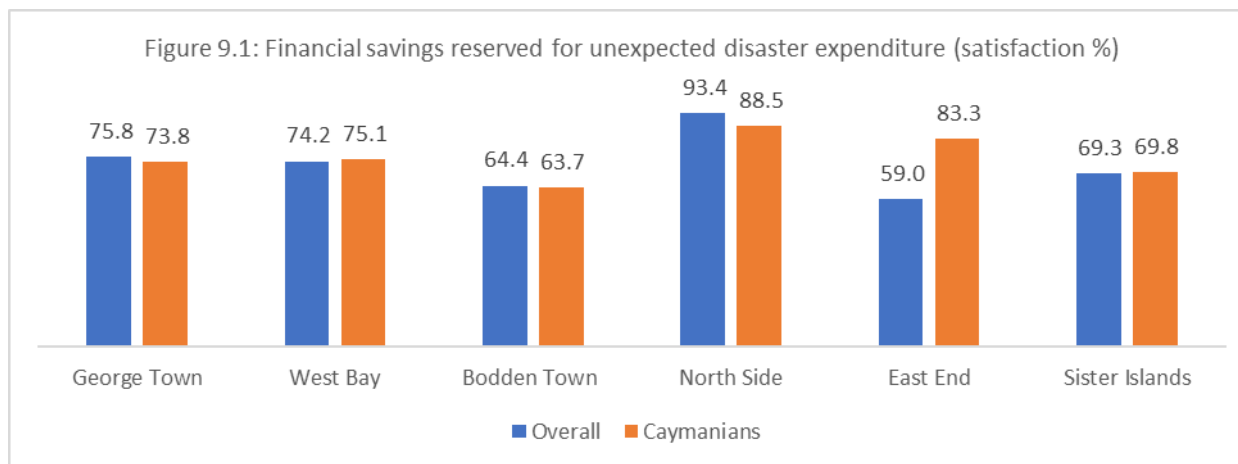

**Getting to a shelter in the event of a disaster.** Regarding the ability to get to a shelter, 84.8 percent of respondents are satisfied. Approximately 3.7 percent of respondents were unsatisfied with its safety, and the other 11.5 percent were unsure. Caymanians were satisfied with a rating of 83.2 percent, while non-Caymanians were 87.2 percent.

**Financial savings are reserved for unexpected disaster expenditures.** 73.1 percent of respondents are satisfied and sure of their reserve recovery funds for unexpected disasters. Approximately 14.8 percent of respondents were unsatisfied with their financial ability to withstand a disaster, and the other 12.1 percent were unsure. Caymanian respondents were satisfied with their disaster recovery financial soundness rating of 72.0 percent, while non-Caymanians' rating was 73.8 percent.

Table 9.19: Financial savings reserved for unexpected disaster expenditure

North Side respondents are more satisfied with financial preparedness than the other districts. Bodden Town seems to be on the lower end of satisfaction, with only 64.4 percent overall and 63.7 percent among Caymanians (see Figure 9.1).

## Economic and Social Development

69.5%

Economic development and growth are often synonymous, but that is not always true. They are, in essence, different. Economic development focuses on the standard of living and includes qualitative and quantitative measures. Economic development aims to foster an economy where members benefit from wealth and education, health, and prosperity, making economic development a multidimensional economic tool. In contrast, economic growth focuses on the increase in an economy's output from one period to another. It solely considers opportunities to stimulate growth within an economy to increase real GDP.

**Overall Development.** To obtain respondents' sentiments on Cayman's overall development, the question was "*How satisfied are you with the following aspects of Cayman's development*"<sup>12</sup>. 70.6 percent of respondents were satisfied with the development in the Cayman Islands. Investment in infrastructure and technological progress were the only two components rated higher than 70 percent. Among Caymanians, it was 67.5 percent, with technological progress rated the highest development component (see Table 9.20).

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian
<b>Cayman's Development</b>	Percent (%)					
Investment in infrastructure	71.9	73.1	70.7	67.9	74.0	75.0

<b>Weighted Average Score ( ___/100)</b>	<b>70.6</b>	<b>71.4</b>	<b>69.8</b>	<b>67.5</b>	<b>71.3</b>	<b>73.3</b>

Table 9.20: Satisfaction with Cayman's Development

<sup>12</sup> Cayman's Development – included investment in infrastructure, human capital development, technological progress and innovation, access to financial resources and good governance and institutions.

**Investment in infrastructure.** As displayed in Table 9.21, using the satisfaction score measure, 61.1 percent of persons were appreciative of the infrastructure development of the Cayman Islands. This metric was highest among non-Caymanians (67.7%) and lowest among Caymanians (52.7%). Males (64.6%) had a more favourable view of Cayman's infrastructure development than females (57.6%). Considering the total dissatisfaction, 23.9 percent of Caymanians were dissatisfied.

*Table 9.21: Satisfaction with Investment in Infrastructure*

**Human capital development.** Human capital consists of the knowledge, skills, and health that people accumulate throughout their lives, enabling them to realise their potential as productive members of society. Investment in human capital involves expending training cost on individuals with the hope of gaining a return in the future (for example, through increased earnings). This return on human capital investment can reduce poverty, create a more inclusive society, and enhance quality of life.

Among respondents, 54.4 percent were satisfied with the current state of human capital development, with another 14.4 percent dissatisfied. Similarly, Caymanians were 48.6 percent satisfied and 23.9 percent dissatisfied (see Table 9.22).

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian

*Table 9.22: Satisfaction with Human Capital Development*

**Technological progress and innovation.** Technological progress and innovation involve discovering new and improved methods of producing goods and services. Changes in technology lead to an increase in labour productivity, capital, and other factors of production. As exhibited in Table 9.23, the satisfaction score for technological progress and innovation was 61.6 percent, slightly lower for Caymanians (58.5%).

	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian

Table 9.23: Satisfaction with Technological Progress and Innovation

**Access to financial resources.** This includes access to capital, funding, and financial support for pursuing education, starting businesses, or investing in personal development. As development matures, so does the ability of individuals or enterprises to obtain financial services, including credit, deposit, payment, insurance, and other risk management services. Over half of respondents were satisfied with access to resources to finance private ventures.

Table 9.24: Satisfaction with Access to Financial Resources

One in five (20.8%)

Caymanians were dissatisfied with their access to financial resources for financing their investments and daily activities.

**Good governance and institutions.** Good governance measures how public institutions conduct public affairs, manage public resources, and guarantee the realisation of human rights, essentially free of abuse and corruption and adherence to the rule of law. *The UN's Economic and Social Commission for Asia and the Pacific summarises good governance as “participatory, consensus oriented, accountable, transparent, responsive, effective and efficient, equitable and inclusive and follows the rule of law.”*

Generally, 56.3 percent of respondents expressed satisfaction with good governance and institutions. Non-Caymanians rated good governance and institutions at 64.4 percent satisfaction, while for Caymanians, 48.4 percent. Approximately one in four Caymanians (24.7%) were dissatisfied with good governance and institutions. As shown in Table 9.25, roughly 26.9 percent of Caymanian respondents were indifferent (neither satisfied nor dissatisfied) to rating good governance and institutions.

*Table 9.25: Satisfaction with Good Governance and Institutions*

## Road Transportation.

To obtain respondents' views on road transportation, the question was

*“How satisfied are you with the following aspects of road transportation?”<sup>13</sup>*

The overall satisfaction scores for road and transportation for residents of Bodden Town were 33.8 percent, of which Caymanian respondents rated it at 28.0 percent. This emanated from low satisfaction or high dissatisfaction with the travelling time on the roads, as well as the road users' knowledge and training.

As shown in Tables 9.26 and 9.27, satisfaction with travelling time on the roads for Bodden Town was 23.9 percent, 18.6 per cent (dissatisfaction was 68.7%, see Figure 9.2) among Caymanians.

	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands
<b>Cayman's Road and Transportation</b>		Percent (%)				
Travelling time on the roads	49.3	68.9	23.9	9.6	44.7	96.7

<b>Average Score ( ___/100)</b>	<b>35.8</b>	<b>43.8</b>	<b>28.0</b>	<b>42.3</b>	<b>52.7</b>	<b>83.7</b>

Table 9.27: Caymanian Satisfaction (satisfied & very satisfied) Scores with Roads and Transportation

<sup>13</sup> Road and transportation include travel time, water drainage on the roads, road users' knowledge and training, an adequate road network, and road construction/repair.

The travelling time satisfaction score for North Side was even lower than that of Bodden Town, with 9.6 percent (dissatisfaction was 83.2%). It was 6.0 percent among Caymanians, with a dissatisfaction score of 84.0 percent.

Besides the road travel time, Caymanian respondents were most dissatisfied with road users' knowledge and training. This scored 14.7 percent for residents of Bodden Town, followed by North Side with 16.0 percent, West Bay (25.6%), George Town (27.6%), and East End (46.7%). Sister Islands had a reasonable satisfaction score of 73.8 percent.

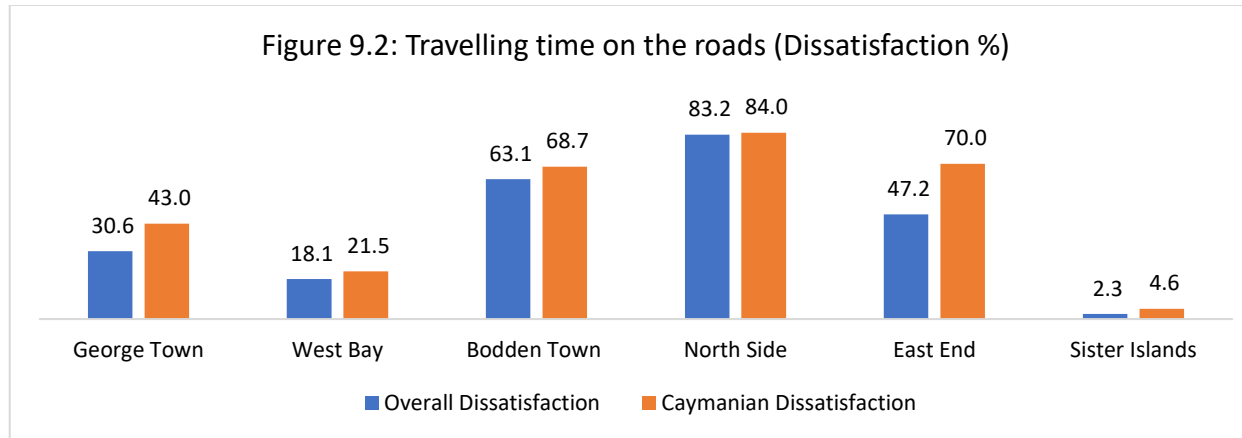

**Travelling time on the roads.** Long drives on the road can leave commuters feeling physically drained (fatigued eyes and muscles). These short-term effects can show the strain driving puts on the body. From sitting posture to the glare of the road, every aspect of driving can contribute to immediate health issues and the quality of life. Generally, approximately 49.7 percent of commuters are satisfied with travelling time, another 34.4 percent are dissatisfied (dissatisfied and very dissatisfied), and 15.8 percent are indifferent (see Table 9.28). More Caymanian commuters were dissatisfied (44.5%) than satisfied (38.4%) with the travel time on the roads. It is plausible to assume that respondents' satisfaction or dissatisfaction depends upon the residential location relative to the intended destination.

The eastern districts expressed the highest dissatisfaction with travel time due to traffic congestion. As

	<b>63.4%</b>	<b>Total</b>	<b>Male</b>	<b>Female</b>	<b>Caymanian</b>	<b>Permanent Resident</b>	<b>Non Caymanian</b>

Table 9.28: Satisfaction with travel time on the roads

depicted in Figure 9.2, Bodden Town, North Side, and East End expressed dissatisfaction rates of 63.1 percent, 83.2 percent, and 47.2 percent, respectively. Caymanians led these dissatisfaction rates in the respective districts.

## Water drainage on the roads.

Caymanian respondents are generally unhappy about the inadequate road drainage during weather events and sharp rain downpours. The dissatisfaction score was 45.1 percent relative to the satisfaction score of 37.0 percent, while the other 17.8 percent remained indifferent. Among all road users, 42.4 percent were satisfied with the water drainage system.

Table 9.29: Satisfaction with water drainage on the roads

## Road users' knowledge and training.

Only 34.5 percent of respondents believed that road users were adequately trained and followed the road code rules. Approximately 41.0 percent were dissatisfied with road users' knowledge and training. Satisfaction (25.8%) among Caymanians was lower, and dissatisfaction (53.0%) was higher.

	58.0%	Total	Male	Female	Caymanian	Permanent Resident	Non Caymanian

Table 9.30: Satisfaction with road users' knowledge and training

**Adequate road network.** Roads play a vital role in the logistics industry and the economy, keeping goods on grocery shelves and supply chains protected. Is the current road network short of the many economic demands that are expected of it? Quality of life survey respondents rated adequate road network at 53.4 percent, while Caymanians' rating was 45.1 percent. Dissatisfaction was highest among Caymanians at 31.0 percent and non-Caymanians at 15.2 percent (see Table 9.31).

**Road construction/repair.** In contrast, Caymanians (46.3%) were generally satisfied with the timing of road construction and repair, while non-Caymanians (67.4%) were satisfied (see Table 9.32). Overall, the satisfaction rate was 56.6 percent.

## Human Capital Development.

Human capital consists of the knowledge, skills, and health that people accumulate throughout their lives, enabling them to realise their potential as productive members of society. Developing human capital can reduce poverty and create a more inclusive society. To obtain respondents' sentiments on human capital development in the Cayman Islands, the question was *"How satisfied are you with the following aspects of human capital development<sup>14</sup>?"*

As displayed in Tables 9.33 and 9.34, North Side (70.0%) respondents rated human capital development as the highest among

	George Town	West Bay	Bodden Town	North Side	East End	Sister Islands

Table 9.34: Caymanian Satisfaction Scores (satisfied & very satisfied) with aspects of Human Capital Development

<sup>14</sup> Human capital Development included education and schools, healthcare and public health, job training and vocational programs, small business support, community centres and recreational facilities, and adult education and lifelong learning.

all the districts, consistent with the Caymanians' rating (59.9%). The lowest overall satisfaction rating was from East End, with 38.8 percent. The lowest rating among Caymanians was from Bodden Town, with 46.6 percent strongly influenced by a low rating for entrepreneurial support for small business development (29.0%).

**Education and schools.** Education and schools are crucial for acquiring foundational knowledge, developing social and personal skills, preparing for future careers, and contributing to societal development. They play a central role in individual growth and the advancement of society as a whole. In the assessment of investment in education and schools, 63.8 percent of respondents were

satisfied with the current facilities and curriculum, with an 11.3 percent dissatisfaction rate (see Table 9.35). Although Caymanian respondents were generally happy, with 63.6 percent, 17.7 percent also showed dissatisfaction.

**Healthcare and public health.** Public Health is essential in the local population as it ensures everyone knows about health hazards through educational programmes and campaigns, influencing government policies. Public health supports individuals, organisations, and society to tackle preventable disease, mortality and disability using prevention (reducing the incidence of ill health, supporting healthier lifestyle) and protection (surveillance and monitoring of infectious disease, emergency response and immunisation). About 75.5 percent of respondents were satisfied with investment in health care

Table 9.36: Satisfaction with health care and public health

**Job training and vocational programs.** While traditional academic paths have value, vocational and technical education offers a unique approach that aligns with industry needs, fostering greater job readiness and economic mobility. Vocational education differs from technical education because it teaches the hands-on skills needed to do a job; many skills are combined to learn a vocational trade. Approximately 50.6 percent of respondents were satisfied with job training and vocational programs (see Table 9.37). The dissatisfaction score was highest among Caymanians with 22.1 percent. About 47.9 percent of Caymanians were satisfied while 30.0 percent were indifferent.

## Entrepreneurship support (small business training, etc.).

Entrepreneurship includes developing and managing new business ventures to make a profit or achieve another aim. It is frequently credited as a major driver of economic growth, spurring transformation, the creation of new markets, innovation, and building wealth. Additionally, it is often key to developing ideas and solutions to problems while creating new products.

At least one in five Caymanian respondents (22.1%) was dissatisfied with the entrepreneurial support offered in the Cayman Islands. Table 9.38 shows that most respondents (44.6%) were neither satisfied nor dissatisfied. 37.7 percent of Caymanians were indifferent and 40.2 percent were satisfied.

**Community centres and recreational facilities.** Access to recreational facilities significantly enhances the quality of life. Communities with ample green spaces and trails are more attractive places to live, work, and raise families. These activities may include beaches, non-motorized racetrack activities, sports fields, picnic areas, parks, and other similar uses.

Table 9.40 shows that 48.6 percent of Caymanian respondents were satisfied with the community centres and recreational facilities; overall, this satisfaction rate was slightly higher at 52.4 percent. The dissatisfaction rate among Caymanians was 23.4 percent.

Table 9.40: Satisfaction with community centers and recreational facilities

**Adult education and lifelong learning.** Lifelong learning starts at birth and extends across the whole lifespan. It provides people of all ages with learning opportunities, responding to their specific needs in different life and professional stages. Adult learning is included in lifelong learning and is geared towards adult participants (people twenty-five years or older). It enhances the learning process with experience and is also geared to give adults a second chance for education and personal development.

Quality of life survey respondents rated their satisfaction with current initiatives and policies to enhance adult education and lifelong learning at 44.2 percent. Caymanian (44.2%) respondents were slightly lower than non-Caymanians (45.9%) (see Table 9.41).

Approximately four in ten persons are indifferent to adult education and lifelong learning (44.2%), and one in two for non-Caymanians.

Sample Households: 1,586  
 Sample Population: 3,681  
 Total Respondents (18+): 2,982

## Districts Sample Respondents (18+)

George Town:	1,435
West Bay:	676
Bodden Town:	588
North Side:	82
East End:	85
Sister Islands:	116

Fieldwork was conducted from September 29 to November 20, 2024. Trained enumerators conducted household interviews. Of the 2,000 randomly selected household samples, 1,642 were actual occupied households and of these, 1,586 completed (fully or partially) the survey.

## 10. METHODOLOGY

Quality of life (QOL) is broader than economic production and living standards and includes individuals' overall satisfaction and well-being. This concept is shaped by physical, psychological, social, and environmental factors. A high quality of life makes individuals feel happier, healthier, and more fulfilled.

Similar to leading countries with quality of life indicators, the Economics and Statistics Office (ESO) proposes to build on the following six (6) dimensional framework: health, employment and job quality, material living conditions, economic and physical safety, leisure and social activities and natural and living environment.

To implement the framework, a set of indicators based on existing survey data covering as many dimensions as possible. Several headline indicators were selected for each dimension, which will be monitored annually. Data was collected jointly with the Labour Force Survey (LFS). ESO enumerators administered a representative sample (proportionate to the number of households in the district) survey to obtain the Quality of Life (QOL) indicators, which included subjective and objective indicators. Subjective indicators are survey answers

## Weighted Sample Survey

Estimated Population: 88,833

Total Respondents (18+): 72,212

### Districts Weighted Respondents (aged 18+)

George Town:	36,091
West Bay:	16,269
Bodden Town:	13,499
North Side:	1,917
East End:	2,173
Sister Islands:	2,763

The population is estimated using administrative data from WORC (work permits, PR, and Status Grants), HSA (births and deaths) and the Census 2021 population count.

based on personal opinions and feelings rather than facts, while objective indicators are verifiable information based on facts and evidence. The quality of life survey questions were administered ONLY to persons 18 and older.

Analytical tables were calculated for the actual responses, excluding “Don’t Know” and “Not Stated,” which were treated as non-responses.

**QOL Scoring.** The QOL dimensions were scored out of 100 points. A higher score indicates that respondents and residents are more satisfied with their quality of life, and lower scores indicate a high level of dissatisfaction.

**QOL Weighting.** A weighting system derived an overall QOL score from the six dimensions. Weights were derived by asking respondents to indicate their preference to sustain a good quality of life by distributing 100 points ranking the six dimensions, with more points allocated to the most important dimension and fewer points to the less important.

## 11. QUALITY OF LIFE DIMENSIONS MATRIX

Quality of Life Dimensions	Headline Indicators	Common Indicators
Health	Health Services and Conditions Physical Wellness Mental Wellness Spiritual Wellness	Competence of staff; overall cleanliness of the facility; friendliness and courtesy of staff; The treatment and medicine prescribed; Waiting time for service, self-assessed physical wellness; sick days from work; self-assessed mental wellness; Self-assessed spiritual wellness
Employment and Job Quality	Employment Opportunities and Employability Job Quality Employable Skills Job Satisfaction	Employment with a workplace greater than 5 years, job creation, labour underutilisation rate, job quality, education and training (high to university), salary and benefit package, job satisfaction survey, real employment income
Material Living Conditions	Housing needs and overcrowding Household income to household costs Housing/Living conditions	Overcrowded households; household income relative to household costs, access to safe drinking water, sanitation, electricity and Internet, transportation
Economic and Physical Safety	Poverty and Food Security Financial security – income and savings Economic and financial outlook Resources to support living standards Physical Safety	Self-assessed poverty, poverty vulnerability, ability to finance unexpected expenditures, self-assessed economic outlook, Self-assessed changes in life circumstances, income disparity, bills payment in arrears, knowledge and awareness of crime, feelings of physical safety

Quality of Life Dimensions	Headline Indicators	Common Indicators
Leisure and Social Activities	Work-life Balance Social Cohesion and Connections	Self-assessed work-life balance, work-life balance measurable hours, employed persons usual hours worked, relationship with family, relationship with coworkers, persons to rely on (sickness, emotional issues, financial problems, general personal support), neighbourhood social cohesion
Natural and Living Environment	Waste management Natural disasters and emergencies Cayman's development	Household (reuse, sort, and reduce waste) conservation (water and energy), satisfaction with Cayman's natural environment (waste management, recycling practices, green spaces and walkable communities, marine and land protected areas, marine and coastal ecosystems), disaster and emergency management satisfaction (mitigation, preparedness, response, recovery), household disaster preparations satisfaction, Cayman's development satisfaction (infrastructure, human capital, technology, financing, good governance), Road and transportation satisfaction, human capital development
