Note: Due to rounding, there may be minor variations in totals or sums.

1. INTRODUCTION

This report presents the findings of the Spring 2026 Labour Force Survey (LFS). The LFS mainly provides information on the characteristics of persons in the labour force (employed and unemployed). It also presents demographic information on the general population, some characteristics of persons not in the labour force, and household characteristics.

The concepts used in the Survey are in accordance with the International Labour Organisation (ILO) guidelines; therefore, the indicators produced by the Survey are comparable to those used internationally.

The remaining sections of this Report present the methodology, the main findings, with an emphasis on the characteristics of the labour force and those who are out of the labour force, and other findings on housing characteristics. The Appendix presents the detailed tables.

2. METHODOLOGY

As in the previous LFS, the planning and execution of the Spring 2026 LFS were undertaken by the staff of the Economics and Statistics Office (ESO), a department in the Ministry of Finance and Economic Development of the Cayman Islands Government.

Sampling design

The sampling frame for the LFS is the ESO's Household Register, which is a listing of all household dwelling units in the Cayman Islands. The last update of the Register was conducted in August 2024, when it listed 34,182 household dwelling units, which served as the sampling frame for this edition of the LFS.

Samples for the LFS were drawn from all districts of the Cayman Islands. Cayman Brac and Little Cayman were combined to form the stratum of the Sister Islands. Probability proportional to household count by district, as determined from the ESO Household Register, was used to allocate the number of selected households across strata. Households were randomly selected from all six districts; within each district, the households were selected with equal probability. The probability of selection for the sampled households in each district can be expressed as follows:

$$P_h = m_h / M_h$$

Where:

P_h =probability of selection for the sample households in the h-th stratum (district)

M_h = total number of households in the sample frame for the h-th stratum

m_h = the number of sample households selected in the h-th stratum

Based on the sampling design, 2,000 household addresses were randomly selected, representing 5.9 percent of the 34,182 households.

Fieldwork

Since October 2014, the ESO has been using tablets for electronic data collection in Grand Cayman. Included in the Appendix (see page 164) is a copy of the questionnaire that was uploaded to the tablet for this edition of the LFS.

The reference week for the Spring 2026 LFS was 19th to 25th April 2026. The data collection took place over a six-week period from 26th April to 26th June 2026. The administrative data (births, deaths, and work permits) used to estimate the total population as of the end of June 2026 were collected in early July 2026.

The ESO hosted its usual in-person training exercise to prepare for the fieldwork. A total of 57 persons, including ESO survey staff, were recruited in Grand Cayman, most of whom have prior household survey experience (census and/or LFS). In the Sister Islands (Cayman Brac and Little Cayman), 3 people were recruited to administer the LFS using tablet-based questionnaires. Therefore, a total of 60 persons were eventually selected to conduct interviews in the Cayman Islands.

Weights

The 2026 population estimate was derived by adding the natural increase (births minus deaths) data collected from the Health Services Authority and immigration (work permits, permanent residents, and change of status) from the Cayman Islands Customs and Border Control (CBC) Department in the first six months of 2026, compared to the 2025 year-end population estimate.

The raising factors for Caymanian, PR/PR-WRW, and Non-Caymanian sub-populations were then calculated based on their respective population estimates,

$$Raising\ factor_{si} = \frac{Population_{si}}{Survey\ Count_{si}}$$

Where:

$Population_{si}$ = estimated population based on administrative data of status$_i$ ($_i$=Caymanian, Permanent Residents, and Non-Caymanians)

$Survey\ Count_{si}$ = number of individuals from the LFS per status.

The household characteristics were derived from the district response rates and adjusted for nonresponse at the household level.

Table 1: Response Rate by District

District	Sample Size[1]	In Scope Households[2]	Fully and Partially Completed	Response Rate[3]
Total	**2,000**	**1,588**	**1,530**	**96.3**
George Town	1,038	802	764	95.3
West Bay	421	351	345	98.3
Bodden Town	358	304	292	96.1
North Side	55	36	34	94.4
East End	50	40	40	100.0
Sister Islands	78	55	55	100.0

1 Of the original 2000 sample household addresses only 1588 were found to be households.

2 In scope households are those with results codes 1 - Fully completed, 2 - Partially completed, and 3- Refusals.

3 Response Rate represents those households fully and partially completed divided by in scope households.

Data processing

The survey responses were processed internally by ESO staff. Data capture was built into the ESO Mobile LFS Project (LFSPrj) software on tablets. Coding of industries and occupations were also conducted internally using the International Standard Industrial Classification (ISIC) (Rev. 4) and the International Standard Classification of Occupations (ISCO) 2008, respectively. Edit checks were conducted using CSPro (Census and Survey Processing System) and SPSS (Statistical Package for the Social Sciences). Data were verified by cross-referencing information stored on the tablets or by phone with the respondent. A data file was then created from information collected from all households that completed the LFS interview (fully or partially). Finally, indicators were generated in SPSS, and the tables presented in this Report were prepared in Excel.

Standard errors for main estimates

Given the nature of the LFS sample design, the estimates were computed with a 2.5 percent margin of error. The estimates published in this Report's tables are rounded to the nearest whole number or person. The sum of the individual rounded numbers may not equal the total. In addition, the difference between one person in the same category across different tables is due to rounding.

Data representing the weighted responses of one individual in the Survey are suppressed and indicated by the symbol "…".

The estimates presented in this Report are all liable to sampling error. Their absolute sampling error increases with its magnitude, while the relative error decreases as the estimate grows larger. Generally, the smaller the *Relative Standard Error* (or *Coefficient of Variation*), the more reliable the estimate. Because of this, comparisons of the larger estimates may be used with

confidence, but small estimates must be treated with caution. The s*tandard errors*, *confidence intervals,* and *coefficients of variation* (C.V.) for key variables in the Spring 2026 LFS are shown in Tables 2 and 3.

3. DEFINITION OF KEY CONCEPTS

Population

In the LFS, the population refers to the "resident" population; that is, persons who are staying or intend to stay in the Cayman Islands for at least six months. Visitors/tourists are not included in the resident population. Persons in institutions for more than six months are excluded. Family members of resident households who were abroad at the time of the survey but had intentions to return to the Islands were also considered residents.

The population is categorised into three sub-populations by immigration status: Caymanians, Permanent Residents (PR), and Non-Caymanians. Permanent Residents include non-Caymanians married to Caymanians, Permanent Residents with a government contract, Permanent Residents with rights to work (PR-WRW), and Permanent Residents without rights to work.

Labour Force

The labour force comprises members of the non-institutionalised population (i.e., those not in residential institutions such as general penitentiaries and retirement homes) aged 15 years and over, who were employed or unemployed during the reference week. All persons in the PR labour force in all tables and sections of this Report refer explicitly to PR-WRW only. Persons categorised as PR without rights to work are included as part of the Non-Caymanian Working Age Population.

Employed

Employed persons are those who, during the reference week, did any work for pay or profit; that is, paid work in the context of an employer-employee relationship or self-employment. It also includes unpaid family workers who contributed directly to the operation of a farm, business, or professional practice owned or operated by a household member related to the household. Based on the International Labour Organisation (ILO) guidelines, work can be for as little as an hour during the reference week; it excludes unpaid domestic housework and volunteer work but includes those temporarily away from their jobs.

Unemployed

Unemployed persons are those who, during the reference week, are:
(a) without work;
(b) currently available for work and
(c) actively looking for a job, or had definite arrangements to start a job within 4 weeks.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, status, sex, etc.) is the number of unemployed people in that group, expressed as a percentage of the labour force in that group.

$$Unemployment\ Rate = \frac{Number\ of\ Unemployed}{Labour\ Force} \times 100$$

Not in the Labour Force

These are persons in the non-institutional population (i.e., those not in residential institutions such as general penitentiaries or retirement homes)—aged 15 years and over—who were neither employed nor unemployed during the reference week.

Household

A household comprises either one person living alone or a group of persons (not necessarily related) living at the same address, sharing common housekeeping, i.e., at least one meal a day, and living arrangements. This concept is used for persons sharing an apartment, house, or one room. For further clarification, please see:
https://www.eso.ky/labourforcesurveys.html

4. MAIN FINDINGS

The population of the Cayman Islands was estimated at 90,832, which includes 41,340 Caymanians, 10,517 Permanent Residents (including 7,161 WRW), and 38,975 non-Caymanians.

From the total population, 62,898 persons made up the labour force. The labour force comprised 61,572 employed individuals and 1,327 unemployed individuals. As a result, the overall labour force participation rate was 81.9 percent. By status, the lowest labour force participation rate was among Caymanians (70.4%), whilst the highest was among non-Caymanians (93.2%). By sex, males had a participation rate of 84.9 percent, whilst females had a lower rate of 78.8 percent. Figure 1 illustrates the composition of the population and labour force.

Table 4: Main Labour Force Indicators by Status, Spring 2026

	Total	Caymanian	Permanent Res.	Non-Caymanian
Population	90,832	41,340	10,517	38,975
0 - 14 years	14,011	8,267	730	5,014
Working Age Population (15+)	76,821	33,072	9,787	33,962
Labour Force	62,898	23,297	7,959	31,642
Employed	61,572	22,460	7,827	31,285

Figure 1: Main Labour Force Composition, Spring 2026

4.1 POPULATION ESTIMATES

The population of the Cayman Islands was estimated at 90,832 as of December 2026. George Town is the primary population centre, containing 51.9 percent of the population. West Bay followed with 21.1 percent of the population, and Bodden Town with 18.3 percent. North Side, East End, and the Sister Islands are significantly smaller; together, they account for 8.8 percent of the population (see Table 6).

The overall average household size was 2.66 persons. At the district level, Bodden Town (2.72), West Bay (2.66) and George Town (2.66) reported the highest averages, while the Sister Islands recorded the lowest average at 2.38 persons per household.

Table 6: Population Estimates by District – Spring 2026

District	Total Population		Average Household Size	Total Households	
	#	%		#	%
Total	**90,832**	**100.0**	**2.66**	**34,182**	**100.0**
George Town	47,142	51.9	2.66	17,736	51.9
West Bay	19,120	21.1	2.66	7,198	21.1
Bodden Town	16,622	18.3	2.72	6,112	17.9
North Side	2,498	2.8	2.65	944	2.8
East End	2,271	2.5	2.64	859	2.5
Sister Islands	3,179	3.5	2.38	1,333	3.9

Note: *The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.*

Sex and Age

In Spring 2026, the female population declined by 4.2 percent (1,930 persons), whereas the male population grew by 4.9 percent (2,185 persons) (see Table 7).

Children under 15 accounted for 15.4 percent of the population, and the elderly (aged 65 and older) accounted for 9.3 percent. Collectively, these two age groups are referred to as the 'dependent population' and accounted for 24.7 percent of the overall population.

Approximately 84.6 percent of residents fall into the working-age category (15 years+), representing the core group engaged in or seeking employment. Within this demographic, individuals aged 15 to 64 are identified as the essential support system for the community's youth and elderly. This dynamic yields a dependency ratio of 32.8 percent, which measures the relationship between those requiring support and the primary provider cohort.

Table 7: Population Estimate by Selected Characteristics

Selected Characteristics	Fall 2025 Population		Spring 2026 Population		2026/2025 Change	
	#	%	#	%	#	%

15 - 24	7,938	8.8	7,315	8.1	(623)	(7.8)
25 - 34	16,352	18.1	14,403	15.9	(1,949)	(11.9)
35 - 44	19,222	21.2	19,633	21.6	411	2.1
45 - 54	16,150	17.8	14,957	16.5	(1,194)	(7.4)
55 - 64	10,627	11.7	11,927	13.1	1,300	12.2
65+	7,600	8.4	8,430	9.3	830	10.9

Note: *Due to rounding, there may be minor variations in totals or sums.*

Status

In Spring 2026, Caymanians constituted the largest demographic group at 45.5 percent. Non-Caymanians accounted for 42.9 percent, while Permanent Residents represented the smallest share at 11.6 percent. Compared to the previous year, Caymanians and Permanent Residents both experienced increases of 0.7 percent and 16.1 percent, respectively. The non-Caymanian population declined by 3.7 percent (See Table 7).

Working-age percentages differ across population groups: 87.1 percent for non-Caymanians, 80.0 percent for Caymanians, and 93.1 percent for Permanent Residents. The high concentration of working-age non-Caymanians is expected, as expatriate residency is generally contingent on employment (see Appendix table 1.11).

4.2 LABOUR FORCE

The labour force comprises persons of working age (15 years and older) who worked, as well as those who, at the time of the survey, did not have a job but were available and seeking work during the reference period. The Spring 2026 LFS counted 62,898 persons in the labour force (see Table 8).

Table 8: Labour Force by Selected Characteristics, Spring 2026

College / University	24,915	39.6
Other	79	0.1
Not Stated	213	0.3

Note: *Due to rounding, there may be minor variations in totals or sums.*

Sex and age

The labour force in Spring 2026 was slightly majority male, with men accounting for 52.8 percent compared to 47.2 percent for women. From an age perspective, the workforce is heavily concentrated in the prime working years; those aged 35 to 44 represent the largest share at 29.8 percent. This was followed closely by the 45 to 54 and 25 to 34 age groups (see Table 8).

Status

The labour force distribution by nationality status showed that 37.0 percent were Caymanians, 52.7 percent were non-Caymanians, and 10.2 percent were PR-WRW (see Table 8).

Labour Force Participation Rate (LFPR)

The total LFPR reached 81.9 percent, with distinct variations based on nationality status. Reflecting the work-permit-driven immigration system, Non-Caymanians and Permanent Residents showed the highest participation levels at 90.7 percent and 89.8 percent, respectively. In contrast, the participation rate among Caymanians was notably lower at 70.4 percent (see Table 9).

Analysis by educational attainment levels revealed that individuals with no education and those with primary education or below have the lowest participation rates (35.1% and 41.9%, respectively). Participation peaks at the college/university level (89.2%) and post-Secondary (88.0%) (see Table 9).

A review of age-specific LFPRs revealed that the LFPR peaked in the 35 to 44 age group at 95.6 percent total participation. Among 15 to 24-year-olds, participation is low at 38.3 percent. This is likely due to a high percentage of this demographic being enrolled in full-time education. Persons 65+ LFPR drops to 39.9 percent, likely reflecting the transition into retirement (see Table 9).

Across nearly all categories, males exhibit a higher participation rate (84.9%) than females (78.8%); the size of this gender gap varies significantly by age, status, and education. By educational attainment, the high school level shows a 13.7-percentage-point gap in LFPRs between males and females (80.7% for males and 67.0% for females). By age cohort, the 65+ group has the widest gap, at 13.4 percentage points (47.1% for males and 33.7% for females). By status, permanent residents have the widest gap at 7.3 percentage points (92.7% male and 88.3% female) (see Table 9).

Table 9: Labour Force Participation Rate by Selected Characteristics, Spring 2026

Selected Charasteristics	Total	Male	Female

4.3 EMPLOYED

The term "employed" includes individuals in the labour force who worked for compensation, profit, or family benefit for at least one hour during the reference week, 19th April to 25th April 2026. Additionally, individuals who held a job but did not work during the reference week were also classified as employed, recognising their temporary absence. A total of 61,572 persons were employed in Spring 2026 (see Table 10).

Table 10: Employed Persons by Selected Characteristics, Spring 2026

Selected Characteristics	Employed Persons	
	#	% Distribution
Total	**61,572**	**100**

College / University	24,560	39.9
Other	79	0.1
DK/NS	213	0.3

Note: *Due to rounding, there may be minor variations in totals or sums.*

Sex and Age

The workforce shows a relatively balanced gender distribution, though males maintain a slight majority. Males account for 52.8 percent of the workforce, totalling 32,509 individuals. Females account for 47.2 percent of the workforce, totalling 29,062 individuals. Employment is heavily concentrated in the 25 to 54 group, which together makes up nearly 74.2 percent of the total workforce (see Table 10).

Status

The total employed population of 61,572 is split 36.5 percent Caymanians and 53.3 percent non-Caymanians. Non-Caymanians make up the largest single group, with 32,814 individuals, and Caymanians follow with 22,460. Permanent Residents WRW represent the remaining 10.2 percent of the workforce, totalling 6,298 individuals (see Table 10).

Employment Status

Most of the employed labour force (90.1%) "worked for someone". By sex, more females (93.9%) are employees than males (86.7%). A total of 5,890, or 9.5 percent of the employed labour force, are self-employed; this includes self-employed persons with no employees (see Table 11). By status, more Caymanians were business owners (20.2%) than PR WRW (11.9%) and non-Caymanians (1.9%) (see Table 12).

Table 11: Employed Persons by Employment Status and Sex, Spring 2026

Occupation

Professionals constitute the largest portion of the workforce at 21.6 percent. Service and Sales Workers (18.3%) and elementary occupations (12.8%) make up the top three occupation groups. Technicians, Managers, and Craft workers follow at 12.7, 12.0, and 11.8 per cent, respectively (See Figure 2).

Further analysis by sex revealed that females dominate the following occupations: Clerical Support Workers (69.3%), Professionals (56.3%), Service and Sales Workers (57.3%), and Elementary Occupations (55.1%). Occupations such as Craft and Related Trades Workers (94.4%), Plant and Machine Operators (88.1%), and Skilled Agricultural, Forestry, and Fishery Workers (89.3%) were heavily male-dominated. Managers (58.5% for males vs. 41.5% for females) and Technicians and Associate Professionals (46.2% for males and 53.8% for females) are relatively balanced occupations (see Appendix table 3.36)

Caymanians hold a strong majority in the following occupations: Clerical Support (58.9%), Managers (63.0%), and Technicians and Associate Professionals (53.0%). There was a higher concentration of Non-Caymanians in Elementary Occupations (76.5%), Craft and Related Trades (71.4%), and Service and Sales Workers (66.8%). Within the largest employment group, Professionals, non-Caymanians account for the majority (52.1%), followed by Caymanians (32.9%). Permanent residence WRW holds the smallest share across all occupations (see Appendix table 3.37).

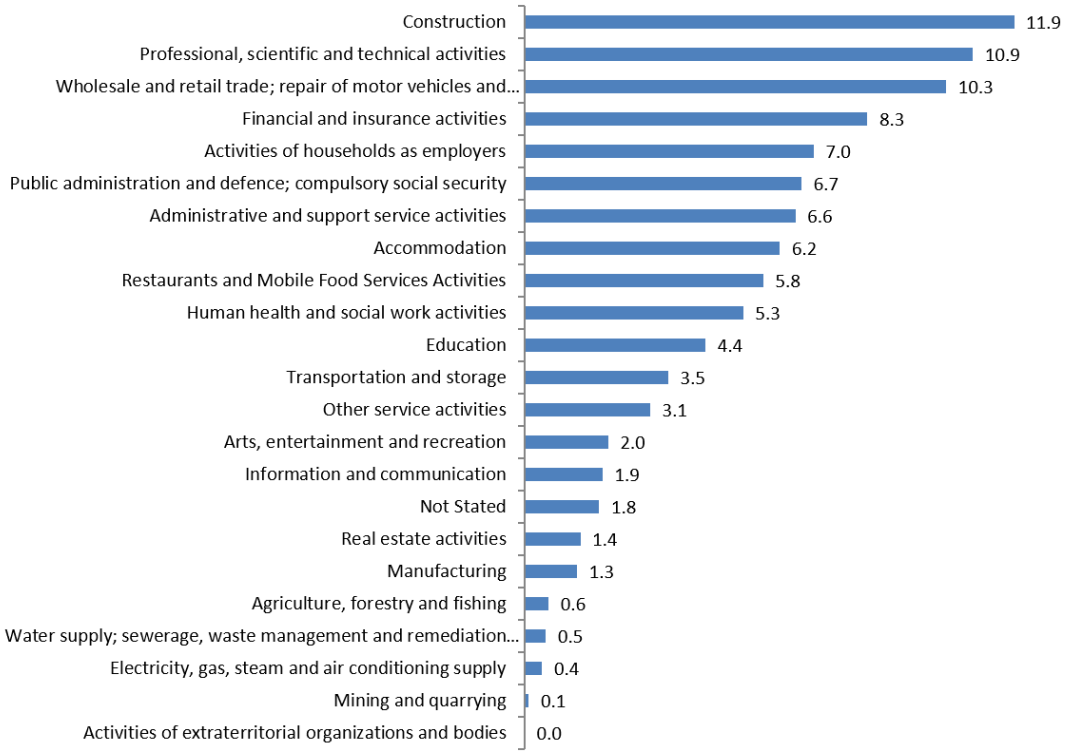

Figure 2: Employment by Occupation Percentage Distribution, Spring 2026

Industry

The top six industries accounted for 55.1 percent of the employed labour force. These industries were construction (11.9%), professional, scientific, and technical activities (10.9%), wholesale and retail trade (10.3%), financial and insurance activities (8.3%), activities of households as employers (7.0%), public administration and defence; compulsory social security (6.7%) (see Figure 3).

Figure 3: Employment by Industry Percentage Distribution, Spring 2026

Hours of Work

The number of hours worked is defined as the total hours the respondent worked at his/her job(s) during the reference period from 19th April to 25th April 2026. This includes all hours spent on work activities and overtime, but excludes vacation, sick leave, public holidays, and other paid or unpaid leave.

The average workweek across all industries is 42.4 hours. On average, males work slightly longer hours (43.3 hours) than females (41.4 hours). Mining and quarrying records the highest total average at 51.9 hours per week, whilst education has the lowest average at 39.5 hours. By status, Permanent Residence WRW, on average, have a longer work week

(43.2 hours) than Non-Caymanians (43.1 hours) and Caymanians (41.2 hours) (See Appendix Tables 3.40 and 3.41).

Earnings from Main Job

The largest segment of the workforce (30.0%) earns between $2,400 and $4,799 per month. Combined, the lowest two brackets account for 56.6 percent of all workers. Only 4.4 percent of the total workforce falls into the highest bracket of $16,800 or more per month. Females dominate the lowest-income tier ($0-$2,399) and the $4,800–$7,199 tier. In the top tier ($16,800+), males hold 50.1 percent of the positions compared to 49.9 percent for females (See Table 13).

Employment by the size of business

Most of the employed labour force worked in large businesses with 50 or more employees (34.5%) and in micro-businesses with one to five employees (24.1%). The proportion of Caymanians employed in large enterprises (50 plus employees) was 39.8 percent, whilst small businesses employ the largest proportion of non-Caymanians, 24.8 percent (See Table 15a and 15b).

Training

A total of 18,002 (29.3%) employed persons reported having received educational training. A larger share of employed females received training (33.1%) than employed males (25.9%). By status, Permanent Residence WRW (40.2%) had the highest percentage of persons who completed educational training, followed by Caymanians (33.4%) and non-Caymanians (24.4%) (See Appendix Table 3.8). Regarding occupation-related training, most employed persons (71.8%) reported having received it (see Appendix Table 3.9).

Overall, most of the workforce has not participated in any personal development training (64.6%). Among those who have received training, Certified First Aid is the most common at 18.8 percent (8,663 people). Customer service is the second most frequent training at 7.6%. Caymanians have the highest participation in almost all categories, notably in Passport to Success (81.2%) and Small Business Development Training (49.0%) (see Appendix Table 3.17).

Promotion at current job

Only 20.7% (12,715 people) of the total workforce received a promotion, whilst 78.8% (48,513 people) did not (see Appendix Table 3.18).

The most common response for not receiving a promotion was “no opportunity for promotion” (52.7%). This trend persisted among Caymanians (48.0%), Permanent Residents WRW (56.9%), and non-Caymanians (54.6%). Similarly, by sex, “no opportunity for promotion” was the most common reason among males (50.2%) and females (55.5%) (see Appendix Tables 3.23 and 3.24).

Less than one year ago was the most frequent timeframe for promotions at 22.5% (2,862 people). Non-Caymanians show the highest rate of recent promotion, with 46.5% receiving their last promotion within the past year. Conversely, amongst those persons who received a promotion more than 10 years ago, Caymanians held the majority (87.7%) (see Appendix Table 3.20). Most persons indicated receiving more responsibilities and

higher pay with their promotion (86.3%). By sex and status, this trend remains consistent (See Appendix Tables 3.21 and 3.22).

4.3.1 UNDEREMPLOYED

Underemployment occurs when workers who could (and would like to) work for a full week can only find part-time work. It can also occur when workers take on employment that does not utilise all their skills and education. As a result, two different measures of underemployment have been utilised: a time measure and a skills-and-education measure.

As of Spring 2026, the total underemployment rate among the employed population was 7.1 percent (see Table 16). This figure comprises two primary segments: time-based underemployment at 1.6 percent (individuals working sub-30-hour weeks who desire more hours) and skills-based underemployment at 5.9 percent (overqualified professionals actively seeking roles that align with their education and experience).

By status, the underemployment rate was highest for Caymanians (7.5%), followed by non-Caymanians (7.1%) and Permanent Residence WRW (6.0%). By sex, females had a higher rate of underemployment (8.9%) than males (5.4%) (see Table 16).

Further breakdown by age group revealed that underemployment was most prevalent among persons aged 45 - 54 (8.8%) and young adults aged 15 - 24 (7.7%). By educational attainment level, underemployment was highest amongst persons with primary or below education.

Table 16: Underemployment Rate by Selected Characteristics, Spring 2026

Selected Characteristics	Employed	Underemployment*			Underemployment Rate

Not Stated	213	-	-	-	-

*Underemployment combines two measures: Time (working less than 30 hrs weekly would work more hours if available & Education, experience (over quality for the current job and looking for a better matching job with skillset)

NB: The total will not sum as 107 persons are underemployed in both time and skills at the same time. However, the total is only the unique person (counted only once).

The vast majority of workers (80.6%) report that their skills are an exact match for their job requirements. Men report a slightly higher match rate at 83.0%. Overqualification affects 17.1% of the total workforce (10,506 people). Females are more likely to be overqualified (19.6%) compared to men (14.8%). Only a small fraction of the workforce (0.6%) feels underqualified for their current roles (see Appendix Tables 4.39).

Permanent Residence WRW report the highest rate of overqualification at 18.2%, followed by non-Caymanians (17.7%) and Caymanians (15.9%). A total of 5,125 (81.4%) Permanent Residence WRW report an exact match, whilst 1.0 percent of Caymanians felt underqualified in comparison to non-Caymanians (0.5%) (see Appendix Tables 4.40).

In terms of education, training, and experience, the majority of persons felt that their education, training, and experience are exactly related to their current job (66.1%). Further disaggregation by status also reveals that “exactly related” was the top response across all nationality statuses, most notably Permanent Residence WRW (71.4%) and Caymanians (64.4%) (see Appendix Table 4.44). By sex, 67.2 percent of males felt their education, training and experience were exactly related in comparison to females (64.9%) (see Appendix Table 4.43).

Among those who did not feel their education, training, and experience were exactly aligned with their current job, 13,342 individuals expressed a preference for roles more closely aligned. A breakdown by status shows that non-Caymanians were the most proactive in seeking new job opportunities (92.0%) compared with Caymanians (91.2%) and Permanent Residents with Work Rights (PR-WRW) (89.6%). From a gender perspective, males (91.5%) were slightly more likely to be seeking new opportunities than their female (91.4%) counterparts.

4.4 UNEMPLOYED

The unemployed labour force numbered 1,327, yielding an unemployment rate of 2.1 percent (see Table 17a). By age group, youth unemployment (ages 15–24) is the highest, at 11.0 percent. Regarding sex, males and females have relatively equal rates of unemployment at 2.1 percent. Additionally, Caymanians have the highest unemployment rate at 3.6 percent, accounting for 63.1 percent of all unemployed persons. In contrast, non-Caymanians have an unemployment rate of 1.1 percent. Regarding educational attainment, those with a High School education make up the largest portion of the unemployed (40.7% of the total). Conversely, those with a post-secondary degree have a low unemployment rate of 1.4 percent (see Table 17a).

Table 17a: Unemployed Persons by Selected Characteristics, Spring 2026

Note: *Due to rounding, there may be minor variations in totals or sums.*

$$** \; Unemployment \; Rate = \frac{Number \; of \; Unemployed}{Labour \; Force} \times 100$$

Age and status

An analysis of age-specific unemployment rates shows that persons aged 35 to 44 (27.3%) make up the largest share of the unemployed population, while those aged 65 and older make up only 4.2 percent of the unemployed population. Further disaggregation by status shows that Caymanians and PR WRW had the top unemployment rates of 3.6 and 2.1 percent, respectively. Meanwhile, non-Caymanians had the lowest rate, 1.1 percent (see Table 17a).

Educational attainment

Table 17b shows that Caymanians with primary and below education were most likely to be unemployed (8.9%), followed by those with high school (6.7%) and middle school (3.6%) education. Caymanians with college/ university education were least likely to be unemployed (1.5%)

Among Permanent Residents WRW, the highest unemployment rates were among those with primary and below (22.2%) and middle school education (12.4%).

Non-Caymanians with college/university education were the most likely to be unemployed (1.5%), whilst those with high school education were significantly less likely (0.5%).

Reasons for not having work

The primary obstacle for the unemployed population was a lack of job openings, with 34.8 percent citing “no work available” as their main reason for unemployment. This was more pronounced among males (59.8%) than females (40.2%). Furthermore, this trend persisted across all residency statuses, affecting 64.8 percent of unemployed Caymanians and 17.8 percent of unemployed non-Caymanians (see Appendix Tables 5.8 and 5.9).

Job search

When asked about the various methods employed to search for jobs (a multiple-response question), the most common responses among unemployed persons were “send resume” (57.2%) and “check websites” (48.5%). Among Caymanians (53.5%) and non-Caymanians (72.4%), “send resume” remained the top-ranking job search method. By sex, “Check website” was the most popular job search method among females (53.3%) compared with males (62.3%), who preferred sending resumes (see Appendix Tables 5.14 and 5.15).

Prior work and period without work

The majority (71.8%) of the unemployed reported having previous jobs; of these, 39.7 percent have been without work for more than 1 year (see Appendix Tables 5.16 and 5.18). By status, this trend remained consistent, with 42.0 percent of Caymanians being out of work for more than a year. In contrast, the majority (39.9%) of unemployed non-Caymanians have been out of work for less than a month (see Appendix Table 5.19).

Training

A total of 675 unemployed persons (50.8%) reported having been trained for a specific occupation. Further examination by status shows that occupational training was most common among non-Caymanians (73.6%). Meanwhile, fewer Permanent Residence WRW (60.6%) and Caymanians (39.6%) were trained (see Appendix Table 5.36). In terms of educational training, non-Caymanians (29.5%) and females (18.4%) had the highest percentage of persons who received training (see Appendix Table 5.35).

When asked whether they had completed any personal development training, 76.4 percent of unemployed persons reported not having completed any. Examination by sex shows that a higher percentage of females (57.8%) had not completed any personal development training than males (42.2%) (see Appendix Table 5.43). Amongst unemployed persons who completed personal development training, Certified First Aid training was the most popular training program (8.8%) (see Appendix Tables 5.43 and 5.44).

4.5 PERSONS NOT IN THE LABOUR FORCE

Those who were of working age (15 years and older) and not working, not available to work, or did not seek work during the reference week were classified as not being in the labour force. A total of 13,923 persons were not in the labour force, most of whom were Caymanians (70.2%). Females accounted for a large share (57.5%) of the persons not in the labour force. Most persons outside the labour force were aged 65 and older (36.4%), closely followed by those aged 15 to 24 (32.4%). The proportion of persons not in the labour force varied by educational attainment, ranging from 0.7 percent among individuals with "no education" to 43.4 percent among those with high school-level education (see Table 18).

Table 18: Persons not in the Labour Force by Selected Characteristics, Spring 2026

65+	100.0	5.0	-	87.7	0.3	4.9	2.1	-

Reasons for not having work

When asked the reasons for not working, the majority of persons not in the labour force stated that they were “retired/elderly” (40.5%) or “student/in training” (34.5%). These were also the leading reasons for Caymanians and Permanent Residents. Amongst non-Caymanians, student/in training (55.5%) and home/family duties (26.0%) were the most common reasons for being out of the labour force (see Table 19).

4.5.1 POTENTIAL LABOUR FORCE

Based on the ILO definition, the potential labour force consists of all working-age persons (15 years and older) who, during the reference week, were neither employed nor unemployed and were classified as either unavailable job seekers or available potential job seekers. *Unavailable job seekers* are persons who carried out activities to 'seek employment' and were not 'currently available' but would become available within a subsequent short period. *Available potential job seekers* are persons who did not carry out activities to 'seek employment' but wanted employment and were 'currently available.'

Of the 13,923 persons not in the labour force, 944 constituted the potential labour force. The majority of these persons were Caymanian (62.7%), male (51.8%), aged 25 to 34 (21.3%), and had college/university education (39.1%) (see Appendix Table 6.40).

5. OTHER FINDINGS

5.1 HOUSING CHARACTERISTICS

Most households (51.8%) occupied rented dwelling units, while 44.5 percent owned their own homes (see Table 20). The majority of households reported having cell phones (98.3%), air conditioning (96.5%), and internet connectivity (94.4%). A small percentage of households had domestic helpers (8.3%) or possessed landline telephones (10.4%). The total number of households was estimated at 34,182 based on post-survey results.[1].

Table 20: Percent of Households by Selected Characteristics, Spring 2026

Total Households	**34,182**
Owned Households	44.5
Rented Households	51.8
With Domestic Helpers	8.3
With Landlines	10.4
With Cell Phones	98.3
With Internet Connectivity	94.4
With Computer/Laptops	68.2
With Tablets/E-Readers	46.3
With Cable/Satellite	35.1
With Internet TV	62.3
With Air Condition	96.5
With Housing Structure Insurance	46.9

Ownership of Dwelling Units

This round of the LFS captured data on Households by Ownership of the Dwelling by a Household Member. Most of the dwellings (90.4%) were owned by a household member (see Appendix Table 7.5).

A look at household ownership by status (see Appendix Table 7.6) indicated that 67.9 percent of the 34,182 dwelling units were owned by Caymanians. Non-Caymanians owned 13.6 percent of these dwelling units. Combined ownership of a dwelling unit, that is, by Caymanians and non-Caymanians, accounted for 1.2 percent.

[1] The total number of households was estimated based on the estimated population by district divided by the average household size by district. This method was adopted in view of the lack of a fully-updated Household Register.

Estimated Rent and Mortgage

The total estimated mean actual rent paid by a tenant was $1,637.47, while the median was $1,300 (see Appendix Table 7.7). The West Bay district recorded the highest mean actual rent at $1,791.04. The Sister Islands had the lowest estimated average rent, at $632.00.

The total estimated mean mortgage payment was $2,438.85, while the median was $2,200.00 (see Appendix Table 7.8). West Bay recorded the highest mean, at $2,787.97. The Sisters Islands had the lowest average mortgage payment, at $1,283.33.
